## Toronto.

"Mum" is the word in this city just now, and in spite of its being still three weeks to the show the excitement is getting feverish. There are some fine blooms to be seen about at the different growers' now, and there are lots more fine ones coming on. From the present outlook the show promises to be the best on record. Already several entries have been received from "the other side."

The presence of the Earl of Aberdeen, Governor General of Canada, in the city this week has enlivened business a good deal for the time. Receptions and dinner parties have been the order of the day. The Governor having kissed the Blarney Stone at the World's Fair, has put everybody in a good humor.

Several of the boys are talking of sending some chrysanthemum blooms to the great show at Chicago. It is to be hoped that their talk may develop into actions, so that Canada may be represented at least. E.

## The World's Fair.

The World's Fair resounds with the sound of hammers and saws these days, as the exhibitors begin, like the Midway Plaisance Arabs, to silently steal away. The great tree ferns are being packed, under the superintendence of Mr. Bennett, for their trip to Schenley Park, and all the exhibitors are doing their best to diminish their surplus. Ontario is moving, taking with them a lot of fine plants but little the worse for their summer quarters, and which were certainly a model of good care and cleanliness during the entire season. Unfortunately a good many fine plants have suffered severely, and they look as if they wanted to be moved at once to a good hospital. The big building will soon look much dismantled until the chrysanthemums fill up the spaces. Many of the exhibitors are very anxious to get rid of their stuff, though good prices are the rule.

Over on the island most of the herbaceous stuff has been sold, the millionaire Pullman being a large buyer. The foreign exhibitors have sold a good deal of their stuff by private contract, though some of it is still to be sold at auction. Those who have been there for so many months are now glad to get away, and they all seem disposed to pull up stakes as quickly as possible; the fact that the weather may change to inclemency any day makes this very desirable.

Some portion of the horticultural display, including plants given to the city, will be kept at the park all winter. It is likely that there will be a good many changes among the staff in charge.

## Announcement to Florists.

We desire to announce the dissolution of the firm of Sipple Dopffel & Co., and to introduce to the trade its successor, The Syracuse Pottery Co., which will be under the management of William Dopffel and Conrad Breitschwerth. The business will be conducted as heretofore, except on a larger scale to meet the growing demand for our goods. We have accordingly enlarged our plant and capacity, and with unsurpassed facilities are now prepared to fill the largest order on short notice. Our latest improved machines are turning out the best and most serviceable flower pots in the market, and assuring you of our intention to lead in further improvements we solicit a continuance of your patronage in the belief that we can supply just what is needed at a price and in a manner satisfactory to all.

Send for price list and samples and we know you will give us an order.

## The Toronto Show.

The Toronto Gardeners' and Florists' Association has decided, at the suggestion of one of the most eminent chrysanthemum growers in America, to give certificates of merit to seedling chrysanthemums not yet in commerce that may be judged worthy of dissemination, and a piece of silver (probably a cup), value about \$25, will be given to the best one exhibited.

Owing to the late date of the show it is thought that this will give a welcome opportunity to many growers to exhibit blooms of seedlings which otherwise would not be seen by the trade and public generally before being disseminated, as most of the shows in the large cities are being held during the first week in November. A thoroughly competent expert on chrysanthemums has been secured to act as judge. It is confidently expected that the local show of plants and bloom will be exceptionally fine this year, and it is certain, owing to the exertions of an influential honorary member of the Association, to be patronized by the elite of the city and suburbs.

ELMIRA, N. Y.—Mr. Grove P. Rawson had a very attractive exhibition of chrysanthemums and other flowers at his greenhouses October 28 to November 4, which was viewed by a large number of visitors.

NEWPORT, R. I.—The dates for the coming chrysanthemum show of the Newport Horticultural Society have been changed to November 6, 7 and 8.

ESTABLISHED 1854.

# THE AMERICAN FLORIST

*America is "the Prow of the Lessel; there may be more comfort Amidships, but we are the first to touch Unknown Seas."*

Vol. IX.      World's Columbian (EXTRA EDITION, NOVEMBER 4, 1893.)      Chrysanthemum Show.      No. 283X

ART INSTITUTE, LAKE FRONT, FOOT OF ADAMS STREET, CHICAGO.

## THE AMERICAN FLORIST EXTRA EDITION.

Copyright 1893, by American Florist Company.  
Entered as Second-Class Mail Matter.

PUBLISHED EVERY THURSDAY BY

THE AMERICAN FLORIST COMPANY.  
322 Dearborn Street, Chicago.

THE unexpected and complete falling off of attendance at the World's Fair, and the rapid dismantling of all exhibits, the laying of railroad tracks and removal of lights, carried dismay to the hearts of the board of managers of the exhibition, and at a special meeting held at the Union League Club late Wednesday night it was resolved to abandon, if possible, Jackson Park and make the display at the Art Institute on the Lake Front, where the world's congresses were held; the proper authorities were seen early Thursday morning, the change agreed upon and the Art Building secured. Friends of the show are enthusiastic over the change, and a fitting floral celebration of the grandest exposition the world has ever known seems assured.

### Chrysanthemum Show.

#### CHANGE OF PROGRAM.

On account of the great change of things at the World's Fair Grounds, the removal of exhibits, and general upsetting of affairs, it has been decided to hold the Chrysanthemum Show in the Art Institute, Lake Front. It will be under the auspices of the World's Fair Commission as previously arranged.

The exhibition will be open from November 4 to 11, inclusive, commencing Saturday afternoon at 2 o'clock.

The premiums offered will be the same as the schedule already issued except the special attractions for Saturday, November 11. These premiums are classes 134 to 162 inclusive, and will be offered for FRIDAY, NOVEMBER 10, *instead of Saturday*, and must be ready for the judges by 11 a. m. of that day.

#### PARTIAL LIST OF EXHIBITORS:

The list of entries at time of writing (Thursday) is necessarily incomplete. A partial list, however, gives some hint as to the possibilities of the show. In the cut flower sections there are numerous entries, including several in different

classes from Nathan Smith & Son, Adrian, Mich.; E. G. Hill & Co., Richmond, Ind.; J. A. Peterson, Cincinnati; Aug. S. Swanson, St. Paul, Minn.; W. N. Rudd, Mt. Greenwood, Ill.; C. A. Samelson, Chicago; John Curwen, Jr., Villa Nova, Pa.; Geo. W. Miller, Hinsdale, Ill.; O. P. Bassett, Hinsdale, Ill.; J. W. Fox, South Hamilton, Ont.; Otto Hanson, Mont Clare, Ill., and others.

In the plant classes Nathan Smith & Sons, E. G. Hill, O. P. Bassett, H. W. Rieman, Indianapolis, E. Nagel, Minneapolis. Theo. Bock, Hamilton, Ohio, Wm. Scott, Buffalo, J. C. Vaughan, Chicago, and others have promised exhibits.

Seedlings will be watched with a great deal of interest; we are promised some wonderful advances. Among those who have made entries are Nathan Smith & Son, Aug. S. Swanson, H. W. Rieman, the Art Floral Co., and Fred S. Walz. Judging from previous shows, and also from the efforts made by the specialists in the line of improvement in form and size, we shall see something remarkable in this line.

The table decorations always prove one of the sterling attractions, and we are

pleased to see an encouraging number of entries, and these from firms whose abilities will make the competition very close. In this class we find the Art Floral Co., Chicago, Aug. S. Swanson, St. Paul, C. A. Samuelson, Chicago, O. J. Friedman, Chicago, and J. H. Small & Sons of Washington, D. C. It is understood that Mr. Small is coming here in person to arrange the decoration.

Individual exhibits, not for competition, are promised by the Art Floral Co. E. G. Uiblein and E. Wienhoeber, all of Chicago. At the present time only one amateur had entered, F. M. Baker, Adrian, Mich., though it is expected that the Columbian medals will prove an attraction to the amateur exhibitors.

#### Items at the Show.

TEN car loads of plants are already heard from.

THE IOWA BAND, 35 pieces, has been engaged for this occasion.

PROSPECTS are good for a fine show of largest specimen plants and standards.

THE Columbian medals will be awarded at the new location exactly as originally arranged.

N. SMITH & SON arrived early Friday morning with nearly one thousand specimen blooms.

TRADE VISITORS should always leave their cards with the secretary when entering the hall.

MR. H. A. SIEBRECHT, of New York, reports a good deal of enthusiasm east of Chicago in regard to the World's Fair Chrysanthemum Show.

THE opening of the World's Fair show is too early for many finest blooms. Good additional blooms will come in by Wednesday and Thursday of next week.

SCARCITY of plants and some lack of harmony at New York is reported to affect the prospects of their show. Premiums are, however, large and show should be a good one.

#### Special Edition Notes.

Poor soil produces earliest flowers.

An incident of the removal of some of the large plants from the Fair was an attachment for terminal station charges of somewhat ancient date. The requisite sum was shortly provided to "lubricate the wheels of evolution."

A western grower reports his trials of this year on the novelties of last season partially as follows:

Golden Wedding, poorly.  
Craig-Lippencott, good.  
The Queen, good.  
Congo, style Mrs. Craig, good.  
Mabel Simpkins, fair.  
W. G. Newitt, good.

May's set, strong growth, but late with us. Creole is one of the darkest, if not the darkest, in commerce.

An Eastern grower says: Mrs. Craig Lippencott, extra good. Harry Balsley, No. 1. Mrs. Sue Price, a good thing. Tuxedo, a good orange. Nivens, very fine. Ermenilda, a beauty.

THIS Special Edition of the FLORIST should reach many of our readers before Sunday and we trust will excite sufficient interest to bring every reader to Chicago the coming week. Director Craig promises a genuine World's Fair Chrysanthemum

Show, while the locality, the entry book and the enthusiasm of those engaged indicates an occasion worthy of the closing of the grand Columbian Exposition.

CHAS. E. MEEHAN and bride are visiting the World's Fair.

THE resignation of Chief John Thorpe of the Bureau of Floriculture at the Columbian Exposition and its acceptance was the surprise of last week. Chief of Horticulture J. M. Samuels now takes full charge of both departments; Mr. H. H. Hindshaw has temporary charge of the Department of Floriculture, and all plant and other exhibits are being rapidly removed from the entire building. The relation of Uncle John to floriculture, horticulture and the World's Fair generally this long, hot and busy summer is "another story" too long for this special issue.

IVORY.

Chicago.

A banquet will be given at the rooms of the Chicago Cut Flower Exchange by the Florist Club, on Thursday evening, November 9. A large number of visitors from outside cities are expected to be present and a very enjoyable time is anticipated.

Mr. G. L. Grant is making a flying trip to New York, Boston and other eastern cities.

At the annual meeting of the stockholders of the Chicago Cut Flower Exchange, October 27, the following board of directors was elected for three years: W. N. Rudd, J. B. Deamud, J. F. Kidwell, Geo. Klehm, Samuel J. Pearce; for two years, E. Wienhoeber, J. T. Anthony, Chas. Naslund; for one year, P. J. Hauswirth, A. Harrer, Geo. Harrer. A director's meeting will be held Friday, November 3, for the election of officers and the transaction of other business. All the tables in the Cut Flowers Exchange are rented and the corporation is now in a prosperous condition.

Mr. A. G. Prince has been sick with typhoid fever for the past week and does not seem to improve any.

The market seems to be overloaded with chrysanthemums at present. Roses are also very plentiful. Beauties scarce.

J. B. D.

AMERICAN GARDENING reaches us now as semi-monthly in another new cover and form. We do not discover the name of the new editor.

SIoux CITY, IOWA, is making a strong effort for a good chrysanthemum show.

Scale of Points for Flower Show Judges.

ED. AM. FLORIST:—Will you please give me some information as to *points* in judging chrysanthemums, both cut bloom and plants? We are to hold our show next week, so would kindly ask you to let me know at once.

C. P. M.

Kansas.

This is one of the questions that comes before us periodically, and there is no doubt that some absolute and generally accepted rules would be welcomed by many harassed judges. Some months since we endeavored, with the aid of Mr. F. Schuyler Mathews, to formulate some rules for judgment of floral designs. Mr. Mathew's article on this subject was published in our issue of June 1, but it may not be out of place to give here a brief resume of the ideas advanced. Taking 100 as perfection, Mr. Mathews thinks the relative values in a design may be placed as follows:

1. Adaptability to purpose.....35%
2. Color harmony.....25%
3. Composition.....25%
4. Excellence of material.....15%

100

In this case naturally excellence of material ranks less than good taste and harmony. In judging plants and flowers, however, we must choose another standpoint, and for this purpose we requested an opinion from some of our well known specialists, who are often called upon to act as judges, and who naturally go about this work with a settled plan.

For cut flowers and plants the following scale was suggested by a well posted Philadelphia grower:

- Size.....25%
- Form.....25%
- Color.....20%
- General effect.....20%
- Foliage.....10%

100

This, it will be seen, covers all the general points of a new flower, and gives a good idea of the estimation of different qualities. It will be noted that size and form present equal values, color and effect five points less, while foliage is least of all. But in judging of general effect, naturally habit, constitution, etc., would come into consideration, while in size and form judgment would, to a certain extent, be decided by comparison, especially in the case of new varieties; where it is simply a case of decision among existing varieties, the judge's duty is a simpler matter. There may be some differences of opinion as to relative values, but we believe that the scale of points here given will be generally accepted, and our correspondent may find them of service in his case. With some such guide, it is comparatively easy for two or three judges to arrive at a fair general average, and there is more possibility of giving entire satisfaction with their awards.

DO YOU WANT an alphabetical list of the chrysanthemums in commerce in America, with class and a brief accurate description of each one, and synonyms noted? You will find such a list in our trade directory and reference book.

PLEASE WRITE on your printed letter head when addressing our advertisers. If you have no printed letter head, then enclose your business card or bill head.

THE AMERICAN FLORIST and Gardening together to one address for \$1.75. Send orders to the American Florist Co.

DIRECTOR ROBERT CRAIG.

## Out at the Fair.

At time of writing the Fair is in a most den.oralized condition. It seems as if, once the strain of the summer removed, everything goes to pieces. The scene in the Horticultural Building suggests Cinderella after the clock struck twelve. The great mound is dissolving as by magic; yawning gaps here and there show a grewsome skeleton of boards, and the few remaining plants hang their heads in dejection. The concessionaire's stands are so many sheeted ghosts, and the florist's place knows him no more; it is a confusion of dead plants, Mexican grass seeds, Columbian cacti and empty pots. The young woman with souvenir spoons and the young man who sold pure Californian orange cider made from vinegar and molasses are departed, and their place is taken by teamsters, trucks and blue coated guards, who tell would-be visitors that the building is closed. No need of that—one look and the curiosity seeker flees.

The last of the New York and Pennsylvania exhibits were being removed. The cream of these exhibits go to Schenley Park to keep company with the great ferns from New South Wales. James Dean, J. I. Donlan, A. W. Bennett and others were busy with these plants; the

huge specimen *Todea barbara*, which Mr. Geo. Nicholson considered the finest specimen ever seen in cultivation was being rapidly wrapped, and the big bird's-nest ferns were swathed in wrappings ready for the cars. Removing the tree ferns was a terrific piece of work. To begin with, the artificial mounds in which they were planted was removed; the plants had been left in the tubs in which they were originally planted. The transfer to the cars was managed as quickly as possible, as the weather was turning much colder. The collection of cacti shown by Mrs. Anna B. Nickels, which received high awards, is purchased by Schenley Park and is being shipped. By the end of the week there will be very little in the way of horticultural exhibits remaining at Jackson Park.

THE show will open at 2 p. m. Saturday. Strenuous efforts are being made to have everything in order by that time. In any case it will be in condition for sightseers.

THE Iowa State Band, which was listened to with much enthusiasm at the Fair during the summer, is engaged for the entire term of the show. On Sunday there will be a concert of sacred and classical music from one to five in the afternoon.

## Concerning Funeral Designs.

In the last regular issue of the *FLORIST* mention was made of the elaborate and costly display of floral tributes in honor of Mr. Harrison, deceased mayor of Chicago. It is remarkable that in this age of endeavor for true artistic art in floral effects that there could be noted so comparatively few designs of real artistic merit. That the display as a whole made a most imposing effect can not be denied, and the material used for the most part was undoubtedly superior to much of the stuff used in this class of work; in fact the florist in most cases was not tied down to any price whatever, his instructions were to produce something superior to anything ever seen on a like occasion, regardless of expense, and yet in most instances the same old beaten path was followed. Broken columns, eight of them by actual count, gates ajar, shields and all the stereotyped designs of bygone ages. What a relief to turn our attention to a simple laurel wreath resting on the casket, or a graceful arrangement of dainty lily of the valley in yonder group. But few, very few, of these tasteful and simple pieces do we notice. It is but justice to the Chicago florists to note that most of the work turned out by them, if we do take exceptions to the designs, were made up as well as things of this kind can well be done. The whole display, sixty-three pieces in all, was afterwards arranged in a group and photographed, after which the general public was admitted to view them. B.

## Chrysanthemum Shows.

- Chicago, Nov. 4-11—World's Fair Chrysanthemum Show. W. C. Egan, Sec'y, Horticultural Building, World's Fair.
- Newport, R. I., Nov. 6-8—Newport Horticultural Society. John J. Butler, Sec'y, P. O. box 313.

- Providence, R. I., Nov. 8-10—Rhode Island Hort. Society. C. W. Smith, Sec'y, 61 Westminster St.
- New Haven, Conn., Nov. 8-10—New Haven Chrysanthemum Club.
- Wooster, O., Nov. 8-10—Wooster Floral Club.
- Louisville, Ky., Nov. 9-11—Louisville Florists' Club. H. Nanz, Sec'y, 582 Fourth Ave.
- Springfield, Mass., Nov. 11-16—Hamden County Hort. Society. Joseph Booth, Sec'y, care of Springfield Institution for Savings.
- Washington, Nov. 14-17—Florists' Club of Washington. G. W. Oliver, Sec'y, 1844 8th St. N. W.
- Denver, Colo., Nov. 15-18—Denver Florist Club.
- Lyle C. Waterbury, Sec'y, University Park, Col.
- Toronto, Ont., Nov. 21-24—Toronto Gardeners' and Florists' Association. A. H. Ewing, Sec'y, 85 Carlton St.

## Friends of the Mums.

We embellish this issue with the portraits of many members of the florist's trade largely interested in growing and selling the Queen of Autumn. We shall see many of these familiar faces at this show, both buyers and sellers, and many a variety owing its origin to their efforts. We think the publication of these portraits in our chrysanthemum show extra will be appreciated; they are identified with this popular flower, and are constantly in line with its progress.

E. H. Michel.  
H. W. Buckbee.  
Fred. Dörner.

J. A. Pettigrew.  
Wm. K. Harris.  
John Thorpe.

COLE BROS., Peoria, will hold a chrysanthemum show under auspices of the Peoria charitable institutions Nov. 9-11.

WITH exhibitors from New Orleans to Canada and from Boston to Denver, we certainly have a sufficiently wide geographical range.

It is estimated that the quantity of stuff coming from outside points to this show amounts to three train loads. The plants are coming in by carloads, and the quantity of cut flowers is in proportion.

THE handsome and imposing steps, portico and entrance hall of the Art Institute will be decorated with bay trees and chrysanthemum plants. President J. T. Anthony and Mr. J. C. Vaughan will assume the chief part of this decoration.

THE whole of the ground floor on the north side of the Art Institute will be occupied by the exhibits. The plants will be mainly disposed in the halls, while all along one side of the corridors will be the tables for cut flowers, the other side being occupied by seats.

## OUR CONDENSED CHRYSANTHEMUM LIST.

Especially Arranged for Flower Show Notes.

The following list contains most of the popular market sorts of chrysanthemums, varieties which we look for as familiar friends at the various shows. A blank space will be found at the right of the names, for the purpose of comment or reference at the show, while space will be found for the insertion, in alphabetical order, of new varieties noted. This list will form a handy reference guide, and it is more than likely that there will be many meritorious additions to be made at this show.

## NEW CARNATIONS.

**Fred. Dorner's Seedlings for 1894.**

### THE STUART, Brilliant Scarlet.

An exceptionally bright color in a Carnation. This is not a red, but is like that rich, glowing shade of scarlet so often found among Geraniums. Growth very vigorous and strong. Foliage large and deep green. Flower stems very long and strong, carrying the large, finely formed flowers with scarcely any support. Calyx never bursting. Very free; blooming from November to July. Propagation very easy; cuttings rooting in two weeks, besides other varieties which need four to five weeks time.

### UNCLE JOHN, Pure White.

An excellent White variety from Silver Spray and Hinze's White in the third generation. It has the grassy appearance of Hinze's White, but with larger blades. Growth very strong and luxuriant. Flower stems long, wiry and very strong. Calyx never bursting. Flowers large, finely formed, delicately fringed, and of the purest white. Its free blooming cannot be surpassed, being far superior to the older varieties from which it originated.

The sale of the flowers from Mr. Dorner's NEW CARNATIONS the past season, at an average of double the price of ordinary varieties, has amply proved that they are undoubtedly the most profitable varieties to grow commercially, as they produce an abundance of the largest and longest stemmed flowers which find a ready sale at all times at paying prices. Mr. Dorner's New Carnations have always been grown free from Rust and other Carnation diseases.

**UNCLE JOHN and THE STUART will be distributed on April First, 1894, at the following Prices:**

## Our Illustrations.

In this issue we present twelve handsome engravings from photographs taken at the World's Fair Chrysanthemum Show, still in progress at Chicago. The titles are self explanatory and no further descriptions seem necessary.

These engravings have special merit as conveyors of correct ideas on account of the fact that in the pictures of vases of flowers the comparative size has been accurately preserved, and the flowers of each variety shown can be correctly compared one with the other. Each vase was placed at exactly the same distance from the camera and as a result the reduction

was identically the same in each case. We believe this adds a very great deal to the value of the pictures. Again below each picture we have given a scale by which the actual life size of each flower may be readily determined.

We submit these illustrations as a record breaker for speed in the preparation of fine half tone plates from photographs. The photographs from which the plates are made were taken Monday, the 6th inst., and the printed page with these beautiful, accurate reproductions of the subjects by the photographic half tone process are now before you. This is remarkable speed for such high class work.

## THE EXHIBITIONS.

### The World's Fair Show.

The last of the World's Fair Congresses opened at the Art Institute on Saturday last; it was a congress of chrysanthemums, and incidentally a congress of beauty too. The delegates commenced to arrive on Friday in select little parties, each travelling in its own private box. They were for the most part attired in tissue paper ulsters of uniform cut, but a wonderful diversity was to be noted when their outside attire was removed. Smooth, sleek and regular blooms and wildly dishevelled ones that suggested Paderewski, everything, in short, except the saucy little pompons of our younger days, which were conspicuous by their absence. The stately entrance hall was richly adorned with plants; in the center a large circular group stood on the mosaic floor, while others were massed around the handsome stairway and the statuary which adorns the hall.

The Art Institute, in which this show is held, is familiar as the meeting place of the World's Fair congresses. Its interior is classically simple, but adorned by plaster casts of famous statuary, and some very beautiful works in the original marble. This stately simplicity lends itself well to adornment by flowers, and the halls are light, well warmed, and well ventilated. The acoustic properties are excellent, giving additional value to the excellent music furnished. On the opening day the halls were constantly crowded, although the exhibits were not all arranged; in fact the influx of fresh arrivals on Sunday morning necessitated the use of an additional hall on the south side of the building. The sudden change from the now dismantled Horticultural Building was an act of wisdom in view of the circumstances that caused the change in the program of the World's Fair officials.

As was anticipated, the best part of the show is centered in the cut flowers. There are some good plants grown to single stem, but in the other classes they are but indifferent. A group of Marie Louise, a new white seedling, a showy reflexed flower, was very good, and Ivory was fine as it always is. But the vases of cut blooms! They were superb!

Decidedly the most taking feature of the show was the huge vases of fifty blooms each. These were certainly grand and attracted instant attention.

For vase of fifty blooms, white, J. C. Vaughan, Chicago, received first, \$50, for a superb vase of the new white chrysanthemum *The Queen*. J. A. Peterson, Cincinnati, also showed a vase of the same variety but while his flowers were grand they lacked the depth and were not so well finished as the first noted. He received third, \$25.

For vase of fifty blooms yellow, Vaughan was again first with a vase of splendid blooms of Mrs. J. G. Whilldin. Nathan Smith & Son won second, \$35, with a

Scale  
1 foot.

GEO. W. CHILDS. WINNING VASE OF 50 BLOOMS, CRIMSON. AT CHICAGO SHOWN BY NATHAN SMITH & SON

vase of mixed sorts including Mrs. Libbie Allen and Miles A. Wheeler. H. W. Buckbee, Rockford, Ill., took third with a vase of W. H. Lincoln.

In the class for vase of fifty blooms, pink, E. G. Hill & Co., Richmond, Ind., were first with a vase of grand blooms of *Vivian-Morel*, *Mermaid* and *Waban*, second went to John Curwen Jr., Villa Nova, Pa. Third was taken by W. N. Rudd, Mt. Greenwood, Ill., with a vase of his namesake.

Both vases of fifty blooms, crimson, were of the variety *Geo. W. Childs*. First went to Nathan Smith & Son, Adrian, Mich., and second to Geo. W. Miller, Hinsdale, Illinois.

The entries in the class for fifty blooms, bronze, were not up to the high class of the entries in the other colors and the judges withheld first and second, awarding third to Ernst Asmus, West Hoboken, N. J., for a vase of *Hicks Arnold*.

For vase of fifty blooms any other color E. G. Hill & Co. took first with a vase of mixed flowers of large size but rather indeterminate color. Ernst Asmus received second for a vase of *Ed. Hatch*.

For best forty-eight varieties, one flower of each, E. G. Hill & Co. were easily first (\$50) with a superb collection of blooms including *H. E. Widener*, *Excellent*, *Niveus*, *Eugene Dailledouze*, *Golden Gate*, *Joey Hill*, *Minnie Wanamaker*, *Mrs. H. N. Higinbotham* (new, described elsewhere in this issue), *Mrs. Whitney*, *Marguerite Jeffords*, *Maria Simpson* and other standard sorts. Second (\$40) went to W. N. Rudd and third (\$25) to Wm. Scott, Buffalo.

For best 25 varieties, one flower of each, first (\$20) was taken by Hill, with a fine

lot, including *Abraham Lincoln*, *Emma Hitzeroth*, *White Crown*, *Beauty of Richmond*, *Roslyn*, *Mrs. P. Smith*, *H. E. Widener*, *Wedding Ring*, *Enfant des deux Mondes*, *Louise D. Black*, *Mrs. Ley*, *Elegant*, etc. Second (\$15) was taken by O. J. Friedman, Chicago, with a fine collection, and third (\$10) went to Corbrey & McKellar, Chicago, for a most creditable display.

In the class for 12 varieties, one flower of each, Hill was again first, his collection including *Vivian-Morel*, *Niveus*, *The Queen*, *Mrs. Higinbotham*, *Mrs. Craig Lippencott*, *Mrs. P. W. Smith* and *Lagoon*. Second went to Nathan Smith & Son, and third to G. W. Currey & Co., Nashville, Tenn.

For 24 Japanese, one flower of each, Hill was again to the front, his collection including *Enfant des deux Mondes*, *Mrs. Higinbotham*, *Dr. Callandreau*, *Sun Glow*, *Chas. Davis*, *Beau Ideal* and others. Second went to Ernst Asmus.

For 12 Japanese, one flower of each, first was not awarded, second going to Hill, and third to C. R. Gallup, Denver.

For 12 Chinese incurved Nathan Smith & Son were first, the varieties including *Mabel Ward*, *Mrs. Robert Craig*, *Mrs. Dudley C. Hall*, *Congo*, *Martha Duryea*, *Mrs. Louis Childs*, *Madeira*, *Hero of Stoke-Newington*, *Baron Hirsch* and *Jeanne d'Arc*. Second and third were not awarded.

For six Chinese incurved Nathan Smith & Son were again first, the varieties being included in the list named above.

For twelve anemones, distinct varieties, *Pitcher & Manda*, *Short Hills*, N. J., were first with a dozen sorts, nearly all named after birds, which is rather a relief after

Scale  
1 foot.

WINNING VASE OF 50 BLOOMS, PINK, (BEAU IDEAL, MERMAID AND MRS. HIGINBOTHAM), AT CHICAGO. SHOWN BY E. G. HILL & CO.

the interminable list of personal titles that have carried so many chrysanthemums to early graves. The varieties were Skylark (aptly nicknamed "The Ferris Wheel" by an irreverent spectator), Titmouse, Yellow Hammer, Owl, Garza, American Eagle, Condor, Partridge, Hawk, Swan, Toucan, Tanager. Second went to Nathan Smith & Son, their lot including Thorpe, Jr., Mme. R. Owen, Mrs. Judge Benedict, Ada Strickland, M. Chas. Lehocq and others.

For six anemones, distinct varieties, Nathan Smith & Son were first and Pitcher & Manda second.

For best twelve vases, six flowers of one variety in each, on long stems, first (\$50) went to T. H. Spaulding, Orange, N. J., for a lot of flowers of new sorts, including Miss Grace Harris, in the way of Mrs. Rob't Craig, but of rather better size; Silver Cloud, a very light shade of silvery pink; Miss Helen, Bloodgood, a very high built rosy pink flower; Mrs. Frank Hatfield, a pale pink ball shaped flower; Judge A. Brown, a promising yellow; Great Republic, an incurved flower of indeterminate shade; Miss G. H. Bates, incurved yellow; Geraldine McCann, a high built round white flower. Second (\$40) went to Hill, and third (\$30) to O. J. Friedmann.

For best six vases, twelve flowers in each, on long stems, Hill took first (\$50) his varieties including Vivian-Morel, Lagoon, Niveus, Chas. Davis, Mermaid, Robt. McInnes. Second (\$40) went to Friedman, his sorts including Marguerite Jeffords, Vivian-Morel, W. H. Lincoln, Bertha Flight, Widener and Wanamaker. Third (\$30) was taken by Nathan Smith & Son, whose sorts included Mrs. Craig Lippencott, Mrs. Gov. Fifer, H. Cannell, Miss Helyett, Geo. W. Childs, Niveus.

For one vase of twelve long stemmed whites J. C. Vaughan took first with a vase of The Queen. Second went to Hill for a vase of L'Enfant des deux Mondes, and third to Ernst Asmus, who also showed The Queen.

Hill was first for vase of twelve yellow with Mrs. Craig Lippencott; Vaughan second with a vase of the same variety; W. N. Rudd third with a vase of W. H. Lincoln.

W. N. Rudd came in first for vase of twelve pink with a superb dozen of Harry Balsley. Hill was second with a vase of Vivian-Morel, and Smith & Son third with the same variety.

G. W. Currey & Co. carried off first for twelve crimson with Geo. W. Childs, Smith & Son second with Cullingfordii.

Hill took first for vase of twelve any other color with a dozen Robert McInnes. Second and third were not awarded.

For twelve varieties of American origin, one flower of each, Hill was first, the varieties much the same as had appeared in his collections already mentioned. Second went to Fred Dörner & Son, Lafayette, Ind.

Hill had it all to himself in the classes for twelve of European origin and twelve of Japanese origin, and took first in both classes with worthy collections. Second and third were not awarded.

The hairy white sort L'Enfant des deux Mondes (which will probably be at once translated into "Child of two Worlds" for the benefit of English tongues and thus cause more confusion) was shown in excellent form and bids fair to be useful as a commercial sort. It is a sport from Louis Boehmer, originating with M. Crozy.

Another hairy flower, a seedling of E. G. Hill's, is Mrs. H. N. Higinbotham; it is a large and robust flower, very hairy, of a clear bright pink, quite free from the livid tint of Louis Boehmer.

The cut flowers were, in the main, very well arranged in handsome Japanese vases, as they should be. The corridors are lined with tables on both sides, with

an overflow into the halls. A very handsome arrangement, not for competition, was arranged by M. F. Gallagher, Chicago; it was a canopied table, draped in pale green. Within this delicate shade were large vases of chrysanthemums, in the center a handsome vase filled with The Queen, one of the showiest of incurving loose petalled whites. The whole effect of this table was charming, and it is a pity that there were not more exhibits arranged in this way.

#### MISCELLANEOUS CUT FLOWERS.

On the first day in the rose premiums O. P. Bassett led, having first for American Beauty, Catherine Mermet, La France, Meteor, Perle des Jardins and Albany. W. W. Coles, Kokomo, Ind., received first for Kaiserin Augusta Victoria and Mme. Caroline Testout. The Oakwood Rose Garden, Oil City, Pa., took first with Bridesmaid; G. W. Currey, Nashville, Tenn., first for Mme. Cusin; M. A. Hunt, Sunset; W. A. Kennedy, Lake Forest, Ill., Papa Gontier. The roses were, on the whole, very good; Mme. Testout and Meteor were, perhaps, the best of any varieties shown.

In carnations Fred Dorner & Son, Lafayette, Ind., took the lead. The best fifty white was Uncle John, which really deserves all the praise given it; best fifty pink was secured by Wm. Scott, with Mme. Diaz Albertini second. R. Witterstaetter, Sedamsville, Ohio, took first for fifty yellow. The Stuart was shown by Mr. Dorner, but not for competition; it is a beautiful clear scarlet, and very good form. Violets, both white and blue, shown by O. J. Friedman, Chicago, received first prize; first for lily of the valley went to Corbrey & McKellar, while first for mignonette went to Dailedouze Bros., Flatbush, N. Y.

#### CHRYSANTHEMUM PLANTS.

The display of plants was fair, but not very extensive compared with the superb exhibition of cut blooms. The principal exhibitors of plants were Messrs. O. P. Bassett, Hinsdale, Ill., who had entries in most of the classes, and a part of whose collection is seen in one of our illustrations with his group of single stem Ivories in the foreground; J. C. Vaughan, Chicago, who had the only standards and who had good collections in the single stem and several other classes; E. G. Hill & Co., Richmond, Ind., who had very fine groups of single stems, one of pink, one of white and one of crimson; M. F. Gallagher, Chicago, who made a good general display; H. A. Rieman, Indianapolis, who had a nice general collection; H. W. Buckbee, Rockford, Ill., also a general display; and R. Witterstaetter, Sedamsville, Cincinnati, who displayed a fine group of single stem plants of the white Marie Louise, which is illustrated in this issue. The premiums were distributed among these exhibitors.

#### THE SEEDLINGS.

These were the star attractions on Tuesday, and indeed of the exhibition as a whole.

The entries were surprisingly numerous in the class for "best seedling on exhibition not yet disseminated, any color, 12 blooms," and for which a prize of \$100 was offered. This juicy peach was taken by E. G. Hill & Co., with a huge globular yellow named Challenge. It is apparently a late variety, as the center was not yet fully opened. It is a very high built flower and comes very near to Mr. Wood's ideal. An engraving of it will appear in next issue.

Other important entries in this class

WINNING VASE OF 50 BLOOMS, ANY OTHER COLOR. (ROBT. MCINNES AND A SEEDLING). AT CHICAGO. SHOWN BY HILL & CO.

were by Fred Dorner & Son, Lafayette, Ind., who showed a new yellow named Major Bonaffon, a superb flower which was given a special medal, and which we shall illustrate next week. The name, however, will undoubtedly be at once abbreviated to the "Major." It is high time to get away from the long, hard-to-spell names that are recklessly loaded on to varieties. We are rejoiced to learn that one prominent originator of new varieties has a list of monosyllabic titles from which he will make selection of names for future introductions.

A remarkable white variety named Mrs. J. Geo. IIs (What a name!) was shown by John Sievers, San Francisco. It was about five inches in diameter and the same in depth. After the long shipment from California the lower petals looked rather tired, but not one had fallen and even at this date the flowers are solid as a ball. Such substance, such depth and such shipping qualities are bound to make this an important addition to our list of varieties. We shall publish next week a life size illustration of one of the flowers.

Pitcher & Manda, Short Hills, N. J., entered a large flat flower, white, with yellowish center, named after themselves. John N. May showed Wm. Simpson, a good pink variety. Other entries were

by R. Witterstaetter, Sedamsville, O.; Jas. Morton, Clarksville, Tenn; Alex McLellan, Newport, R. I.; Vick & Hill, Rochester, N. Y.; T. H. Spaulding, Orange, N. J.; H. W. Rieman, Indianapolis; and all were worthy of mention that we have not space to give them now.

For best vase of white blooms R. Witterstaetter won with a vase of the new white sort, Marie Louise.

The winning vase of yellow was filled with Eugene Dailedouze and was shown by Hill & Co. It is a cross between Abbie Mendenhall and Kioto.

For best vase of pink the award went to Fred Walz, Sta. A., Cincinnati, for a vase of Edwin Walz, a fine incurved sort.

T. H. Spaulding got the prize for best vase of crimson with Brigand, in the way of Geo. W. Childs.

J. C. Vaughan, Chicago, won on best vase of bronze with a handsome incurved red bronze sort not yet named.

For vase of any other color Hill & Co. won with Inter Ocean, a large reflexed flower, creamy white, suffused with pink. It is from Vivian-Morel crossed with L. Canning and has the form of the seed parent. We shall publish an engraving of it next week.

J. C. Vaughan was first for 100 blooms, white, in vase, with a grand vase of The Queen that was a great feature of the dis-

L'ENFANT DES DEUX MONDES, IN HILL'S WINNING SIX VASES AT CHICAGO.

play; and E. W. Weimar, Mt. Vernon, N. Y., won on vase of 100 yellow.

#### FLORAL ARRANGEMENTS, ETC.

Among the other premiums awarded on Tuesday that for best vase, any color, with autumn foliage, was won by the Art Floral Co., Chicago, with a jardiniere in the form of an old stump, filled with bronze, yellow and crimson chrysanthemums and autumn leaves. The same exhibitor showed a very handsome silver basket filled with The Queen and heavy ferns. O. J. Friedman took the prize for the best basket of chrysanthemums with a large canoe filled with pink and white flowers, for the best display of lily of the valley, the best display of cut orchids—some nice cattleyas and odontoglossums—and the best vase of American Beauty. In addition to these, Friedman displayed two "shower bouquets," the special feature of these being a graduated shower of small flowers, caught in little loops of baby ribbon, pendent from the bouquet itself. One bunch was of small white chrysanthemums, maidenhair ferns and lily of the valley, a shower of valley being caught in loops of white ribbon; the other, composed of cattleyas and maidenhair, had a shower of violets caught in violet ribbon. Bouquets of this style had quite a vogue in England at the queen's drawing rooms, being carried by the ladies who were presented at court. Mr. Friedman's display deserves a great deal of commendation. Several other designs, in varying degrees of merit, were noted. A large picture and frame in flowers and a large Venus' chariot of roses, drawn through a wilderness of small plants by a squad of doves harnessed with pink ribbon, were the work of Albert Fuchs and Mrs. Fuchs, and received honorable mention.

On the third day Mr. Gallagher made a complete change in the arrangement of his display, changing the drapery to a dark red relieved by festoons of pale yellow, and adding a canopy. The effect was most excellent and we had a photograph taken, a plate from which will appear in our next issue.

On the same day an additional attraction of great merit was a grand display of mixed cut flowers and decorative plants arranged for effect by Messrs. E. Weinhoeber & Co., Chicago. A photograph was taken of this also and we expect to have a plate for next week's issue.

For 12 blooms of seedling rose of European origin W. W. Coles won with Kaiserin Augusta Victoria, the Oakwood Rose Gardens, Oil City, Pa., coming in first on 50 roses of mixed varieties in a vase, the roses being first class and the arrangement being specially meritorious; O. J. Friedman, Chicago, won on vase of 50 American Beauties; and W. A. Kennedy, Lake Forest, Ill., on general display of roses with an excellent collection of fine flowers.

The estate of N. Singler, Washington Heights, Ill., won on new seedling carnations with an unnamed flower of the Daybreak type, a very beautiful bloom that will evidently have great commercial value. Peter Herb, Mt. Healthy, O., showed blooms of his rosy pink sort Adelaide H. Kresken, and a beautiful thing it is. Other entries were by John McGowan, Orange, N. J., and M. A. Hunt, Terre Haute, Ind.

Pitcher & Manda won on collection of cypripediums, displaying about 30 varieties which were much admired.

A handsome display, not for competition, was staged by Mr. Grove P. Raw-

son, Elmira, N. Y. In addition to the chrysanthemums, which comprised a number of vases filled with high-class specimen blooms, there was a good exhibit of roses, vases of unusually good La France, Mermet, Bride, Perle des Jardins and Albany. The flowers were well arranged and well grown, making an extremely creditable showing.

E. G. Uiblein, a Chicago amateur made a beautiful display of stove and flowering plants and orchids, arranged for effect and not for competition but the judges awarded it a special medal. M. F. Gallagher was also awarded a special medal for his display mentioned elsewhere; and James Dean, New York, received a medal for a superb display of tuberous begonia flowers.

#### NOTES.

The judging has been above criticism and has been an admirable feature of the exhibition. Every point was considered and given due weight. The judges were Messrs. E. A. Wood, West Newton, Mass., Edwin Lonsdale, Chestnut Hill, Philadelphia, Pa., and Frank Leslie, Lake Geneva, Wis. "May their shadow never grow less."

Among those present at the exhibition from a distance were Robert Craig, Philadelphia; James Dean, New York; Elmer D. Smith, Adrian, Mich.; Edwin Lonsdale, Chestnut Hill, Philadelphia; Elijah A. Wood, West Newton, Mass.; E. G. Hill, Richmond, Ind.; J. C. Rennison, Sioux City, Ia.; R. Witterstaetter, Cincinnati; W. W. Coles, Kokomo, Ind.; M. A. Hunt, Terre Haute, Ind.; Avery Gallup, Denver; H. A. Siebrecht, New York; J. A. Peterson, Cincinnati; Fred Dorner, Jr., Lafayette, Ind.; Chas. Dannacher, Davenport, Ia.; Stephen Taplin, Detroit, Mich.; Fred S. Walz, Cincinnati; Carl Schweitzer, Cincinnati; J. Nelson, Oshkosh; Judson Kramer, Cedar Rapids, Ia.; J. D. Imlay, Zanesville, O.; James and Adam Currie, Milwaukee; Jos. Heintz and his son, Jacksonville, Ill.; H. W. Buckbee.

Carnation Uncle John, shown by Fred Dorner & Son, Lafayette, Ind., made a record as a keeper. So late as Thursday, the 6th day of the exhibition, it was as bright and cheerful as ever, though all the other carnations were then fit only for the rubbish heap. This very desirable quality will undoubtedly make the variety of unusual value.

Messrs. Craig, Dean, Anthony, Egan, Pettigrew and Chadwick, the active managers of the exhibition, are certainly entitled to a very great deal of credit for their excellent work, especially in view of the exceedingly embarrassing change in location at the last moment after arrangements had been practically completed for holding the show at the World's Fair grounds. The Exposition officials are delighted with the success of the show and declare it a fitting termination of the great World's Fair and of its Auxiliary Congresses.

#### PAID ADMISSIONS.

ROBT. MCINNES. IN HILL'S WINNING SIX VASES AT CHICAGO.

nent ladies of which Mrs. Potter Palmer, president of the Board of Lady Managers of the World's Fair, is chairman.

It was truly a World's Fair show, exhibits coming from both the Atlantic and Pacific coasts, and from Canada on the north to New Orleans on the south. No less than 21 states (in addition to Canada) were represented by exhibits as follows: California, Colorado, Connecticut, District of Columbia, Illinois, Indiana, Iowa, Kentucky, Louisiana, Maryland, Massachusetts, Michigan, Minnesota, Missouri, New Jersey, New York, Ohio, Pennsylvania, Rhode Island, Tennessee, Vermont.

#### REVIEW OF VARIETIES EXHIBITED.

Below we give a review by Messrs. E. A. Wood and Edwin Lonsdale of nearly all the varieties shown at the World's Fair Show, alphabetically arranged. In the list are included only varieties that are in commerce, and the new and untried ones have been omitted. The seedlings are reported upon elsewhere.

In this list we inaugurate a change in alphabetical arrangement as regards varieties named after individuals which we shall follow in all future lists. As will be noted such varieties are treated just as the personal names would be in an alphabetical list of such names alone. The various preliminary titles in such names are so apt to be dropped by some for the sake of brevity that the correct place in a list is frequently far from the one where one not having the full title in mind would look for it. And by this method varieties named after both Mr. and Mrs. John Smith are brought near together and the distinction is at once apparent, though one may have forgotten

whether the variety be is looking for is Mr. or Mrs. And where "The" forms part of the title the main title is indexed. For instance few look for "The Bride" among the Ts. They look in the Bs and when it does not appear there they imagine it has been omitted from the list. Thus we give it as "Bride, The," which is the only rational way, but which curiously enough has never been followed in lists of flowers before.

Adolphe. Lavender pink, globular. Already have too many of this color.

Allen, Mrs. Libbie. Yellow. Good when well done. Exhibition only.

Amber Queen. Amber. New, will attract attention as an exhibition flower.

Arnold, Mrs. Hicks. Bronze. Good for both exhibition and commercial purposes. Early.

Autumn Eve. White. Not remarkable.

Autumn Glow. Pale nankin yellow. Immense bloom, but color dull.

Avery, Mrs. C. D. Yellow. Beautiful color, but small.

Bahuant, M. Old rose. An incurved variety in England, but reflexes and fades badly in this country.

Balsley, Harry. Pink. A very beautiful delicate shade. A valuable addition for both commercial and exhibition purposes.

Bard, The. Dark red. Of no value. Too small.

Beacon. White. Immense flat bloom, but nearly valueless on account of petals breaking off.

Bertermann, Clara. Maroon. Don't like it.

Bird, Lilian B. Pink. Practically dropped on account of its weak neck.

Bohmer, Louis. Inc. Lavender pink, hairy florets. Too dull in color.

1 foot.

HARRY BALSLEY. WINNING VASE OF 12 PINK AT CHICAGO. SHOWN BY W. N. RUDD

Scale  
1 foot.

VIVIAND-MOREL. IN HILL'S WINNING SIX VASES AT CHICAGO.

Bottomley, Rob't. White. Still quite good, but many others are better. This variety should be called Lady Trevor Lawrence.

Callandreau, Dr. Pale yellow. Too light in texture.

Cannell, H. Yellow, globular. Still valuable in collections.

Cathedral, The. Inc. white. Beautiful thing when well done, but good only for exhibition.

Childs, Geo. W. Ref. crimson. Best crimson up to date.

Clarke, Mrs. E. W. Inc. amaranth. Still good in exhibition collections, but color not very attractive.

Clark, Mrs. Irving. Pink. A good flower for exhibition, but coarse in texture and apt to come streaked.

Craig-Lippencott, Mrs. Inc. yellow. Best yellow that has appeared since Widener was introduced.

Craig, Mrs. Robt. Inc. white. Beautiful bloom.

Crouch, Mrs. J. W. Inc. amaranth. Very fine bloom of its color.

Dailledouze, Eugene. Inc. golden. An incurved Japanese flower having the peculiar lustre of Kioto, but much larger and having a stronger stem.

Davis, Chas. Ref. buff. A sport from Vivian-Morel, having all the good traits of that well known variety.

Delaux, Jeanne. Blood red. An old variety now seldom seen at exhibitions. Domination. White. Still very good with some growers.

Drexel, Mrs. A. J. Crimson lake. The best of its color.

Eda Prass. Jap. Very delicate pink. Good for all purposes. A gem.

Eldorado. Inc. Jap. yellow. One of the best of its color, but difficult to grow.

Ermenilda. Jap. Inc. Beautiful light pink. A valuable acquisition.

Ewing, A. T. Ref. pink. Beautiful bloom, but not quite large enough for standard collections.

Excellent. Inc. blush. Past its usefulness. Too many bad faults to mention in one paragraph.

Exquisite. Light pink. A seedling from Mrs. Fottler and almost identical with that variety.

Farson, Mrs. D. D. L. Pink. Don't consider it worth growing.

Fifer, Mrs. Gov. White. Ordinarily too single.

Flight, Bertha. White, with a suggestion of yellow. Very good flower.

Flowerday, Rob't. Magenta. Not ordinarily considered worth growing.

Gause, Geo. R. Ref. terra cotta. Not a valuable acquisition.

Gerard, Mrs. J. N. Light lavender pink. Good early flower. With some growers very unsatisfactory.

Gettysburg. Deep red. Very good flower, but lacks depth.

Gognac. Jap. A white sport from Mrs. Irving Clark. A good thing. Very large.

Golden Gate. Tawny Japanese. An immense bloom, but not a self color. Good in large collections.

Golden Wedding. Jap. Inc. Yellow. Beautiful golden yellow flower.

Good Gracious. See Princess of Chrysanthemums.

Hardy, Mrs. Alpheus. Inc. white, hairy florets. Beautiful bloom, but so difficult of culture it is little grown.

Harvest Moon. Yellow. A very good flat flower.

Hallock, V. H. Pale pink. One of the most beautiful in color, but all growers not successful with it.

Hatch, Edw. Jap. Inc. white, suffused with pink. An exceedingly large and deep bloom.

Helyett, Miss. Inc. deep amaranth. A good exhibition flower. Always attracts attention in a collection.

Hill, Flora. Cream white. Very fine late white.

Hill, Joey. Inc. Deep red, buff reverse. Large flower, very full.

Hitzeroth, Emma. Inc. Yellow. Good early yellow.

Hull, Dr. H. D. Delicate pink. Large flat petals. Very good bloom.

International. Inc. Straw color. A poor rag.

Irma. Inc. Pink. A beautiful bloom.

Ivory. Jap. White. Still king of the whites.

Jeffords, Marguerite. Inc. Buff. Very fine flower.

Jessica. White. Still grown commercially for early blooms.

Jones, Mrs. Jerome. Inc. White. The most beautiful late white in cultivation. And most beautiful foliage of any chrysanthemum.

Judge Hoitt. Anem. Lavender. One of the few of this class large enough to stage amid other classes.

King's Daughter. White. Almost identical with Mrs. Langtry. Petals come narrower with some growers.

Kioto. Inc. Jap. Yellow. Very fine bloom. Its only fault is weak stem.

Krueger, C. Nankin yellow. Good in large collections.

Laughton, Mrs. Oliver. Inc. Rosy purple. An immense flower good only for exhibition.

Lay, Mrs. Inc. Pale lavender pink. Good exhibition bloom.

LeRoy, Ada H. Pink. Very little grown.

L'Enfant des deux Mondes. A white sport from Louis Boehmer.

Lincoln, W. H. Deep yellow. One of the best of the yellows for all purposes.

McInnes, Robt. Jap. Inc. Bronze. As shown at Chicago a very good variety.

Madeira, Mrs. L. C. Inc. Yellow. The best of the incurved yellows.

Marvel. Jap. White blotched with light lake. Not worth talking about.

May, Harry. Bronze yellow. One of the best of the bronzes.

Mermaid. Inc. Pink. A fine exhibition or commercial flower.

Morrissey, Mrs. J. W. Lavender pink. Good in large collections.

Mt. Whitney. Ref. White. Good in large collections.

Mursell, Kate. Lemon yellow. Sport from Lady Trevor Lawrence (Robt. Bot-tomley).

Newett, W. G. Jap. White. An immense flower. Very valuable variety.

Niveus. White. Very valuable acquisition. Good for both commercial and exhibition purposes. Immense bloom.

Olga. Inc. Pale magenta. Immense bloom but poor color.

Owen, Robt. Inc. Yellow. Beautiful flower, full double, good depth.

Princess of Chrysanthemums. Inc. Blush. Beautiful exhibition bloom, apt to grow crooked stem close to flower.

Queen, The. Inc. White. One of the most beautiful flowers in the exhibition.

Key, Mlle. Therese. Cream. A very large flower.

Roslyn. Inc. Pink. Good exhibition flower.

Rudd, W. N. Pink. A unique bloom of pleasing form.

Russell, Lillian. Pink. Beautiful flower, but a trifle small.

Salvator. Ref. Terra cotta. Not of much value.

San Joaquin. Anem. White. An immense flower for this class.

Seward, Wm. Crimson. Good sized flower. Very dark in color.

Simpson, Mrs. Maria. Inc. Yellow. A very fine flower. Not quite large enough for most collections.

Smith, Col. W. B. Jap. Bronze. Very good exhibition bloom.

Smith, Elmer D. Crimson, reverse buff. Very little grown.

Source d'Or. Orange yellow. Good for bush plants.

Spaulding, Ada. Pink. Beautiful bloom.

Summit. White. Globular.

Swanson, Aug. Inc. Buff splashed crimson. Too dull in color. A poor thing.

Taylor, Jno. H. White. A very good bloom when well done.

Thompson, Frank. Delicate pink. Beautiful exhibition bloom.

Thompson, Mrs. Frank. Jap. Lilac pink, silvery reverse. An immense flower but coarse in petal.

Thorpe, John. Crimson lake. Good in its day but its day is past.

Tuxedo. Jap. Orange brown. Very large flower, good in collection.

Vaughan, J. C. Crimson lake. A good flower but too often shows center.

Vivian-Morel. Ref. Pink. A universal favorite. Produces immense flowers.

Good for exhibition or commercial purposes.

Waban. Inc. Pink. Too flimsy.

Wanamaker, Miss Minnie. Inc. White. A very popular midseason flower. Good.

Whilldin, Mrs. J. G. Yellow. A good early light yellow. Makes a good exhibition plant. Not so valuable for exhibition blooms.

White, Jos. H. Jap. White. Very valuable commercial flower.

Whitnall, C. B. Deep amaranth. A very fine exhibition bloom.

Widener, H. E. Yellow. One of the best of the yellows.

#### Philadelphia.

The chrysanthemum show of the Penna. Horticultural Society opened under very favorable auspices last Tuesday afternoon. The exhibition is being held in the Armory of the State Fencibles, who kindly loaned the building for this purpose. The interior presents anything but a warlike appearance at present, it being decorated throughout with autumn leaves, laurel and spruce boughs, with smilax and laurel wreathing. The growing specimens are all arranged on the second floor in the drill room, while the cut flowers are displayed in the large company room either side of the center hall. The furnishings of the rooms, which are quite elaborate, add considerably to the beauty of the show. Taken altogether the exhibition is very complete, and Mr. Westcott, superintendent, as well as the committee of arrangements, deserve a great deal of credit for their management of the affair. Everything was arranged and the judges through with their awards by 5 p. m., and the premium cards were all attached in time for the evening reception, which at this writing promises to equal that of any previous first night. The show is a grand one in every respect, never before in the history of the society has there been such a display of well grown plants, or anything approaching the specimens of cut blooms that are staged at this exhibition. Such an authority as W. K. Harris said: "Well, I thought I had seen fine chrysanthemums, but these collections are far ahead of anything I have ever seen."

There are vases of cut blooms containing fifteen, twenty-five and fifty speci-

mens, the weakest of which would have been selected out of collections of previous years and spoken of as remarkable flowers. One exhibitor had a remarkable white seedling that many thought equally as good as Ivory which was withdrawn when the other exhibits in its class were seen, for fear that it should not get first place, and it was taken away for another growing and a trial next year.

The plants in comparison to the pace set by the cut flowers are almost, if not quite, even with them in improvement. Jas. Verner, gardener to the late A. J. Drexel, had a magnificent display. His plants are all perfect specimens, not a weak one in the whole lot. We are confident that nowhere else in this country could such plants be seen. He exhibits 24 plants, the smallest being at least seven feet in diameter. The flowers, which are borne abundantly, some plants containing over 200 blooms, were of good size and color and the foliage in perfect condition. Of course such a collection were prize winners, and Mr. Verner carried off all the first prizes in the classes he entered.

Another collection and of special mention was entered by Emil Leiker, it being his first exhibit. His plants, while not as large as Mr. Verner's, were fine specimens and showed the result of careful attention, as in point of color, size of flowers and general neat appearance they were a great credit, and but just starting out for himself he captured almost all the second prizes for his entries.

Other exhibitors were J. McCleary, Wm. Boyce, H. G. Standen, C. W. Cox, Gordon Smirl and W. K. Harris. The latter gentleman only exhibiting plants such as are used commercially and grown in 6-inch pots. His collection of 25 were fine specimens of what can be done with this sized plant, as were also those of Messrs. Leiker and Huster. There were a few attempts at standards, but the least said about them the better. There may have been standards grown that were worth the trouble it took to train them, but we have yet to see them if we may except a few exhibited by Hallock & Thorpe years ago.

Edwin Lonsdale made a very creditable and indeed a very attractive exhibit of orchids in pots and pans; there were a number of clumps of *Cattleya labiata* with several spikes of flowers and about fifteen other varieties, including *oncidiums*, *cyripediums*, *lalias*, etc. There were about forty plants altogether and the orchid table was surrounded at all times.

The display of cut blooms was a revelation and we are glad to note one thing, that each flower had at least 12 inches of stem. The old boxes have gone, we hope never to return.

The collections of 52 and 25 blooms were competed for by Messrs. J. Heacock, H. Grayhouse, J. McCleary and F. Heck, and many of the specimens in these collections were remarkable for size and color; one flower of Golden Wedding in Mr. Heck's collection was commented on by all who saw it, and the opinion was general that it was the largest flower ever seen on exhibition in this city and state; it did not present that coarse appearance so common in large flowers. In this collection fine blooms of Mrs. Bayard Cutting, Mr. and Mrs. Frank Thompson, Vivian-Morel and Ada McVicker were the most prominent. Hugh Graham's exhibit presented a very even appearance, all being fine flowers, the best flowers seemed to be Pres. Smith, Niveus, J. H. Cliffe, Geo. R. Gause, Edward Hatch,

HILL'S WINNING COLLECTION OF 48 VARIETIES, ONE FLOWER OF EACH, AT CHICAGO.

Vivian-Morel, Mrs. Ogden, The Queen, H. E. Widener, Frank Thompson, Golden Wedding, H. Balsley, Mrs. Sharpless, E. Hitzeroth, Harry May, Mrs. Lippencott and Ivory.

J. Heacock's collection was noticeable for its fine blooms of Belle of Orange, F. Thompson, Mrs. D. D. L. Farson, Mrs. Thomas, Mrs. L. C. Madeira, Etoile de Lyon, Lincoln, R. Bottomley and Domination.

The vases of cut flowers containing from six to fifty specimens each were objects of general admiration and perhaps attracted as much if not more attention than any other single exhibit. Mr. E. Lonsdale's two vases of fifty, the pink vases being Harry Balsley and the other fifty yellow, Mrs. Craig Lippencott, each flower a beauty, were the wonders of the show, and many times the remark could be heard, "Did you see those magnificent pink and yellow vases, you must see them!"

Mr. Heacock also exhibited a vase of fifty Ivory which attracted a great deal of attention. They were very fine flowers. A similar vase of Marguerite Graham, a variety similar to Kioto but with a good stem and pure white in color, shown by Hugh Graham, presented a handsome appearance and was frequently pointed out by visitors.

Among the seedlings never before exhibited and placed in competition for the Blanc prize was one exhibited by E. G. Hill & Co., Richmond, Ind. It is called Eugene Dailedouze. It is a superb incurved yellow, large but not coarse, and has a fine stem. This will likely become a leading variety. It received the first prize over six competitors, all of which were good, notable among them being Katherine Leech, a fine pink by H. Graham, also a fine lemon yellow, no name. Another very curious variety, Loda,

greenish center, body of flowers white and edge pink. The flower was very flat and round, as if grown to a mould, quite a curiosity.

The collection of roses exhibited the first day was confined to the growers, and while not large was very creditable in point of excellence, some really fine flowers being shown. Cut carnations were also confined to the growers and were of excellent quality, although it was expected to see more entries among the seedlings.

The following were the awards of the first day: Plants in pots, open to all. For collection 10 plants, 10 varieties, first to James Verner, gardener to the late A. J. Drexel; second to Emil Leiker; third to Gordon Smirl, gardener to Joseph F. Sinnott; special to John McCleary, gardener to William Weightman.

For collection six new varieties never before exhibited at the shows of the society, first to Henry D. Surman, gardener to E. W. Clark; third to John McCleary.

For best specimen plant, new variety, never before exhibited at the shows of this society, first to C. W. Cox, gardener to Mrs. Clay Kemble; second to William Boyce, gardener to Charles Hibbard.

For specimen standard, third to John McCleary.

For 25 plants, 25 varieties, in not over 6-inch pots, first to W. K. Harris, second to Emil Leiker, third to Gebhard Huster, gardener to J. B. Heyl; fourth to Chas. Wm. Cox.

For specimen plant, white, first to James Verner; second to Emil Leiker; third to William Boyce.

For specimen plant, yellow, first to Emil Leiker; second to James Verner; third to A. G. Wanden.

For specimen plant, any other color,

first to James Verner; second to Charles W. Cox; third to Emil Leiker; fourth to Gordon Smirl.

For four specimen plants, four different colors, first to James Verner; second to H. G. Standen; third to John McCleary; fourth to Emil Leiker.

For best seedling plant, first to William Jamison, gardener to R. S. Mason.

Special prizes: "Wootton prize" offered by Mrs. George W. Childs, for three varieties, three different colors, first to James Verner; second to Emil Leiker.

"Pembroke prize," offered by Mrs. Charles Wheeler, for four varieties Japanese, four colors, first to James Verner.

"Record prize," offered by William M. Singler, for six naturally grown plants, six varieties, first to Gordon Smirl.

"Ravenhill prize," silver cup, offered by Miss Marie Weightman, for best plant of Miss Marie Weightman, and best 12 blooms of same, first to John McCleary.

"Luzon prize," offered by Edwin H. Fittler, for 60 blooms, five varieties, first to Hugh Graham; second to F. R. Sykes, gardener to Mrs. G. Dawson Coleman.

"Drexel prize," for the best plant of Mrs. A. J. Drexel, first to James Verner.

"Runnymede prize," three plants yellow, any variety, first to James Verner; second to Emil Leiker.

"Sugar loaf prize," for best seedling never before shown, first to William Jamison for pink Japanese variety, named Wissahickon.

"Paul prize," for best specimen of Mrs. James W. Paul, first to James Verner.

"Blanc prize," offered by A. Blanc, for best seedling (cut blooms) chrysanthemum of 1893, first to E. G. Hill, Richmond, Ind., for Eugene Dailedouze.

"Wohlrh prize," offered by Charles Dissel, for best 12 blooms, any variety not disseminated, first to John N. May.

"Schaeffer prize," silver cup, offered by Miss Elizabeth Schaeffer, for 75 cut blooms, 25 varieties, three of a kind, first to Joseph Heacock.

"Burpee prize" for best 12 cut blooms, Mrs. A. C. Burpee, first to Gilmore & Doherty. For best six blooms, second to Joseph Heacock.

"Thompson prize" for 25 cut blooms of any variety not disseminated prior to the spring of 1893, first to Hugh Graham, second to Edwin Lonsdale.

Cut blooms of chrysanthemums open to all.—For collection of 25 cut sprays, one of a kind, first to John McCleary.

For naturally grown sprays, 12 varieties, first to Charles M. Cox; second, to H. G. Standen; third to John McCleary.

For 52 blooms, one of a kind, first to Frederick Heck, gardener to George F. Bair, Reading Pa.; second to Joseph Heacock; third to Hugh Graham.

For 36 blooms, 12 varieties, first to Joseph Heacock; second to Gordon Smirl.

For 25 blooms, one of a kind, first to Ferdinand Heck, second to Hugh Graham; third to Thomas D. Monahan, gardener to C. W. Trotter.

For best vase of yellow, 12 blooms one variety, first to Hugh Graham; second to Thomas Monahan; third to Joseph Heacock.

For best vase of white, 12 blooms one variety, first to Edwin Lonsdale, second to Joseph Heacock; third to Hugh Graham.

For best vase of any other color, 12 blooms, one variety, first to Joseph Heacock; second to Hugh Graham; third to Henry G. Standen.

For best vase of cut blooms not over four of a kind, first to Hugh Graham; second to Joseph Heacock; third to Henry G. Standen.

For vase 50 cut blooms, pink, one variety, first to Edwin Lonsdale; second to Hugh Graham.

For vase 50 cut blooms, white, one variety, first to Joseph Heacock; second to Hugh Graham; third to Fred R. Sykes.

For vase 50 cut blooms, yellow, one variety, first to Edwin Lonsdale.

For mixed cut blooms, special premium, to Fred R. Sykes.

Cut blooms, growers only, carnations, for best seedling, any color, not less than six blooms, first to Edward Swayne.

For 25 blooms, scarlet, first to Hugh Graham; second to Joseph Heacock.

For 25 blooms, light pink, first to Joseph Heacock; second to Hugh Graham; special to W. K. Harris.

For 25 blooms dark pink, first to Hugh Graham; second to Joseph Heacock.

For 25 blooms, white, first to Hugh Graham, second to J. Welsk Young.

For 25 blooms, striped on yellow ground, first to William K. Harris.

For 25 blooms, crimson, first to Hugh Graham.

For 25 blooms, any other color, first to Edward Swayne.

For best display of violets, cut blooms, first to S. J. Burnham, New York.

Cut roses. For 12 Perle des Jardins, first to David Cliffe.

For 12 Niphotos, first to Joseph Heacock.

For 12 Kaiserin Augusta Victoria, first to Edwin Lonsdale, second to David Cliffe.

For 12 The Bride, first to Hugh Graham, second to Joseph Heacock.

For 12 Sunset, first to David Cliffe.

For 12 Catherine Mermet, first to Joseph Heacock, second to Hugh Graham.

For 12 Mme. Hoste, first to J. Welsk Young, second to David Cliffe.

For 12 of any other variety, first to

Joseph Heacock, second to Hugh Graham.

For six American Beauty, first to Joseph Heacock; second to Edwin Lonsdale.

For 12 La France, first to Hugh Graham; second to J. Welsk Young.

For 12 Mme. Cusin, first to Hugh Graham.

For 12 Mme. Watteville, first to Joseph Heacock, second to David Cliffe.

For 12 Meteor, first to Hugh Graham.

For 6 American Belle, first to Hugh Graham.

For Bridesmaid (special) to Joseph Heacock.

Designs and table decorations, open to all. For plateau of ferns and foliage, first to Pennock Bros.

For plateau of chrysanthemums, first to Pennock Bros. For window box of chrysanthemum plants, first to Charles W. Cox, gardener to Mrs. Clay Kemble; second to Pennock Bros.

For table decoration of ferns and foliage, first H. Westcott Floral Establishment.

For handle basket of flowers, first to John Crawford; second to Pennock Bros.

Grapes.—For foreign grapes, six bunches, six varieties, first to James H. Bull, second to Gebhard Huster, gardener to J. C. Heyl. For three bunches, three varieties, first to James H. Bull.

For Muscat, any variety, two bunches, first to James H. Bull.

For any other variety, first to William Powers; second to James H. Bull.

For specimen bunch, any variety, first to William Powers, second to James H. Bull.

Special mention to F. R. Sykes, Mount Lebanon farm, for exhibit of potatoes and quinces.

To Charles W. Cox, gardener to Mrs. Clay Kemble, for exhibit of cucumbers.

To LaRoche & Stahl for floral steamship, composed of roses, chrysanthemums and violets.

To Hugh Graham for pink seedling.

To John N. May for yellow seedling.

ROBERT KIFT.

#### New York.

If a bright beginning counts for anything as an augury then the great chrysanthemum show of the New York Florists' Club, which opened at 3 p. m. on Monday, November 6, at the Grand Central Palace, will be a pronounced success, for no finer autumn day was ever recorded than the opening day of the exhibition. The entrance and interior of the hall was profusely decorated with hemlocks, southern smilax and laurel wreathing, and the exhibits were all in place when President Manda called his audience to order and with a word of welcome introduced Mr. Willis Holley, private secretary of Mayor Gilroy, who expressed his regrets that illness had prevented his chief from appearing in person, and in a few well chosen remarks formally declared the exhibition open and expressed his hearty wishes for its success. He was followed by Mr. J. N. May, who told briefly of the great progress made in the development of the chrysanthemum since its first appearance as a little stunted purple bloom in 1789, and especially during the past decade. He said that when he was a boy a bloom four inches in diameter was considered a great achievement, and paid a high tribute to the enterpriser of American growers whose judgment and skill had been exercised to make such an advance in size, form, substance and constitution, and who were to-day acknowledged by foreign raisers to lead the world in chrysanthemum culture. Mr. May's remarks

were vigorously applauded. Ex-Alderman Morris made the closing speech and brought down great applause by comparing the great development of the chrysanthemum in the free soil, free air and clear sunshine in America with the progress made by the human race under the advantages of American liberty, which is so great that like the chrysanthemum, after a few generations the average American would scarcely recognize his own ancestors.

The exhibition hall is far ahead of the Madison Square Garden in fitness for a flower show, and no exhibition in New York has ever made such an effective appearance. The arrangement of the groups was most pleasing and artistic and reflected great credit on the committee in charge, of which Mr. Keller was the head. Manager McCrowe also deserves great praise for the manner in which he accomplished the work of his difficult position.

As far as trained specimen plants are concerned it can not be said that the exhibition is in any way wonderful. Outside of Pitcher & Manda's groups there were very few exhibitors of trained plants, and of those that were shown many of the best had been shaken almost to pieces and practically ruined in transportation, while others that were otherwise good were disfigured by stakes unnecessarily heavy and needlessly numerous. The groups for effect made a brilliant display and massed up well against the green background, and some of those grown to single stem and flower bore very fine blooms. The principal exhibitors in these classes were Julius Roehrs, Pitcher & Manda, W. Bayard Cutting, Ed. Weimar, H. C. Willie, H. A. Molatsch. There were no exhibitors in the class of novelties of 1893 except Pitcher & Manda, and very few standards were shown.

It was in the cut flower department that the greatest competition took place. Here the giants met each other. Many of the classes had from six to nine entries and on some lots the judges decided with difficulty. Many of the exhibits were simply wonderful. Such blooms have never been seen here before and two years ago would have been considered impossible of attainment. It would seem that the limit to size, depth and color must be nearly reached, for it is not possible to imagine anything much more nearly perfect than many of these blooms.

The older varieties, such as Viviani-Morel, Widener and Mermaid, were finer than ever, and the two great new whites, The Queen and Niveus, as well as Ed. Hatch, Golden Wedding, Good Gracious and other recent introductions, marked the high water line of American chrysanthemum culture up to the present time.

Owing to the date at which we must go to press it is impossible to announce the results of the competition; this and much more interesting information regarding the exhibition is necessarily deferred until our next week's edition.

It was interesting to note the effect on the colors of certain varieties when the electric lights were turned on in the evening. The pure pinks, such as Maud Dean, Mermaid and Excellent, were richer than ever, and in the purplish tints, such as Louis Boehmer, all the purple disappeared. The deep orange and apricot varieties, Harry May, Mr. Hicks Arnold, Golden Gate and the like, fairly glowed with luminous light.

The leading exhibitors in the various classes for cut blooms were L. R. Powel, Dailledouze Bros., Julius Roehrs, Pitcher & Manda, Peter Henderson & Co.,

R. WITTERSTAETTER'S GROUP OF SINGLE STEM MARIE LOUISE (7-INCH POTS) AT THE CHICAGO SHOW.

Rudolph Asmus, Francis T. Underhill, John N. May, G. H. Hale, J. Condon, Charles Duniper, W. Slack and A. W. Elkstrom.

In the classes calling for vases of separate colors the following were the varieties apparently most popular in their respective classes. For whites: The Queen, Ivory, Minnie Wanamaker, Flora Hill. For yellows: Golden Wedding, Emma Hitz-roth, Mrs. Craig Lippencott. For reds: George Washington Childs, Cullingfordii. For pinks: Maud Dean, Vivian-Morel. There were some magnificent blooms shown on flats, but those in vases seemed to give the most pleasure to visitors.

In the department of cut roses the competition was light, being confined principally to F. R. Pierson Company and John N. May, both of whom showed the standard varieties in good shape. Mr. May's new pink rose, Mrs. Whitney, attracted much attention. In carnations all the favorites were shown. J. N. May, C. W. Ward, F. A. Storm, H. E. Chitty, C. H. Allen and other war horses competing sharply, and as deeply interested in this little diversion as though it was the principal part of the whole show. For the seedling prize J. N. May staged Helen Keller and C. W. Ward entered Storm King.

The large groups of decorative plants and specimen palms added much to the effectiveness of the general display. Julius Roehrs, Richard Brett, Pitcher & Manda, G. H. Hale and W. Anderson all showed superb specimens. Pitcher & Manda had no competition on orchids or nepenthes, of both of which they made a good display. The araucarias from

Pitcher & Manda, J. M. Keller and Julius Roehrs, marantas from Pitcher & Manda and Richard Brett, lily of the valley from Julius Roehrs, cyclamens from G. Bergmann, dracaenas from J. M. Keller, and a specimen plant of *Cattleya labiata* from G. H. Hale were all worthy of special note. John G. Esler showed a new begonia, a cross between *rubra* and *nigricans*, with very rich foliage, which he has named *Hunnewell*, in compliment to Mr. H. H. Hunnewell of Wellesley, Mass. H. Wiperman of Brooklyn has the privilege of selling flowers at the show and his booth, which occupies a large section of the hall and is presided over by half a dozen veritable goddesses, is a fine example of artistic decorative work.

The trade exhibit is held in a separate hall. Here are to be found the Chadborn Kennedy Company, with their automatic ventilator; D. H. Roberts, glass; Thos. W. Weathered's Sons, boilers; A. H. Hews & Co., pottery; H. Bayersdorfer & Co., florists' supplies; A. Herrmann, metal designs; Reed & Keller, wire designs; J. C. Meyer & Co., silk-aline; and the Snow Rustic Manufacturing Co.

The dinner to the judges on Monday evening was a jolly affair. President Manda presided. The first speaker called upon was Mr. Keller, chairman of the exhibition committee, who received a boisterous welcome. Next, John N. May, who said that the flowers on exhibition excelled anything ever before shown in this country or elsewhere. Mr. McCrowe, manager of the exhibition, being called upon, remarked that he was not made for talking, only for work and generally gets enough of it. Mr. Mestanez, manager of the Industrial Building,

pleaded bashfulness, and the company responded with "For he's a jolly good fellow." Chas. Dards was called upon as a representative of the retail trade and made a neat little speech, as did the veteran Charles Zeller, who said that it made him feel ten years younger to be in the company of his fellow florists. Eugene Dailedouze admitted that he wanted to say a few words, but didn't know how to talk. Ernst Asmus was with difficulty induced to talk. Boisterous calls for a story about a moose failed to have any effect, but he spoke in high praise of the show in progress. Mr. Tricker pronounced the show an artistic success. J. N. Gerard was introduced as one who grows chrysanthemums because he loves them, and told of how he first became interested in the flower at John Thorpe's show in 1882. Treasurer Weathered was the last speaker. The introduction of the genial Charlie was the signal for a big demonstration, and after it had subsided he made the best speech of the evening, upon the conclusion of which the whole company stood up and sang "For he's a jolly good fellow," which nobody can deny, to which Forsterman vociferously added "If he does he tells a lie."

#### Boston.

The Boston show is never famous for its size, but in quality is not often second. This year the rule still holds good. The cut blooms are a decided advance on those of former years and undoubtedly as good as the best exhibited anywhere. Everything is shown in vases, not a board to be seen. The plants are a surprise. There are four exhibitors either of whose speci-

men plants are easily the best ever exhibited here: Walter Hunnewell, Arthur Hunnewell, N. T. Kidder and Dr. C. G. Weld, all of these are private establishments. No commercial place could afford to give the time and attention necessary to produce such perfect specimens.

In Walter Hunnewell's collection, which took premiums, were magnificent specimens of such varieties as Mrs. Bishop, V. H. Hallock, A. H. Fewkes, Wm. Falconer, W. H. Lincoln, Mrs. Joseph H. White, Mrs. G. W. Childs, Mr. Hicks Arnold, Mrs. Joseph Rossiter, Louis Boehmer, Duchess of Connaught and Fascination. One plant of Goguac is a curiosity in its way. It has sported variously to bright pink and orange. The flowers of each color are well distributed over the plant and many of the individual blooms even are particolored.

In N. T. Kidder's collection, which came in second, the same varieties are largely represented. In Dr. Weld's lot, one variety, Edith Hollis, is particularly admired for its luminous shades of pink and gold, reminding one of the pink pond lily. William Falconer has sported with him and bears several bright lemon blooms. There are no plants in the hall that are offensively overstaked and all throughout are well foliaged clear to the bottom.

Dr. Walcott, the Bussey Institute, F. B. Hayes and W. H. Elliott are also large exhibitors. Mr. Elliott's are as usual handsome stocky little plants just right for retail sales for window and hall decoration.

The cut flowers occupy the entire lower hall. All the well known New England growers are represented. John Simpkins, E. A. Wood, Mrs. A. D. Wood, Edmund M. Wood & Co., Joseph H. White, C. V. Whitten, T. D. Hatfield, Dr. Weld, Wm. Edgar and F. B. Hayes are there and several others besides.

The silver cup offered by Miss Simpkins for the best twelve blooms of any pink variety was won by E. M. Wood & Co. with Vivian-Morel.

The Hatch prizes for best and second best vase of twenty yellows were won by C. V. Whitten and Wm. Edgar respectively, both competitors staging Lincoln.

In the cut bloom section Golden Wedding, Mrs. Jerome Jones, Niveus, Vesuvius, Ada H. Leroy, H. L. Sunderbruch, Olga, Mermaid, Ermenilda, Mrs. A. J. Drexel, Mrs. Phipps, Jr., T. C. Price, Ed. Hatch, Marie Louise, Lilian B. Bird, Vivian-Morel, Eda Prass, Violet Rose and Fascination, were among the varieties which seemed to have attained the greatest perfection.

The exhibits of long stemmed blooms in large vases were grand. C. V. Whitten, Edmund M. Wood & Co. and John Simpkins were the largest exhibitors in these classes and to them went most of the big premiums. C. V. Whitten's Morel, Ivory, Lincoln and Pelican were great, as were also Harry Balsley, Joey Hill, Golden Wedding, Roslyn and others in E. M. Wood & Co's display, while Niveus and Mrs. Jerome Jones from John Simpkins were the most admired blooms in the hall.

In the classes for vases of ten blooms each in separate class, first premiums went to the following varieties: For red, Cullingfordii; for pink, Harry Balsley; white, Mrs. Jerome Jones; yellow, Golden Wedding.

Exhibits of seedlings and novelties are quite extensive and of such importance that we defer our account of them with the various awards until next week's issue. There were some nice carnations from J. A. Foster and Wm. Nicholson and

mignonette from William Edgar. J. N. May sent some fine blooms of the new carnation Helen Keller, and the new rose Mrs. W. C. Whitney, both of which attracted much attention.

J. F. Huss exhibited two large frames of beautifully skeletonized leaves and seed vessels perfectly preserved in every delicate part and most artistically arranged.

#### Judging New Chrysanthemums.

It has been suggested to us that we say a word regarding the necessity of arrangements whereby exhibitions may be held at such dates as to cover the whole chrysanthemum season so that seedlings may be judged when at their best, whatever date that may happen to be. It is suggested that exhibitions for the judging of seedlings be held as nearly as possible on October 25, November 7 and November 25.

The suggestion is certainly a timely one and it seems to us that it is properly a matter for consideration by the National Chrysanthemum Society of America. If taken in hand by this society the work would have an authoritative stamp that is essential to give the judgments the force and effect they should have.

It might be difficult to arrange for a general exhibition at so early a date as October 25, but we see no reason why a mere trade display could not be arranged for at that date in some of the larger cities at very slight expense and where early seedlings might be entered in competition under rules to be determined by the society, and judgment given on same by experts selected carefully for the purpose.

For the midseason seedling competition arrangements could easily be made with the managers of some of the established annual exhibitions, who would probably be glad to offer cash prizes under the direction of the national society, the judging of the seedlings to be done by judges selected by it.

For the late seedlings a mere trade display could be held on the same plan as that for the early ones.

Certain it is that the National Chrysanthemum Society of America should make some decided practical move looking to the sifting out of poor sorts and the prevention of the dissemination of new varieties that are not superior to existing ones of similar types. This can be done only by making it easy for the introducers of really valuable novelties to procure the indorsement of the society. The opportunity will be quickly embraced and as a result buyers will look with suspicion upon any sort that has not been submitted for judgment and secured favorable consideration.

These judges should be men of unquestioned integrity and thorough familiarity with the chrysanthemum family and not in any way interested in the dissemination of new sorts. At first blush it may seem difficult to get such a board of judges, but we can name two off hand that meet every requirement of the case. They are Elijah A. Wood, West Newton, Mass., and Edwin Lonsdale, Chestnut Hill, Philadelphia, Pa. A board of three judges would surely be sufficient and a third member could readily be selected from among the numerous private gardeners who grow for exhibition every year.

This matter is such an important one that we shall be seriously disappointed if preparations are not begun at an early date for the carrying out of this or some similar plan for the season of 1894.

#### The Ideal Chrysanthemum.

Last Tuesday we asked Mr. E. A. Wood, president of the National Chrysanthemum Society of America, and now generally acknowledged to be the best authority on the chrysanthemum in this country, to describe his ideal flower—the flower that we should aim to work up to. He replied:

"My ideal is a bloom six or seven inches in diameter and nearly the same in depth, of good symmetrical form, full to the center with no show of an eye of any kind, petals of fine texture and good substance showing no coarseness, of good bright color without a suspicion of streakiness, borne on strong stiff stems bearing dark green healthy foliage, flower stalk (the part of the stem from flower to first leaf) not too long."

Speaking further he said that Ivory came the nearest to his ideal of any existing variety. He deprecated the tendency to run to very large, flat, coarse flowers, and expressed the belief that the desirable limit in size had already been passed. We must now work for form, fineness in texture and finish. Very few have any use for a flower as big as a cabbage.

In response to an inquiry for some points as to methods of "building" flowers (giving them extra depth), he said it was quite impossible to convey in words any instruction of value. Preparations for this should be made when the plant is started and depended upon the variety in each case. The great point is to have the wood at the proper degree of ripeness before starting the special feeding, and this can be determined only by personal experience over a number of years with the particular variety in hand and under your special cultural conditions. But when you have the experience you can take most any flower and increase its depth to a remarkable extent.

The science of chrysanthemum culture is really still in its infancy.

#### Carnation Notes.

Chrysanthemums are now upon us, and this Queen of Autumn is such a despot that all the rest of the floral kingdom have to submit to her sway. The best thing for us carnation men to do is to submit cheerfully, curtail our cut and prepare the plants for a good crop in December and January.

A good plan now when you are pulling your flowers, is to pluck along with them the weak stems that are making buds. You do not need any but extra good flowers, and pulling the poor ones will throw the extra vigor into the plants. In pulling these buds do not take much of the foliage with them, as robbing a plant of its foliage will injure its root development, and plenty of good working roots are an important feature in successful carnation culture.

Do not in the hurry of chrysanthemum time allow these to crowd out necessary work among the carnations. If the weeds grow, out with them; if the plants need tying up, do it; for a little extra care and labor right now will be amply repaid by your holiday crop. One is sometimes apt to forget that the plants are now putting up those stems that will make the Christmas crop if they are properly handled.

PARTIAL VIEW OF MR. O. P. BASSETT'S DISPLAY OF PLANTS AT CHICAGO, WITH GROUP OF SINGLE STEM IVORY (IN 6-INCH POTS) IN THE FOREGROUND.

It is well to guard against all extra stimulation at this time, keep your houses moderately cool, say about 50°, not very wet, and keep all of your extra feeding either by manure water or solid fertilizers away from the plants; that is if your plants are good and strong. If they happen to be away behind, as some are this season on account of the drouth, it is better to keep them pushing along moderately, the object being to have a good sized plant about December 1, well hardened, so that it can stand the extra forcing which almost every grower gives his plants over the holidays, without serious injury.

If your flowers do not bring you good returns now, don't abuse your commission man unless you have evidence that you are being treated unjustly; then go for him hot. Lay your plans for the winter and get ready for the trade that is coming when chrysanthemums begin to wane. There is a time for all things, and our time is not far off. A. M. HERR.

#### Carnation Notes.

I have read the article on carnations by Mr. Herr with great interest. On some points I do not agree with him. In speaking of syringing I would not advise any one to attempt to syringe any variety after 3 p. m. from this out. I make a practice of syringing my houses at noon every day, and have found that by so doing I obtain the best results. In regard to planting too deep, I don't see how any man is going to do it unless his benches are of an unnecessary depth, or his plants in the lot very near the surface of the ground. With benches four inches deep it is almost impossible for it to occur.

If you wish to have fine flowers and long stems now is the time for you to disbud; in disbudding you must take the side buds off as soon as you can get at them, for if you leave them until they have grown to any size you might as well leave them on for all the good it will do in taking them off.

I can not see what benefit there is to be derived by not watering until your benches are dried out, on the contrary I find it keeps the plants back. I try to keep my benches about the same all the time, neither dry or wet. You do not wait until you are about starved before you eat; so it is with watering carnations, they want to be kept about the same way, neither dry or wet. You will find that the plants will take root faster under these conditions than any other. I have tried both plans and have had it demonstrated to my satisfaction that it is the best. Try it for yourself and see. When you find that your plants have taken a good hold you should begin to water them with manure water about once a week; you will be amply repaid for your trouble I can tell you.

I would advise to begin smoking before the greenfly has made its appearance, as I have found to my sorrow that smoking is a better preventive than cure. "An ounce of prevention is worth a pound of cure."

FRED. A. STORM.

Bayside, N. Y.

Mr. Storm has misunderstood me on a few points, and I hope any other of my readers who disagree with me will criticize freely, as we can often thus learn from each other. Often what is meat for one will be poison for another, but there

may be something in between that will be good food for both.

In syringing and smoking we both agree, only we express ourselves differently. Planting too deep can not well be done on a bench with four inches of soil, but it can easily be done on a solid bed, and a great many growers are using the solid bed system in preference to benches for many varieties.

Watering is a fine art and should be every grower's study until he finds out just how to handle his soil. If I were to adopt Mr. Storm's idea and keep my beds and benches constantly moist the soil would sour, and a sorry looking lot of carnations could be seen here. In this as in everything else there are extremes to be avoided, a plant should not be left to starve before giving it water, there is a vast difference between leaving a plant suffer for water and allowing it to get dry. When I first started into business, which was with the second volume of the *FLORIST*, I noticed an article by Mr. John Thorpe advocating "first leave your plants get dry and then water well." I adopted the plan then and have found no occasion to change since. Another point in favor of this method with me is that the flowers will stand shipping better if not grown too moist; my flowers have to stand a 24 to 30 hour journey before they even are in the hands of the dealer. Where you are only an hour or two from market and the flowers are used the same day they are pulled this is of course no item. Mr. Storm's soil may not be suited to the same treatment as mine, which is a rather heavy soil, but drains well nevertheless. In taking advice from any one it is well to temper it to your own conditions.

A. M. HERR.

## Chester County Carnation Society.

Despite an extremely stormy day a few of "the faithful" were in attendance at the regular meeting November 4. Mr. Davis had recently returned from a visit to New York and vicinity and reported carnations generally looking well; a few growers reported Daybreak not doing well after moving indoors.

The subject of gold medal to be awarded at Indianapolis was further discussed and a final decision deferred for another month.

Some fine specimens of seedlings were shown from the houses of Mrs. Cowan, E. Swayne showed specimens of Wm. Scott, Edna Craig and Nancy Hanks, all fine flowers. The latter would seem to be more worthy of cultivation than has been the case in this locality. C. J.

## Satisfactorily Adjusted.

We have received a note from Messrs. C. H. Bliss & Sons, Ashtabula, O., advising us that the carnation transaction about which they asked advice through our columns has been adjusted to their entire satisfaction, and requesting us, in view of the mention of Mr. Chitty's name in the former article, to announce to the trade that Mr. Chitty willingly did what was right in the matter as soon as the point of responsibility was settled.

## Miscellaneous Seasonable Hints.

The weather has been so unusually fine the past month that Roman hyacinths that were boxed early are now showing their green leaves above the covering of earth. Don't put on the covering of manure yet, or the leaves will freeze into it when severe weather comes. Add a little more fine earth now, just enough to keep the points of the leaves out of sight.

Geranium and other flower beds have only within a few days become unsightly, and the planting of tulip beds has in many cases been very late this year. I do not advocate the planting of tulips after the middle of this month, but still it can be done much later with good results. I remember last fall planting a bed of the best varieties of tulips about the 10th of December. We had had a severe cold spell, and this was during a short thaw. I was doubtful of the result, but as a consolation to those who should get belated with an order of this sort I can say they were at the usual time of flowering all that could be desired. In planting the tulips or hyacinths, unless the soil is unusually mealy and light, don't trust to your getting the bulbs deep enough in the ground by simply a squeeze down with your fingers; you can't get them deep enough. Plant with a trowel; it's about as quick, and get them down five or six inches. By the time the frost is out of the ground you will find they will be much nearer the surface. Don't cover right off with straw manure; wait for good winter weather for that.

Don't forget in localities where there has been little or no rain for the past month that your forcing tulips that are outside or in boxes and covered with two or three inches of earth will need a good soaking occasionally, or they won't root fast, and the chief help in getting good early (January) tulips is to get them well rooted.

Poinsettias, which are now developing their bracts, are great feeders and soon exhaust the soil in a 6-inch pot, and will with all the heat you can give them soon begin to show their exhausted state by losing their bottom leaves. They must

have liquid manure twice a week. It will greatly help foliage and flower.

The main crop of young geraniums that were propagated in September will now be well rooted, and as you stood them as close together as possible when first potted, they should have a "stand over" and pick over. This simple operation may seem (where there are many thousands grown) a formidable piece of labor to those not in the business, but in reality the cost is so trifling that it pays to do it often. I am within the limit when I say that two smart greenhouse lads should easily clean and stand over five or six thousand of these plants in a day. I have seen men (gardeners), old enough to know better, when moving over plants, raise the little object to about the level of their eyes, their body being in a perpendicular position all the time. After turning the plant round once or twice they decide which leaf shall be rubbed off, and then after a farewell look set the plant very carefully down, leaning a little to one side. One of the first operations I would (and do) show a boy how to do whom I want to teach is to set over plants quickly on straight rows, and the pots level; all such operations as this (simple as they are when learnt), potting and putting cuttings in the sand, should be done with great rapidity, or there is not much money in it.

An enquirer without signature wants to know what to do with cyclamens in 3 inch pots showing bud, but he does not want them to flower. Don't pinch the buds out; they won't pay to grow over another year. You can raise better and more salable plants from seed sown now for another winter. Shift them into 4-inch pots or 4½-inch at once. If kept below 50° they will come on slowly and be useful plants for Easter.

"Mr. A. O. of Quincy" wants to know the best remedy for mealy bug. There is no excuse for having mealy bug on any plant that will stand hard and frequent syringing with water from the hose. If this is attended to they will soon disappear. Some plants won't admit of this. Then a kerosene emulsion applied with a sponge or soft brush will soon fix the bug. Mix one-fourth part of kerosene with a pail of milk; keep it thoroughly stirred, or beat up for twenty minutes or until it is entirely mixed, then add two gallons of water and you have the emulsion. Wm. Scott.

Buffalo.

## New York.

The all-engrossing subject at present is the great chrysanthemum show at the Grand Central Palace. The interest is apparently wide spread, for a great many visitors are in town on purpose to see the show. It is to be hoped for their own comfort and peace of mind that these visitors will arrange to get their mail otherwise than through the uptown postoffice at 28th street and Seventh avenue, for if it once gets into the clutches of the grand inquisitor of this antediluvian establishment they will have neither time nor temper left with which to enjoy the exhibition.

The cut flower trade has not improved any yet. Everything is very abundant and customers are scarce. The exhibition will help to unload the great stock of chrysanthemums which have accumulated, and which it would be difficult to turn into money in any other way.

We learn from the daily papers that a young man from the fashionable circle, Rawlins Cottonet by name, has opened a

flower shop on Fifth avenue, with the laudable object of replenishing his purse from the handsome profits which this business is reputed to furnish. His brother florists, if we may so designate them now, seem to have made no note of this wonderful event, and there is not a ripple on the surface to mark Mr. Cottonet's advent, but the daily papers have made a nine days' wonder of it. Some applaud the young man and call him brave. Yes, he is brave, but he doesn't know it yet. Wait till some of his Fifth avenue associates send back a box of roses with the information that they are "stale and dropped to pieces as soon as taken from the box," or return a plant because it is "not what I ordered," or skip to Europe for a year's sojourn, leaving the winter's account unpaid, or the Greeks come in to shake hands and enquire "how's business," or he slips up on a calla stem while waiting on a pretty customer and spoils the knees of his new trousers by contact with the slippery floor. Yes, then, and not till then, will Mr. Cottonet realize how brave he is.

On Sunday afternoon a banquet was given to press representatives at the Grand Central Palace. About fifty were present, including the officers of the New York Florists' Club. Short speeches were made by Messrs. W. A. Manda, P. O'Mara, W. J. Stewart, John H. Taylor and several of the representatives of the New York daily papers.

## Philadelphia.

There does not begin to be business enough to use up the supply of flowers that are being brought into this market every day. Prices, except in chrysanthemums, do not alter very much, for as the growers say, "What's the use; the stores wouldn't take any more stock; they only buy what they want, no matter what the price is, and we had better take back what is not sold than kill our market for the next day."

With 'mums it is different; their season is comparatively short, and great bargains are to be had every day if a dealer shows any inclination to buy. The best flowers are now sold for \$2 per dozen, very good ones \$1.50 to \$1, and after that so much a lot or bunch down to 25 cents for bunches containing fifty or more small flowers. Widener and Lincoln are just coming in and Mrs. C. Lippencott is about done. The last number of the FLORIST contains in the Boston notes a reference to the latter variety, speaking of it as being a "hairy yellow"; your correspondent is in error here, as this fine variety has smooth, broad petals, with none of the peculiar growth seen in the Mrs. Hardy type. Mr. Harris is in luck again, he having a new variety which can be best described by calling it a pink Ivory, it being identical with this variety in every respect, excepting color, which is a shade darker than Ada Spaulding. Roses are very plentiful, as are all other flowers, and prices remain the same as last week. Roman hyacinths are in, Caspar Pennock having the first, while the first paper white narcissus were sent in by S. Edwards of Bridgeton, they being \$4 per hundred.

The chrysanthemum show promises to be a grand success, the only drawback being that the Armory building will not be near large enough to contain the various collections. The entries in all the departments are very large and the committee of arrangements will certainly have their hands full before everything is arranged satisfactorily.

Mr. Heebner, connected with the Market street National Bank, who bought in the personal property at the time of the LaRoche & Stahl sale has turned this property into a stock concern, called the LaRoche & Stahl Flower Co., Limited. The partners in the company are S. Y. Heebner and Messrs. LaRoche & Stahl, the capital being the personal property contributed by Mr. Heebner, which is estimated to be worth \$2,000, and to which sum only the company holds itself liable.

It is all very well to be ambitious, but it must be kept within bounds; Pennock Brothers were so ambitious to have a large wagon that when it was brought to the stable it would not go in the door, and the floor had to be lowered to effect an entrance.

Sunday the 12th inst., under direction of John Westcott the boys gathered at the Armory where the exhibition is to be held, and soon transformed the interior and changed its war-like appearance. Autumn boughs, laurel branches, spruce, laurel wreathing and wild smilax were the principal greens used. The cut flowers will be arranged on tables down stairs in the parlors, while the plants will be placed in the hall ways and the drillroom in the second story.

W. J. Baker and his team having defeated the Kift faction three matches in succession a new deal was made and Messrs. Brown and Crawford are to captain two teams.

K.

Boston.

As the time for the shows approaches, chrysanthemums are coming in in increasing quantities and finer quality. In former years it has been urged as a reason for not exhibiting, that fine blooms would bring more money in the market than the value of any prizes which they might win at an exhibition. This view is not likely to be advanced this present season unless a very great and most improbable change should develop soon, for so far fancy prices have no existence. Roses, carnations and violets are still as reported last week, in over supply with little prospect of immediate improvement.

About a dozen gentlemen representing the various working committees of the Massachusetts Horticultural Society visited some of the Wellesley private gardens on Friday. They found Mr. Hatfield and Mr. Coles, gardeners to Messrs. Walter and Arthur Hunnewell respectively keeping a good natured eye on each other's specimen plants which are to be entered in competition at the coming Boston show. Both collections are a credit to their growers. Mr. Hatfield has a number of promising seedlings and some of last year's novelties are showing up in fine form.

At Mr. H. H. Hunnewell's, Mr. Harris has the conservatory filled with a brilliant grouping of chrysanthemums. There is also a magnificent show of Cattleya labiata and other seasonable orchids. Lælias and winter blooming cattleyas are just bristling with buds. The rhododendrons have made a good growth the past season and are unusually well set with buds for next spring.

The chrysanthemums at Waban Conservatories are wonderfully fine. As they will be heard from in the report of the Boston exhibition a description of the best varieties is unnecessary here. Mr. Montgomery has located one cause of the trouble with Golden Wedding, which is doing so poorly with most of our growers, in a minute white insect which infests the underside of the leaves and has never been seen here before. The Mermet and Bride houses have never been in finer condition here than at the present time.

Joseph Tailby has several promising seedling carnations. One white one which he has named Wellesley is a fine high-centered flower in the way of Lizzie McGowan but larger and more regularly formed than that popular variety.

Elijah Wood has gone to Chicago and Denver, where he has been invited to act as a judge at the chrysanthemum shows in those cities.

Mr. G. L. Grant, of Chicago favored us with a short visit last week.

W. H. Elliott's new asparagus house is thirty-three feet in height.

The Gardeners' and Florists' Club has elected officers for the ensuing year as follows: P. Welch, president; W. H. Elliott, vice-president; L. H. Foster, secretary; Edward Hatch, treasurer; Executive Committee: W. J. Martin, Geo. A. Sutherland, John Walsh, J. A. Carroll.

Thompsonville, Conn.

Robert McCrone, the veteran florist and gardener who died here on October 30, was a most eccentric character and has been for years one of the best known men in the Connecticut valley. Notwithstanding his peculiarities, he was highly respected by all who knew him and beloved for his many estimable qualities of mind and heart by every one with whom he came in contact. His cheerfulness in adversity was well illustrated at the time of the great blizzard, which wrecked his houses and brought him face to face with conditions which would have completely discouraged many a younger man, but not a word of complaint passed his lips. His age was 73.

BROOKLYN, N. Y.—Chas. Krombach is holding a chrysanthemum show of his own at his greenhouses on 9th avenue. He inaugurated the exhibition November 1 and will continue it till the 12th.

The Seed Trade.

AM. SEED TRADE ASSOCIATION.

W. ATLEE BURPEE, Philadelphia, president; A. L. DICK, secretary and treasurer, 116 Chambers street, New York. Next annual meeting second Tuesday in June, (will probably be held in Toronto.)

THE WEAKNESS in price of yellow and red onion seed which developed at the close of last season seems to have its influence on the opening market this fall; besides there are a number of odd lots afloat of unknown or uncertain pedigree, or of crop of 1892, which can only be unloaded at a cut rate; it is doubtful if large holders of best stocks desire to maintain stiff prices for the benefit of others, at the same time it is believed that the total supply of onion seed is less than in fall of 1892.

Harrisburg, Pa.

The funeral of the late Archibald Graham took place on October 27. There was a large assembly of friends and neighbors, including many of his fellow florists and gardeners, six of whom officiated as pall bearers.

The Melrose Seed & Floral Co. have opened a new store at 32 South Third street. The firm is composed of Mr. and Mrs. W. E. Machlin.

DETROIT, MICH.—John Breitmeyer & Sons will hold a chrysanthemum show in connection with the Midway Plaisance, Detroit Light Infantry Armory, November 14 to 18 inclusive.

HOLLY.

It is conceded that the successful delivery of perishable stock in the best condition exactly when demand is active is secured only as the result of considerable experience and close study of all the controlling conditions. During the past ten years we have studied these conditions and have the experience. We have faith that we can supply "First-Class Stock on Time," and to prove our faith by our works, on all orders given us **in season, we will Guarantee arrival** or no pay. We attempt no competition in price with stock which has never yet arrived, or—arrived after Xmas.

"A Case of Holly in front of the store is worth four (4) on the cars."

J. C. VAUGHAN,  
New York. CHICAGO.

When writing mention the AMERICAN FLORIST.

Toronto.

There will be at least two exhibitors of cut chrysanthemums from this city at the World's Fair viz: Mr. A. J. Watkins, Superintendent of the Horticultural Gardens and Mr. J. H. Dunlop, and probably one or two more. Mr. Dunlop has a magnificent lot to pick from, a batch of Vivand-Morel being especially noticeable for size and beauty. Wanamaker and Golden Wedding are also in fine form.

The show of seedlings at the exhibition here on the 21st promises to exceed expectations; one prominent grower says that he expects to make a better show here than at any of the earlier ones.

"Chrysanthemum weddings" are quite fashionable now; this is encouraging, and shows that the Gardeners' and Florists' Association has not lived in vain.

Mr. George Vair leaves for a visit to Chicago and the World's Fair Chrysanthemum Show on Sunday evening (12th). E.

Pittsfield, Mass.

The second annual exhibition of the Berkshire Florists' and Gardeners' Club was held at Pittsfield during the past week. The exhibition was in size and quality decidedly ahead of that of last year, and the gardeners of the various fine private estates in the neighborhood showed that they are no novices in the line of chrysanthemum culture.

## CARNATIONS.

I have fourteen houses planted to carnations, and they are under my special care and supervision so that I can guarantee every cutting sent out.

If you will kindly write to me stating what varieties you want, how many of each, and when they are to be delivered, I will give you figures and think we can make a deal.

**ANNIE PIXLEY**.—This is a new pink, and one that you want to try; it is one of those beautiful light pinks, just the proper color. The stems can be cut fifteen to twenty inches long, the calyx never bursts, and it is such a strong grower and free bloomer that you can't help but make money if you plant it.

Orders will be filled in rotation, beginning now. Price per 100, \$12.00; per 1000, \$100.00. Twenty-five at 100 rate, 250 at 1000 rates.

Samples of any stock free. Terms absolutely cash with the order or C. O. D.

## PANSIES.

I will have good little plants right along until April 1st. The strain is good, extra good, and the price is very low, quality considered. Per 100, 75c; per 500, \$3.00, free delivery; per 1000, \$5.00, you to pay the delivery.

## GERANIUMS.

Rooted Cuttings, all first-class varieties and good bedders. Price, in mixture, \$10.00 per 1000; \$1.50 per 100. In separate colors, \$12.00 per 1000, or \$2.00 per 100. There are no medium varieties among these; all are A No. 1.

## 500,000 PANSIES

The Jennings Strain of large flowering and Fancy Pansies can be had in any quantity wanted up to Jan. 1st. They are the leading strain to-day, more being sold than any other in the market. Plants are field-grown and are very fine and stocky. Large, medium or small, one price 60 cts. 100 by mail; by express 1000 \$5, 5000 \$20, 10,000 \$35, and plenty of extra plants gratis to help pay express. Yellow and white in separate colors if desired, same price. Florists try this strain of pansies. There is money in it. Only small plants by mail.

**PANSY SEED**—Pure white, yellow, or mixed, \$1.00 per packet of 2500 seeds.

**4,000 fine field-grown CARNATIONS**, sold cheap to clear out. Send for prices.

# EXTRA HEAVY

## TWO YEAR OLD HERMOSA ROSES.

We have growing in the open ground a beautiful lot of extra heavy, two year old Hermosa Roses. The plants average 24 to 30 inches in height, bushy and strong and will make fine plants to pot up into 6 and 7-inch pots for next **SPRING SALES**. Price, \$15.00 per 100; per 1000 \$140.00.

## IMPORTED BUDDED ROSES.

Our importations of these arrive the latter part of November and promise to be very fine this season. We offer all the leading varieties as follows:

Alfred Colomb,  
Anna de Diesbach,  
Baron de Bonstettin,  
Baroness Rothschild,  
Boule de Niede,

Duke of Edinburgh,  
Fisher Holmes,  
Gen. Jacqueminot,  
Gloire de Mousseuses (Moss),  
Magna Charta.

Merveille de Lyon,  
Mons. Boncenne,  
Mrs. John Laing,  
Paul Neyron,

Prince Camille de Rohan,  
Ulrich Brunner,  
White Baroness,  
Xavier Olibo,

Alfred K. Williams,  
Blanche Moreau (Moss),  
Captain Christy,

Countess Murinais (Moss),  
Duchess of Albany,  
Earl of Dufferin,

Gloire de Margottin,  
Persian Yellow,  
Queen of Queens,

Rugosa,  
Rugosa Alba,  
Souvenir de Malmaison.

\$12.00 per 100; \$100.00 per 1000.

\$15.00 per 100.

### Gloire de Dijon. Marechal Niel.

Extra fine stock. \$20.00 per 100.

**NOW** is the time to order the above. Pot the plants as soon as received and plunge the pots into a cold frame, where they will winter at little expense. Root action will begin almost at once, and the plants will be in the best possible condition to bring into your houses at the proper time, with much better result than if potted up late in winter or early spring.

If you are in need of **PALMS, FERNS** or other **DECORATIVE STOCK** do not fail to consult our trade list. We have forty houses filled with this class of plants, all in the best possible condition for immediate sales.

## Buffalo.

Chrysanthemum lore is heard now on all sides, and the demand for them is about as good as last year. Although the writer has been cautioned several times within a few days by good patrons to be careful, "don't grow many," "they are going out of fashion," "no perfume," etc., but these same good people buy them all the same. The varieties that at this writing are making the biggest show are Minnie Wanemaker, Col. W. B. Smith, Ed. Hatch, Golden Wedding, Vivian-Morel, Mrs. R. C. Ogden and Domination. The supply for the next two weeks is likely to be larger than the demand, but those who have good flowers later will, I believe, find a sale for them at paying prices. Roses, except Beauties and Me-teors, are rather too plentiful just now. Violets are in abundance. For the very finest carnations there is a demand; for poorer quality there is not much, and the market is a little overstocked.

Wise Bros., of East Aurora, N. Y., have been sending in some remarkably fine carnations, fine in every way, Daybreak with stems two feet, Tidal Wave and Grace Wilder eighteen inches. These are exact measurements and no guess work.

As there is no "mum" show in this city this year several of our stores are very gay with chrysanthemum plants, and from what is seen in some other cities our plants can be classed as good.

Mr. Peter Crow, of Utica, stopped here on his return from the Golden Gate and New Orleans trip. He has a good story to tell, and must have seen some great sights. In company with Mr. Rebstock and your correspondent the trio visited Mr. Wm. J. Palmer at his large place in Lancaster, Erie Co. They found the old gentleman home and looking wonderfully well, and so was the place. They have been cutting great crops of A1 roses; at the present time the crop is a little off. A house of violets 150x16 is looking very fine. Carnations, three or four houses were also looking well and in fine flower. Perhaps the most brilliant sight just now is a bed of "mums," W. H. Lincoln, about 100x8 feet; a grander looking lot I never saw.

There is talk of a party of Buffalo boys leaving here for New York City the middle of the week. It is to be hoped they will go and bring back reports of the new wonders. W. Scott sent seven large cases of plants to the Chicago show last week.

W. S.

ASPARAGUS PLUMOSUS NANUS, good plants, from 4-inch pots . . . . . \$20 per 100  
 ASPIDISTRA, variegated. A few fine plants, 5 and 6-inch pots . . . . . \$4 per dozen  
 CLIVIA, from fine new European varieties, young plants, 4-inch pots . . . . . \$2 per dozen  
 EUCHARIS GRANDIFLORA, bulbs 5 to 6 in. circ., with healthy leaves. . . . . \$3 per dozen  
 EULALIA UNIVITTATA . . . . . \$2 per 100; \$15 per 1000  
 ARUNDO DONAX, variegated, strong roots, \$2 per dozen. . . . . \$15 per 100  
 IRIS GERMANICA, a fine pure white sort, perfectly hardy . . . . . \$10 per 100  
 PAEONIES, double white and double pink, two of the best, mixed . . . . . \$12 per 100  
 Any of the above will be sent on receipt of price with order.

The Cut Flower Worker's Friend. Fine book  
of 160 pages. Send **\$3.50** for it, to  
J. HORACE McFARLAND, Harrisburg, Pa.

Chicago.

Mr. Ed. Jansen, of New York, has been in the city for the last two weeks packing up his World's Fair exhibit. He will leave for home this week.

Mr. E. A. Wood will go from here to Denver, where he will act as judge at the exhibition of the Denver Florist Club.

The flower market continues fair; the show has certainly increased the sale of big specimen chrysanthemums, but roses are at a discount. Fine Beauties are sold for \$3 a dozen, and grade from that down to \$1.50; Meteors continue to sell, but the rank and file of the roses do not sell. Some extra quality specimen blooms of chrysanthemums, Sunderbruch and Domination, have sold as high as \$6 a dozen, and they grade down from this to anything the dealer can get for the poor flowers. Dull colors will not sell at any price, and the public taste is very critical in pinks, whites and yellows having the preference. Odd tints of amaranth, crimson and bronze are really unsalable.

Romans have made their appearance, and bring \$4, the stock is pretty good. Valley still keeps at \$5, and violets are eagerly bought up at \$1.50. Some of the variety Lady H. Campbell were fine, and received with favor. Carnations do not go very fast, except in fancy stock.

H. Harmon, secretary of the South Park Board for 22 years, died on the 3d inst. and was buried last Sunday. He was a most estimable gentleman and his death will be seriously felt by those who have been so long associated with him in the direction of the business affairs of the South Park system. Superintendent Fred Kanst pays the deceased a high tribute and feels the loss keenly.

The banquet to be given this Thursday evening by the Chicago Florist Club to the visitors in attendance at the World's Fair Chrysanthemum Show promises to be a most enjoyable affair. A full report will appear next week.

# BEGONIA SEMPERFLORENS ROSEA.

## The True Ever-Blooming Species.

Blooms to perfection every day in the year. If you have any use for extra fine cut Flowers or the best bedding, basket, vase, pot, market and the quickest growing, quickest selling and abundant blooming winter plant, Begonia Semperflorens Rosea fills the bill to perfection. (Do not confound this valuable plant with B. S. Gigantea or Vernon, they are in no way to be compared to it). It will give the greatest satisfaction to customers and profit to the dealers. We have plants that are a mass of fine blooms, having bloomed every day since May 1st, 1892; at this date (October 21) they are blooming outdoors splendidly. I offer a limited number of extra stock, well branched plants at following low rates till December 1st only; after that date 20 per cent must be added to present prices. Plants will be sent C. O. D. if desired, but very liberal additions will be made to all cash orders.

BAY STATE HARDWARE CO.,  
272 Freeport Street, BOSTON, MASS.

Baltimore.

Much talk has been caused in gardening circles by two articles that appeared in the columns of the daily press during the past week; the first being a statement of the reasons why Mr. Jno. Donn had left the Gardeners' Club and started a rival chrysanthemum show, and the next an article giving the affair from the standpoint of the Gardener's Club. As usual in such cases, the result is the public is convinced that there is a good deal of ill feeling but otherwise there seems to be little gained by this raking up of an old affair. In fact the setting up of open hostility instead of smothered and secret animosity is the only advantage possible, where the public regard the whole affair as considerable of a joke, and if they go to one show will probably consider that enough, as friends of Mr. Donn will consider his the best and anything else superfluous, while friends of the members think the other a small and insignificant matter, scarcely worth taking notice of.

Mr. Donn is admitted by all to have some superb plants, and it is a pity that any considerations other than the advancement of the love of flowers should have prevented them helping to make the show of 1893 the greatest ever held here.

Flowers are a very slow sale. "Mums" are going, but at low prices, and other flowers are in very little demand.

The prospect of betterment in the market seems slight, possibly the show may stir things up a little next week.

Mr. Wm. Fraser's new office is a dandy, and if they were not a week too late, his "mums" would be hard to beat, as it is they are very pretty plants. MACK.

## Our Illustrations.

In this issue we present five engravings of seedling chrysanthemums shown at the World's Fair Exhibition, three of them in color. The audacity of attempting to issue colored prints within nine days from time of photographing seemed at first to take the breath away from the engraver and printer, but they finally recovered themselves and by crowding things at a remarkably rapid rate of speed we have been enabled to present in this number exceedingly life-like pictures of these prize-winning varieties, adding even the color of the flowers, which means so much in a chrysanthemum, as in other florists' flowers.

Owing to the way the work was rushed in order to be used in this issue it is not as smoothly done as we would wish, but it is certainly excellent in view of the very short time allowed the printer.

The work is done by an entirely new process now made use of for the first time, all the colors being printed from the same plate. The possibilities of this process are great and we hope to be able to print many similar but better colored pictures of the kind in future issues.

The pictures tell the story better than any description and it only remains to add that Inter-Ocean is a creamy white suffused with pink, having the form of Vivian-Morel, one of its parents. All

were described in detail on page 312 of last issue.

The scale given below each engraving will give an exact idea of the size of the flowers illustrated. The comparative size has been preserved as in the pictures in last issue, except in the case of the white California variety, which is given full life-size.

## THE EXHIBITIONS.

### The World's Fair Show.

The "Queen of Autumn" has descended from the throne erected in the Art Institute, Chicago, and her World's Fair court reception is over. During the nine days 17,531 of her subjects paid her homage, and incidentally a half dollar at the box office, while several thousand others held special invitations that were not passed upon by the ticket seller. The only thing to regret is the extremely unfavorable weather that prevailed from Wednesday to the close. From the opening, Saturday, till Wednesday the attendance steadily increased, but on the latter day a drizzling rain set in, followed by a dense fog, the like of which had never before been seen in this section within the memory of the oldest inhabitant. This continued Thursday. On Friday it was clearer, though far from what was to be desired, and the attendance began to climb again. Saturday was about the same as Friday, but Sunday was the most unpleasant day conceivable. A cold rain fell steadily all day and the wonder is that even 500 people found the show such an attraction as to lead them to brave the elements to get there. Under these circumstances the attendance was certainly most gratifying, especially as all premiums and other expenses were covered by the receipts and there will be even a fair surplus. The total receipts from admissions were \$8,765.50.

While there was of course room for criticism the show was undoubtedly a grand success from every point of view, for this is the universal verdict of every trade visitor familiar with exhibitions, and that it was national in character is shown by the many states represented by exhibits. Indeed one award was made to a firm in England. This was for the new chrysanthemum Charles Davis, which was grown here for the English firm and shown in their name, and the variety has not yet been disseminated either here or abroad. In view of this entry and those from Canada the show may be said to have been international. All praise to the men who conceived and carried to a successful issue this grand exhibition, and to Robert Craig, of Philadelphia, most credit is due, and he was ably seconded by Messrs. James Dean, New York; E. G. Hill, Richmond, Ind.; W. H. Chadwick, J. T. Anthony, J. C. Vaughan, W. C. Egan, J. A. Pettigrew and O. P. Bassett, Chicago.

Among visitors at the exhibition who came late or were not mentioned last

week were Aug. S. Swanson, St. Paul; E. Suder, Toledo, O.; J. M. Gasser and wife, Cleveland; Mrs. E. G. Wilson, Cleveland; E. Haentze, Fond du Lac, Wis.; F. L. Bills and wife, Davenport, Ia.; W. A. Harkett, Dubuque, Ia.; Sam W. Raymond, Jr., and sister, Ottawa, Ill.; F. P. Dilger, Milwaukee.

The absence of President W. R. Smith from the exhibition was much regretted. He was very active in furthering the project when first proposed and expected to have seen it through, but shortly before the date of opening he received an injury through a slight fall while stepping over a railing at the Fair that made it wise for him to at once return home.

### MISCELLANEOUS AWARDS, THURSDAY.

The competition in the rose classes was much the same as on previous days. O. P. Bassett was first with American Beauty, American Belle, Mme. Caroline Testout, Meteor and Perle des Jardins; second for La France. C. A. Samuelson was first for Bridesmaid, Catherine Mermet and La France. Peter Reinberg was first for Papa Gontier and any other variety; second for Mme. Caroline Testout and Meteor. G. W. Currey & Son, Nashville, Tenn., was second for Mme. Cusin, Perle des Jardins and Papa Gontier. Oakwood Rose Gardens, Oil City, Pa., received a special prize for Brides, the flowers being exceedingly fine specimens.

For the best 50 blooms of white carnations first prize went to Stollery Bros., Argyle Park, Ill.; second to Geo. Reinberg, who also received second for best 50 pink, the first going to the Art Floral Company.

For best 100 violets, blue, first prize went to Thos. De Voy, Poughkeepsie, N. Y.; second to O. J. Friedman, Chicago, who received first for 200 lily of the valley.

### THE BANQUET.

The Chrysanthemum Show banquet of the Chicago Florist Club was held at the club rooms, 45 Lake street, last Thursday evening, and was a most enjoyable affair. Some sixty members and visitors were present and were seated at a long table with a smaller round one at one end, liberally decorated with flowers, while the benches along the wall parallel to the table bore numerous arrangements of plants and foliage that were very effective as a background to the scene of gay diners at the table. The supper was excellent and well served, and with the advent of the coffee and cigars President P. J. Hauswirth, who presided, presented Mr. G. L. Grant as toast-master of the evening.

The first toast was to the New York Florist Club, and Mr. Jas. Dean of that city was called upon to respond. Mr. Dean was received with long continued applause and responded in a very pleasant speech, in which he expressed much gratitude at the warm reception that had been given him and the friendly feeling displayed toward the Florist Club of the metropolis. He spoke in glowing terms of the exhibition then in progress in this city, and said that he hoped to see it bettered next year by the Chicago florists alone. Mr. Dean was obliged to leave at 11 o'clock in order to take the 11:30 p. m. train for the east, which was much regretted by the others present.

The next toast was "The influence of exhibitions upon commercial floriculture," and Mr. Robt. Craig, of Philadelphia, was called upon to respond. Mr. Craig reviewed the history of exhibitions in this country, and pointed out clearly the great effect they had had in the remark-

able progress of the trade in the last ten or fifteen years. And he predicted that the effect would be more and more potent as the exhibitions were improved and made more popular with the general public. He rejoiced over the success of the great exhibition at the Art Institute, and believed that it would give floriculture in this city particularly a very strong impetus. He spoke of the many difficulties that the managers of the exhibition had labored under through the necessarily sudden change of location, and paid a high tribute to the Chicago push and energy that made it possible to attain success in the face of such obstacles. He described the committee in charge as being one day completely intoxicated with enthusiasm, and then after the sad occurrence that threw a gloom upon the closing days of the Fair and changed all their plans, being in utter despair. But within an hour the recovery had come, all went to work with a will, the new location was secured and the exhibition had met with final success.

In response to a toast to the Horticultural Society of Chicago President W. H. Chadwick acknowledged the compliment to the Horticultural Society and returned thanks on its behalf to the florists who had joined hands with it and made the various exhibitions given under its auspices such grand successes. He felt that the society owed its whole life to the florists of the city, as from them came not only the exhibitors but the real active workers in the carrying out of the details of the exhibitions. He felt particularly gratified at the success which had followed the efforts of the society, in conjunction with the other gentlemen who had backed the affair financially, in making this truly a World's Fair exhibition, with entries from the Atlantic to the Pacific and from Canada to New Orleans. He felt it a great honor for the Horticultural Society of Chicago to take the prominent part it had in an exhibition of such widespread interest to all lovers of flowers in America.

A toast to the Florist Club of Philadelphia was responded to by Mr. Edwin Lonsdale of that city in a few words, expressing his great appreciation of the courtesy to his club and of the privilege he had had of viewing the World's Fair Chrysanthemum Show and meeting the many pleasant gentlemen he had come into contact with while here. His remarks were so brief that the toast-master refused to allow him to take his seat without first singing his famous song "The brave old Duke of York," which he then rendered in his own inimitable style with appropriate interruptions by Mr. E. A. Wood, who sat beside him. Everybody joined in the chorus and at the conclusion gave the singer the tumultuous applause that always follows this song when sung by Mr. L.

The Gardeners' and Florists' Club of Boston was then toasted, and Mr. E. A. Wood of that club responded in a felicitous address interspersed with humorous references to his experience in judging at exhibitions, and the trouble he had getting along amicably with his associate, Mr. Lonsdale, who sat beside him. During the course of his remarks there were several humorous passages at arms between them that furnished much amusement to the others at the table. In introducing him to the company the toast-master had related how he had met Mr. Wood in Washington in the street wearing a long bean pod pinned to his coat as a Boston badge. Referring to the bean Mr. Wood wished it distinctly understood that it did not grow in Bos-

CHRYSANTHEMUM CHALLENGE

ton. He admitted that the luscious bean was freely eaten there, but notwithstanding the popular idea to the contrary Boston was not the center of production of the aforesaid edible. In response to a special request Mr. Wood concluded his remarks by singing a sleighing song, "Jingle Bells," using a couple of glasses for bells, which example was imitated by all the others in the chorus with grand effect.

Mr. E. G. Hill, of Richmond, Ind., was not feeling very well and begged to be excused early in the evening, but later on his enthusiasm arose, and in response to a call he attempted to tell the boys how to grow \$100 prize seedlings. He was greeted with applause, and after some humorous reference to the prize winners he said a few words regarding the grandness of the exhibition in progress and expressed his great gratification that it had been such a success in spite of the obstacles that had continually presented themselves.

Mr. Burt Eddy, of Chicago, introduced as the only original Sir John Falstaff stepped out from the pages of Shakespeare for the special edification of the people of the present century, favored the company by reciting the well known poem of Oliver Wendell Holmes entitled "The old man

dreams." It was delivered with grand effect and received with long continued applause, and in response to a recall he gave a humorous sketch of an old parson at a camp meeting, which was likewise very effectually delivered and which brought down the house.

Mr. J. C. Vaughan then responded to a call and paid a glowing tribute to those who had come to Chicago to make the World's Fair and the chrysanthemum show the grand success that it was. He felt that Chicago owed a very great deal to those in the trade in the other cities for the grand work that they had done and that Chicago florists had been exceedingly fortunate in having this opportunity to be brought into personal contact with the distinguished members of the trade, who had been here most of the summer.

Messrs. A. C. Brown, of Springfield, Ill., and J. M. Gasser, of Cleveland, O., also made brief addresses.

Others present from a distance were M. A. Hunt, Terre Haute, Ind.; Judson Kramer, Marion, Ia.; E. Suder, Toledo, O.; W. C. Craig, Philadelphia; L. Schiller, Berlin, Germany; O. Tomiyami, Japan.

Among local members present, and not previously mentioned, were J. A. Pettigrew, Frederick Kanst, O. P. Bassett,

Jas. I. Donlan, H. Holzapfel, Jr., J. B. Deamud, Chas. McKellar, Walter Kreitling, Hubert Maas, E. Buettner, J. T. Anthony, E. Wienhoeber, J. F. Kidwell, Geo. W. Miller, C. Stromback, P. Neiglick, W. Kirkham, J. Gormley, W. J. Smyth, T. J. Corbrey, and others.

The event closed by all joining hands, and led by Mr. Craig, singing Auld Lang Syne, when the company dispersed, all voting the evening one long to be remembered.

#### THE TABLE DECORATIONS.

Friday was finally settled upon for the competitive display of table decorations. This was unusually interesting; ten exhibitors competed, and their displays were, without exception, beyond the usual average. The judges were five ladies well known in Chicago society.

The three prizes were all awarded to Chicago florists. The first (\$100) went to C. A. Samuelson for a decoration of American Beauties. The table was round; in the center was a tall trumpet shaped glass vase filled with the roses; long stemmed Beauties, heads outward, lay in a radiating circle around the vase, on a bed of ferns. Although this received the first prize the towering vase, beautiful in its place, but too topheavy for a

dinner table, was not generally admired.

The second prize (\$75) went to Joseph Curran for an arrangement of orchids. This was a rectangular table, having in the center an oval rustic holder filled with *Vanda Phalaenopsis* and *Cypripedium* insignis, with adiantums. The favors for the ladies were *Cattleya Trianae* and for the gentlemen *Cypripedium Spicerianum*. This was a very attractive table, and it was entirely free from overcrowding, a defect evident in several other cases.

The third prize (\$50) went to P. J. Hauswirth; his table was regarded by the judges as so even with Mr. Curran's that it was only after repeated ballots that they arrived at a decision. Mr. Hauswirth's table was round; in the center was a plateau of *Cattleya Trianae* and *Adiantum Farleyense*. This stood upon a circular mirror, bordered with adiantums interspersed with a few croton leaves. To our mind it was the richest table in the hall, though it would have been improved had the orchids been given a little more elevation above the ferns.

A third orchid arrangement was shown by O. J. Friedman. In the center was a glass bowl filled with cattleyas and *Vanda coerulea*; four smaller bowls stood around it, filled with similar flowers, while sprays of orchids upon asparagus were laid upon the table. Sprays of lily of the valley, with the name of the guests painted upon the leaves, were put at each plate, and lily of the valley formed the favors.

Roses appeared as chief feature on two tables only, the first prize being one, the other a very pretty arrangement of *La France* and *Adiantum Farleyense* by Gallagher. This was a round table, having in the center a circular plateau of roses and ferns, while around it were specimen glasses containing roses for the favors. It was a very dainty table, and very well arranged.

Owing to the fact that several of the designers of chrysanthemum tables were not aware that other flowers were admissible, this change having been made at a late date, a special class was made for their benefit, and the first prize, a Columbian medal, went to J. M. Gasser, of Cleveland, for his yellow table; the second to Mrs. Ella G. Wilson, also of Cleveland, for the table arranged in white and silver.

Mr. Gasser's table had for its center piece a long low plateau of yellow chrysanthemums; at one end was a vase of white chrysanthemums, at the other white candelabra. This was really very handsome.

At its side was another table of similar shape; in the center was a tall trumpet shaped vase filled with pink chrysanthemums, arranged with perfect grace; this stood on a diamond shaped mirror, bordered with adiantum studded with Mrs. Hardy chrysanthemums and lily of the valley. This was the work of Aug. S. Swanson, of St. Paul. The favors were valley and chrysanthemums.

A pretty little table in the south hall had a center plateau of pale pink and white chrysanthemums, with lily of the valley in the center; the favors were valley, tied with pink satin ribbon, and the candelabra were decorated with adiantum. It was very dainty, but the decorator had made the serious error of gilding some of the *Farleyense* fronds, giving a meretricious look.

The second prize chrysanthemum table was large and circular. In the center was a tall trumpet shaped vase of sea green glass filled with *The Queen* chrys-

anthemums. Surrounding this, but at some distance from it, was a drapery of silver gauze, with white chrysanthemums caught here and there in its irregular folds. The favors were white chrysanthemums and ferns. The silver candelabra were decorated with ferns. This table was extremely dainty, and the soft tints of green, white and silver were refreshing and artistic, but there was too much millinery about it, and the accessories confused its values.

The remaining table was decorated by Walter Kreitling for a masculine dinner; in the center was a circular mirror, a mimic lake, surrounded by a border of ferns and violets. At one side was a bank of ferns, and on this was a large and corpulent turtle, wearing an ivy leaf shell and violet legs. Vases of *La France* stood around this and the favors were violets and *La France*, tied with pink ribbon.

Taken as a whole the display was a very educational one. We secured photographs of seven of the tables from which we expect to have engravings for our next issue, and in that number we shall give a careful review of each table illustrated, commending and criticising from our point of view.

On Friday there was another competition in roses in which W. A. Kennedy, Lake Forest, Ill., won first on Bridesmaid and Gontier; Anchorage Rose Co., Anchorage, Ky., on Mermet; C. A. Samuelson, Chicago, on Meteor, Perle and any other variety; Oakwood Rose Gardens, Oil City, Pa., special for Brides.

#### FOR AMATEURS ONLY—FRIDAY.

Medal for best general display of cut chrysanthemums was taken by Mr. Zimmerman, gardener to A. Schoeninger, Chicago. Medal for best 48 varieties cut blooms one of a kind was taken by D. M. Baker, Adrian, Mich. Also to D. M. Baker for best vase of 50 blooms.

#### THE BASKETS—SATURDAY.

The special feature for Saturday was a competition in arrangement of basket of flowers and there were six entries.

First prize, a Columbian medal, was taken by J. M. Gasser, Cleveland, with a beautifully arranged round handle basket of Brides and Bridesmaids, the colors very artistically blended, a tastefully arranged spray of the roses tied on the handle by a sash of wide white ribbon.

Second prize, \$25, was awarded to Mrs. E. G. Wilson, Cleveland, for a very gracefully arranged square handle basket of Meteors, Brides and Perles. The colors were nicely blended, and at the end where the Meteors were the flowers were carried up and over the handle terminating in a spray.

Third prize, \$15, went to the Art Floral Co., Chicago, for an oval handle basket of Meteors and Perles; the arrangement was fairly good but rather lacked in grace.

C. A. Samuelson, Chicago, showed an oval handle basket of Meteors. But on the handle was tied a sash of ribbon just enough off from the Meteor shade to spoil the color harmony.

Albert Fuchs, Chicago, entered a round cornered square basket of *La France* roses, the attempt in the arrangement evidently being to give the impression that some of the flowers had fallen and others were falling from the basket. The conception was good but the execution lacked artistic finish.

The entry by O. J. Friedman, Chicago, was more of an urn than a basket. It was filled with American Beauties and the arrangement was good, though perhaps a trifle lacking in grace at the top.

On Saturday a medal was awarded to J. T. Anthony for display of miscellaneous cut flowers and filled ornamental fern pans.

#### THE VASES—LAST DAY.

On Saturday it was announced that a special feature for Sunday—the last day—would be a contest in arrangement of vases of chrysanthemums, with prizes of \$40, \$30 and \$20. In spite of the short notice there were eight vases entered and the display was a superb one. It is a shame that they were seen by so few people, the steady downpour of rain all day and evening making the attendance the smallest of any day of the exhibition. But the florists were there and it was an extremely educational contest to them.

A most excellent feature was a written report by the judges, Messrs. E. A. Wood and Edwin Lonsdale, from which we make full extracts below.

The winner of the first prize was a large vase of chrysanthemums of mixed colors arranged by Mrs. E. G. Wilson, of Cleveland, ferns and asparagus being used among the flowers. In their report the judges said: "A very beautifully arranged vase showing artistic merit. The blooms are of A1 quality clothed with beautiful foliage and are so arranged that their good qualities are all made prominent and are not at all bunched. It only lacks a little bright color. The base is well balanced, of symmetrical form and adapted for all purposes where a vase of this style is desired."

The second prize was awarded to J. M. Gasser, also of Cleveland, for a superb vase of *The Queen* and *Jerome* Jones interspersed with asparagus, adiantums and other ferns. A beautiful feature was the carrying of the flowers down one side in such a graceful way as to create an exceedingly artistic effect. To our mind this was decidedly the most artistic piece of work shown during the entire exhibition, and we much regret that the day was so dark we could not secure a photograph of it for illustration. Following is the report of the judges: "Very artistically arranged, flowers of very good quality, but contains some poor specimens and not adapted for all things. A beautiful vase to place in a corner or against the wall, but not at all adapted for center of hall or any location where it must be viewed from all sides."

Third went to M. F. Gallagher, Chicago, for a vase of mixed colors on very long stems and the flowers widely spread apart, asparagus being used as additional green. Upon this the judges reported as follows: "A very well arranged vase, the flowers of good quality. The foliage is quite clean, of good color but arranged so that it looks heavy. The effect that the *Asparagus plumosus* should bring out is thereby entirely lost. It lacks artistic finish, many of the flowers of different colors being bunched, many large open spaces being observed. Is not as well finished at the base as some of the others shown."

Following we give the judges' report upon the other entries: Vase arranged by P. J. Hauswirth, Chicago.—"What would have been a pretty combination of pink and white is marred by the introduction of some blooms of purple tint placed in too close proximity to the shell pink. The vase lacks symmetry, is not carried high enough and the blooms fall away from the center."

Vase arranged by Walter Kreitling, Chicago.—"A vase of very fine blooms and of good conception, but lacks artistic finish, the symmetry seems to be entirely

Scale  
1 foot.

CHRYSANthemum EUGENE DAILLELOUZE.

lost, for from whatever side it is viewed it appears angular. The flowers are badly bunched."

Vase arranged by C. A. Samuelson, Chicago.—"A vase of fine yellow blooms not artistically arranged and lacking symmetry. Flowers in many places being bunched, losing thereby their individuality and gaping holes in others, showing foliage dull in color. It also is not arranged for all purposes and can not be placed in a position where it would be viewed from all sides. This vase is not finished at all at the base."

Second entry by P. J. Hauswirth, Chicago.—"The judges are of the opinion that this vase would have been more effective if one shade of yellow had been used. The quality of the blooms is very irregular, some very fine blooms and others of inferior quality, and badly bunched in some places. The vase lacks symmetry and also shows some large vacant places."

Second entry by M. F. Gallagher, Chicago.—"This vase contains blooms of third rate quality and lacks style and finish, and is not considered a worthy exhibit for such a large premium."

It seems to us that a good thing to consider in connection with the offering of future prizes for best arranged vases is, how much value shall be given to quality of flowers as against skill in arrangement. While quality of flowers is certainly very desirable, and up to a certain point, essential, still we are of the opinion that much more value should be given for skill than for quality of flowers. The greatest artist is the man or woman who can take inferior material and by the exercise of taste and skill create an artistic effect, and we believe that the needed stimulation to such talent can best be supplied by so framing premium offers at exhibitions as to make the contests as nearly as possible those of skill alone.

In this connection we point to the sig-

nificant fact that in the judgment of the ladies who made the awards on table decorations the greatest fault of nearly all the entries was overcrowding and the too free use of material, showing that from their point of view the value of artistic simplicity was not well understood by the competitors. We shall go deeper into this important subject in our next issue.

PAID ADMISSIONS.

## New York.

The exhibition of seedlings at the chrysanthemum show on Wednesday was one of the most interesting features of the week. Much surprise was expressed, however, that the number of new varieties showing any very decided advance on existing kinds should be so small. The variety taking first prize in yellows was Eugene Dailedouze, shown by E. G. Hill & Co. This has all the requirements of a first class flower. It is a large incurved, rich golden yellow, good depth and substance, immense petals, and in foliage, stem and shape is simply perfect.

E. G. Hill & Co. also took first premium for any variety exhibited prior to 1893 but not yet in commerce with another grand yellow named Challenge. This in style and shape resembles Ed. Hatch. The color is similar to that of Eugene Dailedouze and stem and foliage are grand. It is undoubtedly one of the best novelties of the year. A certificate was awarded to Hill & Co. for Butterfly. This is an amber bronze, much in the style of Harry May but broader and flatter. Other varieties worthy of note, by the same exhibitors, were Louise D. Black, a magnificent mammoth Chinese, light pink on reverse and deep pink on inside of petal, and Beau Ideal, a soft pink slightly incurved flower with beautiful broad petals.

To J. N. May was awarded a certificate of merit for Minerva, a grand flower of great depth, which when not too far developed is much like a large Ivory, color canary yellow. The foliage and stem perfect. Mr. May also took the prize offered for the best seedling of any color with Pearl, a variety much resembling Ed. Hatch, but with better stem and foliage. Mr. May's Pink Pearl of last year, now renamed Wm. Simpson, a very large, loose incurved pearly pink with finest stem and foliage, was also certificated.

"Pitcher & Manda," the parti-colored variety described in our notes on Pitcher & Manda's exhibition two weeks ago was awarded a certificate of merit. This is one of the most striking novelties.

H. F. Spaulding received a certificate for a variety named Miss Helen Bloodgood, which is of a rich pink never before equalled. In shape it is somewhat like Domination, rather loose petaled, however. There is a slight touch of hairy protuberance. The foliage appears a little weak. Judge Benedict, by the same exhibitor, is a fine canary yellow in the way of Libbie Allen, more double and a better finished flower than that variety.

Thos. Jones was given a certificate for Robt. M. Grey, an apricot bronze, broader and flatter than Mrs. Alpheus Hardy and more thickly covered with down than any other chrysanthemum. It will be a valuable variety for amateurs.

A. H. Fewkes, shown by T. D. Hatfield, is a fine thing, somewhat similar to but several shades deeper than Minerva, described above. Not equal, however, in depth or center.

Mrs. E. T. Bragan, shown by A. F. Schrader, is like Minnie Wanemaker, but whiter and more double than that variety.

There were three competitors for the Actors' Fund Cup offered for the best wedding decoration, Geo. M. Stumpp, Warendorf Bros. and H. W. Wipperman, Mr. Stumpp being the lucky winner. The judges were Charles Thorley, Charles Dards and David Clark. As we expect to give illustrations of these three decorations in our next issue a detailed description of them is reserved until then, Messrs. Brower & Sons and Warendorf

Bros. were the competitors in table decoration and took first and second prizes respectively. The decorations were in each case a mound of chrysanthemum blooms, Brower's being of Ivory and Warendorf's of Harry Balsley.

In miscellaneous classes silver medals were awarded to J. N. May for rose Mrs. W. C. Whitney, to E. Koffman for a house of smilax, and to Pitcher & Manda for specimen fern *Leptopteris superba*.

The show was a success financially and the club comes out with flying colors. The greater part of the exhibits will be left to constitute a portion of the attraction at the concerts of the Imperial Austrian Band, which extend through the following week. This is a just and proper tribute on the part of the club in recognition of Mr. Mestaniz and his associates in the management of the Industrial Building. These people have been gentlemen throughout, and their treatment of the Florists' Club has been characterized by the greatest kindness and consideration, which is all the more appreciated on account of its contrast with the tyrannical Shylock management which they have encountered in the past.

Among the visitors present were Wm. Robinson, W. H. Elliott and T. D. Hatfield, from Boston; Wm. Scott and J. F. Cowell, Buffalo; Geo. E. Fancourt and W. Clark, Wilkesbarre; Mr. Huss and Mr. Thompson, Lenox; Peter Crowe, Utica; P. R. Quinlan and L. E. Marquisee, Syracuse; Mr. Eyres and Sam Goldring, Albany; B. L. Elliott, Pittsburgh; Phil. Breitmeyer, Detroit; H. Bayersdorfer, Philadelphia; W. H. Long, Boston.

Cut flower trade is improving. All are talking hopefully and prospects appear brighter. The stock of roses has shortened up somewhat and this with the increased demand has helped the situation greatly.

## Philadelphia.

The chrysanthemum show just closed was the most successful the society has ever had in almost every respect, and in the one essential, the receipts, it has broken the record. It was the intention to have continued this show for two weeks as it was thought, and we believe rightly too, that the interest shown by the public would warrant the expense. The plants were as a rule in good condition at the close of a week's campaign, and a fresh supply of cut flowers could easily be obtained, as some varieties are not at their best until a week following the usual time of the show. After the fire however, it was seen that suitable accommodations were not available and it was considered best to limit the time to one week.

Too much praise cannot be given the public press. All the daily papers gave good accounts of the show as it progressed. The *Ledger* and *Times* published whole columns and more of good matter with original illustrations, all of which contributed greatly to the success of the exhibition. Secretary Farson should come in for his share of the blame, for he worked very hard and naturally feels proud of the result. Superintendent John Westcott, and Chairman of committee of arrangements, David Bearn, were also indefatigable workers, as was Isaac Kennedy and his assistants. Everybody worked together and the result could scarcely have been otherwise than it was.

Probably the most prominent feature of the show and that which seemed to attract the most attention was the vases containing fifty chrysanthemums. We

believe that more attention should be paid to this matter in making up next year's schedule. One vase of fifty choice blooms tastefully arranged and placed so that it can be seen from all sides will make more show and attract more attention than the same lot placed in bottles singly. We do not mean to do away with displays of varieties correctly labeled, but would curtail this feature and give more room for color effects such as are produced by massing fifty fine long stemmed blooms of one kind together. The vases of Ivory, Mrs. C. Lippincott and H. Balsley and other varieties containing fifty each were truly grand, but they were not displayed as they should have been, as on account of the limited space they were placed so close together that half their beauty was lost.

The idea of having the growers and dealers stage their exhibits of roses on different days was a good one, as it insured a fresh lot of these perishable flowers each day. In the collections of cut roses these did not seem to be any advance, the quality of the stock being no better than last year. Would it not be well if premiums for vases of fifty or one hundred roses of a kind were offered? Such masses of color would certainly add to the display.

On Wednesday the first display of carnations and roses by dealers was made, Pennock Bros. and John Crawford being the only exhibitors. For roses Pennock Bros. received nine first and five second premiums and John Crawford was awarded six firsts and four seconds.

In carnations Pennock Brothers captured six firsts and two second premiums, while John Crawford was given two first and one second. The collections were all of twenty-five flowers each.

The seedlings were also passed on at this time and resulted as follows: To Wm. Jamison a silver medal for seven vases of seedlings, some of which will no doubt be heard from next year. Henry G. Surman, who raised L. C. Madeira, was given a silver medal for a variety similar to Madeira with a larger flower and the color of old gold; he thinks it will be a winner; it has been named Mrs. W. A. Reed. Wm. Boyce was also awarded a medal for his specimen of A. cuneatum. E. G. Hill of Richmond, Ind., received a certificate of merit for Mrs. Higinbotham, a very large pink loose incurved flower. Certificates of merit were also awarded to John N. May for seedling No. 333, a large yellow with fine foliage; to H. G. Surman for seedling Dr. H. M. Howe, of the Elkshorn type, pink in color, a good flower; to E. G. Hill for Eugene Dailedouze, a magnificent yellow noted before, the flowers of this variety seemed as fresh the last day of the show as they did the first; to Thos. Monaghan, for large dark rose, immense incurved, a wonder if a better color; to R. G. Carey and William Jamison for two promising seedlings; to Hugh Graham, for a pink seedling Katherine Leech, a very pretty flower. Special mention was made of Esther Heacock, a sport of Ada Spaulding, exhibited by Jos. Heacock; to Mrs. Chas. L. Sharpless, a good white, by H. Graham; also Bellevue, another good white by same grower; a seedling pink by H. G. Surman; a light daybreak pink by J. McCleary; and Robt. Owen and Dr. Wakely, English varieties exhibited by T. H. Spaulding. It is said that Robert Owen has been grown twelve inches in diameter in England.

Edwin Lonsdale was awarded a special premium for his fine collection of orchids, as was also William Joyce for his fine palms.

Scale  
1 foot.  
CHRYSANTHEMUM INTER OCEAN.

Honorable mention was made of John Shellem's seedlings in pots and of a variety similar to Viviani-Morel, exhibited by H. G. Standen.

On Thursday A. M. Herr, of Lancaster, exhibited a collection of carnations, very good flowers, among them a seedling, Annie Pixley, a very promising pink variety. Mr. Herr thinks it will be a winner. He was awarded a special premium for his display.

Robert Craig filled a table of choice chrysanthemum blooms, between the vases of which he placed neat plants of araucarias and crotons with fine effect.

The growers made their second exhibition of roses Saturday, a very fair display. The premiums were awarded as follows: T. J. Heacock, four firsts, four seconds and one special; to Hugh Graham, six firsts and three seconds; to David Cliffe, one first and one second; and to J. Welsh Young, one second and a special for three vases of carnations. A certificate of merit was given J. Kitt & Son for a mantel decoration. J. C. Gibson, of Woodbury, exhibited a new coleus called Golden Crown, which looks like a good thing. M. P. McCaffrey had a fine dish of mushrooms.

On Friday the last display of cut roses by the dealers was made, Pennock Bros., John Crawford and J. Kitt being the exhibitors. Pennock Bros. secured 12 first premiums and two seconds; J. Crawford five seconds; and J. Kitt three firsts and two seconds. K.

#### Seedlings at Boston.

Out of about forty seedling chrysanthemums exhibited the following were awarded first prizes:

Best red, Mrs. J. H. White; raised by James Wheeler.

Best white, Mutual Friend; raised by Mann Bros.

Best yellow, A. H. Fewkes; raised by T. D. Hatfield.

Best pink, Peach Bloom; raised by T. D. Hatfield.

Best any other color, Pitcher & Manda; raised by Pitcher & Manda.

Mrs. J. H. White is a large reflexed flower in the way of Mrs. A. J. Drexel but of a different color, it being as rich as Cullingfordii, but of the loose Japanese form. The flowers are borne on strong and stiff stems with ample foliage. Also awarded complimentary notice.

Mutual Friend is very large and full with broad and long drooping florets, making a very deep reflexed flower of the purest white; a fine stem and great keeping qualities. This was awarded a first-class certificate of merit.

A. H. Fewkes is a large and full flower with remarkably broad florets, recurved but not reflexed. The stem is very stout and clothed with rich green foliage. The color is a deep rich yellow throughout. Awarded a first-class certificate of merit.

Peach Bloom is a very full flower of good size borne on stiff stems. The florets are long and pointed and loosely reflexed. The color is peach blow pink.

Pitcher & Manda is a large, rather flat flower, full to the center, somewhat in the way of Wm. H. Lincoln. The color is white with centre florets a distinct yellow. It is the most distinct break seen here for several years. Awarded a first-class certificate of merit.

Other noticeable varieties were Pitcher & Manda's Dorothy Toler, a deep and full flower of great substance and stiff stem. Deep pink in color with silvery reflex. Awarded a first-class certificate of merit.

T. D. Hatfield's No. 651, a large, full flower somewhat in the way of Waban but of a soft rose pink color. Complimentary notice.

James Brydon's Portia. A large flower of very peculiar form. The florets are long and broad, incurving and lapping over each other in a very remarkable manner, appearing as though the flowers had been smoothed with the hand, turning the petals all in one direction and giving the flower a perfect globular form. Color bluish white. Complimentary notice.

T. D. Hatfield's Eiderdown, a white Kioto with stiff stems and hairy petals. [Is this the same variety T. H. Spaulding registered under same name?]

Pitcher & Manda's Mrs. Chas. Lanier, a fine incurved Japanese flower of a rich yellow, but the stem is not stout enough.

John E. Thayer's Sayonara, which was shown and certificated two weeks ago. It is a large reflexed flower in the way of Bride but light yellow in color and very early.

T. D. Hatfield's Wanlas, an incurved Japanese, flowers of large size and silvery pink in color.

E. A. Wood's Golden Hair, a fine flower of the ostrich plume type, bronzy yellow in color, but lacking in strength of stem.

Dr. H. P. Walcott showed a seedling incurved variety without name, in the way of Baron Benst, but more yellow in color with a peculiar shading.

A. H. FEWKES.

#### Indianapolis.

The seventh chrysanthemum show held by the Society of Indiana Florists opened under very auspicious circumstances Tuesday evening, Nov. 7. The fine weather, good attendance, well ordered displays and handsome decorations made every member feel that this year's exhibition would be a grand one.

Several changes in decoration and location of exhibits clothed the hall in a different dress from that of former years. Everyone on entering the hall was delighted with the general effect. In the center of the hall a liberty bell was suspended by laurel and Florida moss; below this was a miniature caravel, the "Santa Maria," made of cape flowers. The stage and gallery were effectively draped. The decorating was done by C. J. Truemper, assisted by members of the society. The center of the hall was laid out in a large circular bed of single stem chrysanthemums, pink, white and yellow, from Bertermann Bros. A good move was made by the committee in sending free tickets to all school teachers of the city schools, and many other free tickets were used for the opening evening.

In cut flowers and single stem plants a marked improvement was noticed over previous years, but in specimens very little if any improvement was noticed.

Seedlings were well represented, but only a very few were considered improvements over existing varieties. E. G. Hill's Eugene Dailedonze was the finest new yellow on exhibition, but was not entered for competition in the seedling class.

Fred Dorner & Son, Lafayette, Ind., received the prize (\$25) offered by Nathan Smith & Son for the best yellow seedling. Their winner was Major Bonaffon, a beautifully incurved globular yellow; it also received a certificate of merit. The silver cup offered by F. G. Darlington of Indianapolis for the best white seedling was won by Henry Rieman, Indianapolis. The flower is somewhat in the way of Ivory, but larger, snow white, and has the appearance of being a better shipper. Henry Rieman also won the prize (\$25) offered by E. H. Hunt of Chicago for the best pink seedling, which was afterwards named Mrs. E. H. Hunt. It is a pleasing shade of pink, slightly incurved and very double. The prize offered by the Pittsburgh Clay Mfg. Co. (\$25) for the best seedling, any color, was awarded to Henry Rieman. This was a fine flower of good form, seven inches across and six inches deep; color between cherry red and terra-cotta. This variety had perhaps the finest foliage of any at the show.

A certificate of merit was awarded to Nathan Smith & Son for a red variety similar to G. W. Childs, but a larger and more incurved flower. Many other good seedlings shown were too weak in the stem to be considered. Some of them may be useful to our English brethren, where they show them on flat boards, but weak stemmed chrysanthemums are no use here. A certificate of merit was also awarded to E. G. Hill for his new

early variety, Mrs. E. G. Hill, the flowers having been cut since October 10.

The beautiful Rockwood vase offered by J. F. Miller of Richmond, Ind., for best 20 blooms on long stem was won by E. G. Hill with a vase of Eugene Dailedonze, without question the finest vase of bloom in the show. It was an easy winner, although H. Rieman had some fine blooms too.

A life like Texas steer made of chrysanthemums was one of the centers of attraction on Thursday. A vase made principally of chrysanthemums took prize of \$15 offered by the Pettis Co. A floral harp made by A. Wiegand was much admired, receiving prize (\$25) offered by D. H. Baldwin.

Among cut chrysanthemums E. G. Hill received first for best 50, ten varieties (*Indianapolis News* special), first for ten blooms yellow, and first for ten blooms pink. Second and third prizes (*Indianapolis News* special), were taken by Henry Rieman and Bertermann Bros. respectively. Fred Dorner received second for best 10 blooms, yellow, and Bertermann Bros. for 10 blooms pink, white and any color. R. Witterstaetter took first for 10 blooms white, and G. R. Gause first for any color. Some very fine blooms were shown in these collections, prominent among them being a fine vase of H. E. Widener and Vivian-Morel in Hill's collection, and Golden Gate in G. R. Gause's collection. The Hill & Co. special (\$15) for best 15 blooms was carried off by Hill & Co. first, Fred Dorner second.

In the plants the \$100 premium for the best 10 plants was awarded to Henry Rieman, second (\$60) to Fred Dorner, third (\$40) Bertermann Bros., fourth (\$25) was divided between Hill & Co. and A. Wiegand. The best specimens in Rieman's collection were W. H. Lincoln, H. L. Sunderbruch, Irma, Ivory and Vivian-Morel.

In the class calling for two plants Bertermann Bros. received first for white and second for any other color; Rieman first for pink, second for white and yellow; Wiegand first for any other color. For single specimen Rieman received first for white and pink; Bertermann first for yellow and second for white.

For the best 50 plants, single stem, Bertermann Bros. first for pink and yellow, second for white; John Hartje, first for white; Hill, second for yellow.

Detroit Pottery Works special, best 50 single stem, 6-inch pots, first (\$15) H. Rieman; second (\$10), F. Dorner.

The special offered by C. F. Whitsett for 20 cyclamen plants was awarded to A. Wiegand, Huntington Seed Co., and W. G. Bertermann. Special prizes of \$25 and \$15 were awarded to Wm. Hack and Huckreide & Son of Indianapolis. J. C. Vaughan's special of \$20 for thirty market plants went to Huckreide & Son. In standards Bertermann Bros. were first.

Cut roses: The collections of roses were finer than ever before. M. A. Hunt, Terre Haute, Ind., received first for Meteor, Mermet and Niphetos; Chas. Wheatcroft, Indianapolis, for Perles and Brides; W. W. Coles, Kokomo, Ind., for Testout, Kaiserin Augusta Victoria, Watteville and Beauty. The Indianapolis Gas Co. special (\$20), for display of cut roses, W. W. Coles.

Cut carnations were shown in large quantities; some fine vases were shown by Fred Dorner & Son, including Mme. Diaz Albertini, The Stuart, perhaps the finest scarlet ever seen here; Uncle John, the ideal white, and Wm. Scott. Peter

Herb of Mt. Healthy, O., showed a new seedling named Adelaide H. Kresken. This is a very fine variety, large, being three inches across, dark pink, with perfect calyx and long stiff stems. This variety won the \$15 offered by M. A. Hunt for best 25 blooms of new seedling not in commerce; second premium of \$10 offered by E. G. Hill went to Fred Dorner. For best 50 blooms, white, Fred Dorner took first with Uncle John; John Hartje second with Snow Queen. Best 50 red, Bertermann Bros.; 50 pink, Fred Dorner; 50 blooms, any new variety, Fred Dorner. A certificate of merit was awarded to John Hartje for a promising white variety. Edward Swayne, Kennett Square, Pa., sent his two new varieties, Sweet-brier and Ophelia, but they arrived too late for competition.

The L. S. Ayres & Co. premium (\$25) for best arranged table of cut flowers was won by Bertermann Bros. The orchid display made by Siebrecht & Wadley was a center of attraction; it was difficult to get anywhere near it. Bertermann Bros. made an effective arrangement in one corner of the hall, consisting of palms, ferns and florists' supplies, and also displayed a mantel decoration. The Huntington Seed Co. also made an effective display of their goods. The Indiana Horticultural Society's fruit exhibit was a new feature added to the show. Some grand specimens of apples and potatoes were shown from Oregon.

The Indianapolis Florists' Club entertained the visiting brethren in a royal manner on Wednesday evening at their club rooms. A bountiful spread was laid and everyone had a good time. Music and speech making made it a most enjoyable affair.

Thursday evening we were honored by the presence of Ex-Pres. Harrison, Gov. Mathews and family, Mayor Denny and family, and most of the state officers, but we missed the presence of "Little Woody."

Among the visiting brethren were E. G. Gillette, Cincinnati, Ohio; Peter Herb, Mt. Healthy; W. H. Elverson, New Brighton, Pa.; Henry Michel, Marion, Ind.; F. B. Tinker, Peru, Ind. The exhibitors seem well pleased with the judging this year, as they all declare they received more premiums than they expected.

Kokomo, Ind.

W. W. COLES.

#### Chrysanthemum Mrs. J. Geo. IIs.

We present herewith a life-size engraving of a flower of this remarkable white chrysanthemum. The bloom was photographed on Wednesday, the 8th inst., and had been on exhibition two days after having been five days in a box, with its companions on the trip from San Francisco. The picture gives a side view of the flower to show its remarkable depth. Its form and great lasting qualities must give this sort a prominent place in commercial sorts, as the stem and foliage are good and judging from same it is probably a good grower.

As will be noted by referring to the engraving the lower petals had shrivelled and some had dried out, but not one had dropped or become broken.

Baltimore.

The club has scored another financial success, and the more gratifying as it was unexpected. The show was a great success. What if some of the largest plants around town were not open enough to show, and consequently the plants in unlimited sizes of pots were apologies in many cases instead of being the great

CHRYSANTHEMUM MRS J GEO ILS LIFE-SIZE SIDE VIEW OF FLOWER

mounds of flowers shown in the same class last year; the 6-inch pots and the cut flowers made glorious amends for any deficiencies in other classes.

The Cyclorama building never showed to better advantage than after being under the bands of Mr. Ekas for a day, and every one admired the general effect of the huge circular room, with the tables for cut flowers and designs arranged around the wall and the center divided into many beds of glowing color, by having, for the first time, plants of each class and division put where they should always have been put, side by side. On entering a bank of towering arcades from Mr. Wm. J. Halliday turned the stream of visitors to either side and served as a screen to hide the door from the balcony and other parts of the show. The massive

central pillar was turned into a great palm tree in appearance, by the skillful use of palm crowns twenty feet up, and covering the lower part with long leaf pine and wild smilax.

The cut flowers were superb, and the flower that took first prize for the best single bloom, exhibited by Mr. C. Hess, was a grand Golden Wedding fully ten inches in diameter, a great fluffy mass of pure yellow without a blemish. The flower that took second was a Vivand-Morel, a perfect hemisphere of deep pink of nearly as great diameter as the first.

The decorated set tables, of which there were three, set for twelve persons completely, were very well done, though there was not the variety that might have been expected, all three being done in white chrysanthemums and adiantums. Halli-

day Bros., who received first, had a long bank of L. Canning running diagonally across their table. Sam'l Feast & Sons, who took second, had a circular table with a mound of Jos. H. White, surrounded by a broad band of dark green ribbon, in the folds of which nestled tiny electric lights supplied from a storage battery concealed beneath the table; Mr. Seidewitz used a mound of Ivory on his table; all used long and short stem chrysanthemums alternately at the plates. A feature of this lot of entries, as well as the mantels, which were decorated by the same firms, was the placing of cards, after the awards, advertising the people who supplied the china, linen, etc. It was commented on quite freely by visitors as detracting from what otherwise was

the most elaborate and interesting feature of the whole show.

The mantel decorations were more varied in character, one that was awarded first prize, by Sam'l Feast & Sons, was done with a bunch of Jos. H. White and Grace Hill on the lower shelf, flanked by a heavy bank of *Adiantum cuneatum*, a bank of *Pteris serrulata* on the upper shelf, and a group of *Cullingfordii* "mums" in the grate completed a very effective arrangement. If any fault could be found with it, there was a trifle too much green on the shelves, but it was a beautiful piece of work. The second prize winner was by Halliday Bros. and was white and green exclusively, Minnie Wanamaker "mums" and *Adiantum* being used freely; this and the first were banked on each side with tall *Areca lutescens*, Halliday Bros.' tallest being fully twelve feet high. The mantel that took third, by Mr. E. A. Seidewitz, was very lightly trimmed, a *kentia* and small group of plants on the left side, loose cluster of eight Kioto "mums" on same side of lower shelf, small bunch of different varieties and croton leaves on same side of fireplace, with *Adiantum* on upper shelf and in grate, was all.

The cut flower work all through the show indicated an advance over last year in taste and skill. The funeral designs, entered the second day, which were staged just beyond the table decorations, were from nine firms and were from first to last good. In the whole nine there was not one badly executed or designed piece. Fortunately the judges were three leading artists in the city and could not be suspected of any shadow of partiality, nor of having to contend with established ideas as to arranging funeral designs. Their awards were made solely on the artistic merits of the designs and were as follows: First to Mr. E. A. Seidewitz for a pair of palm leaves bent into a wreath and with a bouquet of Perle buds and *Eucharis Amazonica* fastened at the intersection of the leaves with white ribbon; second to Brackenridge & Co. for a reclining cross of Ivory "mums" with clusters of the same lightly arranged with *Adiantum* at center and base; third, Mr. F. G. Burger, a large wreath very loosely and gracefully made of Minnie Wanamaker "mums," with a cluster of La France buds and two very small palm leaves at the heaviest part. The competition in original designs of chrysanthemums was equally close and interesting. The piece that took first in this class was an intricate arrangement of white chrysanthemums supported by cycas leaves. Though of acknowledged beauty and originality some of the competitors objected to it on account of the palms. It was sent by Brackenridge & Co. The second was a picture of six perfect Madeira "mums" tied in a spray with broad yellow ribbon and framed with a white frame of closely set chrysanthemums, sent by Mr. F. J. Burger. Third was a similar piece except that the frame was dark red, made by Mr. E. A. Seidewitz.

Next to the table containing funeral work was the bride's bouquets, in which first was taken by Mr. Burger with a cluster of Bride buds and *Asparagus plumosus*; the other two prizes were won by Bride buds and *Adiantum* fronds. The corsage bouquets were of almost as many different materials as there were entries. First was taken by Mr. F. G. Burger with a cluster of La France buds.

Just behind the tables was an elaborate grotto of artificial rockwork twenty feet wide decorated with tree ferns and orchids, by Brackenridge & Co., who

took first prize for the orchids. Next beyond were the carnation entries. First for best six was won by Messrs. Cook Bros. with Silver Spray, Buttercup, Nellie Lewis, Mrs. Fisher, Grace Wilder and a deep pink seedling. The same gentlemen won first for seedling with a fine plant of the same seedling, a slightly deeper tint than Fred Creighton. The collection of geraniums in bloom sent by Wm. Lehr, which came next in order, were surprisingly well grown and bloomed. Then the begonias, among which were a monster B. *manicata aurea* and a fine B. *Smaragdina*; then the entries in the children's department, where were to be seen four specimens of chrysanthemums better grown than many on the main floor. Next along the front of the balcony, under which the booths and stalls for selling were situated, came more tables of cut flower work, baskets, first in which the chief prize was taken by Mr. Burger's, filled on one side with Kioto, on the other with Jos. H. White, a spray of the latter running up on the handle, and a bow of yellow ribbon to match the Kioto on the other. The baskets of the other two prize winners, W. J. Halliday and Brackenridge & Co., were very tasteful, as indeed were all the rest.

The dinner table design and wedding design first premiums were awarded to typical pieces, a plateau of Niveus and H. E. Widener "chrysanthus" being one, and a horseshoe of pink roses and white "mums" being the other.

The entries in cut flowers and sprays, which came next, must have caused our judges for the first day, Messrs. Kift, Colflesh and Smith from Philadelphia, no little study, as they were all very good to extra. The first prize for 25 sprays in 25 varieties was taken by Messrs. Fisher & Ekas with Robt. Flowerday, Violet Rose, Mrs. J. G. Whilldin, H. F. Spaulding, Minnie Wanamaker, Jno. Dwyer, L. Canning, Good Gracious, Advance, Rohallion, Tuxedo, Mrs. Wm. K. Bowen, Sec'y Gen. Cassagnac, Jessica, Golden Wedding, Mrs. J. N. Gerard, Geo. W. Childs, Ivory, Hicks Arnold, Jos. H. White, Golden Gate, *Cullingfordii*, Mrs. A. J. Drexel, a large pink seedling of their own raising, and Mme. Maria Hoste.

The 25 single blooms were staged next and contained as perfect flowers as have ever been shown here. They were from Messrs. Theo. Eckardt & Co. and contained Autumn Glow, a flower as perfectly incurved as Kioto but having a copper tint; Irma, a strongly incurved, delicate pink; Warrior, an incurved red with very peculiar boat shaped petals; Bryden, Jr., an incurved yellow like Kioto, but of longer and looser petals at the base of the flower; Col. Wm. B. Smith, a match for Harry Balsley in shape and size of petal but of clear yellow.

In the lot that took first for 12 blooms, by Mr. E. A. Seidewitz, was Ermenilda, also like Balsley in form but as deep in tint as a La France rose; American Flag, a huge flower, slightly incurved, blush white, with hair lines of crimson all over the petals; and, most interesting of all, a perfectly symmetrical bloom of the lopsided novelty Good Gracious.

The first premium for vase of 12 white was taken by Sam'l Feast & Sons with Jos. H. White and Minnie Wanamaker. For the best vase of 12 yellow, by Mr. C. Hess, with Golden Wedding and Wm. H. Lincoln; best pink, Vivand-Morel and Roslyn, by Mr. E. A. Seidewitz; best bronze by Theo. Eckardt & Co. with Hicks Arnold and Harry May. Mr. Seidewitz took first for vase of 25 any color with Vivand-Morel and Roslyn.

Sam'l Feast & Sons were awarded the gold medal for the best vase of Mrs. Frank Thompson, fine specimens every one of them.

In the contest for best display of cut roses Mr. Jno. Cook took first. In the lot was a new rose unnamed, like a very pale Mermet with a tint of yellow at the base of the petals. Best vase of pink was taken by S. Feast & Sons with Duchess of Albany. First for yellow and same for white were taken by Mr. J. L. Wagner with Perles and Brides respectively, the latter the best in the building.

It is impossible to more than glance over the exhibits, there were so many entries and of such uniform excellence that other comparison than that of the judges would be hard to make, and harder still to prove. Even in violets the quality was far better than was expected for the season, and between the numerous entries it was hard to decide, but first was awarded to Mr. P. C. Erdman. On the table devoted to carnations was the vase of La France roses sent by Sam'l Feast & Sons that deservedly took the Desch silver pitcher offered for that entry; also a vase of Barbara, a new rose sent by Mr. Wm. McNab, a sport from Niphetos with the slender stem but neither the color nor the shape of that rose, being a fawn pink in color and globular in shape. Behind this table, fastened by pins to sheeting stretched upon the wall were the two hundred and fifty sheets of beautifully mounted native flowers and ferns composing the entries for the Wm. McRoberts special premium, which was awarded to Mr. C. E. Waters for a very carefully mounted and described collection of flowers and ferns.

A glance over the entries in the carnation class showed some very fine flowers, notably a vase of perfect Edna Craig in the collection that took first for best display, sent by H. Weber & Sons, Oakland, Md. Mr. Peter Herb, Mt. Healthy, O., sent a vase of new seedling Adelaide Kresken, which was almost too far gone when received to show its quality. Mr. Edw. Swayne, Kennett Square, Pa., also sent two vases of new varieties Ophelia, a deep pink, and Sweet Brier, almost identical in color and form with Edna Craig, but perhaps a shade darker and very heavily clove scented. Here also was the exhibit of Mr. J. N. May, of Summit, N. J., comprising a vase of Wm. Simpson chrysanthemums, huge incurved blooms on stems three feet long, delicate pink slightly tinted with purple in color, and a great keeper, being about as fresh at the end as the beginning of the show. With these, from the same grower, was carnation Helen Keller, very large with a border around each petal of short hair lines of scarlet; and rose Mrs. W. C. Whitney, most luxuriant in foliage and deep pink in color.

Among chrysanthemum plants the 6-inch pot class was decidedly superior to all the rest, and about the showiest lot was one that took first for six bush plants, from Messrs. Fisher & Ekas, containing Mrs. J. G. Whilldin, C. B. Whinnall, Mrs. Robt. Craig, Geo. W. Childs, Mrs. Jno. Gardner and Vivand-Morel, the last being a perfect plant bearing seven immense flowers. The same firm took first with a fine Geo. W. Childs bearing twelve fine flowers. Mr. H. Walther took first for twelve specimens in the same class with plants of uniform excellence. The whole class was the most attractive plant display in the building, and the single stem section was equally good, both the lot that took first for twelve and that for six being extra well grown

and flowered. The honors of attracting crowds were about equally divided between these and the tall standards exhibited by Mr. Welch, which were fine, as were the six-foot single stem plants shown by Mr. Chas. M. Wagner.

First premiums awarded in addition to those named above were as follows:

**CHRYSANTHEMUM PLANTS:** To H. J. Quick for 6 specimens, 6 varieties and single specimen. To C. Hess for 12 specimens 12 varieties and 6 pink. To Ekas & Fisher for 6 standards, Maryland grown seedling of 1893, 6 specimens 6 varieties, single specimen and 6 single stem and flower. To P. P. Welsh for specimen standard, specimen fan shaped pyramid and 12 single stem and flower. To C. M. Wagner for 12 specimens 12 varieties, 6 varieties for amateurs, specimen standard and 12 single stem and flower. To W. Fraser for 75 specimens 25 varieties. To W. P. Bender for 6 varieties single stem and flower. To Geo. Bisinger for 6 varieties for amateurs and 6 varieties single stem and flower. To Mrs. J. S. Johnson for any plant showing careful cultivation.

**CUT CHRYSANTHEMUMS:** To E. A. Seidewitz for 25 sprays, 12 blooms, vase of pink, vase of 25 blooms. To Theo. Eckardt & Co. for 25 blooms and vase of 12 bronze. To C. Hess for largest bloom and vase of 12 yellow. To S. Feast & Sons for vase of 12 white.

**ROSES:** To John Cook for best display and 12 yellow. To S. Feast & Sons for 12 pink. To C. M. Wagner for 12 white. To Eckardt & Co. for 12 red and Am. Beauty. In violets P. C. Erdman for 200 blooms.

**CARNATIONS:** To H. Weaver & Son for best display. To W. Lehr for vase of 25 white and vase of crimson. To P. C. Erdman for vase of red. To Cook Bros. for vase of yellow and vase of striped. To Halliday Bros. for vase of pink. To John Cook for display of cut flowers other than chrysanthus. To E. A. Seidewitz for jardiniere.

**MISCELLANEOUS PLANTS:** To Brackenridge & Co. for orchids. To Cook Bros. for 6 carnations and specimen carnation. To H. Bauer for 6 foliage begonias. To Ekas & Fisher for 6 coleus. To John Cook for specimen palm, group of decorative plants and 6 ferns other than adiantums. To E. A. Seidewitz for 6 adiantums. To W. Lehr for geraniums. To H. Bauer for cacti. MACK.

#### St. Louis.

The third annual chrysanthemum show of the St. Louis Florists' Club was held from the 7th to the 10th in Grand Music Hall of the Exposition Building, and from all accounts at present it may be considered a success. The remarkably bright, warm weather that prevailed the week preceding and during the show rushed plants and cutflowers along so that the display surprised even those who had kept a close watch upon the chances.

The exhibits were tastefully arranged, palms and foliage plants being interspersed among the chrysanthemums, giving the whole a graceful appearance which it would be impossible to produce with chrysanthemums alone. The sales-booth was placed in the forward part of the hall and was decorated with plants of laurel, both standards and pyramids. A special effort was made to have the booth both prominent and attractive, as an arrangement had been made whereby 50% of all sales went to the club. Back of the booth and in the center of the hall

was placed a raised dais for the musicians; this was banked upon the back and sides with palms and standard chrysanthemums. The music consisted of a vocal quartette and a mandolin club, which alternated during the evening.

The sides of the lower end of the hall were banked with foliage plants, ferns, begonias, crotons, carnations in pots and single stem chrysanthemums, arranged upon tables and steps. The class calling for flowering plants for house culture was also placed here and proved to be a great attraction, as almost every lady visitor was interested to a greater or less degree. In the rear of the hall was also placed groups of cannas and specimen plants which could be readily shifted when the space was needed for cut flower tables. Around the sides of the forward part of the hall were placed chrysanthemum plants entered in the classes calling for 12, 6 and 4 plants, also those grown for market sales; here also were placed tables for cut roses, cut carnations and the dinner table decorations; these were not brought in on the first day, but gradually, as they were needed, room was made and they were placed so that while the hall always appeared to be full something new was added every day, thus keeping the interest alive.

On Tuesday, the opening day, there was shown a table of chrysanthemums, "not for competition," from "Vesey's Greenhouses," and exhibited by C. W. Wors, which attracted much attention, owing to good quality, the best being W. R. Smith and Vivian-Morel in pink, Hicks Arnold in yellow, W. G. Newett, Niveus and Wanamaker in white. There was also shown a vase of Adelaide Kresken carnations from Peter Herb of Mt. Healthy, Ohio, the originator, which attracted many by their size and color. On the first day also were shown cut roses which proved their popularity by the surrounding crowds, despite the tempting array of chrysanthemums.

Wednesday a special feature was made of cut chrysanthemums and handle and oval baskets. The cut chrysanthemums were fine and the judges had hard work to pick the winners. In the class calling for best vase of chrysanthemums the following were seen in fine shape in the winning bench: Sunflower and W. B. Smith for yellow; Wanamaker for white, Waban, Excellent and La Perle de Sales for pink, and John Thorpe for red. The prize offered for best 12 flowers, any variety, was captured by Vivian-Morel, exhibited by Wm. Schray; Minnie Wanamaker, exhibited by the C. Young & Sons Co., being a close second. The best flowers noted in the other classes were Ivory, Mrs. E. D. Adams, J. H. White, The Queen and Rob't Bottomley. The winning handle basket was a combination of La France roses, hyacinths and valley, with a center of orchids, all worked in a bed of adiantum; orchids and adiantum were also worked on the handle. This was exhibited by Ostertag Bros. The oval basket capturing first was entered by the C. Young & Sons Co. and consisted of Albany and Meteor roses on opposite sides with valley scattered among them; the center was bunch of orchids; the roses were used with long stems and stood gracefully above a bed of adiantums.

The special features on Thursday were cut roses and table decoration of any flower, tables 6 by 10 feet. The table taking first prize was entered by Ostertag Bros. It consisted of a low arrangement of Mermet buds and valley in a bed of adiantum; the center consisted of a bowl of orchids; small lamps with pink shades

were used, the favors being orchids for the ladies and valley for the gentlemen; small Cocos Weddeliana worked into the design gave it a very graceful finish. The second table was entered by C. Young & Sons Co.; it consisted of a tall vase of long stemmed Beauty roses in the center placed upon a mirror, the edges of the mirror being banked with adiantum fronds and orchids; pink shades were used on the lamps, which were worked towards the four corners. La France roses were strewn around the lamps and towards the center piece. The favors consisted of Beauties and valley.

The special features for the closing day were special prizes for roses and carnations, and round table to be decorated with chrysanthemums. In these classes competition was close. The carnation special could not be decided until several additional judges had been called in. It finally went, however, to Thos. Carroll, who showed 19 varieties in excellent condition.

The chrysanthemum tables were very prettily arranged, first going to the C. Young & Sons Co., whose table consisted of a vase of white varieties in the center surrounded by crescents of yellow; outside there were placed bunches of white; yellow shades were used; small Pandanus Veitchii, nicely marked, set among the chrysanthemums, added materially to the effect. The second table was by Ostertag Bros. and consisted of a vase of yellow varieties in the center of the table placed on a mirror; small cocos leaves were used in this bunch in addition to the adiantum and were very appropriate. The mirror was banked with adiantum, which held white and yellow chrysanthemums alternately; the same arrangement was carried out towards the sides of the table; small cocos were scattered over the table and yellow shades were used on the lamps.

Taking the show as a whole, it was the best we ever held; the cut flowers and designs were ahead of anything ever seen here in regard to quality, while the plants were not quite up to the standard set by last year's show. Following are the awards in detail:

**CHRYSANTHEMUM PLANTS:** 12 plants, 12 sorts—1st, John Armsby; 2d, A. Meyer; 3d, Steidle Floral Co. 6 plants, 6 sorts—John Armsby, Wm. Schray, A. Meyer; 4 plants, white, 4 sorts—Wm. Schray, Steidle Floral Co., F. J. Fillmore; 4 plants, pink, 4 sorts, A. Meyer—F. J. Fillmore; 4 plants, any color, 4 sorts—Wm. Schray, F. J. Fillmore; single specimen white—Wm. Schray, A. Meyer, Jordan Floral Co.; single specimen yellow—A. Meyer, Jordan Floral Co., Steidle Floral Co.; single specimen plant pink—Wm. Schray, A. Meyer, Jordan Floral Co.; single specimen, any color—Wm. Schray, A. Meyer, Jordan Floral Co.; 12 plants, 6 sorts, 9-inch pots, not over 2½ feet high—Jordan Floral Co.; best and largest collection named chrysanthemum plants—Wm. Schray.

**CHRYSANTHEMUMS—STANDARDS:** 3 plants, pink—Wm. Schray; 6 plants, any color—Wm. Schray, Julius Koenig, A. Meyer; single specimen white—A. Meyer, Wm. Schray, John Armsby; single specimen yellow—John Armsby, A. Meyer, Wm. Schray; single specimen pink—A. Meyer, Wm. Schray, Julius Koenig; single specimen, any color—A. Meyer, John Armsby, Julius Koenig.

**PLANTS GROWN FOR MARKET SALES:** 4 plants, white, 4 sorts—A. Meyer, C. Young & Sons Co., Wm. Schray; 4 plants, yellow, 4 sorts—A. Meyer; 4 plants, pink, 4 sorts—A. Meyer, Wm. Schray, F. J. Fill-

more; 4 plants, any color, 4 sorts—Wm. Schray, A. Meyer, F. J. Fillmore.

PLANTS GROWN TO ONE FLOWER, 4½-INCH POTS: 12 plants, white, 4 sorts—Wm. Schray, A. Meyer, F. J. Fillmore; 12 plants, yellow, 4 sorts—A. Meyer, Michel Plant and Bulb Co.; 12 plants, pink, 4 sorts—A. Meyer, Michel Plant and Bulb Co.; 12 plants, any color, 4 sorts—A. Meyer, Wm. Schray, F. J. Fillmore.

CARNATIONS: 24 plants in bloom, 6 of a kind—F. J. Fillmore, Thos. Carroll, Wm. Schray.

CUT CHRYSANTHEMUMS: 45 flowers, 15 sorts, 3 of each—Michel Plant and Bulb Co.; C. Young & Sons Co.; Jordan Floral Co.; 20 flowers, white, 4 sorts—Wm. Schray, Michel Plant and Bulb Co., C. Young & Sons Co.; 20 flowers, yellow, 4 sorts—Michel Plant and Bulb Co., C. Young & Sons Co., Wm. Schray; 20 flowers, pink, 4 sorts—C. Young & Sons Co., Wm. Schray, Michel Plant and Bulb Co.; vase cut chrysanthemums—Wm. Schray, Michel Plant and Bulb Co., C. Young & Sons Co.—12 flowers any one kind, Wm. Schray, C. Young & Sons, E. W. Guy.

CUT ROSES: C. Young & Sons Co. were first on Perles, Meteors, Watteville, Albany, La France, Wootton, Augustine Guinoisseau, Hoste, Gontier and 5 varieties, 10 of a kind, Beauties and Belles excluded. R. F. T. on on Bridesmaid, Bride, Mermet, Cusin and 5 varieties, 20 of a kind. Wm. Schray on American Beauty and 20 blooms of varieties not named in schedule, showing Kaiserin Augusta Victoria.

CUT CARNATIONS: Thos. E. Carroll took first on vase of white, vase of red and largest and best collection, 10 flowers of each kind. Peter Herb was first for vase of pink. C. Young & Sons Co. for vase of variegated.

BASKET AND TABLE DECORATIONS: Handle basket—Ostertag Bros., J. M. Jordan, C. Young & Sons Co.; flat oval basket—C. Young & Sons Co., Ostertag Bros., Jordan Floral Co.; table decoration, any flowers—Ostertag Bros., C. Young & Sons Co., Jordan Floral Co.; table decoration, chrysanthemums—C. Young & Sons Co., Ostertag Bros., Michel Plant & Bulb Co.

SHAW PREMIUMS: Best and most tastefully arranged group of chrysanthemums on not over 100 square feet—A. Meyer, Michel Plant and Bulb Co., Jordan Floral Co.; seedling chrysanthemum—F. Dorner & Son, gold medal; collection of palms—Wm. Schray, Jordan Floral Co., Michel Plant and Bulb Co.; collection of begonias—Michel Plant and Bulb Co., Wm. Schray, F. J. Fillmore; collection of ferns—Julius Koenig, Michel Plant and Bulb Co., F. J. Fillmore; collection of crotons—John Armsby, Michel Plant and Bulb Co., F. J. Fillmore; collection of foliage plants—Wm. Schray, Michel Plant and Bulb Co., F. J. Fillmore; collection of cannas in flower—Michel Plant and Bulb Co., Wm. Schray; 25 blooming plants for house culture, excluding cannas and chrysanthemums—Michel Plant and Bulb Co., Wm. Schray, F. J. Fillmore; collection decorative aloes—honorable mention, Missouri Botanical Gardens; collection nepenthes or pitcher plants—honorable mention, Mr. D. S. Brown.

SPECIMEN DECORATIVE PLANTS: Specimen *Arca lutescens*—Jordan Floral Co., A. Waldbart; specimen for table centerpiece—Julius Koenig; specimen *Howea Belmoreana*—John Armsby, A. Waldbart; specimen *Howea Forsteriana*—John Armsby, Michel Plant and Bulb Co.; specimen *Livistona chinensis*—Jordan Floral Co., Wm. Schray; specimen *Pandanus utilis*—Jordan Floral Co., A. Waldbart;

specimen *Pandanus Veitchii*—Wm. Schray, Michel Plant & Bulb Co.; specimen fern—A. Waldbart, Jordan Floral Co.; specimen decorative plant other than above—Wm. Schray, A. Waldbart. R. F. T.

#### Newport, R. I.

The Newport Horticultural Society held its fourth annual chrysanthemum show on Nov. 6 to 8. The weather was most favorable throughout, and should have warranted a better attendance than that received. It is simply discouraging in view of the fact that the society gives to this community first class exhibitions and the public fail to give patronage enough to make an exhibition pay expenses. The show this year excelled its predecessors by being more extensive, with a larger variety of plants, larger blooms, and better grown plants, in fact the plants and blooms were equally as good as those that were shown in larger cities where competition is much greater.

The groups of mums and foliage plants this year were arranged against the walls; through the centre of hall the various specimen plants were placed; this arrangement gave to a person on entering the hall a good view of the exhibition, and the effect was very pretty. The hall space was confined to the plant classes; in an adjoining room the cut blooms were exhibited. The ceiling of hall was tastefully decorated with flags, lanterns and bunting. This is the first time the society has tried overhead decoration, and it certainly added much to the appearance of the hall.

In the class for best six plants in 12-inch pots, the competitors were Messrs. Alexander McLellan, gardener to John W. Ellis, Esq., and Thomas Beattie, gardener to Joseph Tuckerman, Esq. The plants were remarkably well grown. First went to Mr. McLellan; Mr. Beattie receiving second. Mr. McLellan's six plants consisted of Yeddo, Pres. Harrison, Louis Boehmer, John Firth, Nineveh and Roger Williams.

In the class for 9 plants in pots not exceeding 8 inches there was only one entry, and first went to Andrew Ramsey, gardener to Mr. Ed. King. In this eight was shown some well grown plants of R. Bottomley, Golden Dragon, E. G. Hill and Louis Boehmer.

For 30 plants in 6-inch pots T. Beattie took first with plants that were much admired, being exceptionally well grown. They were as follows: L. B. Bird, Marvel, Lizzie Cartledge, R. Bottomley, Cullingfordii, Harry May, Stanstead White, Mrs. F. Thompson, W. H. Lincoln, Gloriosum, Mrs. Geo. Hill, L. Canning, Newport, Mrs. Jno. Eyerman, Mrs. E. D. Adams, Mrs. A. G. Ramsey, Joseph Taylor, Elaine, Geo. Bullock, T. C. Price, Mrs. Dr. Mandeville, Hon. J. W. Welsh, Bobby Burns, Kioto, Puritan, Comet, Mrs. Mercer, Domination, Dawn and G. F. Moseman.

For best specimen white, first went to A. Ramsey, the winning plant being a fine specimen of R. Bottomley. T. Beattie took second with Domination. Specimen yellow, Mr. Beattie first, with Dr. H. A. Mandeville; A. McLellan second, with Yeddo. Best specimen any color excepting white or yellow, first A. Ramsey, who showed a fine specimen of L. Boehmer; F. S. Follwell, gardener to L. L. Lorillard, Esq., second, with a plant of A. G. Ramsey. Specimen anemone, A. Ramsey first, with a seedling originating with him named Bobby Burns; second, T. Beattie. Six standards, stems not less than 24 inches. Of these it can be truthfully said that the standards shown by F. S. Follwell, who took first, were one of the prin-

cipal features of this exhibition. R. Gardner, gardener to Cor. Vanderbilt, Esq., competed against Mr. Follwell in this class. Mr. Follwell's plants were Harry May, Jardin des Plantes, Mrs. W. S. Kimball, Mrs. E. D. Adams, Yeddo and Gloriosum. Specimen standard, stem not less than 30 inches, T. Beattie first with a splendid plant of Col. H. W. Bois. Mr. Follwell second with a fine specimen of Mrs. E. D. Adams.

The society's silver medal for the best seedling never before exhibited was won by Alexander McLellan with a seedling named Roger Williams. It appears to be an improvement on A. G. Ramsey, to which it has a great resemblance.

For group of foliage plants and mums to cover 144 sq. ft. arranged for effect, mums to predominate, first to R. Gardner; F. S. Follwell, second. These groups were made up of mums, arecas, maiden hair ferns and various kinds of foliage plants, and the effect was excellent. The mums shown in Mr. Gardner's group were very nearly all seedlings of his own raising.

For best group of mums and foliage plants to cover 72 sq. ft., mums to predominate, first to A. Ramsey; second, R. Gardner. Both those groups were arranged very prettily.

For cut flowers, 25 distinct named varieties, T. Beattie took first with Good Gracious, Mrs. Mandeville, R. Bottomley, Marvel, Violet Rose, Ivory, W. H. Lincoln, Mrs. D. D. L. Farson, Domination, Excellent, Comet, Dr. Mandeville, L. Cartledge, A. G. Ramsey, Ada Spaulding, Mrs. Eyerman, Geo. Savage, Frank Thompson, G. F. Moseman, Stanstead White, Cullingfordii, Mrs. E. D. Adams, L. B. Bird, Mrs. F. Thompson, Harry May. The three last named varieties were unusually large blooms. F. S. Follwell second; amongst his lot were some very fine blooms of Mrs. Denne, Harry May, Ada McVicker, Domination and Mrs. Trelease. Amongst the blooms shown by A. McLellan, who took third, were noticeable large blooms of Viviani-Morel, Stone Acre, Gem, the latter variety an anemone which originated with Mr. McLellan and is worthy of special mention. Best 12 blooms, F. S. Follwell first, with Mrs. F. L. Ames, Mrs. Bayard Cutting, Ada McVicker, Kioto, W. W. Coles, Miss M. Wanamaker, Mrs. Wm. Trelease, Geo. Savage, Mrs. Denne, Harry May, Gertie, Domination, the three last named kind being shown in splendid form. A. McLellan second; amongst his twelve being a very fine bloom of Golden Wedding measuring 8 inches in diameter, and San Salvador, introduced last year by Mr. McLellan, and with which he took the society's silver medal. At times its color is white, large, full and globular shaped, he claims for it to be excellent for cut blooms and not good as specimens. Vase of 12 blooms any variety, first to F. S. Follwell for 12 Gertie. Mr. Gardner took second with a seedling raised by him named Countess de Sers, color pink, incurved, of good quality. Vase of 6 blooms, Mr. Ramsey first, with 6 Mrs. Guir; second, Mr. Gardner, for 6 The Gladys.

Centerpiece of mums for dinner table decoration, A. Ramsey first, his piece being made of Golden Dragon and asparagus vine; second to A. Meikle, gardener to W. S. Wells, Esq., his basket consisting of Charity, Annie Manda and Farleyense ferns; third to A. McLellan.

For amateurs: Six plants, best group, not less than 9 plants, first Geo. Douglas, Geo. Taylor first for 12 cut blooms. Both plants and blooms were well grown.

A. Ramsey was first on 2 bunches of grapes.

First class certificates of merit were awarded to the Newport Nursery Co. for collection of begonias; to Edward Swayne, of Kennett Sq., Pa., for carnations, *Ophelia* and *Sweet Brier*; to Thomas Beattie for a collection of gourds; to Geo. Weaver for collection of seeds, bulbs, pots, grasses, etc. Pitcher and Manda were awarded 2 silver medals, one for a collection of anemones, the other for Japanese kinds, and one named Mrs. Geo. M. Pullman.

The judges on plants and flowers were Messrs. Jno. Kearns, William Dexter and James McLeish; on centerpiece, Miss Mary Powell, Miss Anna Hunter; on fruits, Messrs. R. Gardner, John Allan and Ludlow Mahan. The judges to a great extent gave general satisfaction.

[NO. J. BUTLER, Sec'y.]

#### Montreal.

The fifth annual chrysanthemum show of the Gardeners' and Florists' Club of Montreal opened most successfully in the Fraser Hall on November 8. Never in the history of the club has so choice or extensive an exhibit been brought together. Although not so many groups of chrysanthemums are put up as formerly yet their place is more than supplied by the superb exhibits of cut bloom and other entries. Roses and carnations although not extensively exhibited were still a most magnificent lot.

There were five entries for the Challenge cup, section for 24 blooms, and five each for 12, six and three bloom, and also five large vases of chrysanthemums. Messrs. Pitcher & Manda also staged about fifty specimen blooms, so that we may safely place the number of specimen blooms at 500, and all of the first quality.

The following were the winners of the Challenge cup: Sunflower, L. B. Bird, Geo. Savage, J. N. Gerard, Francis Tarbox, E. G. Hill, Florence Percy, Col. H. M. Boies, T. C. Price, Domination, Volunteer, Mrs. E. D. Adams, Count de Germiny, Ed. Audignier, G. W. Childs, Dr. H. A. Mandeville, Ada Spaulding, Mary Wheeler, F. L. Ames, A. J. Drexel, Harry May, Mrs. Libbie Allen, E. Molyneux, Violet Rose. Other collection contained amongst those above mentioned Wm. H. Kimball, Harvest Moon, H. E. Widener, Advance, Ruth Cleveland, Wm. Singerley, M. P. Mills, Excellent, Snowball, Grace Hill, G. F. Moseman, Kioto, W. H. Lincoln.

The winners of the Challenge cup for twelve specimen plants were: Duchess of Connaught, Florence Percy, Tokio, Gloriosum, Ada Spaulding, The Intended, Mme. Fabre, Sunflower, E. Molyneux, C. de Montibiere, Mons. Bernard. Other good plants were Vivian-Morel, Spiralis, G. W. Childs, W. H. Lincoln, La Triomphante, Mrs. E. D. Adams, Mrs. Hicks Arnold, Golden Rod, Ithaca, Count de Germiny, L. Canning and Source d'Or.

Special mention must be made of the best 6 specimens, 3 specimens and 6 plants in 6-inch pots. Never were such plants placed in competition in this Dominion before. They were not extra large, but in every respect perfect. The best specimen was a grand plant of Mrs. E. D. Adams. John Perrin put up two grand groups of chrysanthemums.

In miscellaneous plants not much was done but we had a grand specimen of *Cyp. insigne* with 50 expanded flowers, also a grand piece of *Vanda Sanderiana*.

Two good groups of foliage and chrysanthemum plants on 50 feet were staged, also two groups on 25 feet.

In a group of stove and greenhouse plants were some fine plants of *Lilium auratum* and *lancifolium rubrum*.

C. Campbell had a mantel decoration of great merit. At the corners were two handsome specimens of English bay, surrounded by araucarias, palms, ficus, ardisias, etc., the front of the grate being filled with cut flowers, and the mirror draped with *Asparagus plumosus* and crowned with light graceful palms. On the mantel at the other side were placed vases of roses and carnations. Mr. Campbell had also a good table decoration. The centerpiece was of *Cocos Weddelliana* surrounded by an oval of pink roses, and specimen glasses of lily of the valley and violets with favors of pink and white roses and lily of the valley.

The vases of chrysanthemums staged as decorations were grand, especially the one by Wilshire Bros., who had a vase that in perfect harmony with its surroundings and independent of the flowers was an exhibit in itself.

In made up work, for basket, a neat arrangement in a square basket of *Mermet* and *Bride* roses, lily of the valley and maidenhair fern, handle tied with a soft pink ribbon, by Wilshire Bros., was first. A *Dolly Varden* basket of white chrysanthemums, *Mermet* roses and *smilax*, by Jas. White, was second, closely followed by C. Campbell with a well arranged basket of oval shape.

In funeral designs, a pillow in white roses, carnations, valley and tuberose was first; a neat arranged star, second; and a combination design (*Faith, Hope and Charity*), third.

The epergnes of flowers: First arrangement of pink roses and carnations, with heather and maidenhair; second, *Mermet* roses and maidenhair.

The cut chrysanthemum exhibit of Messrs. Pitcher & Manda was awarded a special first prize and the following four were awarded certificates of merit: Pitcher & Manda, large Japanese, reflexed, deep yellow center, shading to pure white edge, very fine, certainly one of the best and most novel introductions of late years; Mrs. G. West, deep maroon, incurved; Miss F. H. Kingsley, pink incurved, very fine flower; Seedling 321, large globular incurved, creamy white. Other good blooms were G. A. Pullman, Robt. Gray, Mrs. F. L. Ames, The Queen, Minnie Wanamaker, Annie Woods, Fascination, Miss Meredith and Seedling 401. The same firm have a choice collection of new and rare plants on exhibition, the principal features of which were *Diefenbachia marmorata* Corsi, *Araucarias excelsa compacta* and *excelsa glauca*, *Helliconia aurea striata*, *Anthuriums Veitchi* and *Waroqueanum*, *Phrynium variegatum*, *Livistona rotundifolia*, *Phoenicophium Seychellarum*, *Acanthopanax crinata*, *Gulielma speciosa*, *Adiantum Farleyense*, *cuneatum variegatum*, *capillus-veneris grandis*, *festum*, and *Selaginella Pitcheriana*. The whole exhibit of this firm was of the highest order and was well staged by their able representative, H. A. Bunyard, who is always welcome in Montreal.

The club made a special rate for school children on the second day of the exhibition, and the hall was crowded with them all the afternoon. The attendance has been very good so far.

The hall was well decorated this year; with flags, hunting and wreathing and a judicious use of Chinese lanterns, the decorating committee have achieved a marvellous success.

The exhibition was a grand success and

it is the more to be proud of as two or three of our usual leading exhibitors are not competing, as their chrysanthemums are very late this year, in fact a fortnight later would have suited the majority of the growers around here as they would not have needed to use so much heat to open up the blooms.

Following are the principal awards of premiums: Group chrysanthemums and foliage plants on 50 feet of space, 1st, J. Holliday; 2nd, J. Bennett; group of chrysanthemums and foliage plants on 25 feet space, 1st, Walter Wilshire; 2nd, P. McKenna & Son; group of chrysanthemums only on 50 foot space, 1st, John Perrin; group of chrysanthemums on 25 foot space, 1st, John Perrin; group of foliage and flowering plants on 36 foot space, 1st, Colin Campbell; 12 chrysanthemum plants (cup section), 1st, G. Copeland; 2nd, J. Bland; 3rd, C. Smith; 6 chrysanthemum plants, 1st, T. McHugh; 3 chrysanthemum plants, 1st, T. McHugh; 2nd, J. Bland; 3rd, C. Smith; 1 specimen, 1st, J. Bland; 3 Standards, 1st, J. Perrin; 2nd, J. Bland; 3rd, C. Smith; 1 Standard, 1st, C. Smith; equal 3rds, J. Bland and J. Perrin; 6 plants in 6-inch pots, 1st, T. McHugh; 12 plants in 5-inch pots, 1 bloom to each, 1st, J. Bland; 2nd, J. Perrin; 6 plants in 5-inch pots, 1 bloom to each, 2nd, J. Perrin, 3rd, J. Bland; 12 miscellaneous plants, 2nd, C. Smith; 3rd, B. T. Baud; specimen fern, 1st, F. Bennett; 6 ferns in 5-inch pots, 2nd, B. T. Baud; 3 palms, 1st, J. Bland; 1 specimen palm, 2nd, P. McKenna & Son; 6 table plants, 2nd, J. Holliday; 3rd, B. T. Baud; specimen orchid, 1st, F. Bennett; 2nd, J. Holliday; 24 blooms chrysanthemums (cup section), 1st, T. McHugh; 2nd, G. Copeland; 3rd, C. Campbell; special prizes to J. Walsh and J. Perrin; 12 blooms chrysanthemums, 1st, C. Campbell; 2nd, T. McHugh; 3rd, J. Perrin; 6 blooms chrysanthemums, 1st, C. Campbell; 2nd, W. Wilshire; 3rd, T. McHugh; 3 blooms chrysanthemums, 1st, C. Campbell; 2nd, T. McHugh; 3rd, J. Holliday; special prize for largest bloom in show to G. Copeland for bloom of Mrs. E. D. Adams.

In cut roses C. Campbell took first for *Mermet*, *Perle*, *Sunset*, *American Beauty* and *Meteor*; W. Wilshire for *Bride* and *Hoste*.

In cut carnations C. Campbell was first on collection, also on dozen white, light pink and fancy; P. McKenna & Son were first on red and dark pink.

In floral arrangements C. Campbell won first for mantel decoration, table decoration, funeral design and epergne of flowers. W. Wilshire Bros. were first on basket of flowers and vase of chrysanthemums.

H. STOCKING, Sec'y.

#### Providence, R. I.

The chrysanthemum exhibition under the auspices of the R. I. Horticultural Society closed Friday night after a very successful season. The managers entered upon their work with many misgivings as to the outcome, owing to the excessively hard times, but to their surprise and joy the receipts were more than fifty per cent larger than last year.

The exhibition was well advertised and a change from last year in the location of the exhibition on to the principal street of the city and much personal effort by the managers were the chief causes leading to success.

The exhibition itself was a marvel of beauty, the lighter shades of coloring in the blooms giving it a more cheerful appearance than last season's exhibition.

In the center of the hall was a huge mound of plants in full bloom, while around it were groups arranged in a tasteful manner and other collections. The stage was decorated with palms and ferns, while along in front were arranged collections of chrysanthemums in pots.

The chief point of attraction as one entered the hall was the magnificent display of Farquhar Macrea of cut blooms, for which he received the three silver cups for the best 6 vases, 10 blooms of each, of all white varieties; 6 vases of 10 blooms each, of pink varieties; and 6 vases, 10 blooms each, for blooms in variety. The judges had no trouble in deciding to whom the silver cups, one to each collection, belonged, for the blooms were grand.

Following these on the same table were fifty bottles by Mr. Macrea, to whom was awarded first premium in this class. Farther along on same table was a fine collection of 50 bottles by Robert Johnston, who secured 2d premium. Pitcher & Manda exhibited a new variety named "Pitcher and Manda," and for which a certificate of merit was awarded. Richard Witterstaetter of Sedamsville, Ohio, was awarded a certificate of merit for seedling bloom variety named Marie Louise, and Robert Johnston of this city a like certificate for his new chrysanthemum, Pink Ivory.

Edward Swayne of Kennett Square, Pa., was awarded certificates for his carnations Ophelia and Sweetbrier.

A. A. Young, Jr., of Jewett City, Conn., a new competitor in the chrysanthemum world, exhibited cut blooms which were "highly recommended by the committee."

The usual fine displays from the greenhouses of the Messrs. Goddard and Mrs. T. P. Shepard attracted wide attention.

The principal exhibitors of chrysanthemums were F. A. Fairbrother, Robert Johnston, Charles Fulford, John G. Jensen, Farquhar Macrae, R. H. I. Goddard (Charles Potter, gardener), Mrs. T. P. Shepherd (Wm. Hill, gardener), Mrs. T. P. I. Goddard (Alfred Powell, gardener), M. B. I. Goddard (James Hay, gardener), of Providence; James Nisbet and Wm. H. Haskell, of Pawtucket; N. D. Pierce, Jr., of Norwood; Sam W. Lewis of Johnston; and Leo Kennedy of Riverside.

Organ recitals were given each evening by Hamilton C. McDougal, a leading organist of this city.

C. W. SMITH, Sec'y.

#### Worcester, Mass.

The tenth annual chrysanthemum exhibition of the Worcester County Horticultural Society was held in their hall November 8 and 9, and was the most successful in the history of the society. Fair weather brought out a large attendance and made it comparatively easy to ship plants and flowers.

The public interest was centered on the large cut blooms and admiring crowds thronged around the tables morning, noon and night. The general arrangement of the cut flower tables and the staging of the plants was very pleasing and effective, and when viewed from the gallery the gorgeous masses of color, relieved here and there by a graceful areca or a stately kentia, made a picture that one would not forget for many a day.

H. F. A. Lange and Chas. D. Thayer had the most extensive exhibits. Mr. Lange confined himself to cut blooms, palms and ferns and only exhibited chrysanthemum plants in the class calling for best six, grown to single stem, for which he was awarded first premium. Mr.

Chas. D. Thayer captured nearly all the plums in the plant classes and first for 24 sprays; his plants were large, well bloomed and of good varieties, but were utterly ruined as a thing of beauty by the vast number of unpainted stakes used in tying them up, although they did much to make the show a success with the general public.

Col. John E. Thayer and E. V. R. Thayer, of Lancaster, showed some immense blooms which were quite a feature of the show. These two exhibitors together with Lange and M. F. Brierly had a lively tilt for blue ribbons, with honors about even.

Col. Thayer was awarded first for best twelve blooms with Lange a close second; and also for best six with Brierly well up; for best vase of one variety Lange took first and E. V. R. Thayer second; and for mixed vase E. V. R. Thayer first and Lange second, and so on throughout the schedule.

The committee of arrangements hit on a good scheme for this exhibition in awarding gratuities for palms, ferns and ornamental plants, as it increased the interest in the show and the foliage of the palms was necessary to relieve and bring out the brilliant coloring of the "mums."

H. F. A. Lange, A. A. Hixon, Mrs. Thos. Ward, H. B. Watts and Mrs. H. M. Chase received honors in this class, Mr. Lange occupying the stage with a good display.

Among the largest exhibitors other than those already mentioned were: Fred A. Blake, Mrs. C. E. Brooks, State Lunatic Asylum and H. A. Jones.

Ed. Swayne showed two of his seedling carnations, Ophelia and Sweet Briar, and F. L. Chandler a seedling chrysanthemum he calls Sayonara, a lemon, tubular petaled variety of exceeding merit. Golden Wedding took the palm for largest bloom and is truly a wonderful variety.

#### SEEDLING.

#### Milwaukee, Wis.

The hall selected this season is considerable smaller than has been used before, but a much better looking one, requiring less material and labor to set it in order. Although a few good entries were diverted to Chicago after having been booked for this show, the hall was well filled, and was quite attractive in appearance. The cut blooms in roses, carnations and chrysanthemums were a credit to our city, but the arrangements with the exception of Wm. Weil's modest little basket of roses might better have been left out. There was some hesitation on the part of the judges in awarding prizes on "best display of carnations." Frank Dilger had the largest display and most varieties all very good quality; it was a beautiful lot; but Wm. Gregory had the best flowers; when examined individually they were a rare lot of carnations.

The strongest points in this show were H. Staep's roses, H. Von Oven's Am. Beauties, Currie Bros.' cut blooms of chrysanthemums, the carnations, the Mitchell palms. Currie's arrangement of single stem plants with other foliage was in striking contrast with others set on floor along the committee's chalk line, and the music helped very much. The attendance and weather were both good, and the club is to be congratulated upon their success.

In chrysanthemum plants H. Schwebke received firsts for 12 plants, one of a kind; 6 white, one or more varieties; 6 yellow and 6 pink. J. M. Dunlop was first for display of 20 plants, one of a kind, named. And Currie Bros. were at the head on 20, one of a kind, with one flower each.

In cut chrysanthemum blooms firsts were taken by Currie Bros. for 20 named varieties, one bloom of each; 12 ditto and 6 ditto.

For 50 decorative plants Ferd. Knorr was first, A. Klokner second.

In various cut flowers H. Staeps won on 5 best varieties of roses, one dozen of each; F. P. Dilger for best display of carnations; H. Von Oven for 6 American Beauties; Wm. Gregory for 100 violets.

In the special prizes F. Knorr won on display of begonias and other foliage plants arranged for effect, and best group of ferns arranged for effect: H. Schwebke for 10 chrysanthemum plants in 5 colors; H. Von Oven for best carnation; Currie Bros. for most artistic bouquet; Wm. Weil for basket of roses; A. Klokner for table decoration.

The following certificates of merit were also awarded by the judges: Currie Bros., group of miscellaneous plants; John Valom, display begonias and foliage plants; H. Von Oven, violet plants in pots; Archie Middlemass, group of chrysanthemums; Christ Valom, group of ferns; John Nelson, Oshkosh, best five varieties of roses and display of carnations; H. Von Oven, display of carnations; F. P. Dilger, best collection carnations; Currie Bros., 100 violets; Ferdinand Knorr, 100 violets; J. M. Dunlop, 5 varieties of roses. C. B. W.

#### Toronto.

Trade, which had been pretty good for two or three weeks, has unaccountably fallen off and things have been very dull for the last few days. The weather still holds remarkably fine, which may have something to do with dull trade.

Certainly all the chrysanthemum shows which are being held this week can not account for lack of attendance from bad weather, and it is sincerely to be hoped that it may keep fine until the show is over here.

A meeting of the city florists was called by Mr. C. Tidy on Thursday evening last at his King street store, for the purpose of considering various matters connected with the trade. No definite conclusions were arrived at as far as I can learn and the meeting was adjourned to a later date.

Mr. Tidy has opened another cut flower and plant store in the Yonge St. Arcade, a first rate stand.

The plants have arrived home from the World's Fair looking very tired, though considering that they have been on exhibition for seven months and that the conditions were not the most favorable, they look as well as might be expected. Lantias stood the racket best of all and actually flourished.

All arrangements for the chrysanthemum show are now complete. For cut flowers it promises to be the best show ever held here, but large specimen plants will many of them be too far gone to be seen at their best. Entries are coming in apace for all classes.

Cut blooms for the Toronto show can cross the line from the States duty free if in by the 21st inst. E.

#### Boston.

The chrysanthemum show was favored with a very large attendance from the opening to the closing day. In the afternoons the crowds were the largest. Very few professionals from a distance were present this year, owing probably to the fact that almost every show of any account in the country took place during the same week.

# CANNAS

The Seed Trade.

AM. SEED TRADE ASSOCIATION.

W. ATLEE BURPEE, Philadelphia, president; A. L. DON, secretary and treasurer, 116 Chambers street, New York. Next annual meeting second Tuesday in June, (will probably be held in Toronto.)

JOHN LEWIS CHILDS has been elected a member of the New York State Senate by a good majority.

BROOKLYN.—Henry Meyer has erected two greenhouses for retail trade on Newlots avenue, East New York.

ST LOUIS—K. F. Tesson is sending in to W. Ellison some of the finest Beauties, Brides and Mermets that come to this market.

PEORIA, ILL.—A chrysanthemum show was held here November 9, 10 and 11, in aid of a local charity. It was under the management of Cole Bros.

SCHENECTADY, N. Y.—Five of W. C. Eger's six greenhouses were either entirely destroyed or rendered worthless for future use without rebuilding by a fire early in the morning of November 11. Loss about \$3,000, with no insurance. Owing to high special rates Mr. E. had allowed his policies to lapse awaiting more reasonable rates. The origin of the fire is not definitely known but incendiarism is suspected.

EXTRA HEAVY

TWO YEAR OLD HERMOSA ROSES.

We have growing in the open ground a beautiful lot of extra heavy, two year old Hermosa Roses. The plants average 24 to 30 inches in height, bushy and strong and will make fine plants to pot up into 6 and 7-inch pots for next **SPRING SALES.** Price, \$15.00 per 100; per 1000 \$140.00.

IMPORTED BUDDED ROSES.

Our importations of these arrive the latter part of November and promise to be very fine this season. We offer all the leading varieties as follows:

Alfred Colomb,  
Anua de Diesbach,  
Baron de Bonstettin,  
Baroness Rothschild,  
Boule de Niede,

Duke of Edinburgh,  
Fisher Holmes,  
Gen. Jacqueminot,  
Gloire de Mousseuses (Moss),  
Magna Charta.

Merveille de Lyon,  
Mons. Boncenne,  
Mrs. John Laing,  
Paul Neyron,

Prince Camille de Rohan,  
Ulrich Brunner,  
White Baroness,  
Xavier Olibo,

Alfred K. Williams,  
Blanche Moreau (Moss),  
Captain Christy,

Countess Murinais (Moss),  
Duchess of Albany,  
Earl of Dufferin,

Gloire de Margottin,  
Persian Yellow,  
Queen of Queens,

Rugosa,  
Rugosa Alba,  
Souvenir de Malmaison.

\$12.00 per 100; \$100.00 per 1000.

\$15.00 per 100.

**Gloire de Dijon. Marechal Niel.**

Extra fine stock. \$20.00 per 100.

**NOW** is the time to order the above. Pot the plants as soon as received and plunge the pots into a cold frame, where they will winter at little expense. Root action will begin almost at once, and the plants will be in the best possible condition to bring into your houses at the proper time, with much better result than if potted up late in winter or early spring.

If you are in need of **PALMS, FERNS** or other **DECORATIVE STOCK** do not fail to consult our trade list. We have forty houses filled with this class of plants, all in the best possible condition for immediate sales.

**HENRY A. DREER, Philadelphia, Pa.**

Address J. G. Burrow,  
FISHKILL, N. Y.

Yonkers, N. Y.

The chrysanthemum show, held in Tentonia Hall, Yonkers, opening October 31, proved a very successful one. There was an admirable display, both of plants and cut flowers, and although the main exhibits came from amateur growers several well known florists were represented. The judges were Messrs. J. H. Taylor, John N. May, J. Roehrs, David Dunbar, John Wiffler and Henry Siebrecht.

J. N. May exhibited a vase of Mrs. Whitney rose and a seedling chrysanthemum "Washington Irving." Pitcher & Manda exhibited eighteen new chrysanthemums, many of them of the anemone class. Siebrecht & Wadley sent a vase of a new pink rose, Bella Siebrecht.

Among the amateur exhibits, which comprised the greater part of the show, were groups of palms and decorative plants, groups and single specimen chrysanthemums, cut blooms and seedlings. J. Hood Wright, W. E. Dodge, E. W. Weimar, R. C. Martin, David Hawley, Geo. H. Bend, Percy R. Pyne, F. Goodridge and Wm. H. Appleton were among the exhibitors. Prizes were given by various New York business houses, in addition to the money premiums offered by the management. The show was largely attended and a success in every way.

# New Incurved Yellow Chrysanthemum, MAJOR BONNAFFON.

**Awarded Special Columbian Medal at Chicago; and Certificate of Merit and First Prize for best new yellow variety at Indianapolis.**

A very soft, clear yellow of the incurved type, full to the center; flowers measure 6 to 7 inches in diameter with nearly the same depth. Its perfect form and finish gives it the same graceful appearance as Ivory has when at its best. The habit of the plant is rather dwarf and not much inclined to branching; the short jointed shoots growing up to a height of 3 feet and forming a large crown bud with a small number of much smaller laterals. The stem intervening between flower and leaves is short and strong, thus placing the flower in an erect position on the center of the branch, clad in a rich, luxuriant foliage.

With flowers of good substance and unsurpassed keeping qualities, this variety will undoubtedly prove a great acquisition to market as well as show flowers, especially so for the one stem culture so much admired now.

Our large stock and its easy propagation enables us to offer this gem to the trade in large quantities at the following prices:

**50 cents each, \$5.00 per dozen, \$35.00 per hundred.**

**50 at 100, and six at dozen rates. READY APRIL 1st, 1894.**

**FRED. DORNER & SON, La Fayette, Ind.**

OF  
WIND  
MILLS

HOT  
AIR  
PUMPING  
ENGINES

## A Windmill

Is unreliable because it depends upon the elements for its power; hydraulic rams also depend upon favorable conditions and waste as much water as they secure. Steam pumps require skill and hand pumps demand labor and time. The

DE LAMATER-RIDER OR  
DE LAMATER-ERICSSON  
Hot-Air

Pumping Engines

are especially designed for pumping water, and from shallow streams or any kind of well. They are simple, safe and reliable, require no steam and have no valves. They require very little heat to operate them, and can be arranged for any kind of fuel.

## Indianapolis.

The regular monthly meeting of the club was held Wednesday evening, November 1. It was very well attended, all members were instructed to be on hand to get things in shape for the show. Several new members were elected. The annual election will occur in December. A committee was appointed to look for a new meeting place. The club now numbers fifty members in good standing. A paper on construction of plant life and characteristics was delivered by Mr. J. J. B. Hatfield in a very satisfactory manner. He being a great student of scientific matters astonished a great many members, and will probably induce some to study other things than simply raising plants for profit. The meeting was a prolonged one and all departed having been well entertained. W. B.

Mention American Florist.

Chicago.

Elijah Chrysanthemum Tid-bit Wood has gone westward to award the prizes at the Denver show. May he have an enjoyable trip and return safely to the Hub to begin the work of "building" flowers to a proper depth for next year's shows.

Edwin Chrysanthemum-Carnation Lonsdale was discovered by a long lost cousin now living in Milwaukee, during the progress of the show, who saw his name mentioned in the daily press and hunted him up. They had not seen each other for 25 years. Mr. L. paid his cousin a short visit at his Milwaukee home before returning to the east. He left Chicago for Philadelphia on Tuesday.

The rapidity with which the exhibition in the Art Institute was dismantled on Monday was remarkable. By noon the halls were practically cleared and barely a trace of the great show was left. But, thanks to the camera, some of its beauties were preserved and will be presented to readers of the FLORIST in future issues.

"Uncle John" Thorpe has entered into partnership with O. J. Friedman, a local florist, and will remain in this city, having severed his eastern connections.

The chrysanthemums have dropped a little in price since the show, and sales are slower. This may be the result of a lessening interest in the flowers, or it may be that poorer quality of bloom has something to do with it. The main crop is now over, and few later blooms are coming in to take their place. Some fine blooms of Niveus and Domination are about the best noted. A good many flowers of undecided color are sent in, but there is no sale for them.

Harrisii lilies and paper white narcissus have made their appearance. The Harrisii is good, though some of it is decidedly green yet. It is sold for \$1.50 to \$2 a dozen. The narcissus goes very slowly, in fact it is hard to get rid of it. Violets still keep stiff at \$1.50. Quite a lot of violets have been received from the south; they are of good quality, but deficient in odor. Good roses are a little scarcer than they were, Beauties especially running rather short, and they still hold their price. Handsome wreaths of mountain laurel (kalmia) are being received; they are well made, of good foliage and sell well for funeral work. A large number was sold at the time of the late mayor's funeral.

Recent visitors: John Nelson, Oshkosh, Wis.; F. E. Carr, West Cleveland, Ohio; E. A. Suder, Toledo, Ohio.

## Announcement to Florists.

We desire to announce the dissolution of the firm of Sipfle Dopffel & Co., and to introduce to the trade its successor, The Syracuse Pottery Co., which will be under the management of William Dopffel and Conrad Breitschwerth. The business will be conducted as heretofore, except on a larger scale to meet the growing demand for our goods. We have accordingly enlarged our plant and capacity, and with unsurpassed facilities are now prepared to fill the largest order on short notice. Our latest improved machines are turning out the best and most serviceable flower pots in the market, and assuring you of our intention to lead in further improvements we solicit a continuance of your patronage in the belief that we can supply just what is needed at a price and in a manner satisfactory to all.

Send for price list and samples and we know you will give us an order.

LANCASTER, PA.—The Sheperd collection of chrysanthemums owned by Mr. James Rose was placed on exhibition last week in the Y. M. C. A. building and the public attendance was very large. The exhibition was said to be the best ever made in this city.

BRIDGTON, N. J.—The chrysanthemum show which opened on November 7, was one of the best ever held here and the public took advantage of the opportunity and attended in large numbers. Among the professional exhibitors were Richard Bagg, S. Edwards & Sons, Wm. H. Henderson and others.

## THE EXHIBITIONS.

### Washington.

The third annual chrysanthemum exhibition of the Washington Florist Club opened at the National Rifles' Armory, which will be remembered as the beautiful and spacious armory in which the S. A. F. held its annual convention in 1892. Promptly at 2 o'clock the doors were opened, the committee on arrangements having completed their work. The lower hall was devoted to plants and bulb display, while the upper was given up to cut flowers mostly.

The exhibition was a credit to the Capital of the Nation. No finer display of nature's handiwork has ever been made in Washington, and the arrangements of the different classes and varieties was exceedingly artistic. To the indefatigable labors of Messrs. Hale and Oliver is largely due the success of the arrangements. For the past ten days they have been doing nothing else than attending to the thousand and one details. They and their associates have every reason to be proud of their success. The exhibit was wonderfully well arranged, demonstrating the wisdom of the club in selecting Mr. Hale as superintendent of exhibits.

The electrical work was confined chiefly to the upper hall, where the cut flowers were staged besides the dinner tables, mantels and groups of decorative plants. Upon entering the hall the scene was quite bewildering on account of the numerous electric lights. The central feature was a pyramid of maidenhair ferns 20 feet in diameter at the base and 16 feet high, studded around at regular intervals with electric lights of different colors. Above this pyramid was a canopy 30 feet wide of white mull, which was delicately sprayed with asparagus and fringed with tiny electric bulbs. Below this and resting on the pyramid was a large revolving cone shaped structure surmounted by two electric stars, each revolving in different directions, showing various colored lights several times during each revolution. Stretching from the canopy in graceful curves to each corner and sides of hall were six immense festoons of Florida smilax and large Japanese lanterns lighted with electricity. The large

stage was banked with pandanus, dracaenas and other decorative plants. Florida smilax was profusely used throughout both halls.

Among the visitors were many florists from Boston, New York, Philadelphia and Baltimore, and they all expressed surprise and gratification at the beautiful display. They admitted that the Washington show surpassed all they had seen in their own cities this year.

One of the electric light globes hanging near a canopy which had been suspended above the pyramid in the center of the upper hall burst and set fire to a ribbon which helped to support the canopy. The whole decoration fell to the floor, causing a little momentary confusion, but the damage was very small.

CHRYSANTHEMUM PLANTS: Mr. C. F. Hale captured the first prize of \$50 for the best 24 specimens, not more than two of a kind, the plants being the handsomest ever exhibited in this city. Clark Bros. were awarded second prize, and their plants gave Hale a hard push for first place. For 12 specimens, not more than two of a kind, first prize of \$25 was given to Wm. H. King, Mr. Hale coming in second. These plants were all very fine specimens. For six specimens, distinct varieties, first premium of \$25 was easily won by Clark Bros., Mr. Hale coming in second. For best group of chrysanthemum plants in bloom, not less than 50 and not more than six of a kind, Mr. C. F. Hale walked away with first premium of \$50, Clark Bros. winning second prize of \$20. Among these were to be found the handsomest plants in the show, the competition being very keen and the judges were often at a loss to decide.

CHRYSANTHEMUM CUT BLOOMS: First premiums were awarded to C. F. Hale for 24 blooms on long stems in 12 varieties, 12 blooms on long stems distinct varieties, 24 blooms pink one variety on long stems, 24 blooms yellow one variety on long stems, 24 blooms any other color same conditions, 12 blooms yellow same conditions. To Clark Bros. for 50 blooms with long stems in 25 varieties, 24 blooms white one variety on long stems, 12 blooms pink one variety arranged in vase. To W. H. King for 24 trusses in 12 varieties, 12 blooms white any one variety in vase, 12 blooms any other color same conditions.

ROSES: First premiums were taken by Clark Bros. for American Beauty, La France, Wootton, Kaiserin, and best vase of not less than 50 blooms. By Koenig & Lacey for Perle, Bride, Mermet, Watteville, Meteor and Gontier. By C. F. Hale for white La France.

VIOLETS: First for 500 blooms to W. H. King.

CARNATIONS: First premium to E. Swayne for collection 25 of a kind. To W. H. King for vases of 50 white, red, pink and crimson.

**ARRANGEMENTS:** Decorated dinner table set for twelve, first premium, \$50, Washington Floral Co.; second, \$25, A. B. Garden. Basket of cut chrysanthemums, first Washington Floral Co.; second A. B. Garden.

**DECORATIVE PLANTS:** J. H. Ley first for group of foliage and flowering plants and display of 50 ferns in 12 varieties. Koenig & Lacey took the second on group of plants and J. L. Loose second on ferns.

**AMATEURS' PRIZES:** Best six chrysanthemum plants in bloom, first prize, \$10, J. S. Lewis for seedlings; second, \$5, Miss Evelyn Ley (the 8 year old daughter of Mr. J. H. Ley), who takes a great interest in chrysanthemums.

**CUPS:** The Washington Club silver cup, value \$50, to the exhibitor winning the most prizes offered in classes from 1 to 16 inclusive, was won by Mr. C. F. Hale. The silver cup, valued at \$25, to the exhibitor winning the most prizes offered in classes from 17 to 47 inclusive was captured by Clark Bros.

**SPECIAL PREMIUMS:** C. F. Hale won the gold medal for the best 50 cut chrysanthemum blooms in 25 varieties. These fifty blooms would no doubt show up equal with any fifty blooms in the United States; they were simply perfect. The six specimen blooms exhibited for the silver medal by Mr. Hale captured the prize. G. B. Wilson, in this collection, was extra fine in form and substance. Golden Wedding was unusually good. They were without a doubt the handsomest flowers in the show. The silver candelabra set offered for the best 100 blooms, not more than 4 of a kind, was awarded to Mr. C. F. Hale. The silver cup for the best mantel decoration was won by Washington Floral Co. This was a fine piece of work, marantas, ferns, palms and yellow and white "mums" being used. The silver medal for the best vase of cut blooms any color was easily won by Mr. C. F. Hale. The gold medal for the best 6 chrysanthemum plants distinct colors was awarded to Mr. C. F. Hale. He also took the silver cup for the best 6 plants, distinct varieties. The silver tea service for the best 4 specimen plants distinct colors, was won by Clark Bros., as was also the silver water service offered for the best 6 specimen plants, distinct varieties. The ladies' writing desk offered for the best 6 specimen plants distinct varieties was captured by Mr. C. F. Hale, as was also the French plate mirror offered for the best vase of 25 blooms of one color. Clark Bros. walked away with the silver cup for the best three plants distinct varieties. They also very easily captured the handsome carving set for the best vase of 25 blooms any color; this was a very fine collection of handsome flowers of Golden Wedding, E. D. Adams, Frank Thomson, Princess of Chrysanthemums, Mrs. Georgie Cole, Lilian B. Bird, Marvel, President Wm. R. Smith, The Queen, Harry May, Miss Minnie Wanamaker, Cullingfordii; they were all extra fine and artistically arranged in a vase standing four feet high, the flowers having extra long stems and falling well over the vase. The standard banjo for the best four specimen plants any color went to the lucky Hale. He also walked away with the set of silver spoons for six vases of cut flowers, and the set of silver fruit knives for the best three vases of blooms.

#### NOTES.

Mr. C. F. Hale's vase of chrysanthemum Cullingfordii was the finest of the dark varieties on exhibition; the flowers were probably the largest ever produced of this variety.

Mr. J. R. Freeman had two very handsome vases one filled with Miss Minnie Wanamaker the other with Widener mums, magnificent blooms for which he received certificate of merit. His exhibition of seedling cannas were very fine and also received a certificate of merit. Neither were in competition.

The collection of 16 varieties of carnation exhibited by Ed. Swayne and a like collection by W. H. King deserve special mention. They were excellent flowers and neatly arranged in vases, each variety to itself.

Helen Keller carnation, sent by Mr. J. N. May, received a first-class certificate, being an exceptionally fine flower of the fancy variety. White Rose, Daybreak and Sweetbrier carnation also showed up well being very much admired, they also received first-class certificates.

Koenig and Lacey had a very fine display of adiantums, Cocos Weddelliana, pandanus and asparagus, arranged on a table about 20 feet long, through which they had a fine assortment of roses tastily arranged, including La France, Perle, Bride, Wootton, Meteor and Watteville, which attracted considerable attention.

C. A. Brunger, gardener at the Industrial Home, exhibited a fine lot of well grown pot chrysanthemums.

A. B. Garden had a fine group of palms and ferns at one side of the lower hall, in the center of which stood a miniature facsimile of the Washington Post's new building. On this floor Koenig & Lacey had their exhibit of decorative plants which captured the second prize. It was a very creditable display for this young, but enterprising firm.

The most artistic display in the entire show was the wedding decoration shown in the rear of the lower hall. The scene was complete in every detail only wanting the couple for whom the nuptial knot was supposed to be tied. The chancel in its entirety was shown. The floor was of selaginella, the altar was composed of orchids and chrysanthemums, the bell was of white carnations. The rails of the chancel were covered with asparagus which was so arranged as to fall gracefully to the floor in striking relief to the rest of the scene; the rails were studded with electric bulbs. The effect of the entire arrangement was charming in the extreme.

Clark Bro's. display of roses was very fine. Their La France, which took first prize, was beyond a doubt the finest grown in the District of Columbia. Their vase of pink chrysanthemums President Wm. R. Smith was very fine. Its soft pink tint is just what the pale blondes are looking for.

In the upper hall was perhaps the most valuable collection of plants in the exhibition and one which showed superior cultivation. These were exhibited by Mr. J. H. Ley. Mr. Ley is without doubt one of the finest plantsmen in this country. Noticeable among this fine display was several plants of Cupania flcifolia; a Brazilian tree with fern like foliage, excellently well grown and which Mr. Ley says is a fine decorative plant, and will stand considerable rough usage, though hard to propagate. A fine specimen of Latania rotundifolia caught my eye and Croton Rudii with its fine broad leaves richly colored with dark red. This is one of the handsomest crotons I have ever seen. There were also six fine specimens of Latania borbonica aurea, the only golden palm in cultivation, and palms, dracaenas, crotons, caladiums and other plants of this class too numerous to men-

tion. All in the lightest state of cultivation.

The club deserves the warmest praise from all Washingtonians for its earnest efforts to make the show this year more of a success than ever before, and it was a grand success in every way, except financially; the club is several hundred dollars out of pocket.

C. LESLIE REYNOLDS.

#### Springfield, Mass.

The chrysanthemum show of the Hampden County Hort. Society opened the 15th for three days at the new Masonic Hall building. "What a wilderness of beauty" was the exclamation of visitors. A gentleman from New York said, "Why didn't you send these plants to the New York show? there was nothing there to compare." Our plant exhibit was not as large as in former years, but the plants were good and the display of blooms was far better than ever before. A. N. Pierson of Cromwell, Conn., had an elegant display which required some 500 blooms of the most perfect quality. Minnie Wanamaker, Golden Wedding, Kioto, Niveus, President W. R. Smith and A. J. Drexel were especially noticeable. Wm. Nicholson of Framingham had a fine showing of specimen blooms which reminded one of the Boston show, especially his Golden Wedding, Domination and E. G. Hill. Others of extra note were Minnie Wanamaker, Mrs. Lippincott and Mrs. Kimball. Close by was a fine lot of blooms from Wm. N. Craig of Taunton; Mrs. L. C. Madeira, Molyneux, Golden Gate and Vivand-Morel were of excellent quality. One of the most attractive flowers in the hall was his Mrs. Louis Childs Madeira; its round form certainly reminds one of a perfect orange. E. H. Howland of Holyoke filled a table with a great variety of blooms. Pitcher & Manda had their namesake on exhibition, which attracted much attention; they also had a fine showing of the newer sorts, including Black Beauty, Mrs. Bayard Cutting, Defiance, Mrs. W. P. Hennessey and Mrs. F. L. Ames; this last variety was looked upon by some of the experts as of much value. Collis & Tucker of Ware were in it for the first time, this being their first year growing the Queen of Autumn, and they should feel satisfied, for they not only made a good showing, but captured several premiums; they have had the best success as far as size of blooms is concerned with Waban, Golden Wedding, Jessica and Minnie Wanamaker. Mutual Friend, from Mann Bros. of Randolph, was much admired; it is a beautiful clear white, and, judging from its appearance here, a good keeper as well as one that will ship well. Nathan Smith & Son, Adrian, Mich., were represented by ten new seedlings and some fifty varieties of the better old sorts. Their No. 10, Laredo, Ingomar, Harry Balsley, Insolitus and Maud Dean were especially beautiful, while all were of the most perfect form. One would not think that flowers could be sent so far and arrive in such good condition.

Among the plants, F. H. Hatfield, gardener to Walter Hunnewell of Wellesley, had the best specimens in the hall. Louis Boehmer, Wm. Falconer, Mrs. Joseph Rossiter and Cullingfordii were the best ever on exhibition in this city. This was the only lot of plants by a professional gardener; all other exhibits of plants were by amateur growers. Miss M. P. Brewer had a fine showing of bush plants and standards, some fifty plants, nicely grouped; the Misses Taylor, about the

GENERAL VIEW OF THE NEW YORK SHOW FROM THE BALCONY

same number; and H. C. Hamilton, enough to fill one end of the hall; his standards stood six to eight feet high and formed a good background for the bush plants. F. M. Alden entered a nice little lot of standards and bush plants, then the children contributed the remainder.

Next came roses. A. N. Pierson of Cromwell, Conn., had a beautiful display, taking about ten feet of a six-foot table. Among the newer sorts Testout and Hoste were fine, also his American Beauties. C. F. Fairfield made a fine showing of twelve varieties in front of an elegant bank of palms arranged by the Gale Floral Co. The La France and Meteors in this exhibit are seldom excelled. His Mermets and Brides were also of fine color. J. N. May, Summit, N. J., was represented by the new rose, Mrs. W. C. Whitney. The fragrance of this new variety is beautiful.

Carnations—here there was more competition. Mr. Nicholson of Framingham had a fine showing, including the Nicholson and Ada Byron. What a delightful fragrance this last variety possesses! This alone should make it a valuable sort. The Nicholson is a fine flower of the shade of pink that always sells. E. H. Howland also had a good showing in this department. A. N. Pierson also entered carnations. Unfortunately a fine lot

from The Cottage Gardens, Queens, N. Y., arrived late for competition. Among them Lillian Abbe, Storm King, The Stuart and Wm. Scott were extra fine, also Lizzie McGowan. Those who can't grow this sort should take a trip to Queens and see how it is done. Peter Herb, Mt. Healthy, Ohio, sent his new seedling Adelaide Kresken (they must be short of names in Ohio), but this didn't arrive until a day late; but for all that, when it did come it was a beauty, a fine color, much like Sweetbrier, but of larger size. John McGowan's new seedling Fred Cody is a white with pencilings of nearly a purple. Edward Swayne, Kennett Square, Pa., exhibited Ophelia and Sweetbrier, two valuable sorts. In this locality Grace Wilder is a standard color, but as shown here Sweetbrier is much better in form and equal in color.

There were several exhibits of pansies by amateur growers, good for so late in the season. C. R. Miller & Co. had a table devoted to decorative plants and jardinières; the Gale Floral Co., a table of cut flowers, including fine roses, chrysanthemums and carnations not entered for competition.

The judges were Elfred Wingett and H. P. Wookey of Lenox, Ed. J. Norman of Lee and Geo. H. Thompson of Great Barrington.

Robert Simpson of Cromwell, Conn., was an interested visitor.

The exhibition was a grand success, financially as well as in attendance. To be sure, a good attendance brings the financial part, but seldom does a show take place, except in the larger cities, that attracts so high a grade of exhibits, and this certainly has maintained the reputation of the society. The society's year closes with this show; the annual meeting takes place soon, so that early in December the work will be planned for the coming year. G.

Elmira, N. Y.

Grove P. Rawson's invitation per card for a private view of his Winsor avenue plant brought together a large attendance of society people who were charmed with the unusually fine display of chrysanthemums grown to perfection (even if I, myself, do say it), as well as roses, carnations, violets, palms, ferns and orchids, all in first class condition. It was really an A No. 1 flower show that advertised itself on its own merits, the attendance being doubled and trebled from day to day, proving of great benefit in booming the flower trade.

Some of the notable flowers of great size were Golden Gate, Grove P. Rawson

(as here grown from original stock very fine and much admired for its lovely color and good shape), Good Gracious. By the way, Good Gracious is not synonymous with Princess of Chrysanthemums, as some seem to think; although similar as to color, it is yet distinct in shape and much better habit. The former is preferable; even the Princess would say as to that, Good Gracious. First class blooms of uniform excellence were Vivand Morel, J. C. Vaughan, Wm. Falconer, Mrs. Jerome Jones, Mabel Simpkins, Anna A. Sturges, Martha Duryea, Waban, Mermaid, Roslyn, Florence Davis, Rob't Bottomley, Mrs. D. D. L. Farson, Molly Bawn, Geo. W. Childs, Mrs. Langtry, Col. W. B. Smith, Aug. Swanson, Baronald, Chicago, Pelican, Mrs. Rob't Craig, Sunset, Mrs. E. D. Adams, Ed. Hatch, Tuxedo, Wm. H. Lincoln, L. Canning and hosts of others. The most striking novelty is a golden yellow sport from Canning, identical otherwise with this most useful sort. If it stands the test of another season it will prove a notable variety, entirely distinct from other yellows.

The so-called early French varieties are something of a snare and delusion grown under glass, as almost all of them lack size, substance and finish.

For cutting, Belle Poitevine, white, is a beauty; nothing could be finer in the way of a Chinese incurved. Used as a gentleman's boutonniere or for plateau basket work it is perfection. Another good sort for cutting is Carrie Denny, amber, nicely incurved, early, of graceful appearance, and the color is much liked by the retail trade, as is the reflexed Tuxedo (of a deeper shade and later). Some class Carrie Denny as a weak growing sort; it is simply dwarf, that's all, but holds its head erect, as all good mums for cutting should be at all useful. Chicago is a nice early cut flower, pearl pink, large, with stiff stems, as is the popular Jos. H. White.

Our best blooms are from June cuttings planted out in solid beds from 4-inch pots August 1 to 15, or grown on in 5-inch pots to single stem. Carefully select the stock you use, or you cannot expect any remarkable flower development. We grow them in the same compost as for roses, giving all the air possible, but with no liquid feeding. I don't believe in it. Growers seem to think a chrysanthemum has the stomach of an ox, but mums *do* get dyspepsia from over feeding, and their faces show it, as does poor humanity.

The new aspirants to public favor must be large, yet shapely, full petaled, not "drooping" easily like Mrs. Langtry or "spotting," as Ada Spaulding, an I withal good keeping qualities, together with stiff stems, plenty of foliage and reasonably short stocky growth; no Shanghais need apply as the chrysanthemum of the future. Please give us those that once seen will never be forgotten, at the same time "hold their own" to the end of the chapter.

November is the gala month for rich display of gorgeous coloring, thanks to the chrysanthemum. Growers and retailers at least once a year can afford to keep "open house." Go at it in the right sort of way and results will be satisfactory; customers and friends will enthuse; besides it will boom the flower business. I believe it—I know it.

GROVE P. RAWSON.

Germantown, Pa.

Decidedly the prettiest chrysanthemum show ever held by the Germantown

Horticultural Society was opened to the public last evening in the Germantown Cricket Club house at Manheim. A better place could hardly have been selected, the large dancing hall on the second floor being admirably adapted for displaying the plants, while in the galleries above the cut flowers were seen to advantage.

On entering the hall the visitor at once noticed the excellence of the general effect. A beautiful mound of foliage plants in the center dividing the rows of bright colored specimen chrysanthemums. At the sides of the hall were several pretty mantel decorations, while on the stage beyond the orchestra were hidden by a semi-circle of the standard chrysanthemums and foliage plants. Many of the plants were finely grown and reflected great credit on the gardeners and florists exhibiting them. Among the collections such old favorites as Puritan, W. H. Lincoln, Lillian B. Bird, Cullingfordii, Miss Minnie Wanamaker and Mrs. Charles Wheeler were in fine form, but every here and there a plant of the newer varieties and seedlings never before shown were noticed. The standards, though few in number, were very good. The seedlings were numerous and some of them of decided merit.

Of the individual exhibits a word of praise is certainly due to Mr. Mathew McCleary, gardener to A. H. Mason, Esq., who, although obliged to raise his plants in a cold frame, captured more prizes than any other exhibitor, showing some fine specimen plants, collections and seedlings. Mr. Walter Cliffe's exhibit was one of the features of the show. The central group of foliage plants referred to before was shown by him, also several smaller groups and a pretty mantel decoration. Mr. Albert Woltemate's mantel decoration was remarkably fine, its effect being much enhanced by the use of a few orchids. To Mr. Woltemate also is largely due the success of the show, as he is chairman of the committee.

Going up stairs into the galleries, the effect is greatly heightened, and many of the visitors spent much of their time here walking among the cut flowers and gazing down at the plants below. "The roses and carnations," to quote Mr. David Cliffe, "are decidedly better than those shown at the Pennsylvania exhibition last week," and this seemed to be the general verdict. It was partly due to more favorable weather perhaps, but mainly because the Germantown and Chestnut Hill growers turned out with a will and did their best. Pre-eminent among them Mr. John Burton stands first with a splendid display of roses and cypripediums, prominent among the former being American Belle. These roses were easily the best shown, but Mr. Burton being a judge would not allow them to compete. Messrs. Thomas Mehan & Son and Thomas Butler showed some good carnation blooms and Mr. Edwin Lonsdale showed some fine chrysanthemum cut blooms, a good pink, named, I think, Eda Prass, and the famous Princeton orange Tuxedo, also a vase of his fine seedling carnation Helen Keller.

Mr. Thomas Cartledge and Secretary Farson agree in praising the beauty of the show and its general freshness. It seems a great pity that we Germantowners do not yet understand how to advertise our shows properly in order to make them a financial as well as an artistic and a horticultural success, but perhaps we will do better another year.

The judges were Messrs. Cartledge, Burton, Bevis and Colflesh,

JOHN WELCH YOUNG.

Hartford, Conn.

The exhibition given by the Hartford County Horticultural Society which opened November 7 was decidedly good, in fact the best the society has given in the six years of its existence. The specimen plants shown by Mr. Geo. W. Atwood were very fine, particularly a beautiful plant of Ivory; this to our way of thinking for shape, foliage, quality and quantity of flowers came near to perfection. The cut flower exhibit was very large and varied. Messrs. John Coombs, Robert Patchet and James Smith, of Hartford, showed a lot of fresh, large, well foliaged flowers that would do credit to any large city. The specimens of Wm. H. Lincoln, Golden Wedding, Niveus, The Queen, Mrs. Libbie Allen and Vivand-Morel were almost perfection. The display of seedling blooms was very creditable, especially a beautiful, broad petaled creamy white grown by John H. Slocombe of New Haven. One of the curiosities was a very double white sort with a cleanly defined yellow border, sent by Pitcher & Manda.

The arrangements for judging were very defective, though improved over former years. Imagine a judge trying to give satisfaction, when the competing classes were scattered all through the hall; it would require a first-class Kodak to keep the impression in your mind of one entry while you were busy hunting up the next, and so on for eight or ten entries in one class.

The Hartford Society is certainly fortunate to have a public spirited member like Mr. A. N. Pierson, of Cromwell, who filled one enormous table with vases of superb flowers, with no possible recompense, but his interest in horticulture and a desire to help the society. Mr. Pierson also contributed a collection of roses that were far beyond the average, particularly a lot of large beautifully colored Wattervilles and Cusins. V.

New Bedford, Mass.

The chrysanthemum exhibition of the New Bedford Gardeners' and Florists' Club opened on Monday, November 13, in City Hall. The interior of the hall presented a fine appearance, being draped with flags and bunting. The growing plants were arranged in classes on the floor of the hall, and the committee deserve great credit for the management of the affair. The show was a fine one in every respect. Never before have the gardeners exerted themselves to please the public and do credit to the club as on this occasion. Everything was arranged and the committee through with their awards by 2 o'clock, in time for the opening at 3 p. m.

Among some of the most notable awards we may mention the one for the silver cup, which was won by John D. Roney. This cup has to be won by the same party for two years in order to retain it; for the three years it has come to the same man but once.

For the best 12 distinct varieties in 12-inch pots the first prize went to Fred Puckering. For group of chrysanthemums 40 feet square, first to Fred Puckering. For the best six pots of violets (which by the way were very fine), first prize James W. Riley. For the best group of orchids, first prize to Peter Murry; there were some hundred other prizes awarded.

The committee were under great obligations to Mr. Taber, the treasurer of the club, who was indefatigable in his

A CORNER AT THE NEW YORK SHOW.

endeavors to make the time pass very pleasantly, and certainly the committee fully appreciated his many acts of kindness.

#### New Haven, Conn.

The New Haven show opened November 8, but there being no premium list and no attempt at competition, there had been no special effort among the growers to distinguish themselves. The number of plants shown was quite large, but nothing noticeable in the way of specimens. The best plants were sent by Mayor Sargent's gardener and were really fine. Other exhibitors were the gardeners of Mrs. F. B. Dexter, Mrs. O. F. Winchester, Prof. Salisbury, Miss Hillhouse and Mrs. J. A. Sperry. Among the florists who sent either plants or flowers were John H. Slocombe, R. McKenzie, Archibald Veitch, John N. Champion, Mrs. R. Arnold and Robert Veitch & Son.

As the object of the show was simply to raise money for local charities and the receipts were quite large, it doubtless was more satisfactory to the managers than a first-class chrysanthemum exhibition would have been.

#### Wayne, Pa.

The second annual chrysanthemum show of the Wayne Horticultural Society was held at the Wayne Opera House November 1, 2 and 3. The stage, chandeliers and walls of the hall were beautifully decorated with oak and laurel and large groups of specimen plants from the Wootton Conservatories of Mr. Geo. W. Childs were effectively used to beautify

the hall. The exhibits of chrysanthemums from Gordon Smirl, H. G. Standen, Christopher Fallon, John Curwen and others were quite extensive and secured many of the premiums. Edwin Lonsdale of Chestnut Hill was among the chrysanthemum exhibitors with several choice varieties and also showed a fine vase of the new carnation Helen Keller. In addition to the magnificent foliage plants and palms contributed by John M. Hughes, the well known gardener at Wootton, there were also some fine specimens from John G. Gardner. Mr. Gardner also acted as superintendent of the exhibition. The judges were Messrs. H. F. Michell, Thos. Cartledge and W. Warner Harper. On Thursday evening an interesting feature was a dinner table decoration by Mr. H. H. Battles. White chrysanthemums, orchids and Farleyense ferns were used. The flowers were arranged in a tall glass in the center of the table, but in such a way as not to obstruct the view across. Late in the evening Mr. Battles changed the decoration to that of a breakfast table, in which American Belle roses and ferns were the principal flowers used.

#### San Francisco.

On account of there being no flower show in San Francisco this fall one was given by the Santa Clara Floral Society at San Jose, October 25 to 28. The hall was tastefully decorated with palms, evergreens, lanterns, etc., and the prizes were in the forms of diamond pins, rings, etc. The chief attraction was the grand display of chrysanthemums by Mr. M. Lynch, of the Menlo Park Nurseries. His

display was conceded by a great many to be the grandest ever seen in California. He had cut blooms of Vivian-Morel over 12 inches in diameter, and his Golden Wedding were also from 11 to 13 inches across. A set of twelve seedlings was also a great attraction. His cut blooms of "The World," a grand new white, captivated the hall. His other cut flowers were equally as fine. Great credit is due these two gentlemen for their efforts to make the show a success. It will go down on the society's books as being one of the most successful shows on record.

THE WANDERER.

#### Brooklyn, N. Y.

The opening of the annual chrysanthemum exhibition of the Linnean Club at the Opera House in Jamaica, on November 8, was quite an event in Jamaica society. The exhibition was successful in every way and far superior to that of last fall. J. L. Childs, J. Wachtell, Wm. W. Walter and other professionals contributed liberally, and there was also a lively competition between amateur growers and exhibitors of flowers and plants, dried grasses, winter bouquets, etc.

Private chrysanthemum shows have been as thick as flies in this neighborhood and it would take a volume to describe them all. J. Condon, opposite the entrance to Greenwood Cemetery, always has a big display. This year the chrysanthemums occupy the greater part of eight greenhouses, and many of the most popular varieties were to be seen in first rate shape. Another extensive display was made at the greenhouses of Richard

Shannon, of Brooklyn. It was attended by a large number of visitors and was a success in every respect.

Mrs. Jahn, the wife of August Jahn, the well known florist on Broadway, died on November 10, after a long and painful illness. Mrs. Jahn was greatly beloved by her neighbors and friends for her many social and domestic virtues, and widespread sympathy will be extended to Mr. Jahn in his great affliction.

Charles E. Applegate has a very fine exhibition of chrysanthemums in honor of the opening of his new store on Putman avenue. It has been attended by a large number of visitors, including many prominent society people.

#### Oshkosh, Wis.

The fourth annual chrysanthemum show of the Oshkosh Florist Club opened in this city November 14th, in the Opera House. The display in all classes ranked higher than at any of the former shows. The improvement in groups of palms and ornamental plants was especially noticeable.

In chrysanthemums, the specimen plants in large pots shown by James Lewis, gardener to Senator Sawyer, were very good, although somewhat taller in growth than in ideal specimen plants of this class; in flowers and foliage, however, they were above criticism.

For large specimen plants in distinct varieties and in separate colors Mr. James Lewis was easily first in the five largest classes, while Isaac Miles took second in the same. Mr. John Nelson was first on 25 single specimens in 5-inch pots, his flowers scaling sixty points higher than any competitor.

In cut blooms Mr. James Lewis was first with 50 grand specimens in 25 kinds. Mr. Lewis also took first for vases of white, yellow, pink and bronze, 12 flowers of each; while John Nelson took second in each of these classes, except bronze, in which Isaac Miles received the premium.

In ornamental plants, (professional) palms and ferns, James Lewis received first, John Nelson second, Isaac Miles 3rd.

For group foliage plants John Nelson was first with a fine group in great variety. James Lewis was second, Isaac Miles third.

Begonias—James Lewis first, Isaac Miles second.

For best palms and ferns, six of each, James Lewis received first, John Nelson second.

John Nelson received first for a very neat collection of orchids in bloom.

#### Short Single Stem Chrysanthemum.

Mr. Frank Holznagle of Highland Park, Detroit, Mich., sends us a single stem plant of Lincoln bearing a fine large bloom and with a stem measuring only 13 inches from soil to flower. In his note he asks, "Why do they come so short?" We fear that Frank is asking questions for amusement. He knows perfectly well that the plant is grown from a very late struck cutting on which the flower bud had already begun to form and which of course checked any further growth of stem. This method of securing neat, short stemmed pot plants was fully described in the *FLORIST* several years ago.

#### Chrysanthemums from Elmira.

A box of chrysanthemums received last week from Mr. Grove P. Rawson, Elmira,

N. Y., proved that there the Queen of Autumn was still on deck. The collection consisted of mid-season or late varieties, all specimen blooms.

If we could get Lilian B. Bird in quantity, in just the condition of the flowers sent here, there could be no complaints of it as a commercial bloom. It was strong in the neck, just droop enough for grace, foliage fine, and flowers six inches across. The color is just the pink that women admire; it is certainly a grand variety when well done.

Violet Rose is a fine flower, and at times the color is good, but the suspicion of lividness is always a defect, and at times a positive disfigurement. Mistle-toe is too faded in color to be serviceable, and Mrs. Irving Clark, though fine for exhibitions, is not a satisfactory market flower; the color is against it.

In yellows Mr. Rawson sent us some fine blooms, which would be admired at any exhibition. Mrs. T. C. Price, with its shock-head of golden yellow, is excellent, and Tuxedo is still a good amber though likely to be excelled by later introductions. Grove P. Rawson is a well-shaped flower of good size, with good stalk and foliage, and it is certain that our friend, the original of the name, grows it better than anyone else. The great defect is that the color is not bright enough. It has been noted more than ever this year that in the Chicago market undecided colors won't sell at any price; bright yellows and bright pinks are wanted—pale nankin, chrome, dull amber, bronze, crimson, amaranth or lilac pink are all valueless. It is often the case that flowers unsalable in the wholesale market may be sold by a grower with a local trade, but in the main the big trade centers show the prevailing taste. Sunset, handsome enough in a collection, Alcazar, too dull to be pleasing, Brilliant, large and shapely, but dull in color, all belong to this class. Mention must be made of Mr. Rawson's Domination, Jessica, and Snowball (syn. Mrs. S. Humphreys). They are a trio of very beautiful whites, fine for commercial purposes, and the flowers sent us were extra fine in quality.

#### Review of Varieties.

Among those in attendance at the World's Fair Chrysanthemum Show was Mr. Elmer D. Smith, of Adrian, Mich., secretary of the National Chrysanthemum Society of America. Though a young man Mr. Smith has made his mark as a chrysanthemum grower, and ranks high among the authorities on this flower.

We give below the result of an interview with this gentleman which will, we believe, be of much interest to our readers. Before giving his opinions on varieties he emphasized the fact that his opinions were formed from his own individual experience only and that it varied some from that of other growers, the differences being probably due to variations in soil and conditions.

#### WHITES.

Ivory. Still at the top. Dwarf in growth, good stem, flower large with good substance. A good all round variety, for either pot plant or cut bloom. Second early.

The Queen. Grand both as pot plant and for cut blooms so far as we can see now. Flower is not full to the center, but when well grown the center is covered by the incurving petals, very large. Good stem, good foliage and good grower. Plant medium height. Midseason. Good for both exhibition and commercial use.

Niveus. Good exhibition flower. Has substance enough and is a good enough grower to be a good commercial sort, but the peculiar reflexed form of the outer petals makes it a rather unsatisfactory shipper. Where flowers are to be used by the grower, and not shipped, it is an excellent sort. A little later than mid-season.

Miss Minnie Wanamaker. Fine both for exhibition and cut flowers. One of the best.

Mrs. Jerome Jones. Very white, incurved, good size and a high built flower, but should be thoroughly developed before being cut. If flower is cut before it is fully ripe it will wilt very quickly. The foliage covers the stem right up to the flower, which is a strong point in its favor.

Joseph H. White. Remarkable for substance of the flower and consequent long keeping qualities. The flower is not the largest but is of fine form, a perfect ball when fully developed, and the stem and growth are both good. Second early.

Mrs. Robert Craig. One of the largest of the incurved type, pure white, of good substance, good stem and growth. Mid-season.

Goguc. A sport from Mrs. Irving Clark and identical with that variety except in color. It is more desirable for exhibition than for commercial use. Mid-season.

Domination. Still very desirable.

Jessica. Consider Domination better as latter has no disk.

Beacon. Good for exhibition only.

Belle Hickey. Lots of better ones.

The Bride. Many that are better.

Christmas Eve. Very late, which is its only merit.

Diana. Still grown by some for early, but there are lots of better ones that are just as early.

Flora Hill. Fine when well done, but hard to grow.

Harvest Queen. A few days earlier than Ivory, but its earliness is its only good quality.

Miss Anna Hartshorn. Stem too weak.

Mrs. Alpheus Hardy. Beautiful when well done, but few growers can manage it. Not much value commercially any way as stem too weak.

Snowball (Syn. Mrs. S. Humphreys). Small but sometimes desirable on account of lateness.

Mrs. Gov. Fifer. Good substance but shows too much of the center.

Mrs. E. D. Adams. Good as a single stem plant but poor substance. No good commercially.

#### PINKS.

Harry Balsley. Delicate color, good growth and stem. A very tall grower which is only objection commercially. A very beautiful flower.

Vivian-Morel. Large and good all round except that flower is apt to be injured in shipping unless unusual care is observed.

John H. Taylor. Early. Short jointed in growth, good stem, flower large with a high center, and stem clothed with foliage right up to the flower. Excellent.

Mermaid. Good, but all growers can't get it first class.

V. H. Hallock. Same defect as above.

Waban. Would be good for exhibition if it had substance which it lacks sadly.

Ed. Hatch. Pink when grown cool and white when forced. Good for exhibition when grown cool.

Lillian Russell. Stem too weak.

Mrs. Morrison. Poor color.

Olga. Large, and has many good traits, but superseded by newer sorts.

SPECIMEN PLANTS AT THE BOSTON CHRYSANTHEMUM SHOW.

Mrs. Irving Clark. Has good constitution and foliage, but too much magenta in the color.

Mrs. Frank Thompson. Sometimes useful as an exhibition sort.

Mrs. J. N. Gerard. Good early pink in some localities, but not generally liked.

Eda Prass. Probably one of the best for pot plants. Good as Ivory in this respect.

Excellent. Fine when well done, but apt to come poor color.

Aristine Anderson. Weak stem.

Ada Spaulding. Pink when grown cool, but nearly white when forced. Useful for exhibition only.

Princess of Chrysanthemums. Very light pink, almost white. Good only for exhibition.

#### YELLOWS.

Harry E. Widener. As grown by experts this is probably the best yellow up to date, but under average culture W. H. Lincoln gives better results.

W. H. Lincoln. This cannot be done so finely as Widener, but where unable to give the highest culture it is more satisfactory. Good Lincolns can be produced with much less effort than fair Wideners.

Mrs. Craig Lippincott. This is apparently the best of the new yellows. The growth is strong, foliage large and flower a very bright yellow. A very promising variety.

Mrs. J. G. Whilldin. A good early yellow.

Golden Wedding. Every plant we had of this variety was infested by a new insect pest that we were unable to suc-

cessfully combat. The leaves curled inward and as a secondary effect from the devastations of the insect the stem and under surface of the leaves became covered with a rust. The flowers did not open and were practically all bull-heads. Have heard similar complaints from other growers. Some blooms of this variety were, however, exhibited at the World's Fair show with foliage free from the pest noted.

Dr. Callandreau. A very light shade. Good form and petals very gracefully disposed. Good stem and foliage.

Emma Hitzeroth. Much like Widener, only lighter in shade and a better grower.

Kioto. Good only for exhibition on account of peculiar form.

Gloriosum. Superseded by Whilldin as an early yellow.

Dr. Covert. Good, but hard to grow.

Maria Simpson. Some beautiful flowers are shown at exhibitions, but have never been able to grow it good myself.

E. G. Hill. There are many better, and the same may be said of Mrs. Frank Clinton and Gorgeous.

Eldorado. Too weak a grower.

H. Cannell. Similar to Kioto, but better stem.

#### BRIGHT CRIMSONS.

George W. Childs. Probably the best crimson we have to-day.

Joey Hill. A novelty not yet fully tried, but promising. It is later than Childs and the flower is larger.

Cullingfordii. Still one of the best of its color.

O. P. Bassett. Very few growers are

able to get it good. It has an inclination to go blind.

#### MISCELLANEOUS.

Few of these odd shades are useful except for variety in exhibition collections. C. B. Whitnall. Velvety maroon. Incurved. Dwarf, good stem and foliage.

Harry May. Bronze. Good.

Miss Helyett. Maroon. Good.

Hicks Arnold. Bronze. Second early. Good.

Marguerite Jeffords. Bronze. Good.

J. C. Vaughan. Plum crimson. Would be fine if full double.

Louis Bochner. Poor color.

Referring to the packing and shipping of chrysanthemum flowers, Mr. Smith said that he found it very difficult to pack the reflexed type of flower so that it would arrive in best condition. The incurved flowers can be readily drawn together and tied up in tissue paper so they will carry in perfect order, but this is not so with flowers with reflexed petals. Hence few of the reflexed flowers take a high position as good shippers and this quality is essential in a flower that is to be shipped to market.

A curious wrinkle in culture noted by Mr. Smith is that with him Harry Balsey does not incurve as it does with other growers.

MINNEAPOLIS, MINN.—In the absence of a regular club exhibition in this city this year Messrs. E. Nagel & Co. made a special display of chrysanthemums at their store on Nicollet avenue November 11 to 18.

## Carnation Notes.

I have just come in from disbudding a hundred foot house, in which the plants are all on solid beds, and my back is protesting vigorously against solid beds and in favor of benches where one can stand upright to do the work.

It is yet an open question with me whether disbudding pays; there is of course an improvement in both the stem and the flower when disbudding is practiced, but it is so slight that it hardly pays for the time and labor expended. It is quite a job to go over a house of carnations and disbud it properly, for the buds should be taken off as soon as they are visible. It is of very little account to take them off if you wait until they are a size that would make them convenient to pinch. Unless I am very much mistaken there should be a difference in the price between disbudded ones and those that are not of about fifty cents per 100, and it will be pretty hard to get the extra fifty.

There are some varieties in which it pays well to take out the terminal bud and leave the side buds to open up. Where the side buds are near enough one size to open within a day of each other you can obtain a very good spray by practicing this. Golden Triumph is the only variety I know of that can be worked in this way to good advantage, but there are no doubt some others that will make equally as good sprays. The terminal bud should be taken out while quite small and the plants must be strong and healthy with plenty of good feed either in the shape of liquid manure or a good commercial fertilizer to get these sprays to produce flowers of good size.

Now is a good time to apply a little extra feed to your plants. Where commercial fertilizers have been tried and found effective they are a good thing to use, but in my experience I can not use anything but the pure bone (ground, not powdered). This put on about the 20th of this month always gives me an increase of bloom for Christmas and quite an increase in the quality of that bloom. Pure bone is also much better for the health of the plant than either liquid manure or a quick acting fertilizer, as either of the latter are apt to produce that quick soft growth which is very poor material to propagate from.

Right here may be a proper place to say that in my opinion growing carnations for bloom and propagating them for plants should be two separate and distinct affairs. Where you attempt the two things from the same plants one or the other is going to suffer. There is no question but that the bloom can be increased almost 50% in quality by very high culture, neither is there any question but that this high culture is injurious to the health of the plant as a propagator and if continued for a few generations will produce a very sickly lot of carnations subject to every disease in the carnation family. On the other hand if you grow your plants so as to produce good healthy cuttings the flowers are going to suffer and you will have to compete with the medium grade of bloom, and competition is very lively in that grade. It is

in this as in every other business, the best pays the best and that is what we should try to grow, and in trying we will certainly raise the standard of the carnation a little nearer where it should be.

A. M. HERR.

## Carnations at the New York Show.

The display of carnations was unusually fine, showing a great improvement in the cultivation of this popular flower. Varieties which a few years ago were considered very good, are now out of the race. Lizzie McGowan as shown by the Cottage Gardens, C. H. Allen and F. A. Storm were very large and on long, strong stems, many of the blooms measuring three inches in diameter. Edna Craig, shown by Dailedouze Bros., was the favorite with the judges in the pink class and received first; Daybreak was second. This class was the best represented, there being eight entries. Wm. Scott, the new pink sort, will certainly take the place of Grace Wilder, as the color is very similar and does not become streaked; it is also larger and the stems are much longer. F. A. Storm entered a vase of Buttercup, which were something extra, being very large and of excellent color. There were three entries in the class for collections, The Cottage Gardens taking first premium with a very fine display consisting of Edna Craig, Albertini, Wm. Scott, Buttercup, The Stuart, Lilian Abbe and thirteen other varieties; F. A. Storm took second. The Cottage Gardens received a certificate of merit for a new seedling, Storm King, a very large white, of good form, strong stem.

The display on Thursday was even finer than that of Monday. The white varieties were larger and better every way. The pink sorts fairly outclassed the previous exhibit. Wm. Nicholson of Framingham, Mass., took first premium with a new sort called Nicholson; Dailedouze Bros., second, with Edna Craig. T. Jensen took first with Lady Emma, and F. A. Storm second with Portia. The Stuart, a seedling raised by Fred Dörner and exhibited by The Cottage Gardens on Monday, attracted much attention for its excellent color, form and texture, being a good keeper, very rich scarlet and nearly one-third larger than Lady Emma. As pink is the favorite color this season, the growers present at the show were anxious to procure the opinions of the commission dealer as to which sort would sell the best. We fully believe that the honors lay about even between Edna Craig, Daybreak, Wm. Scott and Albertini. They are quite distinct and will not conflict one with the other, and should be grown by every florist. Lizzie McGowan for white is the standard sort in this locality. Buttercup has no rival yet in the market for yellow. The Stuart (if it proves a good cropper) will succeed Portia and all other scarlets. C.

## Watering and Feeding.

Being a close observer of all reading matter concerning carnation culture, in the controversy between Mr. A. M. Herr and Mr. Storm I decidedly take sides with Mr. Herr, and I think I understand him well in regard to not watering until the soil is dry. When the upper side is getting light in color you will find that the bottom soil in the benches is in a condition which we may call crisp; it will not stick together when pressed, nor crumble. This I find the right condition for watering. The more varied and the quicker the

changes are in the soil the more activity the plant will show. In the matter of feeding it is not how much fertilizer and liquid manure we are able to put on, but how much the plant is able to digest. Mr. Storm says that you don't wait until you are about starved before you eat. I can say with safety that two-thirds of the people are sick from over-eating, putting more food in the stomach than the system is able to make use of. As the principal substance we live on is pure sweet air it is surprising how little food we need if it is well digested.

Amityville, N. Y. CHAS. LEUKER.

## Miscellaneous Seasonable Hints.

*Lilium lancifolium rubrum*, *roseum* and *album* have arrived and should not be allowed to remain out of the soil but a short time. These beautiful lilies are not needed before next summer and must be brought along as slowly as possible. Pot three bulbs in a 7-inch pot, or one in a 5-inch pot, in good loam without any fresh manure in it and don't water them until they have made an inch or so of growth. I place them under a bench in the coolest house I have and cover the soil with an inch of sphagnum; place them where they are not liable to get much drip. They will remain dormant for a good many weeks, and that is what you want. As they make a growth of a few inches you will have to give them the light in a cool house. They are very useful in the early summer months after longiflorum and candidum are gone.

The callas that were shaken out and started growing in September in 5-inch pots will now need a shift if the best results are desired, and give them a light warm house. If you don't have the pots at hand, another plan which will save labor is to plant the callas on the bench where you have grown a bench of chrysanthemums. Let the soil dry out sufficiently to work well, then add a good dressing of decayed manure and plant the callas not too thick. When clearing off your old chrysanthemum benches, don't leave the four, five or six inches of soil in the benches. The plants you stand on the soil do not do half so well as those on half an inch of sand or ashes, and the soil, however good it may be, is converted into such a miserable mechanical state that it is useless until it has had a winter outside. Go to the trouble of taking it out and make a good pile of it. It is sure to be useful in the spring.

Your Christmas crop of paper white narcissus should now be in a light house and showing bud. They won't be any more than in full bloom at the holidays, and they pay then. Keep them about 55° at night, but give plenty of daylight. Don't try to force any tulips or Von Sion yet; it will only result in failure.

Put a few azaleas into a rose house temperature and keep syringed, and you can have them in flower by Christmas. Deutsche Perle is much the best for this purpose. Madame Van der Cruysen will come on a little later. A handsome small azalea sells well at the holidays.

Don't let the propagating bed be idle now. Among other things, keep on putting in cuttings of that fine foliage plant, acalypha. You are not likely to get up too large a stock of it, as you cannot increase it like a coleus; but it is a far better plant, particularly for veranda boxes, etc.

I have grown several hundred useful market size chrysanthemum plants this year, that is, grown them on the bench during the summer and lifted and potted them about September 1. They have

done well and sold well. No one who has tried this plan would ever fuss with them the whole summer in pots. And if confined to a small pot, say a 5 or 6-inch, it would be impossible to keep the leaves on, as these bench grown plants have done. But many fine chrysanthemums are not adapted to this purpose. They must be compact in growth and free flowering. Before you discard some old varieties, here is a list that with me have made fine pot plants without any special care. Ivory, Mrs. Whildin, Ada Spaulding, Cullingfordii, G. W. Childs, Wm. Falconer, Eda Prass, Etoile de Lyon, Bayard Cutting, W. H. Lincoln, L. Canning, Minnie Wanamaker, Mrs. Drexel, Mermaid and V. H. Hallock. Many more could perhaps be added to the list, but I only speak from experience, and of all the above Ivory (white) and Whildin (yellow) are ideal pot plants.

Easter is so very early (March 25) it is well to get your Bermuda lilies inside and growing as soon as you can make room for them. They are very unlikely to be too early.

WM. SCOTT.

#### Spotted Rose Foliage.

The rose leaf sent by your correspondent, dated St. Cloud, Minn., is covered with small black spots caused by using green manure, or in other words it is a concentration of ammonia which is attracted by the succulent nature of the leaf and settles in small spots. It will do no harm if the houses have plenty of air on at all times and are not allowed to get too warm, till the strong ammonia has somewhat died away. Great care must be taken to give plenty of air in the houses at all times, as the foliage will burn if the houses are too hot. The great trouble in using green manure is that to some amount, particularly if the plants are not in active growing condition, the roots are affected by it and suffer a certain check which, though it does not seem perceptible to a casual observer, will affect the growth of the plant materially. I would advise your correspondent to hold his plants slightly on the dry side as well as giving plenty of air at all times till the ammonia gets more and better assimilated and until the soil and the atmosphere of the house gets purer.

JOHN N. MAY.

#### How to Force Sweet Peas.

Ten years ago there were very few sweet peas grown for the cut flower market of Philadelphia even in summer time. Now they come in—figuratively speaking—by the bushel especially in the early spring months. They are principally the product of the carnation specialists, as a secondary crop.

It is now four or five years ago since the writer of this began to experiment with sweet peas, with the object in view of inducing them to produce their dainty blossoms in winter time. It was August 1889, that I ventured to plant some seed in 6-inch pots. They germinated freely, and grew quite satisfactorily, but it was not until February, 1890, that an opportunity offered to give these plants a decent trial. Some La France roses were not doing well, so they were thrown out and the sweet peas were transferred from the 6-inch pots to the table until recently occupied by the roses. The sweet pea plants however, had become somewhat entangled, and in the separation some of the vines became bruised, which in a very few days became evident as they died. The first flowers were cut early in March,

but the stems were rather short, so much so that I was not quite satisfied with the experiment. However, four dollars per hundred was readily paid for them. The following year the seed was planted directly in the boxes, in which they were intended to flower, and the results were very satisfactory.

They require an abundance of water when in free growth; a little liquid manure is very helpful. They seem to do a great deal better under glass in this part of the country (Philadelphia) than they do outdoors. The insidious red spider is their worst enemy, and a free use of water forcibly applied on the affected parts of the plant on bright mornings will help to keep this little rascal in check.

Carnation growers meet with good success with sweet peas by planting them at intervals among the carnation plants. They require plenty of headroom, as they will grow from eight to ten feet high during the season.

It is not too late yet to plant a few seeds, about six feet apart along the center of a span roofed carnation house; with the aid of a stout cord or some twiggy brush they will make very rapid progress in a congenial situation. An idea which I have often threatened in my mind to put into operation is to grow a few specimens in pots, twelve or fourteen inches in diameter. What a novelty at a spring exhibition or in a roomy conservatory they would be.

Seeds could be sown directly in the pots in light, rich, and porous soil. When well developed the plants should be thinned to three or not more than four of the strongest of them. The sweet pea plant has a wonderful power for what is known as *stooling*; that is to say a great number of shoots are produced from one seed.

If convenient a shapely twiggy young birch tree six or eight feet high should be planted in the center of the pot. What a magnificent display such well grown specimens would make when full of their charming flowers! It is not too late to make the attempt yet. For the later the seed is planted within reason the earlier they bloom in proportion to the time between the planting and flowering periods.

One thing must be borne in mind and that is not to defer placing the brush for the plants to climb upon any longer than can possibly be helped. They grow faster when the support is at hand, and the danger attending the disentangling of the young plants is removed.

Sweet peas will live out all winter in favored spots in the vicinity of Philadelphia. That is to say if they are planted early enough, so as to get good root hold before severe weather sets in.

EDWIN LONSDALE.

#### Mushrooms.

We are trying to raise some mushrooms and have followed directions sent us, but they omit stating whether to remove the straw they are covered with when they begin to come up or to let it remain on them. Please give us instruction on this point. It might help others as well as ourselves.

OLDHAM BROS.

Cuba, N. Y.

You don't tell us anything about the conditions under which your mushrooms are being grown, nor what are the "directions" which you have followed, hence we can not give you as explicit an answer as we should like to. Anyway, if your beds are indoors, by all means remove the straw as soon as the young mushrooms begin to appear above

ground, and don't put it on again. It is a good plan to cover the beds with straw when they are moulded over, letting the straw stay on till bearing time; this helps in retaining warmth in the beds, prevents them from becoming dry on the surface and does away with any need of watering during the non-bearing period. W. F.

#### Forcing Bulbs.

In forcing Dutch bulbs and lilies how many weeks should it be from the day they are brought in from outside till the flowers are salable?

Also how long should lily of the valley require?

F. B.

Most Dutch bulbs require from three to four weeks from the time they are brought indoors until they are in salable condition, the early lots requiring a few days longer than those that are brought in after Christmas.

Lily of the valley usually needs from twenty-one to twenty-five days to get it in good condition before the holidays, but later in the season can be nicely finished in nineteen to twenty-one days.

W. H. T.

#### Philadelphia.

Chrysanthemums are still the leading flowers in our market and are likely to last until Thanksgiving day, which festive occasion generally makes the largest inroads into their ranks, and save a few choicest late varieties, they are then heard of no more until another season. We believe that this is one reason that Thanksgiving day is so popular with some of the craft, as after six weeks of "cuss" words and other things that are said about the "weeds" but all to no purpose, they can go to church and offer thanks that their hated enemy is no more and their field is clear for another eleven months.

We believe that this cry about the chrysanthemum hurting the sale of other flowers at this season is not warranted by fact. There are more American Beauties on the market this year than ever before, yet there is a good demand for them, in fact, these and the American Belle are the best selling flowers of the day. At the same time good chrysanthemums are in demand; fine blooms of Minnie Wanamaker, Widener, Lincoln, and other choice varieties, sell well, in many cases they make their own market and are sold to people who though not expecting to buy flowers could not resist their beauty.

There is very seldom a glut of choice flowers, it is the inferior stock and the rubbish that causes the trouble; drop 25 to 33 per cent. of the output, make up the difference in quality, and all will be returned sold at satisfactory prices.

Violets are improving slowly; if some of the growers that send to the Philadelphia market would take a day off and come to town they would learn something to their advantage, for not one in five know when to pick violets or how to tie them up. It is of the utmost importance that violets should reach the consumer as soon after they are picked as possible; their fragrance is fifty points; if they are picked when half open they are like green fruit and have no fragrance, besides being only half as large and the color lacking. If picked in the morning they should reach the consumer so that he can offer them for sale the same day. If gathered in the afternoon the stems should be put in water over night; at no time should the flowers be allowed to get

wet. A great deal of care should be taken in bunching so that every flower should show with plenty of leaves around to keep them in place; they don't want to be tied very tight like a ball, but arranged so as to make as large a bunch as possible; don't use wire unless very light copper or brass; fine green thread is best, and fifty flowers to a bunch is better than twenty-five. We have seen so many violets made unmarketable, first, by being picked when only half open, or very badly bunched with leaves and flowers mixed together, or with very short stems, or tied up with a piece of No. 23 wire which had cut into the stems and had rusted, or tied up as if they were to be sold to children to play ball with, or packed helter skelter in a box after the flowers had been thoroughly soaked with water. It seems a pity that men should give their time and greenhouses to raising flowers and then pay so little attention to getting them ready for market, for there should be nothing left undone to present them in the best possible and most salable condition.

The chrysanthemum supper was not held this year, the first omission since the chrysanthemum show was inaugurated years ago. This year's exhibition while it has been a great success has lacked the presence of several gentlemen closely identified with it in former years. Edwin Lonsdale and Robert Craig were both absent at the Chicago show and will no doubt be sorry when they hear what they have missed. But that they did not miss the supper will be some satisfaction to them. Those famous songs, Annie Laurie, and The Brave old Duke of York, are as necessary to an occasion of this kind as fried oysters on the bill of fare and they will be heard later on in the season.

The National Chrysanthemum Society of America was to have met here during the week of the show, but did not materialize. The mums seem to be very well able to take care of themselves; however, if the society should work together as the members work individually, we have no doubt in the light of the advances seen this year that some of the varieties will soon be large enough to be used as umbrellas.

The weather has become decidedly cooler and several mornings the past week ice half an inch thick was to be seen, while the thermometer registers some 6 to 8 degrees of frost; there was also a slight fall of snow.

Keeping the mums back to get a better market has the effect of weakening the stems and many otherwise fine flowers are often spoiled in this way. A chrysanthemum that will not hold its head up is hard to sell and generally has to go at a low figure. The varieties in the market now are Kioto, Widener, Lincoln, Eva Hoyt and a few Whilldin in yellows. M. Wanamaker is the only good white, although there are some fair Canning, and still a few Ivory, Mermaid, Maud Dean and M. Freeman in pink about wind up the assortment. The prices are down, \$12 to \$16 per hundred being asked for the very best, but really good stock can be obtained at from \$8 to \$10.

Roses are improving. Mermets and Bridesmaids are looming up, while some growers have La France in fine shape. Kaiserin is increasing in size of flower and length of stem, and the same can be said of Meteor. Medium stock of these varieties brings \$3 to \$4, while the extra fine command \$6 per hundred. Perles, Cousins, Wattervilles and Hostes are plen-

tiful at \$2. Beauties and Belles are quite plentiful and good; they range from \$1.50 to \$2 per dozen, and the number of boxes a man has to carry seems to determine the quantity of blooms that make a dozen. Carnations are excellent and \$1.25 is asked for the best. All varieties are improving and Wilder is at last being pushed to one side, Daybreak, Edna Craig and Swayne's Sweetbrier seeming to be preferred. Edna Craig brings \$2 per hundred. Mr. Harris, who has some very fine stock of this variety, cannot get enough to supply the demand.

Among the visitors to the chrysanthemum show were J. L. Dillon, Bloomsburg; W. Scott and Prof. Cowell, Buffalo; Mr. Crow, Utica; Mr. Eldridge, Wilkesbarre; Mr. Spaulding, Orange; Messrs. Bennett and Dailedouze, Flatbush; Messrs. Gude and Clark, Washington; Mr. Frazier and others, Baltimore; Mr. Elliott, Pittsburg; and several others whose names we did not get. Another year we hope to have matters better arranged so as to get our guests to visit us about the same time and then we will have a chance to show them a little Quaker hospitality.

As far as we can learn, the volume of business is up to last year at this season, so that in spite of the cry of hard times we may all be happy yet. Some growers are complaining that prices are so low, but a comparison with those of a year ago shows very little change, not enough, we venture to say, to interfere with next season's crop of new houses.

F. O. Canning of Horticultural Hall in Fairmount Park was married to Miss Sarah J. Holmes of Philadelphia November 16.

K.

#### Boston.

The finest dozen blooms ever shown here was the vase of Mrs. Jerome Jones from Mr. Simpkins. Foliage, stem and bloom were as near perfect in every respect as anything could possibly be. Mr. A. H. Fewkes showed blooms of a seedling canna resembling very much Florence Vaughan in marking, but of a richer yellow color, a fuller spike and petals wider open, although somewhat narrower than those of Florence Vaughan. It was awarded a silver medal. David Allan showed a pretty group of orchids, including some good cypripediums and Dendrobium formosum virgineum. "Just so they won't forget I'm about," said Davie. Rea Bros. exhibited a plant in bloom of the true Aster grandiflorus, and received a certificate of merit for the same.

Alex. Montgomery has shown the Boston market what he can do with chrysanthemums, and he can make as phenomenal a record with these as he can with roses. He speaks very highly of Mrs. H. F. Spaulding, Harry Balsley and W. G. Newett. Geo. W. Childs he finds liable to burn and Mabel Simpkins drops badly. He has nothing but words of praise for the new rose Kaiserin Augusta Victoria. The Cornelia Cook, which has hitherto been grown extensively at this establishment, has been thrown out entirely this year.

Geo. A. Sutherland has had his establishment thoroughly renovated and put in shape for the big business he expects to catch during the coming winter.

N. F. McCarthy & Co. had a successful auction sale of budded roses and other dormant stock on November 1.

On Tuesday November 14, a party of gentlemen representing the garden committee and others of the Massachusetts Horticultural Society made a visit upon invitation of Mr. C. M. Atkinson, to the

grounds and greenhouses of Mr. J. L. Gardner, over which Mr. Atkinson has for many years presided. The party was met at the door by their smiling host and the first thing they were shown was a well laden table to which they were invited to sit down and do justice. After getting through with this important part of the ceremony they were in good condition to appreciate all that Mr. Atkinson had to show them in the greenhouses. Among other things the cypripediums, odontoglossums and calanthes were in splendid condition and that prettiest of all orchids for florists' use, Dendrobium Phalaenopsis as seen in many beautiful shades of color, and phalaenopsis in several species were pronounced by Mr. Fred Harris to be the best he had seen for a long time. Mr. Atkinson has very good success with eucharis and on being asked regarding his treatment he said an important point was that they should be kept dry. The plants in question at the time he said had not been watered for seven weeks. When wanted in bloom the resumption of water throws them into full flower, and another advantage in keeping them dry is that it is a sure way to keep them clear of the mite which is a serious pest otherwise. There was quite a show of chrysanthemums, some of the finest varieties in cultivation being seen here at their best. They were domiciled in the grape house. One of the most satisfactory varieties was Mrs. E. D. Adams, which although an early variety elsewhere was just in its prime here at this late date. In the herbaceous borders the Christmas roses were blooming and were a welcome sight to the English born members of the party. Before the visit broke up Mr. Atkinson discovered that the day was his birthday, a fact which he had overlooked and which resulted in prolonging the pleasant occasion far into the evening.

Mr. Ormsby, of ventilator fame, gave an entertainment at the Rawson greenhouse at Arlington to about two hundred and fifty market gardeners, florists and their ladies on the afternoon and evening of November 15. The party met at Arlington from whence they were conveyed by wagons to the establishment of W. H. Elliott in Brighton where the wonderful asparagus houses were inspected. Returning to Arlington with appetites well sharpened by the long ride they found a bountiful collation prepared for them. Music, speeches and dancing were indulged in and when the party broke up late in the evening it was unanimously voted that they never had a better time in their lives.

On Saturday, November 18, there was quite a display of chrysanthemums, carnations, etc., at Horticultural Hall from several local growers. James Comley showed sixteen large well bloomed plants of a novel chrysanthemum which he brought from Japan a year ago. The petals are very long, reflexed and drooping, color light garnet edged with pale pink or white. The centre of the flower is deep garnet, very prominent on account of the drooping habit of the petals. The effect of these blooms on the plant is very striking and the variety ought to become a favorite kind for growers of exhibition plants. Norris A. Comley showed blooms of a very promising seedling, resembling greatly Ada Spaulding, but of a very deep rich pink throughout. It received a complimentary notice. Another seedling from Louis Boehler and Mrs. Alpheus Hardy raised by T. D. Hatfield attracted much attention. It has been named Eiderdown. It is to all purposes a white

Kioto without any of Kioto's faults. A solid compact flower and looks like a good shipper. In the fruit exhibit Geo. A. Nickerson and J. H. White showed some fine hothouse grapes.

Your Philadelphia correspondent takes exception to the description in a previous Boston letter of chrysanthemum Mrs. Craig Lippincott as a "bairy yellow." The only reply I can make is that the flowers referred to did have an abundant hairy growth on the petals, and that the stocks on which they grew came from a prominent Philadelphia grower, labeled Mrs. Craig Lippincott. Possibly there is something in the atmosphere here conducive to such a growth. If so a short sojourn at the Hub might be advisable for our esteemed Philadelphia correspondent. If he will look in the glass he will understand.

Cut flower trade is looking up a little here. Roses are shortening in supply and the demand is improving. Violets also are selling much better than they did. Chrysanthemums are still plentiful, but the quality is only medium in most cases.

Mr. Wm. C. Barry of Rochester favored us with a short visit last week.

#### New York.

Considerable surprise is expressed regarding the report in the AMERICAN FLORIST Special for November 4, to the effect that "a scarcity of plants and some lack of harmony at New York is reported to affect the prospects of their show." Where such an idea could have originated it is impossible to imagine. The fact is that in the preparation and carrying out of the recent exhibition the amount of friction was less than on any previous occasion, and those gentlemen who were intrusted with the work pulled together with a single purpose, and happily to a successful finish. As to plants there were enough of them and no anxiety was felt beforehand regarding this feature of the exhibition.

One day in the latter part of the week Ernst Asmus was very much in evidence at the exhibition hall. He was in a state of ecstatic glee and acted like an Indian out on the Messiah dance. In his lucid intervals he explained that all his fun was at the expense of the rose men, who had staged a lot of roses without going through the formality of labeling them and were all disqualified by the judges in consequence.

Dyed chrysanthemum blooms are to be seen in several of the florists' windows, sometimes where such things would be least expected. The pink dyed Ivory seems to be the most popular, but occasionally a green Wanamaker supplies variety for the tawdry display. Self-respecting florists ought to be above such things.

John Henderson Co. are sending to Mullang Bros. Meteors of wonderfully fine size, color and finish. When of good quality this is the best selling rose in the market this season.

Brower & Sons are engaged in a war with the Greeks, who have taken possession of the sidewalks in their neighborhood much to the detriment of the legitimate flower trade. The fight has already reached the Supreme Court.

As an indication of the extent of the recent glut of roses in the New York market, Mr. Theodore Roehrs tells of an enterprising newsboy on a Sixth avenue car who gave his customers a rose as a premium with each penny paper.

#### St. Louis.

During the past week quite a change has occurred in the weather, the glass going close to or below freezing point every night. It has had the effect of shortening up stock and slightly improving the market, the hope being expressed on all sides is for a continuance of the cold spell.

The late flower show may be looked upon as a success as far as exhibits and arrangements are concerned; the balance sheet has not as yet been worked out but the indications are that the signers of the guarantee fund may be called upon for about \$50. The bowling club has gone through some radical changes lately, apparently with good effect; three teams have been formed which play each other alternately and much amusement is caused by the effort to keep to the front. So far team No. 3, known as the "brotherly team" owing to its having among its numbers three Young brothers and two Ostertag boys, is ahead having the highest average score, as well as holding the man with the highest individual score, Will Young, who has 277 pins to his credit, and who is conceded to have a sort of "lead pipe cinch" on the gold medal for the next six weeks.

Mr. Alex Waldbart has been confined to the house for some time through illness and all are hoping for his speedy reappearance. Mr. George Waldbart, who has been for a long time with his brother Mr. Alex Waldbart at Grand avenue and Chestnut streets, it is rumored will open a store of his own on Grand avenue near Olive street. Mr. Will Oughton has opened a retail store on Washington avenue near Twenty-seventh street.

A flower show was held on the 16th and 17th at Kirkwood, a small town situated about twelve miles from and tributary to St. Louis, under the auspices of the village improvement society, the object being to raise funds to carry forward the work that the society has taken in hand as well as to promote sociability and good feeling among the residents and members. The exhibition lasted two days, a dance being held the second evening, in which all the young people of the place took part. Refreshments were served while the show was in progress and everything done to make visitors feel welcome. The exhibition was gotten up principally by amateurs. The chrysanthemum plants shown were good, having a nice clean growth, that would put some professionals to shame; the newer varieties were well represented in the collections. Mr. D. S. Brown, whose beautiful place "Brownhurst" lies but a short distance from the town limits, exhibited "not for competition," chrysanthemums, palms, and orchids in flower, making a fine display, as those who visited his place during the convention know he is able to do. Mrs. F. W. Hoyt received first prize for best collection of chrysanthemum plants, having in her collection well grown Ivory, Minnie Wanamaker, Puritan, Mrs. Irving Clark and Dawn. Mrs. A. S. Mermod also showed chrysanthemums in quantity, while numerous other members showed several plants each, all together making a fine appearance. Mrs. Rebecca Hazard showed three seedlings, capturing a prize with one called Grace Hazard, a medium sized flower, the color being white. Among the professional exhibitors were the Michel Plant & Bulb Co., who took first prize with a display of cut chrysanthemums and also showed a group of plants. Mr. Chas. Conner exhibited some standard

plants in fine condition that were too late for the St. Louis show. Luther Armstrong exhibited table decoration and collection cut carnations, capturing first with both entries. Cut roses were represented by a collection from R. F. Tesson which were very attractive. The exhibition all through was a big success, so much so that it has been decided to hold another next season. This is something that can and should be copied to advantage by many small towns and villages, and which would not only prove an educational feature, but would make neighbors better acquaintances and friends.

R. F. T.

#### Chicago.

Mr. Robert Craig left for home last Thursday, the 16th inst.

Mr. E. A. Wood passed through the city on his way home from Denver last Monday. He reports that the Denver show was a good one.

The flower market is in fair condition, but most of the retailers complain of extremely slow collections. Roses are stiffening in price; first-class Beauties have gone up to \$25, and best quality in other lines shows a corresponding increase. White carnations sell rather slowly; there is a large supply of cheap white chrysanthemums, which are cheaper for making up than carnations, so short stemmed whites are in very slight demand. Some of the fancies, such as Edna Craig or Daybreak, bring \$2, but this is the highest. There are no such fancy prices for carnations as prevailed last year. Violets still keep stiff at \$1.50; some fine flowers have begun to come in from local growers, but many are sent from the east.

Chrysanthemums are falling off fast, and few specimen blooms are received. Some good Lincolns were noted, and a small supply of some of the newer yellows, and some extra fine Lilian B. Bird, which, when first class sells, but not otherwise. Among whites Nivens is still good, and quite a lot of the neat little Snowball (Mrs. S. Humphreys), which sells well for \$5 to \$6. The best specimen blooms go for \$15, and though there is talk of a higher price for Thanksgiving, it seems somewhat doubtful.

Harrisii and callas range from \$12.50 to \$16, and, of the two, callas go the more readily when first class. Valley and Romans sell well, but there is no market for narcissus; dealers are willing to get rid of it for \$2 to \$3, though valley and Romans go for \$4 to \$5. Smilax is more plentiful, and there is a good supply ready to cut. Galax leaves are selling better than they did, but not as well as they deserve; probably they will go better as flowers become dearer. There is a preference for the bronze leaves, rather than green.

#### Flushing, N. Y.

The chrysanthemum show (the first show held in Flushing) is a decided success, the attendance being large and appreciative. The exhibits are up to the standard. The exhibitors are Henry C. Rath, carnation blooms and chrysanthemums in pots; Leavit & Lawler, palms; P. J. Tully, begonias; Dr. J. W. Barstow, palms; and the John Henderson Co. cut roses and chrysanthemums and chrysanthemums in pots including most of the leading varieties. Our only drawback was the size of the hall. We are greatly encouraged to do it again next year on a larger scale.

insertion in the issue for the following Thursday.

Address THE AMERICAN FLORIST CO., Chicago.

WE HAVE received from Mr. Wm. C. Bowditch, Boston, a copy of his "souvenir," which is a very neatly gotten up advertising novelty. It is in the form of the long strips of views in cities that fold up into a cover, and contains 18 small half-tone engravings of views in his greenhouses and store, also groups of plants and photos of floral arrangements. We would imagine it to be an effective adv. with the general public whom it is designed to interest.

FLORIST.—The feathery leaved plant seen in the Chicago park may have been *Pyrethrum aureum*, or, possibly, the party may have referred to *santolina* or to *Sedum Charlesii*. You give small clue to identification. The *echeveria* mostly used is *secunda glauca*, and of the *alternantheras paronychioides major* and *aurea nana*. Please give your name and address with future inquiries.

I. C. B.—We have forwarded the insect to the Government Entomologist for identification and will print his reply when received. Please give your full name and address in future communications.

## The Seed Trade.

### AM. SEED TRADE ASSOCIATION.

W. ATLEE BURPEE, Philadelphia, president; A. L. DON, secretary and treasurer, 116 Chambers street, New York. Next annual meeting second Tuesday in June, (will probably be held in Toronto.)

### A Reminiscence.

In view of the tendency of the times to agree on prices the following circular issued in 1865 will doubtless make interesting reading to the older as well as the younger members of the seed trade. History repeats itself.

NEW YORK, November 1, 1865.

Dear Sir:—You are requested to attend a meeting to be held December 1, 1865, at the Scottish Enterprise Horticultural and Seed Store, in this city, for the purpose of forming a Cabbage Grower's Protective Association. Truck growers have long felt the great evils of the present marketing system, by which each man tries to outsell his neighbor instead of making common cause against the hucksters and other unprincipled buyers, many of whom, by their paltry misrepresentations of others prices, induce marketers to dispose of their truck at very low figures, and thus grow shamelessly rich at our expense.

By a regularly fixed scale of prices all this can be easily remedied; we can avoid all the haggling of common barter, all the ill feelings arising therefrom, and great loss of time to ourselves and customers.

It must be evident to the smallest drumhead grower amongst us; how much easier it is for one party to a bargain to make the price than for two; and yet we have haggled out half our lives for the lack of this discovery, the very simplicity of which is so striking, (like the ideas of a great poet) at once a proof of its inherent soundness and the brilliant genius of its discoverer. Then, (between ourselves) we mean to have better prices for without blinking the matter, this is the only cement that can hold our association.

Our motto, which we borrow from the enlightened patriots of the French Republic, is "Liberty, Equality and Fraternity," and bearing it out our system will be found to work very generously towards poorer growers whose land or working facilities do not produce such fine roots or heads; and in case of poor crops generally, besides securing a great saving in small articles which are now sold at greatly reduced figures:—per example, six dollars per hundred being the given price for cabbage, the man who has a small headed crop will realize as much as the best of his neighbors, size being no object to the association.

The Flower Growers' Protective Association has already demonstrated the fallacy of the antediluvian notion that supply and demand must regulate market prices, and with the aid and experience of that enlightened association we propose teaching the world a sounder philosophy as well as a wiser economy.

It may be well enough for old countries to be regulated by old rules, but it is preposterous to suppose that a young cabbage growing community like ours can be bound by the dogmas of such old fogies as Adam Smith and his disciples, who never studied the necessities of a new world like ours, nor dream't of such glorious marvel as the new era which the Flower Growers' Protective Association has so modestly inaugurated.

#### PROVISIONAL COMMITTEE.

Sandy Kalestock, Bay Ridge.  
L. Drumhead Bergen, Hoboken.  
A. Flat Dutchman, Union Hill.  
John B. Cockney, Flushing.  
Jean Beeterave, Flatbush.  
Herr Blatterkohl, Yorkville.  
Hunions Proleffis, Staten Island.  
Early Wakefield, South Bergen, chairman.

NEW YEAR's prices on beet, carrot and turnip are sure to be higher.

THE IMPORTANCE of foreign crops of beet on this market is very great.

VISITED CHICAGO: C. P. Braslan, A. H. Goodwin, E. V. Hallock, R. A. Robbins, S. F. Willard, E. Schaettl.

IT IS RUMORED that the Congressional Committee on Ways and Means have agreed to report seeds free of duty.

A GOOD AUTHORITY on red onion seed claims that with a smaller visible supply than last year the prices should rule higher later on, unless large holders become too anxious to realize early.

WHITE ONION SEED is said to be scarcer than last year. The white imported last season did not give entire satisfaction

Special attention given to  
Seed Bags and Catalogue Envelopes.  
NEW HAVEN, CONN.

and hence the probability of greater demand for American grown stocks; besides, the foreign market is comparatively bare this year and no American grown seed has been carried over.

ALBANY, N. Y.—The public have been treated to an exhibition of chrysanthemums at Washington Park during the past week, which has given great pleasure and was most creditable to Supt. Egerton, with whom the idea originated. At the close of the exhibition the flowers were cut from the plants and distributed among the charitable institutions of the city.

ALWAYS mention the AMERICAN FLORIST when writing to advertisers.

# NEW DIREGATORY.

We have decided to issue a corrected edition of our

## TRADE DIRECTORY

AND

## REFERENCE BOOK

FOR 1894

February 1 next.

In addition to the changes in the list of those in the trade the lists of roses, chrysanthemums and carnations will be brought up to date. All the other reference features will be retained and several important new ones added, among which will be

### Seasonable Hints for the Year,

covering each week separately, prepared by Mr. Wm. Scott, whose seasonable hints published in the FLORIST have been so helpful to our readers during the past year. This calendar of operations, in condensed form, and where it can be readily consulted at any and all times, cannot fail to greatly enhance the value of the book.

### Change in the Size of Book.

In view of the growing value of the book for frequent reference we have decided to reduce the size of the page sufficiently to make the volume of handy size for carrying in the pocket. This change will make the printed part of the page 3 1-2 inches wide and 6 1-2 inches long, instead of 4 1-2 by 7 1-4 as before.

### ADVERTISEMENTS.

In view of the reduction in size of page we have reduced the rates for advertisements to the following, each including a copy of the book:

|               |   |   |         |
|---------------|---|---|---------|
| FULL PAGE,    | - | - | \$25.00 |
| HALF PAGE,    | - | - | 15.00   |
| QUARTER PAGE, | - | - | 9.00    |
| EIGHTH PAGE,  | - | - | 5.00    |

Every adv. will be placed opposite important reference matter that will be frequently consulted by buyers of the book.

## News Notes.

GEORGETOWN, MD.—Mr. Samuel F. Evans, a florist of Georgetown, died on November 13, after an illness of many months.

HOLYOKE, MASS.—At the regular monthly meeting of the Horticultural Society, held on November 4, Mr. Wm. S. Loomis read an interesting paper on window gardening.

WILKESBARRE, PA.—I. G. Marvin gave a successful chrysanthemum exhibition in Memorial Hall during the week of November 13-18, for the benefit of the Women's Relief Corps.

WE REGRET to have to announce that owing to failing eyesight the veteran landscape architect, Mr. H. W. S. Cleveland, of Minneapolis, has been forced to give up all professional work.

LEBANON, PA.—A very fine chrysanthemum show opened in Lebanon on Thursday, November 16. Many of the finest varieties were on exhibition, contributed by neighboring florists and amateurs.

NORWICH, CONN.—Mr. E. N. Gibbs gave a public exhibition of chrysanthemums at his greenhouses on November 7 and 8 which was very creditable. The place was thronged with visitors on both days.

BRIDGEPORT, CONN.—The Fairfield Horticultural Society's exhibition of chrysanthemums on November 3 and 4 was exceedingly creditable and attracted a large number of visitors. Many of the prominent florists of Bridgeport and vicinity contributed plants and flowers.

KANSAS CITY, MO.—J. H. Smith came here from Minneapolis and in spite of the warning published in the FLORIST managed to repeat his old tricks of borrowing money from employes, and he even managed to draw from his employer more money than was coming to him.

MT. VERNON, N. Y.—E. W. Weimar gave a very fine exhibition at his greenhouses on Third avenue. The plants were numerous and well grown and included some of the finest new varieties. There was a large attendance during the time they were on exhibition.

MILLBROOK, N. Y.—There were some very fine chrysanthemums exhibited in Millbrook this season at the chrysanthemum show which opened here on November 15. The local growers were represented by a number of very fine plants and quantities of magnificent blossoms.

PRINCETON, N. J.—The fifth annual exhibition of chrysanthemums by Wm. G. McTear was held as usual in one of the large greenhouses during the week ending November 11, and was attended by a very large number of visitors, who were delighted by the beautiful and effective display.

WORCESTER, MASS.—The annual meeting of the Worcester Horticultural Society was held in the library room of Horticultural Hall on November 1. President Henry L. Parker was re-elected by a unanimous vote. E. W. Lincoln was elected secretary, Nathaniel Paine, treasurer, and A. A. Hixon, librarian. The treasurer's report showed a substantial reduction in the society's debt during the past year. A committee consisting of Messrs. Hadwen, Draper and Blake was elected to arrange for a series of public meetings during the winter and the sum of \$250 was appropriated for their use.

## CARNATIONS.

I have fourteen houses planted to carnations, and they are under my special care and supervision so that I can guarantee every cutting sent out.

If you will kindly write to me stating what varieties you want, how many of each, and when they are to be delivered, I will give you figures and think we can make a deal.

**ANNIE PIXLEY.**—This is a new pink, and one that you want to try; it is one of those beautiful light pinks, just the proper color. The stems can be cut fifteen to twenty inches long, the calyx never bursts, and it is such a strong grower and free bloomer that you can't help but make money if you plant it.

Orders will be filled in rotation, beginning now. Price per 100, \$12.00; per 1000, \$100.00. Twenty-five at 100 rate, 250 at 1000 rates.

Samples of any stock free. Terms absolutely cash with the order or C. O. D.

L. B. 496.

ALBERT M. HERR, LANCASTER, PA.

## 500,000 PANSIES

The Jennings Strain of large flowering and Fancy Pansies can be had in any quantity wanted up to Jan. 1st. They are the leading strain to-day, more being sold than any other in the market. Plants are field-grown and are very fine and stocky. Large, medium or small, one price 60 cts. 100 by mail; by express 1000 \$5, 5000 \$20, 10,000 \$35, and plenty of extra plants gratis to help pay express. Yellow and white in separate colors if desired, same price. Florists try this strain of pansies. There is money in it. Only small plants by mail.

**PANSY SEED**—Pure white, yellow, or mixed, \$1.00 per packet of 2500 seeds.

**4,000 fine field-grown CARNATIONS.** sold cheap to clean out. Send for prices.

## St. Paul.

Prices are not as good as in former years, but as there is an abundance of stock the amount of sales will be as large or larger than in former years. Roses are abundant and cheap, though no cheaper than in former years. We have not heard of any going to waste. Beauties are in good demand, retailing readily at \$3 to \$4 per dozen. May & Co. have a very fine house of Beauties and are just now cutting large quantities of them.

Your correspondent recently paid Mendenhall's conservatories, Minneapolis, a visit. They are situated near the heart of the city, in the finest residence portion, and are well equipped for carrying on a first class trade such as they now enjoy. They are especially well constructed and well ventilated, having in use the familiar "meat saw" system, which our friend Carmody sings the praises of. Their mums are in all their glory and were fully a week ahead of St. Paul stock. There is a large collection of azaleas in the houses and when the proper season arrives Allison will have quite a little show of them all his own. They also have a fine collection of ferns and palms. Their roses are off crop now, having a breathing spell while their sister mums put on their gay attire. In addition to these houses Mendenhalls have a row of eight in the suburbs devoted principally to roses, the whole constituting the largest area of glass in the northwest. Our Minneapolis brethren would do well to imitate their leader in the construction of their houses, as no expense has been spared to make them durable as well as practical.

Not many hybrid perennials are grown by our florists, and more's the pity. With an ever-increasing demand for this class of roses our florists should be alive to the exigencies of the case and supply the demand at least, and make greater demands if possible. The public need to be educated to appreciate beautiful things in nature as well as in art, and if more attention was paid to hardy herbaceous plants, perennials, roses and the like by our florists a demand would be created, homes beautified and pockets enriched.

Trade has been fairly good lately. The Charity Ball called for a large number of flowers, and it was especially remarked that "mums" were in greater demand than roses, quite an unusual thing with the swell crowd. The popular flower, however, seems to gain popularity each season and has not yet attained its destiny.

Two of the larger department stores engaged in a little rivalry recently, the one selling nice pot plants at 10 cents each or 3 for a quarter. The crowd was great and the mums were all gone before 9 o'clock a. m. As many went later purposely for the plants, but were turned away disappointed, the florists reaped a good trade from them.

Roses are abundant and cheap. We never saw finer ones than are now being cut. Beauties continue in good demand, with Meteors a good second.

Swanson scored one victory at Chicago and all Saintry City florists should rejoice with him. We were sorry to learn that no roses were sent for competition. We are confident that Minnesota beats the world for roses grown under glass.

We notice a few Romans and narcissus in bloom, hardly enough, however, to determine what they will bring in the market. Some Harrisiiis are well advanced and should make splendid blooms for Christmas.

FELIX.

# HOLLY.

It is conceded that the successful delivery of perishable stock in the best condition exactly when demand is active is secured only as the result of considerable experience and close study of all the controlling conditions. During the past ten years we have studied these conditions and have the experience. We have faith that we can supply "First-Class Stock on Time," and to prove our faith by our works, on all orders given us **in season, we will Guarantee arrival** or no pay. We attempt no competition in price with stock which has never yet arrived, or—arrived after Xmas.

"A Case of Holly in front of the store is worth four (4) on the cars."

## Bouquet Green.

Mild weather has greatly facilitated the gathering of this stock, and prices are now EASIER.

Write or wire us for latest price if you are in the market to buy.

**J. C. VAUGHAN,**

**WOOD BROTHERS,**  
Fishkill, N. Y.

Toronto.

We have been favored this week with a little cold snap, but it is mild and balmy again to-day. "Old probs" has, however, this morning given us to understand that strong northwest gales, snow and cold, are on the way. We trust that a kind Providence will not let them loose in Toronto during chrysanthemum show week.

Entries have come in very well and a good show is assured in spite of its lateness and the prophecies of some of the knowing ones that there would be no show at all. However, I am convinced myself that it is just a week later than it should be in order to give every one a good chance. The delay, however, was unavoidable as every one knows, so that it is folly to croak until there is some cause for it.

The bloom shipped from Toronto for the World's Fair chrysanthemum show was very unfortunate. Mr. Watkins, of the Horticultural Gardens, shipped a box of magnificent blooms with some fine Daybreak carnations of Manton Bros. on Thursday, the 2nd inst., and we hear since that they were delivered at the World's Fair on Tuesday, the 7th, at 10 a. m., and were immediately sent back to the Art Institute, where when unpacked they were of course found to be entirely useless. Mr. J. H. Dunlop also shipped some cut chrysanthemums, roses and carnations, but they did not arrive in Chicago until Sunday morning in bad condition and a day too late. The duty was paid in advance on both these consignments and every means taken at this end to expedite them. Mr. Watkins feels very sore about it, and justly so I think.

The Canadian Controller of Customs has at the request of the G. and F. Association kindly consented to allow cut bloom for the chrysanthemum show here to come in free of duty if entered by the first day of the show. This piece of news was immediately telegraphed to the horticultural papers. [It appeared in last week's FLORIST.—Ed.]

Business has improved a little this week, though there is nothing steady about it yet. The stores are full of chrysanthemums, and some very good ones are to be seen. E.

# A NEW PLANT TUB.

Received Highest Award at World's  
Fair, Chicago, 1893.

BE SURE AND CATALOGUE IT.

Price **LESS THAN HALF**  
of any other tub on  
the market.

Dealers issuing catalogues cannot afford to omit this tub. It supplies a long felt want for something neat, durable and cheap. It has steel wire hoops (three times as strong as the flat iron hoop) with welded joints (not riveted into the wood. These wire hoops are at intervals indented and pressed into the wood. These indentations in hoops besides preventing them from falling off under all circumstances, act also as a spring, expanding or contracting always in accord with the condition of the wood in the tub, so that bursting is impossible. We solicit correspondence from all dealers, and assure you that our prices, and facilities for supplying your wants, cannot help but please you.

## AZALEAS.

We have a consignment of plants in vari-  
ous sizes and varieties; they have been care-  
fully potted and stored in a greenhouse of  
one of our growers. We wish to dispose  
of them now on terms satisfactory to any  
one, for immediate delivery or for Easter.  
This is an opportunity for a store keeper not  
having any greenhouse room. We will give  
full description and prices on application.  
There are not many who can afford to let  
this chance go by.

AZALEA.

## HOLLY.

We have supplied our trade for five years without failing in a  
single instance to deliver it as we agreed. The quality  
is as good as grows. Our price is low.

## GUT FLOWERS.

Our improved method of fixing prices is now  
fully appreciated by grower and retailers; the  
consequence is that "The Barrel" is hardly ever used, and "The Fakir" is  
discouraged. Our lately increased facilities enable us to solicit more busi-  
ness from both grower and consumer. If you are at to great a distance to  
avail yourself of the advantage of our Milwaukee market, we wish you  
would write us full particulars, as we are making preparations to extend  
our usefulness to other localities and will select first such places that show  
the greatest demand for our services.

**Hydrangeas.** We wish to purchase 100 good sized plants.

**Crotons.** We have a good stock of 4-inch pot plants; we will sell  
cheap or exchange for other stock.

**BOUQUET GREEN NOW READY.**

**WIRE WORK.** We make it ourselves and can accomodate you better than  
ever before.

**THE WISCONSIN FLOWER EXCHANGE,**  
468 Milwaukee St., MILWAUKEE, WIS.

Baltimore.

Fortunately for the peace of mind of the Gardeners' Club the judging of premiums at the show was done by different judges each day—the first day, Messrs. Colflesh, Kift and Smith from Philadelphia; the second, three leading Baltimore artists, Messrs. Fuchs, Dietrich and Tait; the third, Mr. Hale from Washington; and on the fourth day, Mr. Gude, from the same charming suburb.

It is due to the florists who kindly acted to say that the awards made by them were received for the most part in silence, but the work of the artists was apparently not so acceptable, though it would be hard to say what designs of cut flowers are for if not to be passed on in accordance with their artistic merits, i. e., simply on the beauty of form and color embodied in them. No doubt an artistic arrangement of choice flowers will take precedence of a similar arrangement of inferior flowers, but the question is, should a graceful design of inferior flowers rank above a heavier one of flowers of extra quality as individual blooms. On this point there are many opinions in the club and a question in the question box at the last meeting, "Who are the best judges?" brought out some vigorous speeches for and against floral designs being judged solely on their artistic merits, one speaker urging as a reason for not getting artists to judge for us that they "would not think of getting florists to judge their work."

The report of the exhibition committee was, although incomplete, very satisfactory, showing, as it did, a net profit after all expenses were paid, and that in spite of a greatly enlarged premium list, extra expense connected with an individual electric plant and one very rainy day.

Flowers continue a very slow sale; the quantity of chrysanthemums in the market is immense, but prices have not altered materially. Violets are becoming more plentiful and so are roses, and the quality is keeping pace with the increase in quantity.

Mr. M. C. Hantske has taken Galloway & Christie's old store, North Charles street above North avenue.

Librarian Philip Welch sent an invitation to the club to come and witness it; so the boys all congratulate him and hope his shadow may never grow less, and all his troubles may be little ones.

MACK.

TRENTON, N. J.—C. Ribsam & Sons formally opened their new store on November 2, with a reception to their friends and customers, of whom there must have been about eight to ten thousand attending during the afternoon and evening. The place was beautifully decorated with chrysanthemums and palms. A table decoration for a dinner party was one of the principal features, the flowers used being La France, carnations, and lily of the valley, with festoons of smilax and asparagus, making a very attractive decoration. The visitors received each a boutonniere as a souvenir.

LINCOLN, NEB.—Chapin Bros. purchased a block of five acres of land near the city last summer and have erected on same eight houses, of which two are 18x100, three 10x90, one 10x90, one 11x90, one 8x100. Also packing room and office 16x100. Heating is by steam. The establishment is very conveniently arranged, and a team can be driven right through the potting room and by the boiler pits for the carrying in or out of soil, fuel, etc. This is the first greenhouse plant built outside of the city limits, but being on an electric car line communication is quick. They still retain their 16th street place as before.

PLEASE mention the AMERICAN FLORIST every time you write to an advertiser.

### Greenhouse Flowering Plants.

The plants that I will mention are not suitable for the florist to grow for cut flowers, but any florist who has a trade among amateurs who have a greenhouse will find them useful, for they are easily grown, and make showy plants and serve to brighten up a collection, for in an amateur's greenhouse there should be something in flower at all times, and the old fashioned greenhouse plants just fill the bill. As it is now with cut flowers bringing such low prices at wholesale every florist, where it is possible, if his location is suitable for it, and if his establishment is close to a city or large town, or in a good suburban neighborhood, should try to work up a retail trade both in flowers and plants, and to do that he must not confine himself to bedding stuff for flowering pot plants, and to a few palms and ferns for decorative use; and in the winter after his chrysanthemums are over he has not got anything in the shape of a flowering plant to sell to a customer who has a conservatory unless it is a lily, azalea, genista, calceolaria, primula, cyclamen or some old plants of bedding stuff that have been carried over. He should have a small lot of greenhouse flowering plants, and they will prove profitable to him. As it is one seldom sees anything of this sort except on a private place of good size, or in the houses of a florist who does a catalogue trade in stove and greenhouse plants, and the average florist knows nothing of them unless he is an old plantsman.

Francisceas. These are very beautiful plants and very easily grown. They do best in a mixture of peat and loam, with a fair amount of sand added to it. The plants should be potted as soon as they are done flowering, and grown on in a warm house, given a liberal supply of water both at roots and foliage. When the young shoots have made five or six leaves the tops should be pinched off. This treatment should be continued until flowers show, when they should be kept cooler and not syringed as much as before. They are all handsome shrubs with large purple or violet sweet scented flowers. The best are *F. calycina* major, *F. eximia*, *F. hydrangaeformis*, *F. latifolia* and *F. Lindeniana*.

Habrothamnus. These are very handsome Mexican shrubs of easy growth and flower very freely; they are red or purple flowering, and the flowers are produced in racemes. *H. elegans* is of climbing habit and is very useful for covering a pillar or wall. *H. aubletia*, *H. corymbosus* and *H. Newelli* are the best of the species.

Kalosanthus coccinea. This fine old succulent plant is one of the most gorgeous colored flowering plants in cultivation. The large umbels of flowers are of the most brilliant scarlet, and is sure to

call attention to it. There are many varieties, some red, some red and white, and others flesh color.

Aphelandras. Among these we find some of the brightest winter flowering plants, and with proper attention can be made into handsome bushes. They like a warm house and plenty of water when growing. After flowering they should be kept as dry as possible without shriveling. At the time of starting into growth they should be cut back to within two or three buds of the old wood, or the plants will become naked. The flowers are in spikes, mostly orange and scarlet, and stand well above the foliage. *A. aurantiaca*, *A. Roezlii*, *A. Porteana* are the best of the old varieties. *A. Louisiae* and *Macedoana*, two of the new and expensive ones, are very fine, having handsomely marked foliage.

Among the bromeliads there are some plants of easy growth that will be found useful. The flowers are of rich colors and gorgeous appearance, and the foliage is in many of them very ornamental. Many of them are when not in flower of very odd and striking appearance. Among this order are found the following: *Echmea*, very handsome plants with graceful foliage and flowers on erect scapes, which are in most cases bright red or scarlet bracts and the flowers blue or purple. *Bilbergia*, handsome plants of easy growth with light panicles of flowers, some red, some scarlet and some blue. *Gussmania*, plants somewhat like tillandsias, but of ornamental foliage and pretty flowers. *Nidularium*, these are handsome bromeliads and very useful for conservatory decoration. Tillandsias are a large genus of the most useful greenhouse decorative plants. Many have very handsome foliage and the flowers are red or blue and very handsome. The vriesias are very handsome, both in flowers and foliage, but now included as synonymous with the tillandsias.

*Dalechampia Roezliana rosea*. This is a very handsome stove shrub. It owes its beauty to the bracts, not to the flowers. The bracts are large and beautiful carmine color; it is very free flowering. It is of easy growth and likes rather a warm house. It should be potted in loam and peat with a good portion of sand. If a good sized plant is wanted the flowers must be kept picked off and the plant potted on as often as it becomes rootbound.

The epiphyllums, or crab's claw cactus, are very handsome decorative plants; as small plants grafted on stems six inches to a foot high they make good house plants. They succeed well on their own roots and make good basket plants, using a wire basket and putting the plants through the sides and bottom of the basket. They grow much faster when grafted on the *Pereskia aculeata*, or on *Cercus speciosissimus*; the latter makes the

best stock, especially if wanted to make a very large plant. When growing they want a fair amount of water, but when growth is finished should be kept dryer.

The *cranthemums* are small growing plants with pretty flowers and well colored foliage, and are useful for winter flowering. They are easily grown. The best are *E. albo-marginatum*, *E. igneum*, *E. tuberculatum* and *E. sanguineolentum*.

*Euphorbia splendens* is a gorgeously colored flower, very free and makes a good pot plant. It requires the same treatment as a pot poinsettia.

*Gesneras*. These plants always call attention, being very showy with their bright colored flowers and their rich velvety foliage, the foliage being in the different varieties of all shades from light green to rich crimson. *Gesneras* are tuberous rooted, and after flowering must be attended to and given occasional waterings with weak manure water. When the foliage begins to decay give less water, and as soon as growth is finished it must be withheld entirely. Then put the pots away in a cool dry place. When required to start in growth it is a good plan to start in the old soil, then shake out and repot. *Gesneras* can be propagated by divisions of the tuberous root, also by cuttings, which root readily in bottom heat. When increased by cuttings they should be taken off early in the season to give the plant time enough to make a tuber, for when no tubers are formed the plant dies when it goes to rest. When growing they like plenty of water at the roots, but they must never be syringed at all; the foliage must be kept dry.

*Meyenia erecta* is another beautiful plant, flowering at all seasons of the year. The flowers are dark blue, trumpet shaped, with a rich orange throat. They do best in a mixture of peat and fibrous loam. A slight rest after finishing their growth is necessary, and all coarse strong shoots should be cut out in their young state. There is a white variety of this plant, but it is not common.

*Lasiandra macrantha* is a beautiful plant bearing large flowers of most intense deep purple. There are two varieties of this plant, one flowers freely when small, and the other is probably a seedling which has got mixed up with the original; it is much inferior to it, the flowers are small and it does not bloom till it is a large plant.

*Linum trigynum* is a dwarf shrub of free growth with racemes of bright yellow flowers; it flowers all winter.

*Tabernaemontana coronaria flore pleno* is a compact growing shrub, with pure white double flowers; it somewhat resembles the gardenia and requires the same treatment. JAS. S. TAPLIN.

Madison, N. J.

#### Packing and Shipping Cut Flowers.

BY CHAS. McKELLAR.

[Read before the Chicago Florist Club, Nov. 25.]

The subject may be best covered by dividing into three classes, 1st, that by the home growers, the ones usually so closely related to a large market basket; 2nd, growers shipping to the city market from points two to five hours away; 3d, the wholesale dealers.

The first class, instead of baskets and clumsy boxes, should use card board boxes usually termed rose boxes. These are made of good stiff card board and measure 18 inches long, 9 inches wide and 4 inches deep, and cost from \$16 to \$20 per thousand according to the grade of card board used. Many growers im-

agine the cost of these boxes a useless expenditure, but should they use such, and use them properly, the increase in their returns would soon convince them that they were an excellent investment. Before packing stock should be sorted into firsts and seconds and allowed to stand in jars of cold water in a cold cellar for a couple of hours or more. When ready to pack the boxes should be lined with rag or straw paper, sprinkled lightly but not sufficiently to allow the card board to become saturated, then 25 to 100 roses, according to size, should be packed carefully in each, counting carefully, and marking the number on the cover of each box. The buds should be placed so as to present the best possible appearance when the box is opened. If the growers would watch the wholesalers' customers make their selections they would see the importance of packing in the manner described, for such boxes of graded flowers are always first sold, and often in this way the full box is sold where the buyer may have originally intended to take only a smaller number of that variety. And where a grower is conscientious in grading and counting his flowers his stock soon gets a reputation with buyers and consequently meets with a more ready sale. A very great advantage of the boxes is that constant handling of the flowers is avoided, and we all know that every rehandling of the flowers does them damage and lessens their market value. Growers sending in their stock packed in bulk in large wooden boxes should remember that the wholesaler hasn't the time during morning sales, which are now done in a very short time, to sort such stock, and during the rush the counting out of bulk stock is pretty apt to result in a few broken buds, which are thereby rendered worthless, the value of which would have paid for the card board boxes which would have prevented such loss and also have helped the salability of the stock. Carnations, valley, violets, Romans and other flowers tied in bunches of 25 can be packed in larger boxes, as they sell by the bunch, causing rehandling necessary. The bunches of such flowers should be tied close to ends of stems, which ought to be kept even, and not the flowers as many practice.

Growers of the second class should pack stock in zinc, basket, or wooden trays, the former being preferred on account of the zinc retaining the moisture, while the wood absorbs it. These trays are shipped in strong wooden or leather cases, holding four to five trays each. Not over two layers should be packed in a tray. A small quantity of ice on ends of stems is an advantage in the longer shipments. The wholesaler can display and sell stock from these trays with but very little handling if varieties are kept separate. The shipping cases and basket trays manufactured by W. P. Wight, of Madison, N. J., are pronounced by all who have used them as the best and most practicable. Although rather expensive for the ordinary growers they undoubtedly pay for themselves in a very short time.

In regard to the handling and packing of the flowers by the wholesalers. Growers should manage by all means to get their stock into the wholesaler's hands early in the morning. The trade in the Chicago market now opens at 7 o'clock and all stock, or the bulk of it, should be on hand at that time. As it is, the growers keep straggling in at all hours, likewise the shipments, causing the wholesaler inconvenience in filling orders promptly, and then, if everything isn't

sold and returns high, he is challenged for a knock out. The present mode of packing adopted by most of the wholesalers is undoubtedly the best. Long, light wooden boxes are used. After being well lined with paper and cotton wadding should smilax or ferns be with an order of roses, etc. they should always be placed in bottom of box to form a foundation. Should roses alone be packed a good bit of loose paper should be placed in each end of the box under bottom layer of roses, protecting them from becoming water soaked. Colored roses should be packed first, as the light varieties are more subject to rust and bruise if packed in bottom. Pack roses in each end of box, putting two to three rows to a layer according to length of stems, which should not lap too much but meet from both ends of box. Place a strip of wax paper between each layer. After all are in fasten a brick of ice securely with cleats and directly on ends of stems. Stock should stand in water a while before packing in order to stiffen it. The ice, if placed properly, will keep up their vitality. Carnations, valley, violets and all such stock should be packed lightly on top. Care should be taken in wrapping packages carefully, as one good sheet of express paper properly tacked and tied around the box will keep out more frost than a half dozen sheets of cotton inside.

These are not by far all the points which the wholesalers and growers should bear in mind, but only a few of the most important and those the neglect of which breed the greater portion of the kicks from dissatisfied customers.

#### Wedding Decorations at the New York Show.

First prize was awarded to the arrangement by Geo. M. Stumpp. The background was asparagus with *Harrisii* lilies. The mirror was decorated with white and pink chrysanthemums, Farleyense ferns and asparagus and a fine vase of white chrysanthemums stood opposite. This decoration was noticeable for its simplicity. It made a charming picture.

The decoration by Warrendorf Bros. was awarded a certificate of merit. The mirror on the right (which does not show in the picture) was decorated with araucarias, ferns and smilax, white and pink chrysanthemums. The walls were hung with southern smilax. In the back ground was a canopy of smilax with a wreath of lily of the valley suspended, and festoons of white satin ribbon, and streamers of red and white roses.

The decoration by H. W. Wipperman, consisted of a heavy canopy of smilax overhead with a parachute of pink and white roses and lily of the valley suspended overhead. The altar rail was trimmed with Bride and Bridesmaid roses and white and pink chrysanthemums. A profusion of pink and white roses were strewn on the carpet.

Francis Parkman.

In the loss of this eminent historian perhaps it may not be generally known how largely horticulture also has been indebted to his enthusiastic, persevering and intelligent investigations, which have left a marked impress on its progressive advancement.

His attention was first drawn to such pursuits by the hope of benefitting his health, and his active mind was not content to tread the beaten paths; he early began the extensive cultivation of herbaceous plants, mostly from seeds, and his

WEDDING DECORATION BY GEO M STUMPP AT THE NEW YORK SHOW

success with delphiniums and phlox was very marked, especially with the first named, of which his collection of seedlings was perhaps the finest in this country.

Early in his work a friend placed in his charge a collection of evergreens, lilies, etc., sent over by Dr. Hall from Japan, and this was probably the foundation of his fine collection of lilies, in the hybridization of which he achieved such fine results. "*Lilium Parkmanii*" is a notable example and was afterwards sold by Mr. Parkman to Anthony Waterer of England. His assortment of rare ornamental shrubs was unsurpassed; roses were also one of his special studies, his collection being one of the most noted in the vicinity of Boston. He published a treatise on the rose which was for many years the best American work on the subject.

In 1862 he connected himself in commercial horticulture and for many years his collection of shrubs and plants were in active demand by growers; in July, 1862, he made the first public exhibition of *Lilium auratum* before the Mass. Horticultural Society; Messrs. Veitch & Sons had made a similar exhibit in England only a week earlier.

Mr. Parkman was president of the Massachusetts Horticultural Society from 1875 to 1877, and during many

years was one of the most prominent exhibitors at its weekly shows.

#### Indianapolis Floral Festival.

After the show is over it is well to make comments where mistakes were made and where good was done. Our committee can look back to our past floral festival with considerable satisfaction, making it as it was the best show yet held by our society. No serious mistakes made by committee, members or judges have yet come to the surface. Plants exhibited, especially large ones, were backward in amount of blooms, but consequently kept in perfect condition all week; the same can be said about single stem and market plants, except that they were in excellent shape from the beginning. They were good plants all through, but blooms of chrysanthemums were beautiful; in this regard the committee members were astonished themselves that such a fine collection could have been brought together. It is doubtful if such splendid specimen flowers, and in such perfect condition, can be displayed every season.

The display of cut roses was in every way a remarkable one. Mr. J. M. Gasser, of Cleveland, sent some beautiful specimen Brides, Perles, etc.; some of them certainly would have carried off pre-

miums, but no entry being made it was taken for granted they were for exhibition only. M. A. Hunt, W. W. Coles and Nanz & Neuner also showed fine cut roses. The rose tables were the admiration of many, and in this respect I would suggest that gradually more attention must be paid to this department. The upper class having to some extent tabooed the chrysanthemum we must cater somewhat to their wishes. But don't neglect the chrysanthemum, you need it to make the spectacular display, and besides, the people at large are beginning to appreciate the Autumn Queen, and when they do you can depend on successful exhibitions every time. Carnations also should receive more attention and a larger amount of premiums. This department was greatly admired; the difference in size of flowers between varieties was so pronounced that the smaller ones were lost sight of.

The attendance for the week was as follows:

| PAID ADMISSIONS.                  |             |
|-----------------------------------|-------------|
| Evenings (50 cents)               | 1,335       |
| Days (25 cents)                   | 4,511       |
| Children and auction day (10 cts) | 1,800       |
|                                   | <hr/> 7,646 |

About 600 free tickets were issued for Tuesday evening—about 400 press tickets and 83 complimentary for the week to

members' families and others. All members and Horticultural Society members were admitted free. This record beats our past efforts, but taking the beautiful weather into consideration the effect of the money stringency is felt. Our committee is congratulated from all sides that it came out so successfully, as the State Fair was a failure, while the theaters and other amusements have continued to lose money. The World's Fair has drained many a pocketbook, and the effects will continue for several months to come, until World's Fair debts are paid and savings again stored up. Our committee has a sufficient surplus to pay arrears of secretary's salary and have some money left.

#### IMPRESSIONS.

The matter of entertainment at flower shows is not given the prominence it deserves. Every exhibition should have a large entertainment committee who will not only see that the press receives every attention but also the visitors, who are often unable to obtain information regarding the exhibits.

Compliments were passed regarding the absence of funeral emblems.

The cut flower booth felt the scarcity of ready money among visitors.

The decorations of the hall are in great demand after the show. The Flower Mission used them this week, and firemen and others will dance under them later.

Extra good music must be provided to attract evening attendance.

Business men were delighted with the trade that was brought to the city on account of the exhibition. The show was advertised liberally all over the state, and reduced railroad rates helped us.

The opening address by Mayor Denny was listened to by a large audience, and with unusual silence. The response was made by Mr. M. A. Hunt, in his usual happy manner, and both speakers were loudly applauded.

Special displays of cut roses were made on Wednesday by E. G. Hill & Co., of Richmond, Ind., and J. S. Stuart, of Anderson, Ind. Among them were some elegant Brides and Mermets. W. B.

#### Carnation Notes.

As we are now all firing steady it will be well to give a thought to the temperature of the carnation houses. This is a feature too often neglected, as the carnation will not, like a rose, show the effects at once if it gets chilled or too hot. A proper regulation of the temperature will have much to do with the health of your plants and the quality of the cut, as you can not have good flowers from unhealthy plants, neither are you likely to have poor flowers from healthy plants.

My experience has been, taking noon for a start, to have the houses up to 70° or 80° on bright days. It is much better for the plants to allow the houses to run up to 80° if the air is below freezing outside than to put that air on the houses. Have the houses down to about 60° by sundown and down to 50° by sunrise the next morning, and then allow them to run up to the 70° or 80° mark if it is a bright clear day by noon, and repeat the

operation as long as the weather is clear and cold. Whenever there is a warm day during the winter put on all the air you can without getting the thermometer below 60°. It is not advisable to go beyond 80° or below 60° at noon; the latter figure is about right for those days when you have to put on artificial heat during the day. If you can not control your houses to within three degrees of what you want your heating apparatus can be improved on and it will pay you to do it at once.

My houses are all heated by steam with 1½-inch pipe, seven pipes to a house, and every pipe with a globe valve and a check so that we can run one pipe to a house or the seven as needed, and there is little or no trouble in running them just as we want. Every house has two or three thermometers in it. The night man makes a round every two hours, and if he finds the houses too warm or too cold turns off or turns on a pipe as the case may be. I might add that on nights when we are firing pretty hard the night man sprinkles the paths once or twice during the night to keep the atmosphere in a healthy growing condition. With proper temperature and proper moisture half the battle is won to get good carnations.

Most growers are now making some extra effort for their holiday cut. If you wish to give the plants a little extra forcing begin at once and do it gradually; if you start in now for the three or four nights preceding Christmas you can have the houses ten degrees higher than their usual temperature with little or no injury to the health of the stock. A watering with liquid manure will prove very beneficial if attended to about every ten days, and a spraying of ammonia water once a month from now on helps to keep the leaves in a good healthy condition; this is best done immediately after pulling the flowers, and about one quart of ammonia can be used to fifteen to twenty gallons of water. Try a small lot first.

It will pay to disbud from now on to Christmas, as you will want to get in to the market with extra fine flowers at this season of the year. Disbudding should be attended to at least every ten days, and to be really effective must be done as soon as you can get at the buds. I am sort of on the fence on this question and don't know yet which side I will get down on. If the blooms bring two cents or over it will pay; if they bring less I don't think it will. A. M. HERR.

#### Carnation Portia.

Some growers persist in calling a selected type of this well known and very valuable carnation Lady Emma. Not one of those who have grown the true Lady Emma have ever been known to fall into this error. Lady Emma was raised and disseminated by the late Chas. T. Starr many years ago—at least fifteen, I think—and the color of the foliage and its habit of growth were as decidedly distinct from the one now grown under that name as it is possible for two carnations to be. Carnations as a rule have glaucous foliage, but Starr's true Lady Emma had more nearly true green foliage than any carnation I know, or have known.

I will not dispute that there may be two distinct types of Portia, because this may be accomplished by both selection and soil and climatic influences. For there are now two distinct types of the well known varieties Grace Wilder and Lizzie McGowan. EDWIN LONSDALE.

## THE EXHIBITIONS.

Toronto.

At this date (24th) it looks as if the chrysanthemum show of 1893 would be as grand a success financially as it is in other ways. Certain it is that as an exhibition it beats the record "by a large majority," and it seems thistime as if the people had really caught on to the beauty and value of the show. The first two days the weather was had and the attendance, though everything that could be wished for as regards quality, was deficient in quantity, but on the third day (Thanksgiving day) the pavilion was packed both afternoon and evening. The management engaged a first rate band at a reasonable price which helped not a little with its spirited music to make people pleased with everything.

The show of cut blooms was simply immense, and the large center table was a sight to behold and not to be forgotten in a hurry, such blooms had never been seen before, and our American brethren contributed largely to make up the display this year. The following were the American exhibitors: Messrs. Nathan Smith & Son, Pitcher & Manda, E. G. Hill & Co., Mrs. E. Suder, Toledo, O.; Wm. Scott, Buffalo; H. Tong, Erie, Pa.; P. Herb, Mt. Healthy, O.

The judges were Mr. Richard Salter, of Rochester, for cut flowers and designs, and Mr. E. I. Mepsted, of Buffalo, for plants, both of whom must be highly complimented on their thoroughly conscientious work. As it happened the prizes were pretty evenly distributed, so that the inevitable kicking was less than usual on these occasions.

The exhibit of roses and carnations was really something magnificent, and it may be said without exaggerating that no better could be seen on the continent, especially with regard to roses, the bunches of 50 blooms being simply beyond description. I have secured photographs of these, copies of which will be forwarded as soon as finished.

Pressure of business prevents me sending a detailed statement of the exhibits and the prize winners this time, and can only give those who were awarded certificates of merit for new seedlings. Here they are: Messrs. Nathan Smith & Son for Oriana and J. A. Pettigrew; Messrs. Pitcher & Manda for Miss E. Kingsley, Pitcher & Manda and No. 231; Messrs. E. G. Hill & Co. for Challenge and Eugene Dailedouze; Mrs. E. Suder, Toledo, O., for No. 101; Messrs. Manton Bros. for carnation, a sport from Buttercup, dark red and yellow, a strong grower named Eglinton; Messrs. Spears & Muston for seedling carnations, a pure large well formed white and a yellow and red fancy, both unnamed as yet.

On the evening of the 23rd all the members of the association who were present were gathered into the secretary's office where the following resolution was carried unanimously:

WEDDING DECORATION BY WARENDORF BROS AT THE NEW YORK SHOW.

"The Toronto Gardeners' and Florists' Association, assembled at the Pavilion, Horticultural Gardens, on the occasion of their annual chrysanthemum show. Moved by the President, Mr. Thos. Manton, seconded by Mr. Geo. Vair, that this Association desire to express their deepest sympathy with Mr. F. C. Bruce in the great loss he has sustained in the recent fire, and that they are in accord with the profession in hoping that the citizens of Hamilton will continue to him the approbation that his long residence and business ability entitle him to at their hands."

Messrs. J. A. Bruce & Co., seedsmen, Hamilton, were burned out on Monday night last.

Details of the show will be forwarded next week. E.

Louisville, Ky.

The chrysanthemum show under the auspices of the Children's Free Hospital has gone by, and the florists as well as the hospital have every reason to be satisfied with the outcome, financially as well as artistically. The sum of \$400 has been divided among the florists, viz., Nanz & Neuner, Chas. Schleeter, J. Schulz, A. Lauer, Wm. Mann, E. G. Reimers and C. W. Reimers. The latter withdrew from the exhibition after having been debarred by entering cut blooms of chrysanthemums which were bought, the rules stating that no purchased cut flowers

would be allowed in competition. The plants on exhibition were unusually fine, especially the standards and singlestems. Cut blooms of chrysanthemums were very good; 35 varieties were shown and four blooms to a variety.

Tuesday, November 14, being the day for roses, Nanz & Neuner received 1st prize for best collection and finest specimens, J. Schulz 2d, S. Schleeter 3d, A. Lauer 4th, Wm. Mann 5th and E. G. Reimers 6th.

The daily attendance was about 600 people, owing to a very small hall; otherwise a larger attendance would have been secured. The results were as follows: Total receipts from gate and advertising, about \$1180; paid out for advertising, ball rent, music and incidentals, \$600; to the florists, \$400; leaving a balance of \$180 for the hospital fund. Commission on sale of plants and cut flowers amounted to \$75 and the sale of cocoa and homemade candy, which were sold by the hospital ladies, amounted to \$75, making a net profit for the hospital fund of very near \$350, which in these hard times certainly is a very nice sum to receive.

The florists are determined to organize at once in order to make preparations on a large scale for next season, as the Commercial Club of this city will take the matter in hand and run it as a fall celebration in conjunction with music and other attractions. It goes to show that without harmony and united action not

much can be accomplished. Therefore with the encouragement we have had this season we may be in a position to invite outside competition and have an exhibition equally as fine as our northern cities.

H. Nanz, Sec'y.

Frederick, Md.

The Floricultural Society of Frederick County, Md., a society of amateurs, has again scored a grand success financially and otherwise in their show this season, which far exceeded that of last year. The membership of the society is made up of physicians, lawyers, merchants, the postmaster of the city, clerks and many ladies prominent in social circles.

The show was held in the armory, one of the largest buildings in the state, and it was literally packed with exhibits. The showing made by the amateurs was wonderful and has probably never been equalled at any show in America. The specimen plants and cut blooms were magnificent, much finer than those of a great many florists in some of the shows in the large cities.

The cut blooms of Henry Trail and David Groff, two florists, have never been surpassed, not even at the great show in New York. Such was the opinion of Mr. John Donn, the judge, who last year was one of the judges at the Madison Square show, New York. Mr. Herman, another

florist, made a splendid exhibit of foliage plants, his immense bank in the center of the building being beautifully illuminated with a number of colored incandescent electric lights. The whole building was lighted by large arc lights, and handsomely decorated with cedar trees arranged all around the hall, flags, bunting and Japanese decorations; in fact we claim that our show has never been equaled in this country by any society officered by amateurs.

In no city of its size other than Frederick is the culture of flowers in the home circle carried on to so great an extent, and it is all owing to the exhibitions of this society; it is the florists who reap the benefit, whilst the amateurs do the real work. The president is a prominent physician, vice-president a dry-goods merchant, the treasurer is the postmaster of the city, and the secretary is a dry-goods merchant, Mr. C. Edwin Kemp, to whom much of the credit for the success of the show is due.

Let other towns and cities follow the example of Frederick. C. HERMAN.

#### Oshkosh, Wis.

The attraction for the second day was the roses and carnations, of which there was a fine display. For vase of 12 roses John Nelson was first with La France; Miles second with American Beauty, with very short stems. For 6 distinct varieties of roses Nelson 1st, Miles 2d, Woods 3d. In carnations Nelson was first on display, Miles 2d; for 25 blooms, white, Nelson 1st, Miles 2d; 25 blooms, pink, Nelson 1st, Woods 2d; 25 blooms, red, Woods 1st, Nelson 2d; basket, Nelson 1st, Miles 2d.

For table of decorative and flowering plants Lewis was first, Nelson second. Mr. E. Haentze of Fond du Lac had a very fine table of roses, carnations, violets and smilax, not for competition, as Mr. Haentze acted as one of the judges; the management, however, awarded him a special premium, which was well deserved.

Taken altogether the show was a great success, leaving a nice balance after paying expenses.

In the class for table decorations by ladies of the club Mrs. Rounds was first with a very dainty one in *Mermet* roses and *adiantum*s. The second table was in *Daybreak* carnations and *asparagus*, good, but rather short in material.

#### Terre Haute, Ind.

The second annual "mum" show of the Congregational Church was held here November 11. Mr. M. A. Hunt donated a fine assortment of his best chrysanthemums and the show was well patronized, clearing something over \$100.

Jno. G. Heinel gave a "mum" show lasting eight days at his new greenhouses on 20th street. On Sunday there were nearly 2000 visitors. He has seven houses all planted in mums, Beauties, carnations and roses. The Beauties are coming on finely with 4 and 5-foot stems and good color.

L. Heinel has opened an uptown office on south 6th street for the winter months.

We have several gardeners with greenhouses for lettuce, etc.; one has 40,000 feet of glass for lettuce alone and ships all to Chicago. F.

#### Princess of Chrysanthemums.

I notice Mr. Grove P. Rawson implies that the above and Good Gracious are not synonymous in his communication in

your last issue, but I can not agree with him on this subject.

We secured our stock of Princess of Chrysanthemums from Mr. John H. Sievers, who disseminated it in the spring of 1892. Hearing they were synonymous we purchased a few young plants of Good Gracious from the disseminators, Messrs. Peter Henderson & Co. Our object was to satisfy ourselves whether or no there was any difference, and to avoid variation from soil and culture the two varieties were planted on the bench side by side, and I must say as here grown were identical in growth, foliage and flower.

Kate Mursell (Mursell) 1891, a light yellow sport from Lady Trevor Lawrence (probably better known in this country as Robert Bottomley) and Flora Harkett, sent out last spring, are synonymous and the first name has precedence.

Synonyms are quite likely to occur from sport varieties, and may occur in remote localities, as has been the case where the same variety has sported to the same color in England and America at about the same time. ELMER D. SMITH.

#### Chrysanthemum Mrs. Craig Lippincott.

Yes, sure enough, this variety may be classed among the hairy ones, and it comes by the hirsute appendages honestly, too, for according to its registered breeding it is a cross between Mrs. Alpheus Hardy and Kioto. The hair is not nearly so pronounced, however, as it is on Hardy, Boehmer and those types. E. L.

CHRYSANTHEMUM MRS. CRAIG LIPPINCOTT.—In the advertisement of Mr. Hugh Graham, on page 381 of our last issue, a typographical error made him offer stock plants of this chrysanthemum at \$4 00 a dozen when it should have read \$4.50 a dozen. The adv. appears correctly in this issue.

#### New York.

There is a little improvement manifested in the cut flower trade, but prices and demand are far behind the average for the season, and the outlook is not over bright. The worst thing that can happen now is a sudden increase in prices, and those who are looking forward to excessively enhanced values for holiday stock will in all probability be sadly disappointed. A case in point at the present time is the price of violets in this market. Until recently the wholesale rate was 33 cents to 50 cents per hundred; now it has jumped to \$2 and \$2.50 per hundred for good stock. Retailers cannot afford to handle violets, which lose their fragrance, and consequently most of their value, in twenty-four hours, at less than double the wholesale price. The public wants violets, there is no flower more steadily a favorite than the violet, but when it comes to paying \$4 and \$5 per hundred for them the public will go without them rather than stand such a price, this more especially in a season like the present, when every dollar is carefully watched. Insistence on these excessive prices will surely kill the violet trade for this winter, and incidentally injure the entire cut flower industry at a time when it can least afford to stand it.

Chrysanthemums are nearing their end. Those in the market have a bedraggled appearance, they drop their petals and they hang their heads, and within another week they will have ceased to be a factor, and the rose men and the carnation men will have regained their position in the market, with nothing in the chrysanthemum

line to worry them for another year.

Roses are in full supply. While a few choice selected lots bring as high as \$6 per hundred, it is not unusual for large quantities of mixed varieties to be unloaded after other demands are satisfied at \$15 to \$20 per thousand. American Beauty is in short supply. Few blooms bring over \$4 per dozen, but occasionally very select special specimens may go as high as \$6 per dozen. The carnation market is in bad shape. Daybreak, Buttercup, and other highly favored varieties are always salable at good prices, but the common run of market varieties are sold with difficulty and are overstocked.

Cypripedium insigne is one of the most abundant as well as one of the most unsalable flowers in the market at present. No one seems to want them. But they are good keepers and their turn may come in the sweet bye and bye. Smilax is another good keeper, which keeps entirely too well for the peace of mind of those who have to handle it. Nobody has any use for it apparently.

Messrs. Taylor, May and Weathered, the committee intrusted by the Florists' Club with the duty of arranging for the annual club dinner have fixed the date as January 6, 1894, at 6:30 p. m., and the place selected is the Arena, on 31st street, near Broadway.

G. W. Hillman, Jr. and family had quite a scare at their residence in Flushing on Wednesday, 22d inst., from a fire which started in the kitchen in some unexplained manner and from which his wife and child sustained burns, fortunately slight, however. The damage to the property was estimated at \$400. Two days after a large haystack near the house was burned and a loss of \$200 was sustained. This latter fire is believed to have been incendiary.

M. B. Maguire is sending to Burns & Raynor some very well-grown bougainvillea. This is a fashionable color this season and there is no more effective flower for decorative work.

Strangers in town: C. R. Gallup, Denver, Colo., and Ben. Dorrance, Dorrance, Pa.

#### Philadelphia.

The chrysanthemum army is now thoroughly routed and in full retreat, only a few stragglers remaining, the best of these being Eva Hoyt and Harris' seedling No. 10, a very large incurved blush white with yellow eye; the flowers of this last variety are larger than any other incurved kind that we have seen, and as it has good stiff stems and is not ready until after November 15 it is one of the most valuable late varieties. Minnie Wanamaker is in fair shape, but the stems are getting weak; Mt. Blanc, both yellow and white, with very straight stems, are just in, and there are still a few Lincoln and Widener. Anderson has a lot of Mrs. Whildin which he thinks might last until Christmas, at least it is in as good condition as Lincoln and Widener is with him, except the color, which is considerably lighter than at first. Prices for good flowers range from \$6 to \$16 per hundred. Atkinson, of Edgewater, says he can take more money out of a house by lifting the plants from the field just before frost, heeling them in on the tables and giving good big bunches of sprays for 25 cents; he finds ready sale for this kind of stock. Pot plants are all done.

All kinds of roses are in good shape and

WEDDING DECORATION BY H. W. WIPPERMANN AT THE NEW YORK SHOW.

there seems to be plenty for the demand. However, prices have stiffened a little, most growers asking \$3 for the small teas, although very good stock can still be had for \$2. A few choice Kaiserin have been sold by R. Craig for \$8. This rose is gaining in popularity. There have been some Brides about, however, which have pushed it very hard. Messrs. Heacock and Myers and Santmann have had some fine specimens the past week; \$4 is the top price for Bride, Mermet and Bridesmaid, but as the quality of the stock is getting so much better the next cold wave will likely move the figures up a point or two. The best La France, sent in by Casper Pennock, sell for \$6; they are fine flowers. Beauties and Belles are now \$16 to \$20 per hundred and some days quite scarce. Burton, Lonsdale, Myers and Santmann, L. Ball, C. Meehan and the Messrs. Pennock are all cutting good stock of these varieties.

Some of the store keepers are complaining of the sly way the growers have of marking prices up without consulting them in the matter. Most dealers take regularly certain amounts of stock and the growers count these out, make out their slips, pass them up to the desk and walk out, and it is sometimes several days before the dealer is aware of the advance. Then there is a scene, but the prices seem to go all the same.

Messrs. LaRoche & Stahl are remod-

elling their store; it had been cut in two by a division down the center making two small stores, the corner one being rented to a cigar man. He failed, however, and now the partition is removed, the firm have taken the corner on 13th street side and rented the other side and counter for a music store. This is a move in the right direction; music and flowers ought to make a strong combination.

The Crawford ten pin team have beaten the Brown faction in two consecutive games. It was hard for Brown to lose last Thursday night after putting up three games of over 190 to a game, but his men could not keep up the pace he laid out for them and they were defeated by over 100 pins.

Robert Craig and his son William have returned.

E. V. Hallock and Major Bonnaffon spent Sunday last in Phila. K.

#### Buffalo.

Business must be pronounced rather dull. There is a dearth of weddings, society events, etc., which accounts for it. Chrysanthemums are getting much less plentiful and those that have them now will be likely to realize a good price. There has been a good deal said about the drop of prices in the "Queen of Autumn" and also its alleged unpopu-

larity, but as near as I can learn of the trade in this city all that have been grown here or sent in from other locations have been disposed of, but at certainly not the same prices of former years. Prices have been about 30 per cent lower for the same quality of flowers. They are a comparatively easy flower to grow, and coming in large quantities in a short space of time, the market is bound to be a little overdone. There is no scarcity yet in roses, except American Beauty. The demand for carnations is a little beyond the supply and there are many days when there are not enough to go round. Day-break is the favorite here and very fine quality flowers wholesale at \$2 per hundred. Violets are the scarcest flower in this city; an extravagant price is asked by the few growers who have the good fortune to pick any quantity. There are very few paper white narcissus forced here early and they would not pay if they were. Roman hyacinths are getting plentiful, but a good use is made of them. Calla lilies are none too plentiful. Mr. James Milley has a fine lot of early Bermuda lilies, which find a ready market at 15 cents wholesale.

Mr. Rebstock was so elated over the great majority his friend Laughlin received for city attorney that the two immediately after election repaired to the wilds of Canada in search of game. They must have had great luck, for since their return

Joseph's friends have been surleited with game in various degrees of age.

I am well aware there is a gentleman in Toronto fully capable of giving you a good report of their show there last week, but I would like to bear tribute to the excellence of the whole show. In company with the two judges, Richard Salter of Rochester and E. I. Mepsted of Buffalo, I took it all in. The mums, both plants and flowers, would compare favorably with shows in very much larger cities. But it is not in chrysanthemums that the glory of the Toronto boys rests; it's in something else more solid. I am not afraid to assert that such a display of carnations was never staged on this continent before, and their roses—such roses as are grown by Harry Dale, John Dunlop and Walter Muston are worth a long journey to see; only they make those handling the ordinary run of roses feel a little faint.

W. S.

#### Chicago.

George Edward Thorpe, youngest son of John Thorpe, died November 23 of typhoid-pneumonia, aged 20 years, and was laid to rest in Oakwoods Cemetery on Sunday last. The funeral was attended by many members of the Florist Club and a suitable floral tribute was sent by the club. The deceased was a very promising young man and very popular with all who knew him. His untimely death was a severe shock to all. His father and family have the sincere sympathy of all in the trade.

At the last meeting of the Florist Club Mr. Chas. McKellar of Corbrey & McKellar read an instructive paper on the packing and shipping of cut flowers, which appears elsewhere in this issue. A committee was appointed to prepare suitable resolutions regarding the loss to the club through the death of George Thorpe, and the officers were instructed to make arrangements for attending the funeral, and to see that a suitable floral emblem was sent in the name of the club. Mr. H. Holzappel was requested to read a paper upon the system of making awards at the World's Fair at a future meeting, and accepted the assignment. There was an interesting discussion of the recent exhibition.

Trade is fair and a profitable Thanksgiving business is expected. Prices have kept up and show an increase in some lines. Beauties are very scarce and in great demand. Meteor ranks next, the demand for this variety being very brisk, as high as \$7 being obtained for extra flowers, while the average is \$5 to \$6. Some excellent Woottons are seen, but they cannot compete with Meteor. Brides are rather scarce in best grade. Bridesmaids are bringing \$6, while Mermets go at \$5. Excellent Perles are seen. Colored carnations were rather scarce at the beginning of the week and were bringing \$1.25 for red, while Daybreak is scarce and difficult to obtain at \$2. Violets are scarce and in brisk demand at \$1.50.

In the bulb stuff narcissus still keeps a drug; Romans sell better, but the demand for them is not extra brisk. The stock in the market is very good. Valley keeps at \$5; a good deal of that noted is rather too pale and not properly hardened off, so does not stand very well. Harrisii and callas are improving in both quality and quantity. Chrysanthemums are nearing their end, but a few blooms fine enough to command \$25 a hundred have been in this week, these being of course from single stem plants. Among them were

Harry Balsley in fine order, W. H. Lincoln, Snowball, Niveus and L. Canning, but the latter is not a favorite, as the flowers drop so quickly. Smilax is plentiful and good, and asparagus is coming in for an increased share of favor.

Among recent visitors to Chicago were E. C. Reineman and brother, Allegheny, Pa.; Miss Emily Taplin, Detroit, Mich.; L. J. Leopold, St. Louis.

#### Washington.

Business has been unusually dull during the past few months, wedding decorations and funeral orders constituting the bulk of the trade. During the past week or ten days orders for wedding decorations and funeral designs have been above the average, and the outlook is much brighter. There is little or nothing doing in the way of receptions. Society people of Washington seem to feel the stringency in the money market as keenly as do the business classes, consequently they are spending as little money as possible, and the florist seems to be the first sufferer when retrenchments are in order.

Chrysanthemums seem to be a glut on the market at present; there has been an unusual production throughout the District this season, which has brought prices down very low. The quantities peddled on the street and those offered for sale by farmers at the markets have hurt store trade considerably. The demand for large pot grown plants has been very slow, the call seeming to be largely in favor of small plants with from six to eight good flowers.

Mr. C. F. Hale, who exhibited such fine specimens at our late show, says he does not intend to grow large specimen plants next season, but will devote his attention to the production of fine flowers on small plants, not allowing more than six or seven flowers to a plant; he finds readier sale for that class.

The store windows are all decorated with fine plants of chrysanthemums. Mr. J. R. Freeman has a fine display in his beautiful store on 13th street. Mr. C. F. Hale has some of the famous prize winners on exhibition in his attractive store on 14th street, where he exhibits the greatest number of varieties of anyone in the city. The Gude Brothers continue their exhibition at their store on F street. They are never behind, always to be found in the front ranks.

The demand for decorative plants has fallen far behind former years, though the florists all have fine plants of this class. Probably the sale of these will increase after the chrysanthemums are past.

Roses, carnations, valley and violets are not over plentiful and the quality is not up to the standard, with a few exceptions. I think they are being withheld in order to work off the stock of chrysanthemums.

Messrs. J. H. Small & Sons have a portion of their late fine exhibit yet in their windows; their miniature gardens are as attractive as ever and add much to the appearance of their handsome and attractive store. They had their chrysanthemum exhibition a week earlier than the Florist Club. It was a most excellent display and attracted thousands of our citizens.

Mr. Geo. H. Brown, Superintendent of the propagating gardens, and his assistant, Mr. E. M. Byrnes, have given considerable attention this season to chrysanthemum growing, and their display at the gardens, near the Washington monument, has attracted much attention among the florists as well as the public;

and well it might, for they certainly had the finest ever grown in the District of Columbia. The flowers on pot grown plants were as large as those usually grown on benches from single stems. Many of the plants, in fact most of them, were in 14-inch pots from cuttings rooted last March. These plants carry from twelve to thirty flowers each, and are indeed very fine. A plant of Mrs. E. D. Adams has ten flowers measuring from 10 to 14 inches across, and they have a number of others equally well done, namely, The World, Golden Wedding, Vivand-Morel, and a host of the other leading varieties which are simply perfection.

They have a small bench across one end of a greenhouse devoted to seedlings of their own raising and several among them promise to be very fine. One, a cross between Mrs. E. D. Adams and Gloriosum is a creamy white, good substance, reflexed bloom, measuring eleven inches has eight of the outer petals standing out from the others some two inches or more at regular intervals, producing an odd appearance. Mr. Brown has named this Mrs. Col. J. M. Wilson, in honor of the wife of his superior officer, Col. J. M. Wilson, engineer in charge of public buildings and grounds. They have another very fine rose pink measuring 14 inches, which has not been named. Mr. Brown has every reason to be very proud of his efforts in his chrysanthemum undertaking.

C. LESLIE REYNOLDS.

#### Boston.

The cut flower trade is livelier and prices are beginning to look up. With good weather a fair Thanksgiving Day trade is anticipated. There is a scarcity of white chrysanthemums and good blooms sell quickly. Roses of good quality are in demand. Carnations are abundant. Violets are in short supply; these and American Beauty sell at sight if in good shape.

Lawrence Cotter and Edward Hatch celebrated the capture by the former of the premium offered by the latter at the chrysanthemum show, and incidentally settled an election wager by inviting a dozen of their friends to dine with them at the Thorndike on the evening of November 22. It was a very select company and the various exercises were carried out with due formality. Judge Hoitt and Warren Ewell were the star speakers of the occasion.

From Nashua comes the news that Judge Hoitt's professional duties have increased to such an extent that he has been obliged to retire from the flower business and has sold out his establishment to Mr. August Gaedeke, who has been in charge of the business for several years. Judge Hoitt has never given much personal attention to the business, being in it because he loved the flowers and the society of the florists. It is gratifying to know that although not actually identified with them in business the popular Judge has no intention of discontinuing his social relations with "the boys," but will still be with them in sympathy, and when anything is going on he can still be counted on to participate as of yore.

Paul Berkowitz, of Bayersdorfer & Co., is in town.

#### St. Louis.

A week of continuous cold weather has had the usual effect upon the market and stock has become scarce. Shipping orders have started to come in at a good rate,

GENERAL VIEW OF THE INDIANAPOLIS CHRYSANTHEMUM SHOW.

thus opening outlets that were closed during the warmer weather. Chicago however, must be still suffering from overproduction or stagnation, as several shipments have been received from there at the reported rate of \$16 per thousand.

At a meeting of the exhibition committee to wind up the affairs of the late show it was found that the expenses exceeded the receipts by about \$200. There is, however enough money in the treasury of the club to make good the deficit so the signers of the guarantee fund will not be called upon to make any payments. At the informal discussion which followed the meeting the prevailing sentiment was in favor of discontinuing the shows; if they are to be continued it must be on radically different lines. R. F. T.

Pittsfield, Mass.

The Berkshire County Gardeners' and Florists' Club enjoyed their annual banquet at the Burbank House on Wednesday evening, November 22. About fifty members were present and the tables were beautifully decorated with chrysanthemums, roses and palms. In the absence of the President, Colonel Walter Cutting, Vice-President John White occupied the seat of honor. Following the dinner speeches were made by many prominent gardeners of the county and Mr. A. P. Meredith, on behalf of the club, presented the secretary, Mr. W. M. Edwards, with a handsome token in the form of cash. Treasurer Lucas was also remembered in a similar manner, and Miss Mary E.

Miller and Mrs. John White received a gift each in recognition of their efforts at the club's exhibitions.

#### Milwaukee.

Milwaukee has not had much to say lately, because we are undergoing a development in the evolution of the trade which is not easily understood, and which, if understood, bears more on the philosophy of the subject than on any one branch in detail, as is common in reporting the condition of trade in a city.

We are just beginning to see and feel the effects of that economic condition called the division of labor. But while it has started, and is working to advantage it nevertheless works some hardships, for all changes entail some loss, in spite of any improvement brought about by such change. We have had any number of so-called growers here, but they were a class which neither lead nor follow anyone else who does lead, each one attempting to grow a little of everything, and making a partial failure of half. They would neglect crops to look after trade, and when they got an order be obliged to call on other growers to supply stock; then, when they got a crop themselves, complain about outside stock filling their market, and that growing was overdone. The uncertainty of their product made it impossible for consumers to depend on them, so when by chance a nice crop was obtained there would be no sale, because our "Jack of all trades" must peddle his own stock and would

seldom call at the right place, or at the right time.

By a determined effort on the part of a few a flower market has been established here which we think is equal in efficiency to any. It is having the effect of driving many growers into various lines of specialties, with results that are quite promising. It has thrown all local growers into competition with outside growers, and, although it caused much grumbling, it is working a great change. The amount of flowers sold is more than double what it was a short time ago, which is due to the organized effort to get things into such shape as to be able to accommodate the public promptly. Of course it gave rise to the opening of several stands by parties not having any greenhouses. They got regular supplies of flowers, which they could supply better than the retail grower, thus compelling him to fall in line. While such changes are in the line of progress they cause much grumbling. We have been troubled but very little by the fakir, because he is not given much if any opportunity to cut the dealer who pays store rent.

The price of flowers for the day is never broken in our Milwaukee market. If Mr. Jones pays four cents for first quality Mermets this morning he knows that no one will get them for less all day, but the next day all stock that may be left over is marketed at half price. While this gives a fakir a chance, the other dealers get the same opportunity, and they are enabled to watch the fakir and meet him half way. The consequence is that the

waste barrel is very little used, and the fakir simply exists in order to keep the storekeeper awake. Recently the chrysanthemum was most popular, but the supply did not fit the demand. There were just about enough of the large flowers, grown single stem, to supply the demand, wholesaling at 15 to 40 cents each. Those quoted at 8 cents were rather overdone, but so far as we learn but one florist was provided with good plants for retailing. This firm found ready sale for plants with twelve to twenty-four flowers at \$1, \$2 and \$3 each. We do not understand the cause, unless the growers think cut flowers pay best. We think growers at a distance may fare best with cut blooms, but local growers should provide good pot plants.

The price of roses took a tumble when they had to share the market with the mums. The supply is better in quantity and quality than it was a year ago. Violets are quite good in quality, and sell out clean at \$1. Romans are in good supply. Auratum lilies are finished. Callas are coming in a very few at a time. Harrisii lilies are over; new crop is promised December 1; this is a troublesome time for large flowers. Carnations increase in popularity as they improve in quality. The supply is good, but small and irregular. Milwaukee is shorter of good carnations than any other flower. The use of fern fronds and other fancy foliage is greater here than in other places. Asparagus tenuissimus is used as much as plumosus, and is considered the better for many purposes.

The principal demand for flowers this season is for those inevitable occasions, birthdays, wedding and funerals. Color is used quite freely now in funeral work. American Beauty roses are now quite frequently used. A beautiful piece we saw today was a large wreath of fancy foliage with a few dark red long stemmed anthurium blooms, and gloxinias to match. There is considerable plant work done for funerals also. There is a steady demand for palms from \$2 to \$5, but the latania is not in demand, and the ficus has never become popular here. The use of small ferns in jardinières is increasing. The florist trade here on the whole is not good, but the condition of stock generally is better than usual, and promises well for the future. The weather has been quite favorable for outside work, and there has been considerable planting of shrubs and bulbs done. The stock of tulips is lower than common at this date. C. B. W.

### New Notes.

GOUVERNEUR, N. Y.—I. M. Brainard is building a new house 20x80 at his place on Rock Island street.

NORTHAMPTON, MASS.—The Lord & Burnham Co. have the contract for building the new greenhouses at Smith College Botanical Garden.

MOBILE, ALA.—Mrs. M. T. Green has recently exhibited two fully matured pineapples grown by her. This is the fifth time her pines have borne fruit.

NEVADA, MO.—Clarence W. Talbot, the florist, gave a chrysanthemum show November 17 to 19 inclusive. The display was excellent and the attendance large.

FT. WAYNE, IND.—D. Honaker is having a fine store room built in the heart of the

city in which he will open for business shortly.

LITTLETON, N. H.—George M. Kendall has one of the largest hothouses in the state in process of erection. The first snow of the season came here on Sunday, October 29.

SHARON, PA.—The second annual exhibition of the Sharon Chrysanthemum Club was held November 15 to 18 inclusive. M. I. O'Brien, a local florist, is president of the club.

BROOKLYN, N. Y.—Mr. and Mrs. Wm. Davison will celebrate their 50th anniversary on Thursday, Nov. 30, at the residence of their daughter, 951 Bushwick avenue, this city.

SPRINGFIELD, MASS.—A large block on Main street, in which is located the florist store of N. J. Herrick, was badly damaged by fire on the night of November 14. Mr. Herrick's loss is estimated at \$200.

LEBANON, PA.—The chrysanthemum show held by the charitable ladies of Lebanon during three evenings of last week, for the benefit of the destitute and unemployed, realized a profit of over \$1,000.

BEATRICE, NEB.—A chrysanthemum show was held here November 7 to 10. It was quite a novelty here, being the first show of the kind ever held in this part of the state. About a thousand plants were on exhibition.

AURORA, ILL.—J. A. Freeman has removed his greenhouses from 185 Penna. avenue to 396 North Lake street and added ten new rose houses 18x50 and a house 10x36 for palms and ferns. He now has a total of 6,000 feet of glass. Heating is by hot water in 4-inch pipe.

MINNEAPOLIS, MINN.—The chrysanthemum show given by E. Nagel & Co. at their store on Nicollet avenue was very successful. The display was as good if not better than any seen in this city before. Sixty-five varieties were shown, among them some very fine standards in addition to bush plants, and three seedlings, E. Nagel, bronze; Flora Rumler, creamy white; and Mrs. D. Morrison, bright yellow. No admission was charged and the attendance was very large.

DANVERS, MASS.—Messrs. E. and C. Woodman have just opened their new flower store and greenhouses at Tapleville, to the public. The office building is very pretty and well adapted to the use for which it is intended. The entire frame work of office building and greenhouses is

of iron, from plans and material furnished by Hitchings & Co., of New York. On the street front large show windows permit displays of plants, flowers, etc., and within, counters, show cases and refrigerators are conveniently arranged for the transaction of a large business.

SPRINGFIELD, ILL.—Brown & Canfield have opened a store at 329 South 5th street and have held a chrysanthemum show there the past week, making no charge for admission. The cut blooms shown compared favorably with most of those displayed at Chicago, though most of them were grown 4 to 8 flowers to a plant. Pot plants were shown in 60 varieties—from single stem in 4-inch pots to large bush plants in 6 and 7-inch pots. During the exhibition plants found quite a good sale, especially the 5-inch size, which sold at from 35 to 50 cents each. In addition to chrysanthemums there was a handsome mound of palms, a collection of ferns and a fine show of roses of all the leading varieties, including vases of Am. Belle, Testout and K. A. Victoria, all from their own houses, also Romans, violets and carnations. They expect to make the store a permanent fixture if it pays, but will continue it till after the holidays anyway.

### SITUATIONS, WANTS, FOR SALE.

Advertisements under this head will be inserted at the rate of 10 cents a line (seven words) each insertion. Cash must accompany order. Plant ads. not admitted under this head.

SITUATION WANTED—By German, 24 years of age, as assistant; good greenhouse man; single. Good references. F. E. P. O. box 64, Bedford, N. Y.

SITUATION WANTED—As foreman; practical grower of roses, carnations, violets, decorative and bedding plants, forcing of bulbs. References English and this country. State wages. Address FLORIST, 154 La Salle Ave., Chicago.

SITUATION WANTED—By competent single florist and gardener; private or commercial; permanent place. Please give full particulars in answer by letter. Address COMPETENT, Substation D, P. O. De Kalb Ave., Brooklyn, L. I., N. Y.

SITUATION WANTED—In commercial place by young man of good habits, who has had 6 years' experience in general greenhouse work. Not afraid of work; willing and obliging. Address LA FRANCE, care American Florist, Chicago.

WANTED—Wholesale catalogues on vegetable and farm seeds. LOUIS ORTENDORF, Spring Brook Farm, Mora, Minn.

WANTED—An active young man who has had some years experience in a cut flower growing establishment in the U. S. Must be able to furnish good references. JOHN IRVINE CO., Bay City, Mich.

## The Nursery Trade.

A note having recently appeared in the Philadelphia *Press* representing that on account of the depression in trade this year the nurseries at West Chester had been obliged to discharge their hands and close business for the winter a month or more earlier than usual, we took the liberty to send a copy of the statement to Messrs. Hoopes Bro. & Thomas of West Chester to ascertain regarding the truth of the statement, and the following encouraging reply was received: "Gentlemen: The enclosed clipping from the *Press* is a sensational item without any foundation in truth. It is true that the nursery trade has been affected by the depression in business but that 'the orders were all filled in October' is a myth. The present autumn is fully up to the general average owing to the increased demand for certain kinds of stock."

PLEASE WRITE ON your printed letter head when addressing our advertisers. If you have no printed letter head, then enclose your business card or bill head.

## Review of the Fall Bulb Trade in New York.

On Roman hyacinths, candidum lilies, paper white narcissus and French bulbs in general trade has not been as good as was anticipated at the time import orders were given. In March, which is the month in which orders are placed for most of these goods, everybody was looking forward to a good season and ordered accordingly. In the case of Roman hyacinths all the dealers came with the same story from France, of a short crop. Every jobber was offered a chance to speculate and many of them accepted and bought larger than the demand of the subsequent dull season justified. The short crops previously reported proved plenty long enough for the demand and there was no lack of supply. The florists, however have continued buying through the fall better than usual and many dealers who have been feeling discouraged have managed to clean up well, especially on the large sizes. The small sizes, which are wanted only for early forcing, are very abundant and many have found their way to the auction rooms. Colored Romans have not sold as well as usual this year.

Candidums do not cut the figure in the forcing bulb trade which they once did. The demand has been on the decrease for some years past and this year it is especially noticeable. The low price at which Harrisii have been offered is in part responsible for this. Paper white narcissus have been but an insignificant item in this year's trade.

When Dutch bulbs were ordered in April and May, the panicky feeling had begun to manifest itself among the people and everybody ordered cautiously and light. In consequence many kinds ran decidedly short and had to be replenished by cable orders. Jobbers were encouraged to speculate and heavy consignments of goods were brought over late, but a fairly satisfactory market was found for all. Wm. Elliott, the veteran auctioneer, reports that he sold more Dutch bulbs at auction this fall than in any previous season of his forty years experience. The demand for forcing tulips has certainly fallen off, but this result was anticipated by the jobbers who had been watching the unsatisfactory prices realized by the cut flower growers last winter, and ordered considerably lighter. So although the demand has been less than last year yet the stock being smaller, has been well cleaned up and there will be no overstock. Dutch forcing hyacinths were also ordered short and like the tulips are well sold out. Named varieties have not sold as well as previously, cheap grades being mainly in demand.

For daffodils there has been a good average demand, Von Sion especially having shown an increased market. The same is true of freesias, which have sold unexpectedly well, although a surplus has been left with several jobbers. Lily of the valley is now in and it is too early to give final results. It may be said, however, that valley has been very plenty for the past two years and prices are low. There appears to be a fair demand for pips but there is not a great quantity in sight, and there are no large stocks going into cold storage apparently.

## Complete Stock in New York

—WITH—

THEO. PABST &amp; CO., 26 Barclay Street.

In Harrisii lilies the trade has been poor. The bulbs have been of good quality but the Harrisii business has plainly been overdone, and the results to flower growers have not been particularly encouraging, and they are inclined to be conservative this year. Quantities of bulbs have been sold late in the season at a very small margin, and some consignments have even been returned to the shippers in Bermuda.

The retail trade has not been equal to last year. It has been a grand season for outdoor planting and the ground is still open. Bedding tulips in common mixture have sold somewhat better than last season. Dutch bedding hyacinths are getting low in stock, having been ordered very light in spring. But counter trade is very much slower than usual, the dull times having plainly affected the small buyers. Chinese narcissus have sold fairly well, but the big bargain drygoods stores have got hold of them and the prices have gone away down. Mail trade has suffered severely. There has been a falling off of from 30% to 50% from last year, and in consequence there is a large accumulation of miscellaneous small light bulbs on hand.

The prospects are promising for the Japan lily trade. Auratum, lancifolium album and rubrum all show an increased demand, with indications of returning popularity.

Seedsmen are looking confidently for a good spring trade. There appears to be a short supply of many specialties both American and foreign and contracts are being filled only partially. There is nothing striking promised in the way of novelties.

Recent visitors to New York, Mr. W. A. Brotherton of Lohrmann Brothers & Co., Detroit, J. Comont, London, Eng., and Jas. Meggatt, Wethersfield, Conn.

J. L. STACK Co. succeed J. L. Stack & Co., advertising agents, St. Paul, Mr. C. E. Ellis retiring from the firm.

THE DULL MARKET for onions at present and full stocks all over the country may have some effect on seed sales the coming season.

THE Northrup, Braslan & Goodwin Co. will on January 1 open a wholesale seed warehouse at Chicago. It will be devoted exclusively to the jobbing trade and located in the new fireproof Bradley Building at 55, 57 and 59 No. Jefferson street. The Minneapolis house will continue as usual.

## FIFTY THOUSAND

## PEARL TUBEROSES

Roemer, Quedlinburg, Germany, seed novelties; V. Schmelz, Sylvan Lake, Fla., native wild plants, bulbs, moss, etc.; A. Blanc, Philadelphia, electrotypes of flowers; Wm. Krumm & Sons, St. Joseph, Mo., floral designs, etc.; Brooks Sisters, Sorrento, Fla., bulbs and plants; Harlan P. Kelsey, Linville, N. C., native ornamental plants; Adolph Schmidt, Berlin, Germany, garden tools.

## Heating Pipes.

How much 1½-inch steam pipe shall I use in a three-quarter span house 21x14 to maintain a temperature of from 55° to 60° all winter? How many square feet of glass do you reckon to the lineal foot of steam pipe? J. C.

The following formula will determine the amount of pipe that will be required: The surface feet of glass area, plus one-tenth of the surface feet of wall area, divided by three. This will equal the number of lineal feet of 1½-inch pipe needed to maintain 55° to 60° in zero weather.

## New Notes.

CHAMBERLAIN, S. D.—E. C. Newbury has removed to Mitchell, S. D.

MITCHELL, S. D.—E. C. Newbury, formerly of Chamberlain, has located here.

WARE, MASS.—Collis & Tucker had a fine exhibit at the chrysanthemum show at Springfield, containing over 200 blooms.

ATCO, N. J.—William F. F. Murray died November 22. He was a well known grower and a member of the Society of American Florists.

SAGINAW, MICH.—Herman Schmeiske has removed to Rockville, Conn., where he will join his brother, who has three greenhouses and five acres of land there.

HAGERSTOWN, MD.—Wm. Bester has built a new three-quarter span rose house 20x100, with a north side propagating house. His roses and carnations are in fine condition.

CHAMBERSBURG, PA.—Wm. B. Reed has added two new houses 12x75 and put in a new heating apparatus, using the system of hot water under pressure. He heats ten houses with one boiler.

COLORADO SPRINGS, COLO.—Victor Johnson, formerly of Pueblo, has removed to this city, where he has five greenhouses 20x75, mostly devoted to roses, carnations and violets for the wholesale trade. Mr. J. E. Miller is in charge of his Pueblo property.

CLINTON, IOWA.—John R. Bather, the well known florist, died November 20, aged 66 years. He was born in Manchester, England, Nov. 7, 1827. When 21 years of age he came to America, locating in Albany, N. Y., where he remained 9 years. He came to Iowa 35 years ago. The business will be continued by his children.

The Grand New Forcing Rose,  
*"American Belle."*  
 Prices and full particulars on application.  
 John Burton, Chestnut Hill, Philadelphia.

PLEASE mention the AMERICAN FLORIST every time you write to an advertiser.

## CARNATIONS.

I have fourteen houses planted to carnations, and they are under my special care and supervision so that I can guarantee every cutting sent out.

If you will kindly write to me stating what varieties you want, how many of each, and when they are to be delivered, I will give you figures and think we can make a deal.

**ANNIE PIXLEY.**—This is a new pink, and one that you want to try; it is one of those beautiful light pinks, just the proper color. The stems can be cut fifteen to twenty inches long, the calyx never bursts, and it is such a strong grower and free bloomer that you can't help but make money if you plant it.

Orders will be filled in rotation, beginning now. Price per 100, \$12.00; per 1000, \$100.00. Twenty-five at 100 rate, 250 at 1000 rates.

Samples of any stock free. Terms absolutely cash with the order or C. O. D.

L. B. 496.

ALBERT M. HERR, LANCASTER, PA.

## 100,000 VERBENAS. THE CHOICEST VARIETIES IN CULTIVATION.

Fine pot plants, \$2.50 per 100; \$20.00 per 1000. Rooted Cuttings, \$1.00 per 100; \$8.00 per 1000.

PRICE, \$3.00 PER 100.

This stock has always been entirely free from disease of any kind. Inspection invited. Orders booked now. H. HUEBNER, Groton, Mass.

## Baltimore.

A rather amusing occurrence at the show was in connection with a wheelbarrow full of La France buds sent by Brackenridge & Co. for competition in the wedding designs and labeled "A gardener's wedding present." One of the daily papers next day praised it as a "chariot of roses," another called it a "Gardener's prison" and singularly enough an esteemed contemporary in the florist world has it "A gardener's prison" too. B. & Co. will have to be satisfied, though no doubt many were puzzled to know how a wheelbarrow could be a prison for anyone, let alone a gardener.

After the flurry of the show things have settled down very seriously. Now and then a wedding and one large ball during the week have kept business moving gently, though there seems no very steady demand for anything but violets, which are rather scarce at one dollar per hundred. Chrysanthemums are still plentiful, but not in very great demand, and really the only very steady demand outside of violets seems to be for flowers suitable for funeral designs. MACK.

### Liability for Injury to Trees by Escaping Gas.

Shade trees, shrubbery and vegetation generally may be injured by escaping gas. The great difficulty is to prove the cause of injury, especially in a suit for damages. But the general term of the Supreme Court of New York in the case of *Evans v. Keystone Gas Company* has just decided that certain circumstantial evidence is admissible for such purpose, and, in fact, sufficient. This was an action brought to recover damages alleged to have been sustained in the injury to certain premises in the village of Olean, New York, by the negligence of the gas company in that it permitted its gas main laid in front of said premises to leak, and thereby destroyed three maple shade trees standing near the street, which had been there fifteen years and had attained the size of about fifteen inches in diameter. They were represented to have been fine, thrifty trees, not only ornamental but useful to the premises as a shade in the summer season. The evidence offered to prove this case was that the gas company at a certain time placed beneath the surface there an eight-inch main pipe from which were extended lateral pipes as they were wanted for the purpose of lights. Evidence was also furnished tending to prove that gas quite abundantly leaked from the main from the time it was placed there until it was repaired, about three years afterwards, and that, in consequence of such leakage, vegetation along the street was, to some extent, destroyed during the period of such leakage. It was shown to be impossible at that time to make young trees along there survive, while thereafter they lived and were thrifty. Other maple shade trees on the same side of the street were, during the same period, for a considerable distance from those in question, affected in like manner, which tended to prove that gas leaked from the main pipe along that entire distance. This evidence, taken together, the court said permitted the conclusion that the negligence of the gas company in its failure to put and keep its main in proper condition was the cause of the injury complained of. It also suggested that it might be assumed that the damages recoverable in such a case would be the value of the premises with and without those shade trees.

## Milwaukee.

A bit of artistic Japan, such as Sir Edwin Arnold has sung about, can be seen at Whitnall's flower store. The great windows as seen from without are massed with chrysanthemums, but the interior is still more gorgeous with these blossoms. There are chrysanthemums everywhere nodding the heads above the palms and ferns or filling great Satsuma with their own loveliness. Prettier even than the flowers are the Jap maidens in bright colored kimous who guard them. In a pagoda of white and yellow chrysanthemums a black eyed girl in the sweetest of yellow and white kimous, with a cluster of wonderful chrysanthemums that shade from the palest yellow to a golden brown, tucked into her sash, serves tiny cups of tea to every purchaser. Little Gordon Whitnall, with his mop of yellow curls twisted up a la Jap and dressed in a scarlet and yellow kimou, is a center of attraction. The display has been arranged for the patrons of the store and the general public, who are cordially invited to come and take a cup of tea and imagine that they are in flowery Japan. Clauder's orchestra will furnish music to add to the enjoyment of this unique flower show, which will be open and free to the public until to-morrow night.—*Milwaukee Journal Nov. 15.*

## Foreign Notes.

Cypripedium Clonius, which recently received a certificate from the Royal Horticultural Society, is a cross between C. candatum Lindeni and C. conchiferum. The dorsal sepal is long and pointed, white veined with pale green, the pedals being similar in color, and nine inches long. The lip is ivory white faintly spotted with reddish brown.

Laelio-Cattleya Pisandra, a handsome bi-generic orchid recently exhibited in England, is a cross between Laelia crispa and Cattleya Eldorado. The sepals and pedals are of a pale rosy mauve, with a bright golden yellow throat.

Please mention the AMERICAN FLORIST every time you write to an advertiser.

## Announcement to Florists.

We desire to announce the dissolution of the firm of Sipfle Dopffel & Co., and to introduce to the trade its successor, The Syracuse Pottery Co., which will be under the management of William Dopffel and Conrad Breitschwerth. The business will be conducted as heretofore, except on a larger scale to meet the growing demand for our goods. We have accordingly enlarged our plant and capacity, and with unsurpassed facilities are now prepared to fill the largest order on short notice. Our latest improved machines are turning out the best and most serviceable flower pots in the market, and assuring you of our intention to lead in further improvements we solicit a continuance of your patronage in the belief that we can supply just what is needed at a price and in a manner satisfactory to all.

Send for price list and samples and we know you will give us an order.

SAVANNAH, GA.—A. C. Oelschig held his second chrysanthemum show last month for the benefit of a local charity. It was a great success artistically and netted \$500. Mr. Oelschig added considerable glass last summer, including a palm house for specimen plants, a fern house and an addition to two rose houses 60x40. Business was dull all summer, but is now improving.

PORTLAND, ME.—Jos. A. Dirwanger's greenhouses are a favorite resort of the flower-loving people of Portland who admire rare varieties and well grown specimens. *Adiantum Farleyense* is seen here at its best, and there is always a good assortment of orchids in flower. One house at present is brilliant with tuberous begonias, Chinese primroses, ericas and flowering anthuriums.

DO YOU WANT a list of the leading park superintendents of America? You will find such a list in our trade directory and reference book.

### Miscellaneous Seasonable Hints.

As fast as your mums are thrown out you will have space for other crops. An important one is the Bermuda lilies, which may have been hurried in to the greenhouse. Now you will have time to give them proper care. I allude to the Easter crop. If you did as I suggested—plant the bulbs two inches below the rim of the pot, allowing an inch or so of compost to be added after they have made a growth of a few inches—there is no better time to do it than now. As I have before stated the roots which the lilies are bound to send out above the surface will find a great help in this top dressing. After it is done the science of watering comes in, as the new surface soil without roots taking anything from it for a few weeks, will always appear more moist than the solid ball of the plant really is. An examination of one or two plants in a batch will reveal the true state of affairs.

I would like here to refer to a little controversy which has lately taken place in your columns about watering. Expert waterers are jewels; like poets, they are born not made. Few plants except aquatics want to be all the time in the same condition of moisture at the roots. When a plant does not dry out in proper time there is something wrong, but there is a great difference between a plant so dry at the root that its leaves and branches wilt, and one that has just absorbed the moisture from the soil and is again ready for another supply. Perhaps a hundred different directions could properly be given for the many different plants that are cultivated. But one broad rule will stand for 99% of all the plants usually found in the commercial greenhouse, viz.: let a plant get slightly on the dry side and then give it a good drink and then let it go till it needs it again; and this applies to either bench or pot, and what's the good of drawing an analogy between the vegetable and animal kingdom? They more likely both started from the same mysterious germs, but as we view them and know them they are existing under very widely departed conditions.

There is no plant more troubled with aphids than the longiflorum lilies and when they are about one foot high is the worst time for them. The greenfly gets away down in the heart of them and continual smoking scarcely dislodges these little pests after they have once got a foothold. Before you see any greenfly at all give them a syringing of weak tobacco water. It will go far towards preventing a crop of aphids from troubling your Easter crop.

Don't stand your imported azaleas too close together; give them room and it is none too early to look out for that premature growth which if allowed to grow will almost entirely spoil your crop of flowers. Have them carefully pinched off

if you want to sell the plants this coming winter and spring. I believe the close atmosphere which they get in the hold of a vessel and then the sudden change to day light and moisture is the cause of this premature growth. Some varieties have long strong growth extending several inches beyond the shoots that bear flowers; these are usually blind; cut them out; they only spoil the symmetry of the plant.

If you imported any rhododendrons treat them the same as the azaleas and for the present keep as cool as possible. They do not sell as well as azaleas, neither do they force as well. Don't try to get them in by Easter; they will pay all right in May and June if you have any demand for such stuff.

The new crop of lily of the valley is difficult to get in by Christmas, but a paying percentage can be forced for that date. They want a strong bottom heat (85° to 95°) and plenty of water (twice a day) at a temperature of 80°. If possible have them in the bed or boxes so you can water the roots without wetting the flowers, which is a great injury to them. Put in the first crop on December 1, and continue every few days as your demand requires. Large growers of valley depend on dormant roots until after New Year's but the new pups can be successfully forced for January 1, and on.

Those who potted some Dutch hyacinths as soon as received in early September will now be able to bring in a few and if given a strong heat can have them in flower by the Holidays. It is not desirable to force many, for they are not in great demand until late in the season. Give them a night temperature of 65° to 70° and plenty of shade.

A few years ago we thought it absolutely necessary to have tulips at Christmas, but of late we can do without them. If you do want them bring in only the Duc Van Thols, scarlet, yellow and pink. Give them a temperature of 70° at night with plenty of water and cover at all times with a heavy shading; cheese cloth is about right. The shading is to produce a long stem. Bring the first lot in about December 1, and they will be well in flower by Christmas.

Pelargoniums that were propagated in August and September and the old plants that were cut down, shaken out and started growing again will now have made a good growth and if you want to increase your stock take off the ends of the strong leading shoots. They root very easily in the sand now and there is plenty of time for them to make good salable plants by May and June. It is not desirable to propagate them much later than this date.

About the 15th of this month I bring in to force the following tulips: La Reine, Vermillion Brilliant and Chrysolora; and

Von Sion narcissus. They can with heat and shade be grown with good stems by the first week in January. WM. SCOTT.  
Buffalo, December 4.

Rose Notes.

Now that the great rush of the chrysanthemum business is over growers will begin to think it is time to see about their roses. Many, I fear, have very much neglected them of late on account of the all-absorbing topic of the season—chrysanthemums. Where such has been the case it will be unfortunate for them at Christmas, I am afraid. At any rate now is the time to put all the time and energy possible into the growing of roses and other stock from which cut flowers are to be harvested for the coming winter.

Where old stock has been carried over every possible means should now be used to help it along, but, let me put in a word of caution here, not to over-do it. The great trouble with many of us is we think if a little is good a good deal is better, but in this case the rule does not apply at all. Better use a small quantity and often than a large quantity and over-do it at once. Where good, clean sheep manure can be procured there is nothing better as a fertilizer for old plants than a dressing of one-half to three-quarters of an inch of this spread evenly over the surface. Where such cannot be procured the next best thing is thoroughly well decomposed cow manure used in about the same proportion, but as this is not as stimulating and does not contain the same proportion of ammonia as the sheep manure it would be well to use a light dressing of fine, pure ground bone first before applying the manure. This helps to draw the roots to the surface where they can be fed with liquid manure occasionally and very best results obtained by such means. Nitrate of soda also is considered valuable in such cases. The best means I have ever yet found for applying nitrate of soda is to take a very fine, dry soil, screen through one-quarter inch mesh five parts to one part of nitrate of soda; or in other words take about five shovelfuls of fine soil and a small shovelful of nitrate of soda. This should be enough to cover five or six hundred square feet after being thoroughly mixed up together; the watering gradually dissolves the nitrate of soda and the roots get the benefit of it without the possibility of giving them too much. The trouble with giving them too much is that it is apt to burn the roots and do more injury than good. Such a dressing as above can be applied every four weeks with considerable benefit if the plants are in vigorous healthy growing condition. Some use it as a liquid but I prefer the above method as being more sure of getting it in lighter doses, so to speak, or, in other words, a small portion for each meal rather than give an over quantity at one time.

Young plants, or rather houses replanted with young stock this year would be better without the nitrate of soda

until the days begin to lengthen out quite considerably—say February. I have never yet found in my experience that too much stimulant is of any benefit to young plants till they have fairly well filled the soil in which they are planted with roots. It oft-times does more harm than good, and if the plants have a good sound packed soil when planted they certainly do not need it until that time.

Many complaints reach me through the mail and otherwise that the stock is generally below par this season. I have taken considerable pains to find out what might be the cause and found that in very many cases it occurs through running too high a temperature. It may appear to the general reader egotistical in me to keep "harping on the same string" in reference to temperature, but there is no such thing as getting really fine plants and flowers if the temperatures are run too high. It would be just as reasonable to expect a horse to travel at a high rate of speed continuously without rest and maintain his condition and be in good shape all the time as it is to expect a rose run at a high temperature to keep producing fine flowers. The animal and vegetable kingdom are very closely allied in this respect and if you want to get the best results you must give the very best treatment consistent with their requirements to obtain it in either case. A horse that is driven at a high rate of speed is cared for very judiciously and fed in small portions, with all the other paraphernalia of dressing, cleaning, etc. just as carefully attended to, and if you want the best results from plants producing flowers you must follow the same rule.

All the above-named fertilizers and several others which could be enumerated also and are known to the general growers can be used to advantage, but care must be used in their application. Nitrate of soda is one of the stimulants that more than ordinary care must be taken in using, hence my reason for emphasizing the above.

Keep all dead leaves, weeds and rubbish cleaned off the plants regularly; water very carefully when dry only. At this season of the year oft-times the syringing of the foliage will be almost all the plants require for five days out of six; and unless liberal syringings are applied on all favorable opportunities red spider and other insects will be sure to obtain a strong foothold; keep all such insects checked on first indications of the same. With reference to green fly another season's experience warrants us in emphasizing our statement that the tobacco juice applied as vapor from steam is by far the best means up to date of destroying insects on plants that are producing flowers. After a three year's trial of this material we have never found a flower injured from its application. Many people run away with the idea that there is considerable complication in arranging for such applications; this is an error. The requirements are simply a steam boiler large enough to generate sufficient steam to fill a house or houses with a body of steam quickly; this is really the heart of the whole process.

Summit, N. J.

Carnation Notes.

Cuttings:—"Well begun is half done" I was taught while going to school. Unless my ideas are all away this applies to the propagation of carnation cuttings as much as to anything else. One would not think of breeding from a deformed or sickly horse or cow, much less should we think of propagating from a deformed or sickly carnation plant, for in the first case we can have one healthy parent if we wish and yet we would not make the attempt. In the carnation's case there is only one parent to work from, and if that parent is not in the best of health and vigor how can one expect the progeny to be healthy?

Promiscuous propagation is one of the causes, and one of the principal causes, of carnations deteriorating after a few years. Unless some care is used in pulling the cuttings diseased and unsatisfactory plants will become more plentiful every year and it will be only a few years until they will be in such a large percentage that the variety will be declared run out and worthless. The other cause for the running out of varieties is the continual propagation from plants that are grown for cut flowers, but of this I will have something to say later on; these remarks now apply to the cuttings as they are usually taken from blooming plants.

Never put an apprentice to pulling cuttings; the best men on the place are none too good, and should be instructed not to take any from a plant that shows the least sign of weakness or disease. There is a great deal more in careful selection than most of us are willing to acknowledge, and if we follow it up closely year after year we can improve, instead of ruin, a variety even if we are propagating from blooming plants.

It should not be necessary for us to be continually crying for new varieties to take the place of the old worn out ones. When we get a good one we should endeavor to improve, and not allow it to run out almost before we have learned to grow it. I can recall some of the newer ones that were propagated, every little branch and sprig from healthy and unhealthy plants alike, and what was the result? Almost worthless the first season they were put on the market, a disappointment to those who bought and a very poor card for those who sold.

My experience has been that the side shoots on the flowering stems make the best cuttings, and that it will pay where you have enough of a variety to do it to let the flower open first before pulling the cuttings, and if it is not strictly a first-class flower do not take the cuttings, as they will not be strictly first-class either. Where you do not have enough of a variety to follow this plan, almost as good results can be had by carefully selecting the cuttings from the best, nealthiest and most free blooming plants.

It would be suicide for me to propagate now for my next season's plants, but in some localities and soils December struck cuttings are the best. These early cuttings should be especially carefully selected as they will have from three to four months indoor culture.

A. M. HERR.

TABLE DECORATION OF CATTLEYAS AND FARLEYENSE FERNS AT CHICAGO. ARRANGED BY P. J. HAUSWIRTH.

ORCHID TABLE DECORATION AT CHICAGO SHOW. ARRANGED O. J. FRIEDMAN.

#### Chester County Carnation Society.

The December meeting of this society met at their room Saturday, December 2, with an unusually large attendance. The question of disposition of the gold medal offered last year and not awarded was again introduced and elicited considerable discussion as to the restrictions to be imposed. It was finally determined to offer it for best six blooms not introduced before 1892. Last year the offer was for six blooms of a variety never offered for sale. It will be remembered that only three varieties competed at Pittsburg last year, and in the opinion of the committee

none of these were considered of sufficient merit to warrant an award. The committee will be composed as last year of three persons, one to be appointed by the Chester County Society, one by the American Carnation Society, and these two appoint the third. This society is particularly desirous that there shall be a strong competition, and the offer is open to all growers whether members of either society or not.

Prices on cut flowers were reported as in favorable condition for the grower, the secretary calling attention to the importance of carefully grading the flowers.

The subject of disbudding for profit was presented. C. J. Pennock thought it depended on the variety. In Tidal Wave, Buttercup, Robt. Craig, etc. it was better to take off the terminal bud and leave three or four side buds to form a spray. With Portia and others of similar growth it was better to take off the side buds. Secretary Shelmire had found that the expediency depended on the particular stem. He had found it varied in the same variety; some stems of Buttercup, for instance, would make most profit by leaving the terminal, which was always sure to make a good bloom. Mr. Walton

doubted the profit to small growers, because it was not the custom of the commission men to give each grower his individual sales, but averaged the total sales of a week among the various growers. President Ladley thought the time was past for selling carnations simply in bulk, but that they should be classified, and still better to sell them by names and thereby create a better market for the better kinds.

The secretary read a letter from Mr. Darlington, member from Doylestown, with valuable suggestions for better exhibit of flowers at the various flower shows. Mr. Phillips spoke of the success of the exhibition held by the society at West Chester last winter, and suggested the advisability of another, and a committee was appointed to look up the matter and report at the January meeting.

The exhibit of seedling blooms was unusually large, and a number of exceptionally fine flowers were shown. Geo. Lowe showed a clear yellow with others, McGowan X Tidal Wave. Wm. Swayne showed a fine one, style of Daybreak; I. Passmore showed several, one a fine deep pink. L. Thompson showed one of last year's, very attractive, deeply fringed, a clear pink. Jos. Phillips showed several in type of Tidal Wave. E. Walton had several, one extra good one of Chester Pride type. E. Swayne showed seedlings for Wm. Nicholson, Nicholson and Ada Byron, and some whites by number from Sewall Fisher. Secretary Shelmire showed several seedlings of Caesar stock, also Mrs. Stanley and Buttercup. C. J. Pennock showed three or four, one flame color, full, fringed and of attractive style. C. J.

Chrysanthemum Notes.

Surely there is no flower grown where there is such a difference of opinion as to respective merits and individual excellence. Some of them have such "swelled heads" that it is little wonder their growers become inflated also. Varieties like Ivory, that combine so many good qualities are the exception. More are good only for some social purpose. According to my judgment, any color and shape, double or single, is permissible in chrysanthemums so long as there is some special individuality? Mme. Hyslop, the tiniest of them all, but half an inch in diameter, is a novelty as are Medusa's tangled threads! The dragon varieties always attract attention as curiosities for exhibition.

One of the prettiest plaque arrangements I know is well grown Molly Bawn, with adiantums, *bedded* (not cut sprays that soon wilt and mar the general effect). The flower is grace and purity itself, and the adiantums a natural setting. Small crotons, grevillea (silk oak), cyperus, etc., used this way with bronze and gold chrysanthemums are a great addition in made-up work, where they can be used to advantage as in baskets and the like. What a bonanza the chrysanthemum would be if Easter was in November!

I observe in notes reviewing varieties exhibited at Chicago "Robt. Bottmley should be called Lady Trevor Lawrence." If I am not at fault R. B. has precedence by one season. As I recollect, the variety was imported by two English firms, one getting ahead of the other in bringing it before the public. Several firms have done the same with us too, but it is less likely to occur for the reason that we do not need to go to Japan for novelties when our own productions are so notable and our climate so well adapted (under glass the American grower has it all his own way).

I regard King's Daughter as distinct from Mrs. Langtry. A deeper flower, less informal arrangement, and does not shed its petals like Langtry. It is rather odd that this sort holds out so well on the plants, and "going all to pieces" almost as soon as cut.

Aug. Swanson suits me as an exhibition flower, large, good shape, short jointed habit, with stiff stems, not "Daddy long legs" as are most of the incurved bronze leather colored sorts. For myself I like these so called "indeterminate" shades in chrysanthemums and dress goods! I do not regard it necessarily a fault that a mum should show a center disc; often it but gives character to the flower, unless too pronounced; especially is this true of the incurves. Waban may be "flimsy" when poorly grown, otherwise satisfactory and a first-class exhibition bloom. Thos. Cartledge, although not any too easy to grow, is a splendid yellow bronze for exhibition. A good bloom is five or six inches deep, somewhat reflexed, while the incurved petals cover the center nicely.

American Flag is a fine exhibition sort, in the way of Vivand-Morel as to build, considerably later in bloom. Harn Ko is a curiosity in the way of a twisted incurve and a very distinct shade of silvery lilac or lavender. M. B. Spaulding is a very good yellow, reminds one somewhat of Golden Wedding. I find Golden Wedding easy to grow. Of what use though are words in chrysanthemum lore; she is able to stand on her own merits, her popularity is not on the wane, and her sway is sure and certain so long as November annually ushers in the Flower of the Gods! While the added novelties and superior culture will always interest connoisseurs.

GROVE P. RAWSON.

Toronto.

As I anticipated in my last notes concerning the late chrysanthemum show the Gardeners' and Florists' Association is now possessed of a bank balance \$50 larger than before the show; this does not seem much to brag of, but all the same it is highly gratifying to those who have been doing the work especially, and also to all the members of the Association. There is every reason to believe too that the chrysanthemum show may now with proper management become one of the fashionable events of the season in the city, some of the upper ten having promised more substantial support next year. Several valuable hints have also been made by some of the daily papers, which if taken advantage of will materially aid in swelling the receipts. The beauty and magnificence of this year's show too must certainly advertise the next one to a large extent.

Now for the details which I promised in my last. To begin with plants, which were, if taken altogether, quite as good as last year's in spite of the lateness of the season. The \$25 prize given by Sir C. Gzowski for 12 specimen distinct varieties

was taken by Mr. A. Macpherson, gardener to Col. Sweny, whose plants though not quite so good as last year were very fine; Mr. Geo. Hollis came second with 12 smaller but very nicely grown plants; Mrs. Palmer third. For 4 whites Geo. Hollis first, Mrs. Palmer second and R. Gore third; 4 pinks, Central Prison (Mr. W. Houston) first, R. Gore second and Reservoir Park (Geo. Reeves) third; 4 yellow, Col. Sweny first, Mrs. Palmer second and R. Gore third; 4 any other color, Mrs. Palmer first, Central Prison second and R. Gore third. In specimen plants of each of the above colors the firsts were taken by R. Gore, Reservoir Park, Col. Sweny and R. Mearns. The cup given by Messrs. John Davis & Sons for the best specimen any variety brought 11 entries and was captured by Mr. A. Macpherson with a magnificent W. H. Lincoln. Both firsts for standards were taken by Mr. R. Gore. In the section for 25 distinct varieties in 6-inch pots there was great competition and Messrs. Spears & Muston came in first with a very fine lot, good blooms, bushy and well leaved down to the pot; Messrs. Manton Bros. were close behind. The cup for 25 distinct varieties, single stem, single flower, was taken by Mr. A. J. Watkins of the Horticultural gardens; his plants had been held back for several weeks but came in ahead after all; Mr. R. Mearns was second. There were 8 entries for the group of chrysanthemums and foliage plants 15x6 feet and some very fine banks were put up. Messrs. Manton Bros. took the cup with a beautiful arrangement, Horticultural Gardens second and W. J. Laing, not quite up to his usual taste, third.

In miscellaneous plants Messrs. Manton Bros. took the cup for palms in 10-inch pots and first for palms in 8-inch pots; Spears & Muston first for a beautiful lot of 50 ferns in 3-inch pots. A. Gilchrist second with a large variety. For large ferns, adiantums and orchids John Chambers, Exhibition Park, was away ahead. Mr. Geo. Hollis had a lot of cyclamen hard to beat and took first prize. Mr. R. Mearns was first with specimen callas, fine well grown plants.

The exhibit of cut bloom was so large, varied and fine that one is a little nervous about endeavoring to describe it, though of course one can not let it go by without some remarks. Mr. J. H. Dunlop took the Lieutenant Governor's cup for the best 25 distinct varieties with a superb lot, among which Golden Wedding, Minnie Wanamaker and Good Gracious were particularly conspicuous; he also took first for the 12 distinct varieties including Mrs. Chas. Duhme, Mrs. Irving Clarke, Elmer D. Smith; also for specimen yellow (Golden Wedding), Pitcher & Manda's medal for 5 varieties new of 1893, Nathan Smith & Sons's prize for 12 varieties of 1893, and firsts for vases of 12 yellow (Golden Wedding again), 12 white (Minnie Wanamaker), 12 pink (President W. R. Smith), and 12 any other color (Harry May).

Mr. R. Mearns also had a magnificent lot of blooms which took second for the 25 and 12, first for specimen pink (Good Gracious, immense!), first for 12 Japanese and 12 Chinese and second for cut sprays.

Messrs. Nathan Smith & Son (whose blooms had only just been unpacked) came in third for the 25 and 12 and first for the 6; noticeable among their blooms were F. Thompson, Ada H. Le Roy, Mrs. F. L. Ames, Maud Dean, M. B. Spaulding, C. B. Whitnall, J. S. Mathews, Mrs. A. J. Drexel, H. Balsley, Sec'y Farson, Vivand-Morel, etc.

TABLE DECORATIONS AT THE CHICAGO SHOW.

TABLE DECORATION OF ORCHIDS AND ADIANTUMS AT CHICAGO. ARRANGED BY JOSEPH CURRAN.

Wm. Scott, of Buffalo, and E. Suder, of Toledo, also showed some fine blooms in the 25, 12 and 6, but did not quite get there; Suder, however, took first for specimen white (The Queen) and specimen any other color (seedling 101, which was awarded a certificate of merit and took the cup for the best seedling); Scott also took third for vase of 12 blooms white, second for pink, third for yellow and second for any other color. Mr. A. Gilchrist captured first for 12 cut sprays with a beautiful lot against keen competition. Other exhibitors taking prizes were Horticultural Gardens, Mrs. Palmer, Grainger Bros., Manton Bros., R. Gore.

The class for seedlings turned out to be a great feature. In my notes of last week I gave those which had been awarded

certificates of merit, but besides these were others worthy of special mention. From Nathan Smith & Son were Iora (in the way of Good Gracious), Durango (yellow) and Laredo (pink). From Pitcher & Manda were Geo. A. Bellman (yellow) and a very pretty lot of anemone flowered blooms. From H. Tong Masasanga Chief, a large deep crimson but a little weak in the stem.

The exhibit of floral designs was very large and fine (in its way). W. J. Laing was first for the cross (chrysanthemums, 30 inches), Manton Bros. second and W. Scott third; for the wreath (chrysanthemums, 20 inches), A. Westwood was first, Scott second and Tidy third. There were three decorated mantels and I think the judge must have found it hard to

decide which was the best; they seemed to me to be all much of a muchness, but the general opinion of the public seemed to be that the third should have been first. Messrs. Grainger Bros. were awarded first, W. J. Laing second and Manton Bros. third.

The show of carnations was magnificent and hard to beat. Daybreak was in the ascendancy, putting all the other pinks into the cold shades of unpopularity. The principal prizes were taken by Messrs. J. H. Dunlop, H. Dale (Brampton), and Spears & Muston, the latter getting the cup for the best 100 blooms. W. Scott took first for red with some as fine Portia as ever was seen. Other exhibitors taking smaller prizes were W. J. Laing, Manton Bros., A. Gilchrist. A

fine bunch of 100 blooms named "Adelaide Kresken" was shown by Mr. Peter Herb, of Mt. Healthy, O. This is a seedling of Mr. Herb's raising not yet in commerce. It is a pink in the way of Tidal Wave, but brighter, more sparkling and larger. It was awarded a certificate of merit.

Now I come to the last class, but the best of all—roses. Nothing could surpass them; they were simply glorious, and the first prize bunch of 50 (of which I send you photograph) put up by Mr. J. H. Dunlop could not be equalled I am sure in the world at this time of year; it was composed of American Beauty, Mme. Caroline Testout and Kaiserin Augusta Victoria. The second prize bunch of 50 put up by H. Dale was little behind the first in quality, but were not arranged quite so tastefully. For roses of specified sorts 6 blooms of each, Dunlop took 6 firsts, Dale 3 firsts and Spears & Muston 1 first. All, however, were really first class blooms and the superiority of one over the other in most cases could only be detected by experts. Toronto rose growers have now got such a name in the trade for the good quality of their bloom that it is almost superfluous to sound their praises in these notes.

Here endeth the fourth annual show of the Toronto Gardeners' and Florists' Association, and good as it was I have no doubt but that the fifth will be better.

Mr. F. G. Foster, of Hamilton, ably officiated as superintendent.

Messrs. Jas. McKenna and Joe Bennett, of Montreal, were there, also the genial Harry Bunyard, of Pitcher & Manda.

Special features of the show were Seedling No. 101, Oriana, Good Gracious, Golden Wedding, Eugene Dailedouze—and Great Scott.

Capt. W. F. Master, an honorary member of the Association, was presented with a gold headed cane by the members and highly appreciated the compliment.

Those who had a voice in the postponement of the show were amply vindicated by the crowds on Thanksgiving Day afternoon and evening.

A first class band is a necessity at a flower show. E.

#### Denver.

We are now through with the anxiety of our first show. Denverites cannot do things by halves and as a result we came out of our first show financially away ahead, and for glory we have the praise of every one of the 7,000 people who paid admission.

The show room, a large circular 138 feet in diameter, was full to overflowing. Plants occupied a large amount of the floor room, the entries for standards in 12-inch pots being an attraction to all. Mr. Beach had four splendid ones that easily led in the race. Mr. Beach says that Michigan boys never follow. In 12-inch bush plants another eastern raised man was successful, Mr. Adams, grower for C. R. Gallup. If Mr. Adams' products are to be taken for a standard surely Baltimore must require a very high standard for mums. Among the successful single cuts, Mr. John Berry, gardener for Senator Wolcott, had more than one. Not only is the Club grateful to Mr. Berry for the splendid specimens he exhibited but for the earnest work he did as a member of the committee of management, which consisted of Mr. Lewis, Mr. Thos. Chapman, Mr. John Berry and our president, Harrison Given.

We were pleased to have some eastern goods with us, notably from Nathan Smith & Son, J. C. Vaughan and B. G. Hill & Co.

The twelve cut blooms of Golden Wedding from Gallup deserves special mention, they were among the very most admired bunches; this variety is a favorite among us.

Probably closer competition was shown among the rose growers than elsewhere. Among the successful were Colfax Floral Co., with Beauties, La France and Merrets; Gallup with Woottons and Bridesmaids; Mauff with Brides and Belles.

Saturday was our great day both in attendance and interest. The table decorations were a great card. Mrs. C. R. Gallup was the favored one with a round table of Bridesmaid roses and asparagus. This table was very much admired, its beautiful simplicity being the charm. The table of white and yellow mums, by Mr. Albert Mauff followed closely and shared not a few of the praises. In mantel decorations the Mauff mantel was easily winner.

We were hurt in attendance very much by extreme cold Thursday and Friday and yet were blessed with pleasant days both before and after the show.

Among the many things the club is rejoicing over is the fact that we had Mr. Wood among us for four days. True he was a surprise to us, for the committee could not locate him at all when the train arrived, so he hunted us up when he came up town. He however forgave us as no doubt he had to do many many times later. Not one kick is our report as to his judgments. We can never hope to be so well pleased as to awards again until we can have him for a second time.

Snow and cold are new arrivals and are shortening up all cuts. Mums have held up in prices very well, so far \$2 to \$3 are the ruling prices for good cuts. Roses are unusually good this winter. The Bridesmaid is not a small attraction on the market. LYLE.

#### St. Paul, Minn.

I have noticed lately that the AMERICAN FLORIST has a correspondent from this part of the world; many of the florists here, as well as in Minneapolis, have been inquiring of each other, and stretching their imagination, trying to guess who the person is who styles himself "Felix." They have come to the conclusion that he must be a man outside our profession, and they now all beg that he will honor them with his name and address, as they are all willing and anxious to extend their help and give him needed information, as his letters of late have been so entirely contrary to facts and circumstances that to a casual observer acquainted with the profession here it seems as if "Felix" was taking a pleasure in misrepresentation. I will enumerate some of the points in his letters to which exception may be taken.

In his letter of October 19, he says:

"Some of the department stores here and in Minneapolis have 'flower days' selling at wholesale prices; it tends to dispose of the surplus while not materially affecting the regular retail trade."

How any honest person can say that it does not affect the regular trade to have the drygoods stores advertise broadcast that stock from the city greenhouses will be sold at prices like this for instance—roses from twenty-five to sixty cents, chrysanthemum plants ten cents each, or three for a quarter, or Dutch hyacinths in pots five cents each?

The second point to which exception is taken is where he states:

"Ten years ago two or three small greenhouses supplied the entire trade in cut flowers and plants; now there are a score or more, some of them like May's containing upwards of 100,000 square feet of glass. And still their capacity is taxed to the utmost."

The fact is there is no greenhouse establishment in this city which contains over 40,000 feet of glass, and most of them are considerably below this. Ten years ago there were, to my knowledge, at least fifteen different greenhouse establishments in the city of St. Paul. Of course they have done here as in other parts of this country; they have most of them increased their glass area, but it seems to me his letter is contradictory, when he first says the department stores are disposing of the surplus, and then tells us the houses are taxed to their utmost. As a fact I think we would all be better off if there was at least a third less glass.

Another item which many of the brethren have been inquiring about is who or what committee recommended that no chrysanthemum show be held. No one has been able to answer; they all say they don't know. They also take exception to some points in his letter of October 26, but as that is of less importance we will let it pass.

In the November 2, issue he states that "A large department store in Minneapolis is offering roses for Monday at 25 cents per dozen. Surely these must have been cut in Chicago."

On the contrary, Minneapolis florists claim they were supplied from St. Paul.

The letter appearing in the FLORIST November 23 was fully as good as its predecessors. All the Minneapolis florists wish to be excused from following his advice in imitating the Mendenhall greenhouses in the construction of their own, as there are many faults in their construction, and they are too expensive for a commercial florist.

Some of us in St. Paul take exception to the statement that "mums were in greater demand than roses" at the recent Charity ball in this city. We did not find it so, the call was for roses first, violets second, and chrysanthemums were taken when nothing else suitable could be had. It is a fact that the chrysanthemum doesn't seem to be popular with the "swell crowd" for wearing or carrying, except on the street.

Another item is

"Two of the larger department stores engaged in a little rivalry recently, the one selling nice pot plants at 10 cents each or 3 for a quarter. The crowd was great and the mums were all gone before 9 o'clock a. m. As many went later purposely for the plants, but were turned away disappointed, the florists reaped a good trade from them."

This I failed to find a fact; most of the florists will exclaim, when that point is touched, "We would shut our doors for that class of trade; we cannot grow plants, bring them to the stores, sell them singly, and wrap up and deliver for any such price as that."

Another item objected to is the statement

"We are confident that Minnesota beats the world for roses grown under glass."

I for my part am sure we should present a sorry spectacle if we tried to pit our roses against the product of eastern growers, in quality as well as quantity and surely in the price. I am confident it costs us more by a great deal to produce them here, with the cost of fuel alone from \$70 to \$80 for each 1000 feet of glass, and we have always had to use more labor and more expensive houses; more piping and more wear and tear to our heating apparatus, and with weather like last year's, steady cloudy weather from November 1, almost continually till April 1, and way below zero as a usual thing, it is no easy matter to produce high grade roses, and they will not as an average compare with eastern grown flowers.

In conclusion let us say, and more espe-

TABLE DECORATION OF LA FRANCE ROSES AT CHICAGO SHOW. ARRANGED BY GALLAGHER FLORAL CO.

cially in regard to our unfortunate brothers in Minneapolis, the drygoods and department store custom of selling flowers is the greatest drawback and misfortune to our business. The florists are cursing the day they started to dispose of their surplus in that way. It has the most demoralizing effect on our business; people get so that they will not pay a fair price for flowers; they want them at "Glass Block" prices, or they want to know the reason why. It has got so far that the "Glass Block" almost controls the trade in the city. They have fitted up a fine store, and carry a big stock of flowers (very good flowers too) every day, take orders for anything, and advertise their "wholesale prices at retail" in the newspapers, so the news is carried over the country, thus spoiling the country trade as well. I believe there are now florists who are in such a position that they are almost compelled to sell their products to the same "Glass Block," and at prices dictated by this concern, or they would do no business at all. They all see their folly now that it is too late. If they had been less jealous and more united, and each had agreed to take a stand at the Central Market they could have disposed of their surplus there; if necessary at cut prices, instead of throwing it on to the department stores. They would thus have had a chance of controlling their own trade, but no, there is too much jealousy and ill-feeling to have anything in common. And now we suffer for it. These stores are more of a nuisance to us than the Greeks are in the eastern cities, because they are doing business every day, and doing it in a business-like way, spending large sums in advertising, and delivering their goods as well.

AUG. S. S.

Philadelphia.

Thanksgiving Day business was good and there has been enough doing the past week to keep all branches of the trade moving lively. Over 400 Beauties were shipped out of town one day this week by one of our commission men, and there

seemed to be enough left to supply the home demand. This market could not have stood such a demand a year ago. There are more Beauties and Belles about and better stock than we have ever seen before at this season of the year. Prices range from \$10 to \$25 per hundred.

Good Meteors are selling very well; people are beginning to find out the virtues of this rose; the good keeping qualities and the length of time it holds its color are both points in its favor and we expect to see more demand for it in the future. Bridesmaid and Kaiserin are also growing favorites; the Bridesmaid will likely drive the Mermet out of the market, as it is nearly always given the preference when placed side by side on the counter. Daybreak pink, the Mermet shade now is all right in a carnation, but it does not seem to be the color in a rose. The small teas are now bringing 3 for the best; the larger class range from 4 for good flowers to 8 for first choice.

A few Harrisii are in and bring \$16 per hundred. Carnations are up a little, the general variety selling for from 1.25 to 1.50 per hundred. Edna Craigs command 3 and seem to sell well at that. They are in the hands of a few men who grow them fine, disbudbing and allowing but one flower to a stem. Double violets are very scarce, the ruling price being \$1 per hundred. They are improving in quality, but have quite a distance to go yet before they can be called fine. A shade better than the common run have brought as high as \$1.50. Singles are also scarce. Valley is plenty at 4. Romans and narcissus abundant at 2 to 4. Smilax 12 to 15, and asparagus 50c per string.

Chrysanthemums are now so poor that they are hardly worth quoting. The best flowers now are M. Wanamaker, \$10; Eva Hoyt, Lincoln and Widener same price. We have seen some flowers of the new variety, Eugene Dailedouze, that were cut November 3 and sent by E. G. Hill & Co. to the Phila. show, where they received the prize for best seedling. After passing a week at the show, they have been since that time on exhibition in a florist's window, where they have been

handled a great deal by admiring visitors and to-day, December 4, there are still two flowers of the lot which are in good condition, and in fact better than anything that is now being sent in. This will certainly become a standard variety.

The hybrid houses are now coming on and the growers are speculating on their chances of success. Anderson, Heacock, Burton, Lonsdale and Smith & Whiteley all have houses under way. There may be a few for the holidays, but the 15th of January is a more certain date for the first flowers.

A very interesting match of ten pins was played on the alleys last Tuesday night between the Brown and Crawford factions, and for the third time the Crawford team was victorious. The finish was very exciting. At the commencement of the last game the Browns were 129 pins ahead and it looked like a cinch for them, but the Crawfords took a brace and came out 3 pins ahead at the finish. They gained 69 pins in the last two frames.

K.

New York.

"Listen to my tale of woe." Will the New York growers ever learn their lesson? Ahead of the world in many things, yet they still persist in the antiquated custom of holding back their flowers in advance of a holiday, in order to load them in on the market at the last moment, with the hope of obtaining higher prices. It has been demonstrated over and over again on every occasion where the growers have attempted this that they have been heavy losers by the operation, and the absurdity of their course is apparent to everyone but themselves.

Thanksgiving Day demand was good and the results would have been satisfactory throughout had it not been for the enormous overstock of everything. With one third less stock on the market, prices would have been much better all round. As it was quantities were left over unsold which had they been sent in on Monday and Tuesday would have found a ready market; but on those days their owners

could not be induced to part with them, and customers who were willing to buy had to go without.

Outside prices obtained for extra good stock were 2 to 2.50 for violets, 5 to 6 for Brides and Bridesmaids, 8 for La France, 40 to 50 for American Beauty and 1.25 for carnations.

The Christmas Holidays are but three weeks off. The unexpected willingness of customers to buy flowers at Thanksgiving, notwithstanding the hard times, is an encouraging sign of what may be realized at Christmas if the old profitless tricks are abandoned and wise counsels prevail. To repeat the mistakes of former seasons will be suicidal this year and can result only in disaster.

#### Boston.

Thanksgiving Day trade came in the form of a welcome surprise to the Boston florists. The general testimony is that it was the best on record, a result entirely unlooked for in this season of industrial depression. There was a fair supply of everything in the market. The demand was general, with no special run on anything, excepting that crimson carnations enjoyed a little boom on account of the demand for this color occasioned by the foot ball contest at Cambridge.

At the exchange there was a strong tendency on the morning of the day preceding Thanksgiving, to advance prices sharply and early buyers paid well for what they got. This was most noticeable in the case of carnations, which for a time ruled at almost double prevailing rates. The commission dealers, on the other hand showed an inclination to resist the doubling up process. The weather was perfect, and growers, and dealers, wholesale and retail, were all in high spirits over the general result.

The exhibition of herbariums by the children of the public schools at Horticultural Hall, on December 1-2, was as usual very interesting. A marked improvement over former exhibitions, in the manner of mounting, accuracy in naming and general neatness, was noted. The collection by Arthur C. Boylston of Milton, an 11 year old lad, which took first prize for 125 plants, would compare favorably with anything of the kind done by mature collectors. Elizabeth C. Dudley's collection of 100 plants and Arthur C. Faxon's collection of 38 grasses also took first premiums in those classes and were very creditable. This line of instruction seems infinitely more useful than anything in the way of window gardening competition. The children are expected to collect, prepare and mount the specimens themselves, and to give the common and botanical name, as well as the habitat of each specimen, and garden plants, so-called, are excluded.

#### Cincinnati.

On last Friday and Saturday the new Jabez Elliott Floral Market House was thrown open to the florists of Cincinnati and vicinity. This building is the result of the fulfillment of the will of the late Mrs. Holroyd, who bequeathed the handsome sum of \$15,000 for the erection of a market house for the exclusive use of florists. It is claimed that Cincinnati is the only city in this country having a public market house for this special purpose.

The building was erected on the site of the old floral market on Sixth street and is two stories high. The ground floor is entirely taken up by the flower stands and the second floor will be used as the

home for the society. Thirty-nine large double stands have already been put in, with room enough left for a dozen more. Considerable opposition was met with from the produce commission men on either side of Sixth street, which caused the society a suit in court, but which they won after a long and bitter contest. But that is a thing of the past and we now have our reward. The florists were not able to make an extra fine display on the opening days owing to the extremely cold weather, but under the circumstances they did very well.

On Saturday evening the society gave their opening banquet, which was indeed very enjoyable. Florists from the surrounding cities were invited, but owing I suppose to the rush of business a large number of them were unable to attend. Over one hundred florists and prominent citizens sat down together to do justice to the elegant supper, which was truly a delight to the inner man. Mr. B. P. Critchell, our worthy president, was toastmaster and welcomed the guests in a very eloquent manner. Speeches were made by several gentlemen, among whom were Mr. N. Ohmer and Mr. H. H. Ritter of Dayton, O., Mr. Bertermann of Indianapolis, Mr. E. G. Hill of Richmond, Mr. M. A. Hunt of Terre Haute, Mr. Albert McCullough, ex-president Mr. Geo. Corbett and Mr. E. G. Gillett, the present secretary of the society.

At the last business meeting of the society several new members were elected and two or three more candidates are now on the way. The society is enjoying more prosperity now than ever before, and should in the future accomplish a good deal.

Florists report retail trade as being fair. Good roses are scarce and are bringing a good price.

Walter Gray's boiler house burned down last Saturday night, entailing a loss of \$600. Unfortunately he carried no insurance.

Mr. Chas. A. Getz and our worthy secretary, Mr. Gillett, are on the sick list this week. Ed. S. JOHNSON.

#### Chicago.

Mr. Jas. I. Donlan has completed the work of packing and shipping the remaining exhibits in the New York state division of floriculture at the World's Fair, and accompanied by his wife, left for the east last Friday.

Thanksgiving trade is generally reported as excellent, the quantity sold being certainly larger than last year, but the prices were generally lower. There was a scarcity in some lines, especially carnations. Colored carnations are com-

ing in in limited quantities, and the price holds up. Among fancies Daybreaks are scarce and in excellent demand, ranging from \$2 to \$2.50, and we hear of \$3 being given for extra quality long stemmed Buttercups, which are always received in extremely limited quantities in our market. Violets also keep up in price, ranging from \$1.50 to \$2 at Thanksgiving and the latter price is still asked for extra quality flowers. The demand for them is far in excess of the supply.

In roses the greatest demand is of course for Beauty, and the supply is not nearly equal to the demand. Metcours too are in excellent demand, but Perles are a glut and there is very little demand for them, while it appears as if more are grown than ever. A good many pale Mermets are seen, and they can not compete with Bridesmaid, while Testout excels La France in selling, but is not plentiful. Brides of first grade seem a trifle scarce.

#### SITUATIONS, WANTS, FOR SALE.

Advertisements under this head will be inserted at the rate of 10 cents a line (seven words) each insertion. Cash must accompany order. Plant advs. not admitted under this head.

**SITUATION WANTED**—By young man in flower store. Thoroughly understands plants, etc. Address Z, care American Florist, Chicago.

**SITUATION WANTED**—By a gardener and florist. First-class references. State wages offered. Single. Address J. JAGODZINSKI, 111 String St., Chicago.

**SITUATION WANTED**—In private or commercial place; have 8 years' experience; American, age 30. Good references. Address E E, care Am. Florist.

**SITUATION WANTED**—By a florist with 16 years' experience. Speaks German and English. Either private or commercial. Good references. Address M D, care American Florist, Chicago.

**SITUATION WANTED**—By florist and gardener; well experienced in all branches; age 36. Best of references. Private or commercial place. FRANK OTTO, 583 Lincoln Ave., Chicago.

**SITUATION WANTED**—By a young man of good habits; practical grower of roses, carnations, violets, decorative and bedding plants, forcing bulbs. Good recommendations. Box 686, Batavia, Ill.

**SITUATION WANTED**—As foreman; practical grower of roses, carnations, violets, decorative and bedding plants, forcing of bulbs. References English and this country. State wages. Address FLORIST, 154 La Salle Ave., Chicago.

**SITUATION WANTED**—In commercial place by young man of good habits, who has had 6 years' experience in general greenhouse work. Not afraid of work; willing and obliging. Address LA FRANCE, care American Florist, Chicago.

**WANTED**—An experienced packer in the wholesale plant department of a good sized place. Must come well recommended as to ability and good character. State wages wanted. Address X A R, care American Florist, Chicago.

**WANTED**—Partner to take commercial portion of business, in a greenhouse plant now paying large profits. \$1,500 cash capital necessary. A larger demand than the supply year round. Address H H, care American Florist, Chicago.

**FOR SALE**—\$6,500 will purchase 12,000 square feet of glass, well stocked; 1 acre of land, and 8-room dwelling, in Chicago; or will rent greenhouses. Address M. OLSEN, 66 Wabash Ave., Chicago.

## HOLLY.

On all orders given us in season, we will Guarantee arrival or no pay. We attempt no competition in price with stock which has never yet arrived, or—arrived after Xmas.

"A Case of Holly in front of the store is worth four (4) on the cars."

## Bouquet Green AND Wreathing.

WE CAN MAKE CLOSEST RATES ON THIS STOCK AT ALL TIMES.

## Catalogues Received.

P. Lambert, Trier, Germany, roses;  
 Wm. Chappelow, Monrovia, Cal., trees  
 and plants; Beney, Lamaud & Musset,  
 Lyon, France, seeds; West View Floral  
 Co., Atlanta, Ga., plants; Edouard Parre,  
 Ledeborg-Gand, Belgium, plants; Aug.  
 Rolker & Sons, New York, metal jardi-  
 nieres; Hugh Low & Co., London, whole-  
 sale plants; J. M. Thorburn & Co., New  
 York, wholesale seeds; H. Cannell & Sons,  
 Swanley, England, plants and bulbs;  
 Louis Paillet, Paris, France, plants; W.  
 & J. Birkenhead, Sale, Eng., a catalogue  
 of ferns which is worthy of something  
 more than a passing note, being beauti-  
 fully illustrated, very comprehensive and  
 as a book of reference exceedingly valuable.

ANDERSON, IND.—J. S. Stuart has pur-  
 chased ground in Avondale, at the corner  
 of Jackson and 21st streets, one mile  
 south from the old place, where he has  
 built two rose houses each 20x100, three-  
 quarter span in latest and best style of  
 construction. They will be heated by  
 steam, using natural gas for fuel. They  
 are planted with Testout, Bridesmaid,  
 Kaiserin and Perle. The plants in the  
 five large houses at the old place, which  
 he still retains, are doing finely. He has  
 recently opened a city store at 53 N.  
 Meridian street and reports trade open-  
 ing well for the season.

## The Seed Trade.

## AM. SEED TRADE ASSOCIATION.

W. ATLEE BURPEE, Philadelphia, president; A. L. DON, secretary and treasurer, 116 Chambers street, New York. Next annual meeting second Tuesday in June, (will probably be held in Toronto.)

Talk about yer bankers an' yer anti-silver cranks, Tut, there ain't no institutions like the sweet potato banks;

Log fires er boomin' in the winter night;  
Mountain tops er bloomin' all in white;  
Taters in the ashes, possum in the paw—  
Talk about yer livin', beat that if yer can.

HUSTED, O.—The Husted Floral Co. has started here with about 2,000 feet of glass.

YELLOW SPRINGS, O.—Casper Peterson has put up a house containing about 1,000 feet of glass. M. L. Carr & Sons will increase their plant next year.

SAN FRANCISCO.—The Sherwood Hall Nursery Co. announces that the business will hereafter be conducted under the title Sunset Seed and Plant Co. The management and location remain as before.

OTTAWA, ILL.—The floral display at Fred J. King's anniversary opening was exceedingly fine and drew crowds of visitors. The display included large collections of chrysanthemums, roses and decorative plants. Among the attractions was a decorated dinner table.

ROCHESTER, N. Y.—The greenhouses of White Bros. on the Thurston Road were destroyed with their contents by fire, early on the morning of Sunday, November 26. Overheated pipes are supposed to have been the cause. Loss estimated at \$10,000, pretty well covered by insurance.

## Forcing Roses.

A stock of the best varieties  
always on hand.

M. A. HUNT, Terre Haute, Ind.

ROSES.  
SOUVENIR DE LA MALMAISON

Own root plants, out door grown, \$15 per 100.

## ATTENTION!

HAVE YOU A HORSE AND WAGON, IF SO, YOU WANT OUR NEW WAGON HEATER.

It pays for itself in less than one week's time if you take into consideration the valuable time you lose in packing your flowers, also paper, string, cotton batting, etc.; and still they freeze sometimes.

We guarantee that our heater will warm a wagon box 3x8, up to 50° in the coldest weather, so that plants can be delivered without being wrapped up. It is made of Galvanized Iron, and weighs 40 pounds when boxed. It will require 1/2 gallon of kerosene per day. Price, \$10.00. Terms cash. Parties desiring it sent C. O. D. must remit enough to pay charges both ways.

**WILLIAMS & PULT,**

1624 & 1626 Broadway,

**LINGOLN I. NEFF, Florist,**

4010 Butler St., PITTSBURG, PA.

AGENT FOR HARLAN P. KELSEY.

## Buffalo.

The poorer the times the more the flower stores increase. The latest to appear will be that of Mr. James Buxton, whose store will be at the junction of Niagara and Eagle streets, a very fine location.

The outlook for society events was never so dismal as at present. Winter has come in earnest; perhaps that will help a little. Thanksgiving was a little let up to the past month's dull business. In fact it is conceded that it was a good Thanksgiving. It about cleaned up chrysanthemums for the season.

Mr. George Troup, superintendent of Forest Lawn cemetery, and Mr. M. Bloy, late with Mr. D. B. Long, have just returned from a short trip through the British Isles. Mr. Bloy reports seeing mums at the Edinboro flower show fully equal to the American standard and mostly American varieties.

Mr. James Milley has the sympathy of us all in the death of his wife, which occurred December 3. Mrs. Milley was a most estimable woman and her death will be a great blow to her family.

W. S.

## Swainsona

GALEGIFOLIA ALBA.

The beautiful pea-like blossoms of this free blooming plant are produced in racemes three to five inches long.

IT IS ESPECIALLY VALUABLE TO THE FLORIST WHO GROWS AND RETAILS HIS OWN FLOWERS.

MANN BROS., Randolph, Mass.

## CARNATIONS.

I have fourteen houses planted to carnations, and they are under my special care and supervision so that I can guarantee every cutting sent out.

If you will kindly write to me stating what varieties you want, how many of each, and when they are to be delivered, I will give you figures and think we can make a deal.

**ANNIE PIXLEY.**—This is a new pink, and one that you want to try; it is one of those beautiful light pinks, just the proper color. The stems can be cut fifteen to twenty inches long, the calyx never bursts, and it is such a strong grower and free bloomer that you can't help but make money if you plant it.

Orders will be filled in rotation, beginning now. Price per 100, \$12.00; per 1000, \$100.00. Twenty-five at 100 rate, 250 at 1000 rates.

Samples of any stock free. Terms absolutely cash with the order or C. O. D.

L. B. 496.

ALBERT M. HERR, LANCASTER, PA.

## New Yellow Coleus.

The Golden Crown is a perfect beauty.

On the lawn will do its duty:

Its color, style, and growth are fine.

'Twild make the landscape fairly shine.

Fine stock now ready, \$3.00 per dozen; (Golden Bedder we don't want you).

The Verbena of yore was a modest wee stymie.

Scarcely as large as a silver dime.

Until Henderson, the great floral artist,

Produced them as large as a silver quarter.

Still we're progressing, florists may laugh.

Gibson shows them as large as a silver half.

P. S.—We have a fair stock of the progressive seed

and will gladly supply it to all who may need.

500 seeds 50 cts.; ¼ oz. \$1.00. 500 seeds 35 cts.; ½ oz. 60 cts. Post free.

Gibson's Pansies need no praisers.

They're such beautiful, scented blazers.

500 seeds 30 cts.; ¼ oz. \$1.00; nice stocky plants 50 cts.

per 100; \$4.00 per 1000.

Drer is the Petunia king.

His elegant strains are just the thing.

Double hand hybridized, per 500 seeds 75 cts.; 1000

seeds \$1.25. Plants and rooted cuttings fints.

Fine-grown gold and silver variegated Vincas \$5.00

per 100. Snow Crest Daisies, nice young plants, flats,

\$5.00 per 100. Cash with order please.

Address J. C. GIBSON, Woodbury, N. J.

## COLEUS.

A large stock in 75 varieties, including the very newest kinds.

Rooted Cuttings in 30 to 40 varieties, at \$6.50 per 1000 by express.

" " In 20 vars at \$1.00 per 100 by mail.

Golden Bedder (true), at \$10.00 per 1000.

Verschaffeltii, Golden Verschaffeltii, Mrs. I.

D. Haight, and other yellows, at \$8.00 per 1000.

New Kinds including some of the most handsome

ever offered for sale in 10 vars, at \$2 per 100 by mail.

Stock Plants, ordinary kinds, at \$3.00 per 100.

" Verschaffeltii and yellows, at \$4.00

per 100.

Cash with Order. Safe delivery guaranteed.

Also a large and fine stock of CARNATIONS.

— Send for circular. —

W. R. SHELMIER, Avondale, Pa.

## PALMS.

150,000 of all the leading varieties.

## FERNS.

50,000 of leading varieties.

Address

GEORGE WITTBOLD,

1708 N. Halsted St., CHICAGO.

## PANSIES.

I will have good little plants right along until April 1st. The strain is good, extra good, and the price is very low, quality considered. Per 100, 75c; per 500, \$3.00, free delivery; per 1000, \$5.00, you to pay the delivery.

## GERANIUMS.

Rooted Cuttings, all first-class varieties and good bedders. Price, in mixture, \$10.00 per 1000; \$1.50 per 100. In separate colors, \$12.00 per 1000, or \$2.00 per 100. There are no medium varieties among these; all are A No. 1.

## SWEETBRIER

Received 1st Premium for "best seedling of any color" at Phila., Nov. 7, '93. Color between Daybreak and Wilder.

"I like its color better than Daybreak." EDWIN LONSDALE,

"Sweetbrier is all that can be desired." W. A. MANDA.

Rooted cuttings, \$10.00 per 100; \$80.00 per 1000. Delivery to begin February 1, '94.

## OPHELIA

Was winner of Craig Cup for best seedling at Phila., Spring of '93. Color darker than Wilder.

"That beats Edna Craig." BENJ. DUFFEE.

"It is the best flower in your houses." ROBT. CRAIG.

Price and delivery same as above. Flowers of both the above brought \$5.00 per 100 wholesale at J. R. Freeman's, Washington, last winter. Send for price list of other varieties.

EDWD. SWAYNE, Kennett Square, Pa.

### STOCK PLANTS

— OF ALL THE —

### BEST VARIETIES.

PRICES ON APPLICATION.

NATHAN SMITH & SON,

Adrian, Mich.

St. Louis.

Steady cold weather and Thanksgiving arrived about the same time, and while the latter may be looked upon for starting a good trade, the former can be credited with keeping it up. There is just about enough coming in to satisfy demands without having anything to spare while now and then some variety will be a little short. Prices have remained about the same, Beauties ranging from 5 to 25, Brides, Mermets, and Meteors 4 to 5, and smaller varieties from 3 to 4. Beauties are inclined to be in short supply, while Meteors are always short, the trouble being to get enough good flowers during the winter season to make their growing profitable. Some fine Kaiserin and Test-out are being received by W. Ellison from W. W. Coles, of Kokomo. They are classed as extras and go at once at an advanced figure. A strange thing is noted regarding Testout; the finest flowers meet with ready sale, while good medium stock cannot be given away. Carnations are in fair supply and fancy varieties average 1.50, some going as high as 2. Some extra fine Daybreak went as high as 2.50 recently.

While trade is, and promises to continue good collection are slower than at any time during the summer months.

R. F. T.

**W. C. KRICK'S**

PATENT

Florists' Letters, Etc.  
Highest award ever exhibited.

American Florist.

Baltimore.

Thanksgiving day was a delightful day in many ways, skies clear, temperature summer like, and streets dry. It may be imagined that everybody that could get out was out of doors and the demand for flowers soon left the supply out of sight. Pretty much every thing in the way of cut bloom was entirely cleaned up at good prices and it almost seemed like the beginning of better things. The demand soon let up though and by Saturday matters and things floral were at their accustomed standstill. Violets continue very scarce, but roses are coming in freely and of very good quality in the main. Roman hyacinths are making their appearance.

Mr. R. J. Halliday, who has been suffering from a prolonged attack of neuralgia of the stomach is improving.

The crape-puller, as the solicitor of orders for funeral work is called, has probably come to stay, whether the trade in general likes him or not; every few days one doing business in the city is reminded of the fact, by the complaints of customers, "Oh! That is twice as much as a man offered to make us the same piece for this morning" or, "We would have come to you for flowers, but such a man came to the door and offered them so cheap, and talked so nicely we gave him the order."

There is something repulsive in the idea of going to houses where a death has occurred and soliciting orders for flowers, to most minds, but apparently there are plenty who are not so constituted, and if the people who give the orders take no offense why should others? The only drawback to it seems to be the imminent probability that people of good taste will become disgusted, the rank and file of society will follow their lead, and "no flowers" will be a standard ending to all funeral notices, until the use of them at funerals will have passed out of mind altogether.

MACK.

THE THIRTEENTH ANNUAL REPORT of the North Carolina Horticultural Society, recently received by us, must be specially recommended for the practical nature of its contents. Its garden calendar, lists of fruits and vegetables adapted to that state, and numerous essays are all written from a business standpoint and give permanent value to the report.

When writing to any of the advertisers on this page please mention the American Florist.

NEWBURGH, N. Y.—On the evening of December 4 fire broke out in the propagating house of John Peattie's establishment on North Miller street, caused by a defective flue. Before it could be controlled damage to the extent of \$1,000 to \$1,500 was done. Partially insured.

CINCINNATI, O.—Prospects for Christmas trade are good. Roses of all kinds will be scarce in this market. There will be plenty of narcissus, Romans and valley, and a fair supply of carnations in all colors. Smilax, asparagus and ferns will be plentiful. General trade is now only fair.

ST. JOSEPH, MO.—Our first chrysanthemum show was held November 7 to 10 in the hall of the Y. M. C. A. and under the auspices of that organization. The exhibitors included the majority of the florists of the city, and the display was very creditable for a first effort. Plans are already being considered for a better show next year.

### Review of a Flower Show.

Our annual chrysanthemum shows are once more a thing of the past, their success or failure is a matter of history. Now after the heat of battle let us sit down a moment and calmly consider how far we have, by this our recent effort, profited by former experiences and what lessons have been taught us to apply in the future. We must cheerfully admit, if candid, that much can be learned yet, both in regard to management of shows as a whole and as individual participants. Many of us at the close of each successive exhibition are willing to admit that in many instances mistakes were made, and inwardly resolve to take the lesson to heart and guard against a repetition of the same errors in the future, and yet how apt we are to forget and do the same thing over again.

Of course differing conditions will have to be taken into account. Take for example the show held at Chicago this year, the peculiar circumstances which surrounded the same certainly made it unique and when we undertake to analyze it we do not wish to have it construed as a criticism. There were a number of obstacles in the way which seemed perfectly appalling. In spite of all obstacles the show opened promptly on Saturday noon as advertised and in as complete a state as most shows are at the opening hour.

It is all important that the first view of the visitor upon entering the hall of an exhibition should be an impressive one. A first impression is generally a lasting one, and we should always bear this in mind. A defect of this kind was painfully apparent on the opening day, when the rotunda of the building looked bare and empty, but the next day this defect was happily remedied by arranging a handsome group of palms for a center attraction.

Much has been said as regards decorations, some in its favor and some against it, some people holding the expense to be unnecessary and often detracting from the show itself. A great deal depends upon the rooms or hall as to what extent such decoration should be made. Let us consider the rooms or series of halls of this show. It can not be denied that a little money judiciously expended would have greatly added to the beauty of the show. The cost need not have been very great; let us say a dozen cases of southern smilax at a cost of about \$6 a case. This would have filled the bill admirably. Another point that was brought out very clearly was the necessity of groups of decorative plants to set off the chrysanthemums. A defect of this kind, very apparent on the opening day, was rectified afterwards by the disinterested efforts of some of our public spirited brother florists. No premiums for anything of this kind were offered. Can we afford to ignore this matter in the future? [Mr. B.

has overlooked the fact that had the show been held where originally intended there would have been an abundance of decorative plants to use, and therefore such premiums were deemed unnecessary in that case.—ED.]

Another very important factor of an exhibition is music. In our opinion good music adds largely to the drawing power of a show, but we must be careful as to the kind of music we furnish. A large band of brass and wind instruments is very well in its place, but is not the kind of music to enjoy at a flower show. The noise is apt to drown all attempts at conversation within a radius of several hundred feet, and is rather more annoying than pleasing. A string orchestra, in size adapted to the space, would be much better.

But now let us mingle with the throng and listen to comments made by our visitors, for we are anxious to learn what pleases the public and to what extent our efforts for the advancement of floriculture are appreciated. Turning our attention to the chrysanthemum plants first we can not fail to notice that the groups of plants grown to single stem and bloom attract the most notice. The large and showy groups of bushy plants, though striking enough in their glow of color, are carelessly passed by. While they are admired by many and are indispensable in a show, yet it will be observed that these displays receive less attention than some others. Fine standards, beautiful single specimens, all receive their share of praise, but nevertheless those little single stemmed fellows are the ones that gather the admiring crowd.

The fine display of cut chrysanthemum blooms seems to have been fully appreciated by the public. The corridors and parts of the different halls where these were staged were always crowded. Every style of bloom came in for its share of admiration. "Chappie" yonder stares in undisguised admiration at a vase of magnificent Queens and secretly resolves to possess himself by force if necessary of the largest specimen in the collection for his boutonniere, while his lady love beside him looks, alas! in vain, for the dainty little pompon of former days. It seems a pity that most all of our old friends have disappeared. We will admit that many of them have been superseded by more meritorious sorts, still others have been discarded merely for lack of size. Yes, surely it is size, texture, depth of flower and shipping qualities that in our opinion constitute a first class chrysanthemum, and yet can we afford to ignore the fact, which will be apparent to any one who will take the trouble to observe, that the public will admire many sorts and types that would not pass muster with our modern judges. Take the instance of a vase of Snowball grown in sprays, which was shown in a general display of com-

mercial cut flowers. This vase was as much admired and commented upon probably as anything in the hall; this was doubtless more pronounced from the fact of its being almost the only one of its kind.

The most striking exhibits were those magnificent vases of 50 and 100 blooms of one color in a vase, especially those where the exhibitor confined himself to one variety. The result plainly showed that the mixing of two or more varieties in a vase of this kind is unwise and should be avoided. This appeared especially noticeable where both incurved and reflexed varieties were placed together. These remarks of course apply only to those classes that call for best of any given number of blooms of a certain color.

But speaking of vases of mums we may be allowed to say a word right here about a vase arranged for effect. In this class also the best results may be obtained by choosing only one, or at least but few, varieties. But if we judge these are we not apt to lay too much stress on quality and are we right in deciding that a certain vase does not compare favorably in this respect with some other by showing some blooms grown to sprays which might not possess the same commercial value and are yet indispensable in a first class arrangement. What, let us ask, do we mean by quality anyway?

For the first time in the history of our local shows there was a very creditable display of roses. Beauties in particular were fine. There is no doubt that this feature of a chrysanthemum exhibition is appreciated by the public, which is evidenced by the attention and favorable comments the rose tables received. It is rather difficult to bring out a fine display of roses at this season of the year. The rose is not at its best, and the rose grower takes little interest, for the amount in premiums offered is insignificant as compared to the mums. If we ever wish to draw out a full display of roses we will have to offer better inducements in the shape of premiums. And what can be said of roses also may be applied to carnations. A premium of \$3 for 50 blooms is but barely the retail price of these flowers, and we can not expect that growers will tumble over each other in the attempt to get in. It is but proper that in a chrysanthemum show the mums should take first place, but nevertheless if we attempt to run our shows for a full week we will have to provide different attractions after the first two days. A competition in rose baskets, chrysanthemum baskets, or vases, is well enough and fills in between days, but these hardly possess attraction enough to make a strong drawing card. By past experiences both table and mantel decorations have pre-eminently proved to be the greatest extra cards. The mantel decorations were omitted in this show, which fact was much regretted by many of our patrons, as was evidenced by the numerous inquiries as to when the contests in this class would take place.

That dinner table day was there in great shape and proved again, as in former seasons, one of the banner days as regards attendance. The amount in premiums offered was just double that of any ever offered before in this city, and no doubt this fact brought out the large number of contestants. Most all of the tables exhibited possessed many points of merit, and yet in fully one half of the entries we observe that the lessons which were taught us in former contests were disregarded or forgotten, and the tables overcrowded. The blame is too often

laid upon the caterer who sets our table. Do not blame anybody but yourself if your table proves to be too small for your centerpiece and decorations. You ought to know that a round table nine feet in diameter is too small for twelve covers, and an oblong table three feet wide is too narrow to admit of a proper centerpiece without crowding on to the service. On the other hand we may go to the opposite extreme, and in order to have plenty of room for our display set a table large enough for eighteen or twenty people. Most of the centerpieces outside of the chrysanthemum tables, which latter were made a separate class, were low so as not to interfere with the line of vision across the table. This style seems to be the most popular, and is altogether the best suited for a table for twelve covers. Notwithstanding the fact that the table containing a tall vase of Beauties took first money a high centerpiece on a table of this kind seems to us a rather dangerous experiment. If we are aiming at an artistic effect it is bound to be a failure, for just so sure as we attempt to give a *finish* to our vase by drooping some of our flowers below the rim of the vase just so sure will we obstruct the view across the table and thus render it unfit for the purpose intended. And if we keep strictly within the lines of adaptability the result must necessarily be a very stiff arrangement unless you carry the vase so high as to appear ridiculous. When we sit at table we want to look *on* the flowers and not to crane our necks to look *up* at them. For this reason, if not on the point of effect alone, we claim that high centerpieces are least desirable. But enough of the tables. It is not our intention to criticise but only to point out some mistakes which might be avoided by a little timely thought.

Outside of these special attractions, if we may be allowed to call them such, there are others of much merit and interest to the visitor that are not to be overlooked in a flower show. We noticed two very fine displays of a general assortment of commercial varieties of cut blooms which received, as they well deserved, a great deal of favorable notice. These displays were not for competition, but we have no doubt that the enterprising men who put them up will be amply repaid for their expense and trouble by an increased business. Exhibits of this kind should be encouraged.

But don't let us forget the so-called amateur. One of the finest groups in the hall was that of Mr. Uihlein, of Chicago. This excellent exhibit, beautifully arranged and meritorious throughout, was admired by all, and let us hope he may find many imitators in the future.

And now, after the show is over and we are settling up our affairs, let us paste these few memorandums in our hat, for past experience has proved them to be very important. If we intend giving a show next fall let us issue our schedule not later than January next. Let us be very careful that the wording of our schedule is very explicit, and not to omit any important features. Let us make it plain, for instance, what we mean by a 24 inch basket, and try if we can to define the meaning of the word basket. Let us try to secure a suitable place for holding our exhibition in good season, and don't let us forget to arrange for proper means to decorate the same. If we contract for any goods or material let us have an understanding what the cost is to be. If we engage any help let it be thoroughly understood what each man's duties are to be and what compensation he or she

is to receive for services thus rendered, and let the proper committee be responsible for the same. Don't expect one or two men to stand the whole burden of the show. To assure prompt action make your committees small. A "one man power" is preferable to an unwieldy body. B.

#### Chrysanthemum Basket.

We present in this issue front and back views of Mr. Hauswirth's winning basket of chrysanthemums at the Chicago show. The flowers used were superb specimens of the new yellow variety Eugene Dailledouze, and the arrangement was such as to convey the impression that the flowers were falling out of the basket, the idea being very cleverly carried out. *Adiantum Farleyense*, *Asparagus plumosus* and croton leaves were used for "other foliage." The croton leaves were an exceedingly effective addition, combining admirably with the chrysanthemums. The engravings do not come anywhere near doing justice to the basket, which was strikingly beautiful.

Carnation Notes.

Now is the time to take particular account of your carnations and see which are paying, which are not and where you have made any mistakes that can be rectified another season. This is the time you want fine flowers and lots of them. Christmas and Easter are the two times in a year that the grower can make a few dollars for himself, and if a carnation is no good for those two seasons it is no good at all.

There are some varieties that are very late in coming into bloom, not giving any flowers until the middle of January or February. It is certainly poor policy to take up valuable space for such sorts. There are others that come in crops and often unless handled properly will be off cropping during the holidays; now these croppers, if you can get the crop at the right time, are very prolific and about as good pay as the majority. If you have missed it this season, study up where the mistake is and get there next time. The best of them all are those that start in early and bloom until late in a continuous crop; such varieties should now be in the best of health and full of buds.

A very good thing to do is to start in about the 15th of this month and keep an accurate account of the number you cut from each variety separately; do this daily until about the tenth of January and you will be able to see what is paying and what is not, and more than likely you will keep up the account system the season through. It pays more per minute than anything else you can do around a carnation establishment.

If you are consigning to a commission house make out a memorandum of each shipment as per following copy. It will make them a little extra work, but if they do not take enough interest in your welfare to do this much for you between the dates named about the best thing you can do is to drop them and deal with people who are willing to do what they can for their consignors.

FRONT VIEW OF FIRST PRIZE BASKET OF CHRYSANTHEMUMS AT THE CHICAGO SHOW, ARRANGED BY P. J. HAUSWIRTH.

This is the style of memoranda to put in with the flowers:

|                    |                  |  |
|--------------------|------------------|--|
| 400 Daybreak.      |                  |  |
| 1000 long McGowan. |                  |  |
| 300 short McGowan. | Albert M. Herr,  |  |
| 600 Fred Dorner.   | Nov. 20, 1893.   |  |
| 300 Grace Darling. | Train 2:15 p. m. |  |

Have your commission man make his returns as follows:

|                            |                         |
|----------------------------|-------------------------|
| 400 Daybreak at .02        | — \$ 8.00               |
| 1000 long McGowan at .01   | — 10.00                 |
| 300 short McGowan at .0075 | — 2.25 Albert M. Herr,  |
| 600 Fred Dorner at .02     | — 12.00 Nov. 20, 1893.  |
| 300 Grace Darling at .01   | — 3.00 Train 2:15 p. m. |
| 2600 Carnations            |                         |

\$35.25, less Com. \$29.97

Carefully file these memoranda and returns and before you begin laying in stock for next season look them over carefully and you will find some that you want to drop out; there is nothing so convincing as to have down in black and white the amount in dollars and cents a certain variety is worth to you. There are too many good varieties on the market for us to take up our room and waste our time on anything that is not up to the mark in every respect, and it is impossible for us to take anyone's word as to what is a good one and what is not, for what is good with one grower may be

comparatively worthless with another. Of course there are some sorts that are worthless almost everywhere, but when we get among fairly good ones it is only by experiment that we can tell which are the ones for us to handle.

ALBERT M. HERR.

#### Carnation Rust.

Questions are asked through the mails and otherwise for a quick and effective remedy for this trouble. It is not easy to suggest one that will effect a cure, because when a plant is observed to be rusted it is too far gone to be cured. It therefore follows that preventive measures may be the ones to be resorted to in the first place. Every precaution should be taken to keep the rust entirely off of the place. If the grower has clean plants, those that are entirely free from the rust, and propagates from them, the only opportunity there is for the advent of the rust is either by the spores coming from infested plants grown by neighbors or elsewhere. Those spores are minute, invisible and may come on the wings of the wind. One should be very careful in the purchase of plants from other growers. As far as

practicable he ought to be satisfied that the plants do not have within them the germs of the rust disease.

You see from the above that the rust may come of its own accord. Its sudden appearance in a greenhouse does not necessarily mean that it came with plants that have been recently purchased, particularly if it appears upon old plants and no signs of it are upon those recently introduced. If on the other hand the new plants show quite uniformly the rust and the old do not, the conclusion is a natural one that the new plants have brought the disease with them.

It is possible to treat the plants so that the spread of the rust disease may be to some degree checked. This comes from the fact that the spores may be destroyed by a fungicide, either in the place where they are produced in great quantities on the surface of the infested plants or upon the surface of the healthy plants, where they have been carried by wind or water or other agencies. Therefore there is hope in the use of a mixture like the Bordeaux or the ammoniacal solution of carbonate of copper.

Several conditions of things may be supposed for the present purpose. In the

first place a large carnation house with but a single plant infested with the rust—in such an instance it would seem best to first speedily remove that rusted plant. It may have given off multitudes of spores before the disease was noticed, and a thorough spraying of the house with the Bordeaux mixture will be quite apt to prevent the germination and further development of the rust in the healthy plants. Again we may suppose that there are a hundred plants affected with the rust; the same rule should hold good here, providing these plants are badly infested. Or, it is possible that a plant may have recently become diseased, and it has developed rapidly in some one leaf or portion of the plant. Should this be so it might be wise to simply remove the rusted portions, cutting well below where the rust has appeared, also spraying the whole house with the fungicide. If the rust is within the house it would seem wise not to propagate from any plants in that house, or otherwise the disease will be apt to go with the cuttings and appear possibly in worse forms in the new plants made thereby.

It goes without saying, particularly to the carnation growers who have had any experience with this disease, that the genuine rust of the carnation is a serious malady and must be met with heroic treatment, not left to increase in force.

BYRON D. HALSTED.

#### Chester County (Pa.) Notes.

Carnations are a little late all through this section this year. As a rule the plants are looking good and the "spot" is being kept well in check. Most of the growers are deep in the seedling craze, which if it does not result in much profit certainly furnishes lots of fun. The average result from seed shows a remarkable advance over that of recent years. One grower has a bench of 600 seedlings out of which but one single flowered variety has appeared. A noticeable fact is the very small proportion of whites and crimsons among them.

Cæsar still continues to be the favorite maternal parent with the Chester county hybridizers. The sovereign remedy advanced for defects or weakness in any variety is "cross it with Cæsar." The great desideratum appears still to be a yellow that will beat Buttercup, but it does not yet appear. The variety Golden Gate has proved to be very prolific in yellow progeny.

W. R. Shelmire has a distinct and very promising variety which might be classed as a picotee. It is pale yellow with a narrow but well defined pink edging to all the petals. Lamborn is regarded here as well as generally throughout this section the best white. Edelweiss, which is a white sport from Chester Pride, is also doing well. Mr. Shelmire states that he has seen no sign of rust this season excepting on a few seedlings, which were immediately burned.

Mrs. Starr's is still the "home of the Buttercup." One of the most satisfactory whites here is Louis J. Haettel, and the best crimson is J. R. Freeman. Perhaps the best appearing dark crimson in the county is Black Beauty at Isaac Larkin's. It is a seedling of Mr. Larkin's sent out last season.

Edward Swayne can scarcely eat or sleep all for love of his two new pink varieties, Sweetbrier and Ophelia. They are selling well in the Philadelphia market and will be popular. Mr. Swayne has been unable to do anything with Marie Louise violet for several years.

This season he has put in Lady Campbell and it is doing splendidly, showing not the slightest trace of disease.

Wm. Swayne has a house of Lizzie McGowan which would be hard to beat. Thos. Cartledge is also very handsome here. For fumigating Mr. Swayne states that he uses the sweepings from a snuff mill, which he finds much more effectual every way than tobacco stems.

C. J. Pennock is in poor health and confined to his house at present. The many friends of the genial secretary of the Carnation Society will all wish him a speedy recovery. His houses are in the pink of condition. Among the seedlings are some that will make a mark if they show up as well on the second year as the first. One bright scarlet looks as though it might be the long sought large flowered Portia. Sweet peas are just showing bud at Mr. Pennock's.

Chambers Bros. and J. H. Ladley are more or less involved in the seedling business. Mr. Ladley has several which give good promise for the future. Up to the present time it has been a very difficult matter to tell the Chambers brothers apart. But three weeks ago Joe got married, and he already begins to wear a different look and can now be readily identified.

#### Lady Emma and Portia.

I agree with Mr. Lonsdale regarding the above carnations. We used to grow Lady Emma about eight years ago and I believe today it was the best red carnation we had up to date, when in a healthy condition. A free bloomer, bright color, large flower and all long stems. But we could not keep the disease from it then. May be we could now. Two years ago I saw Lady Emma advertised in the *FLORIST* by a New Jersey firm and I ordered 200 rooted cuttings. But when the plants came to maturity I could see no difference between them and my Portias. I wrote the firm about it and they replied that if I would attend the Pittsburgh convention of the Carnation Society they would show me the difference between their Lady Emma and Portia, but I did not attend the convention. I am very glad that Mr. Lonsdale has brought the matter before the trade for discussion.

A. SCHMITT.

Glennville, O.

[We had our first glimpse of Lady Emma about 10 years ago in Gordon Park, but a short distance from Mr. Schmitt's establishment. A bed about ten feet in diameter had been planted with this variety and it was a splendid sight, one that we have never forgotten. We examined these plants with much interest and both plants and flowers were quite distinct from the variety Portia, with which we have since become familiar. Mr. Schmitt probably secured his stock from the above or from the same source. The recollection of the bed above noted calls to mind the fact that the possibilities of the carnation as a bedding plant have been sadly overlooked. If florists would plant such beds of carnations (one variety in a bed) where they could be seen by customers, orders in abundance would surely follow.—Ed.]

WHEN SENDING US newspapers containing items you wish us to note please do not fail to distinctly mark the item so it can be easily found, as we can not spare the time to hunt through the mass of papers sent us for unmarked items.

#### Registering Names.

The registration of the names of the new chrysanthemums to prevent their being duplicated and thus obviate confusion, which would likely occur, is of too great importance to be neglected. We have a very extended list now in use and this is being so rapidly increased each year that any neglect on the part of the disseminators in this matter will soon bring about a state of chaos.

The following names have been registered since the August meeting of the Chrysanthemum Society of America: Esther Cleveland, Erato, Hiawatha, Eureka, Brick Top, Polyphemus, Monte Vista, Cascade, Nisus, Endymion, Orange Judd, Minnehaha, Proserpine, J. J. B. Hatfield, Mrs. E. H. Hunt, Clinton Chalfant, Mrs. E. G. Hill, Eugene Dailedouze, Challenge, Inter-Ocean, Beau Ideal, Major Bonnaffon, Oriana, Laredo, Pompadour, Miss Hattie Bailey, Iora, Nyanza, Ursino and Durango.

I notice some of the seedlings have been shown under names which if adhered to will be duplicates. I merely allude to this to impress upon those who are interested in their pets the importance of early registration, thereby avoiding any complications. ELMER D. SMITH, Sec'y National Chrysanthemum Society of America, Adrian, Mich.

#### Seedling Chrysanthemums and Exhibitions.

The question arises, how are we to sift out the chaff and get at the golden grain? How are we to know which are desirable additions, and which are either almost duplicates of existing varieties or inferior to those already in commerce? If the truth respecting the new comers is to be arrived at, then we will have of necessity to change our present methods and raise our class schedules. Personally the writer does not think the task a difficult one, and believing this, the following is offered for consideration:

Let the judging be done under the auspices of the National Chrysanthemum Society of America, or if thought advisable, let the different florists' clubs appoint delegates to decide the manner, time and place, when, how and where the seedlings shall be judged. We never can arrive at definite conclusions as to the merit of new chrysanthemums until a system is devised whereby they can all be brought together and judged relatively. If, say seedlings are exhibited at Boston and Indianapolis and not shown at some central place, it is simply impossible to tell which is best; if, say some central place, as Buffalo or Pittsburgh, were selected then it would be possible to gather all together and have a competitive examination that ought to result in great good to all interested in the future of the chrysanthemum. It would seem as if the show or city securing such an exhibit could well afford to provide a portion of the premiums or other expenses incident to the contest in view of the additional interest

BACK VIEW OF FIRST PRIZE BASKET OF CHRYSANTHEMUMS AT THE CHICAGO SHOW, ARRANGED BY P. J. HAUSWIRTH.

accruing to the exhibit where the national contest occurs. There would be but little trouble in providing the necessary funds, as several gentlemen interested in the chrysanthemum have signified a willingness to contribute if some such thorough and general contest could be had. It might be advisable to exact of the competitor a sum for each variety listed or entered for competition; this would have the effect of keeping out rubbish and would furnish funds to cover a portion, if not all, of the premiums. It might be necessary to have two dates for such a contest, one for the earlier varieties and one for the late sorts. The art of packing is so thoroughly understood now that blooms shipped to the seaboard cities would carry well, and vice versa from east to the west. Then let the club or exhibition committee offering the best inducements have the honor of the exhibit. But of over one hundred varieties introduced last year—and last year was an exceptional year for high class seedlings—how many stood the test? Cer-

tainly not more than fifteen or sixteen. We might mention the three whites, The Queen, Niveus, W. G. Newett; and Mrs. Craige Lippincott, Brydon, Jr., Mrs. F. L. Ames and Henry Sunderbruch among yellows; Pres. Smith, Maud Dean and W. N. Rudd, pinks; Rob't McInnes and Andes in the bronze section, with Mrs. J. W. Crouch, Louise Sievers, Joey Hill and Mabel Simpkins in the miscellaneous colors and classes. Undoubtedly the two varieties exhibiting the greatest advance were respectively The Queen and Robt. McInnes. The first is an ideal white, the last the very perfection of a high class bronze. What then was the use of the 80 and odd varieties which do not measure up? To find this out at the expense of the purchaser is wrong in principle and will tend to bring into ill repute all new varieties.

There should be classes for commercial varieties, i. e., those that come nearest the ideal of what the retail florist wishes for selling over the counter. This class scarcely goes outside of the white, yellow

and so-called pink for a variety; perhaps a crimson might be considered.

Exhibition varieties for making grand displays at the shows—those are necessary now and should have a class by themselves. To be sure commercial varieties will also do for this section, but often a large, fine, distinct flower would be voted nil because the color did not come up to commercial requirements.

A class should also be made for the incurving Chinese type and it would be well if this class were given more attention in this country on account of their symmetry and usual fine finish and form. What chance does a finely formed seedling of the Mrs. Rob't Craig or Madeira type stand against their larger rivals the Japanese.

The chrysanthemum has come to stay; exhibitions are an assured fact; let us do our utmost to place not only the flower, but the exhibitions, on the highest plane possible. The rose men will have to kick; it will do no good; the chrysanthemum has paved the way for exploiting, not

only her own charms, but has furnished audiences for the rose, carnation and orchid. Personally I have greater interests in the rose and carnation than I have in the chrysanthemum, but I trust I have more sense than to give way to the senseless talk about downing the chrysanthemum. Such talk only shows a man's one sidedness and is all bosh. If the rose men want to give great rose exhibitions and entertain and interest the people, why, I am with them, but to attempt to dethrone the chrysanthemum and minimize her influence and charms in order to exalt the rose, then I say no!

The chrysanthemum has an organization to look after its particular interests, the carnation enthusiasts have a well equipped society, but the rose, the dearest, sweetest, most beautiful of all flowers, has not an organized society to watch over and care for her interest; until such time and until exhibitions are held in her honor let no one talk about doing away with the chrysanthemum. The rose has made a thousand times more money for its votaries and growers and yet there is not zeal or interest enough manifest to protect her queenly being. E. G. H.

#### Good Gracious! Princess?

As a rule I am careful not to make any statement that is not the result of my personal observation and experience. Here is my detailed experience as to the two chrysanthemums in question.

Grown to single stem Princess of Chrysanthemums with me always has a crook neck, with the flower produced side ways and a less decided flesh tint than Good Gracions. The flower is rather more compactly incurved. These are certainly points of difference and well marked as grown side by side. The only exception to the above was one that sported to white, which had a less formal arrangement of petals, flower erect, the stem being stiff in the neck. I have retained it to try another season. "Sports" have to be well tested before claims can be entered for individual merit.

Good Gracions under the same conditions *always* has a stiff stem, flower erect, much more loosely incurved and the longer, lower petals reflexing to the stem. This the Princess does not do according to my experience. Good Gracions is a good seller over the counter, bringing as much again as most of the other sorts, while Princess did not take at all on account of "curvature of the spine." I do not believe the case in point is as V. H. Hallock versus Dawn.

GROVE P. RAWSON.

#### Insects on Chrysanthemums.

ED. AM. FLORIST:—The insects mentioned in the letter of Mr. Waldie were not found on the plant. The package contained some chrysanthemum leaves which appeared as though damaged by the red spider. The box was crushed and if there were any active insects in it they probably escaped on the journey. It is impossible from Mr. Waldie's description to surmise the species. If he will send other specimens it will give me pleasure to examine them and report.

C. V. RILEY, Entomologist.  
Washington.

[Will Mr. Waldie please send new specimens direct to Prof. C. V. Riley, Washington, D. C., packing as carefully as possible.—ED.]

#### Miscellaneous Seasonable Hints.

Don't delay in getting some good strains of cyclamen and sow about New Years. Plants from these seeds, if kept growing right along as they should be and not starved for want of root room, will make fine plants for a 5 or 6-inch pot the following winter. The type known as *C. persicum grandiflorum* is much better than *C. p. giganteum*. Cover the seeds one-eighth of an inch with light soil and place in a temperature of 60°. There is as good a demand for a good pot of cyclamen this winter as ever. They are always a good house plant.

If you grow a few orchids, as I do, as soon as well open move such sorts as *Cattleya Trianae* and *Lælia autumnalis* into a cooler house and they will last much longer. You can keep *Cypripedium* insigne a long time in a cool, shady house. If your *Dendrobium Wardianum* and noble have ripened their bulbs as they should and are resting in a cool house, don't leave them all to come in at the same time. Bring a few at a time into a night temperature of 60° or 65° and you will have a succession of flowers.

Don't delay now (as severe weather is here) to cover your beds of tulips, narcissus, etc., with two or three inches of long stable manure, and a little extra on the Roman hyacinths. If the earth on the beds is frozen an inch or two, so much the better; it stops the tulips from shooting up 5 or 6 inches long before they are brought in to force, which they are likely to do if kept too warm, and then when forced they have an awkward "flop" on them.

Before the end of the month bring in a large lot of the leading tulips and Von Sion narcissus, for at that time they force well and the demand from the middle to end of January is at its best.

Don't keep your freesias in too warm a house. A good light bench and a night temperature of 45° will flower them finely, and in these conditions the flower will be well above the foliage.

If you do a general business it is most likely that at this date all hands and the cook will be busy with Christmas greens, holly, etc., and the shifting of plants and other greenhouse operations will be temporarily suspended; but it isn't too soon to think about shifting your earliest struck geraniums from 2 to 3-inch pots. The plants will need to bespread to make good sturdy growth and they might as well have the benefit of the larger pot. There is always some stock disposed of at the holidays, which gives you the necessary room to spread out such young stock as geraniums. Don't let one man do this potting alone. It breaks him up to have to stop potting and carry away a flat of plants. Let two men stand and do the shifting and give them a good lad to do the running. I am sure with this team you will get as much done as four men would do in the same time with every man acting as his own boy.

As soon as poinsettias are cut and sold put the plants away in a warm dry shed, or better, under a dry bench, and they won't trouble you any more until the first of April.

That very fine yellow midwinter plant, *Linum trigynum*, is in some places rather early for Christmas. Its flowers hang on about one week. Keep it cool and the flowers will be all the better, and it needs plenty of sharp syringing when not in flower to keep down red spider. This pretty plant is not yet generally grown, but it sells well. It will propagate any time you can get good young growths.

After flowering cut back and the young breaks can be propagated. Plant out of doors end of May and lift in September. During its summer growth it needs plenty of pinching to keep it symmetrical. It lifts well if kept shaded for a few days and syringed. Wm. Scott.

Buffalo, Dec. 11.

#### Philadelphia.

The December meeting of the Florists' Club Tuesday evening, Dec. 5, while not largely attended, owing to very disagreeable weather, proved very interesting to those present. Edwin Lonsdale graced the chair for the first time, assuming his duties as president.

After the regular business of the meeting was transacted, there being no essay ready, President Lonsdale was called on and gave an account of his western trip. He said that he was much pleased and surprised with what he saw. There were many features of the show that were new to him and he thought some of them should be introduced in the eastern exhibitions. One was that there was something for the judges to do every day, some new exhibits to be judged; this served to keep up the interest and gave the reporters something to talk about. Another was that a committee was on hand whose business it was to remove all faded flowers so that at all times the exhibits presented a bright, fresh appearance. He said that in this respect he had never seen flowers of all kinds keep like they did at that show; carnations, roses and other like perishable flowers, which are rarely presentable after the first day at our show, looked fairly well after two or even three days and some remained the full week and were even then in a presentable condition. He attributed this to the fact that there was no gas nor ever had been any in the building; that the lighting was all done by electricity and that the exhibits were not in one large room, but in a number of smaller ones and were not so affected by draughts.

While the chrysanthemum plants exhibited did not amount to much and were not as good as found in eastern shows, the cut blooms were as fine as any he had seen anywhere, if not better. He particularly praised Inter Ocean, Major Bonaffon, The Queen and Eugene Daille-douze. He said the special features, such as the vases arranged for effect, the decorated dinner tables, etc., were very fine, and showed that our western brethren were fully up to the times.

A letter from Mr. C. B. Whitnall of Milwaukee was read by Robert Kitt; it was in reference to the Wisconsin Flower Exchange, asking co-operation with Philadelphia brethren for their joint benefit. There was considerable discussion and everybody thought it would be lovely, but as such expressions about the market project are always to be heard every time it is broached, there was nothing new elicited. Mr. Lonsdale said that he was in the Wisconsin Exchange and that it seemed to be in a very flourishing condition and was giving a great benefit to the trade. He also spoke of the Chicago exchange, which he believed had recently declared a dividend. Mr. Watson spoke of being in Boston a short time ago, and said that the exchange there, although only having enjoyed a short existence, had just declared a dividend of 40%.

It seems singular that the growers of Philadelphia, who are so alive to the best interests of the business in all that pertains to the production of good stock, should be so blind in this respect; when will the scales fall from their eyes?

There was also a discussion as to the best fuel, and the consensus of opinion seemed to give preference to pea or buck-wheat grades of coal.

The entertainment and other matters concerning the meeting of the National Society next summer were discussed and the January meeting is to be given over to this subject.

Business has been good the past week, with a fair demand for choice flowers. Prices are better, \$3 now being asked for all the small teas, while 6 to 8 is the price for the larger varieties, with a few Kaisers at 10. Beauties and Belles are in good demand at from 20 to 30. There are from 25 to 50 per cent more of these roses about than last year, but at times the demand is greater than the supply, and this in the face of the "industrial depression."

John Burton stole a march on the boys and sent in some very nice Brunners on the 5th; for the season of the year they are very fine stock. He is also cutting some extra fine carnations from plants that were grown on the benches inside all summer. His Grace Battles are the best pink carnations seen in this market for a long time, and we question if such stock has been equalled here before.

Mr. Lonsdale is sending in some No. 1 stock of his new carnation Helen Keller; they are grand flowers and attract attention wherever shown; it is as large a bloom as any we have seen and has a particularly short calyx, which enables the flower to fully expand; the stem is very stout and strong.

Mr. Harris has a gem in his new seedling chrysanthemum which he has named Mrs. Thos. Cartledge. It was not ready to cut until December 6, so it will help to extend the season. The flower is simply perfect, being the purest white, and in shape and size an almost exact reproduction of his yellow variety Eva Hoyt. Such a flower will never go begging for want of customers.

The Brown bowling team was knocked to smithereens last Thursday night. Kennedy of the Crawford team made an average of 195 in three games and G. Craig of same team an average of 181. W. J. Baker and C. Longinette are to captain two teams in the next match. Charlie is a champion rooster and when he lifts up both hands and lets his melodious voice out he can be heard something over a mile; it won't be his fault if his team doesn't win. K.

#### New York.

The Florist Club had a very interesting meeting on Monday evening at the pleasant headquarters in the Industrial Building.

Mr. Keller read his final report as chairman of the exhibition committee. He said that the results of the recent chrysanthemum show demonstrated that the Industrial Building was a good place for such shows, and predicted increasing patronage by the public in the future. In reviewing the exhibits and premiums he asserted that the displays of cut flowers had not been excelled anywhere and alluded to the difficulty in producing seedlings superior to the grand kinds now existing. The competitions in decorative work had been all that could be desired in quality, if not in quantity. He extended the thanks of the committee to Mr. Mestaniz and his associates for their liberality, to the judges for the conscientious manner in which they performed their duties, to the exhibitors for their punctuality in staging and to the donors of special premiums.

The committee on annual dinner announced that the dinner would take place on January 6 at the Arena at 6:30 p. m.

After listening to the report of the committee appointed to confer with the Madison Square Garden Co. regarding unsettled claims held by the club against that company, the club voted that the committee use any means in their power to collect the amount regarded as due the club.

The election of officers was then proceeded with and all the nominees unanimously elected as follows: P. O'Mara, Pres.; Ernst Asmus, Vice-Pres.; John Young, Sec'y; C. B. Weathered, Treas.; John Morris, chairman trustees.

It was also voted that the secretary be allowed a salary for his services.

Mr. Mestaniz being called upon outlined a proposed plan for a grand roof garden and palm house which is to be constructed upon the roof of the Industrial Building, and asking the co-operation and assistance of the club. The contemplated improvement will cost about one hundred thousand dollars and will give stage and restaurant accommodations sufficient to entertain many thousand people at a time. After a free discussion Messrs. Julius Roehrs, Weathered, McCrowe, Forsterman and May were appointed a committee to confer with the management and report at the next meeting.

Among those present were Secretary Farson of the Pennsylvania Horticultural Society and Benj. Grey of Boston, both of whom being called upon made neat little speeches. Mr. Farson was in his accustomed merry mood and kept his audience in a fit of laughter, as usual.

After adjournment the club visited the World's Fair exhibition which is in progress in the building, by invitation of the management.

Julius Roehrs has been informed that he had been awarded a silver medal for specimen chrysanthemum blooms at Hamburg, Germany, which he had sent over in care of Mr. Snyderhelm.

Some New York florists are, and there are some who profess to be, as good judges of trotting stock as they are of roses and chrysanthemums, and any claims on behalf of a piece of horseflesh by its owner are sure to be promptly met by rivals who are prepared to dispute these claims and back up their own to the extent of risking a few dollars or a good dinner on the result of a test. Others of the fraternity who happen to be present when such controversies occur can always be called upon to incite and encourage a trial of conclusions, the privilege of "holding the stakes" and being counted in on the dinner being a sufficient inducement. This explains how it came about that Mr. A. J. Vreeland of Jersey City and Mr. Wm. Traendly of New York, the former possessed of an uncertain looking little grey and an unlimited stock of bravado, the latter behind a sleek brown, and a party of half a dozen of the boys in rigs of more or less pretentious appearance were all gathered together at a hotel on the outskirts of the town one recent afternoon. Suffice it to say that the race came off in regulation style and Mr. Vreeland was very badly left, the unanimous verdict being that this gentleman was a splendid judge of some things, but not of horses. The dinner was a good one, and the boys are watching for another such lucky chance.

Much dissatisfaction is expressed in retail flower circles over the edict of the manager of the Metropolitan Opera House prohibiting the passing of flowers

in any form over the footlights at the performances.

#### Chicago.

Mr. Edgar Sanders has been confined to his home for some time with a very serious attack of inflammation of the bowels. His life was at one time considered in danger, but at last report he was improving though still confined to his bed.

Trade is a little quieter this week, many of the retailers complaining of the prevailing dullness. Shipping orders, however, are up to the average. A moderate quantity of Christmas orders are already placed, but many buyers outside are inclined to be cautious, and are holding off until they know something of the prices likely to prevail. It is not expected, however, that very high prices will rule, though they will no doubt advance in another week. There is sure to be a better supply of carnations, for example, than there was last year, but these flowers are not very plentiful just now, good colored ones especially being quite scarce, and prices continue good. Beauties are scarce, and first quality stays at \$3 a dozen. Some extra fine Meteors are in; they sell sooner than any other red rose, and stay at \$6 to \$7 per hundred. Testout are bought quickly, but few are coming in; they and La France are worth \$6. Albany brings the same, and is good. Mermet is often pale and ranks below Bridesmaid. Light colored roses, as a whole, sell very slowly, particularly Perle, which continues to be a glut. So far throughout this season Perle has been one of the poorest selling roses sent in, though most of this variety now in the market are of excellent quality.

Violets are still scarce and keep at \$1.50 to \$2 for the best. The supply is far below the demand; it is one of the best selling flowers sent in. Good valley holds up to \$5, but there is quite a lot sold for \$4. Romans continue a glut, and as some of the growers are trying to hold their crops back for the holidays it is likely to be very plentiful then. Harrisii and callas continue to improve. There is any quantity of smilax to be had, and nobody wants it; it seems as if people won't use it at all. Asparagus is selling more freely this season than any previous time.

Orders for Christmas greens are reported as brisk, though holly and mistletoe are not seen around yet. Laurel wreaths are being sold for cemetery work and since the advent of frost has given a bronze tint to the galax leaves they go better, being fine for cemetery work.

Mr. H. Weber, Oakland, Md., was in town this week.

Herman Matti has leased a place at Rogers Park, Ill., and will grow cut flowers for the Chicago market.

Alfred Dimmock, of St. Albans, England, is in Chicago attending to the removal of the F. Sander & Co. exhibit at the World's Fair.

Quite a little comment has been caused by the appearance of a flower counter in one of our high class dry goods stores. It is under the charge of a Greek, but it looks as if the store was interested in it, as we see the sign "Flowers delivered to any part of the city." They were selling all sorts of roses except Beauties at 25 cents a dozen.

#### St. Louis.

Trade still continues fair. The warmer weather prevailing has slackened up the demand somewhat, it not being quite as good as last week. It may still be looked

upon as somewhat spasmodical, the principal work being funeral orders. The prospects for Christmas trade are good, although it is doubtful whether anything like prices prevailing during the past two seasons can be realized.

The first series of games between the three teams composing the bowling club was finished on the 6th. Team No. 1, consisting of J. J. Bencke, C. A. Kuehn, E. Schray, John Young, C. Roeper and C. C. Sanders, takes first place with an average of 1,026 pins per game. Teams No. 3 and 2 take second and third place with averages of 977 and 969 pins per game. No. 1's victory is due more to the fact that its members are regular attenders rather than better bowlers, as both the other teams have been handicapped by having to accept 100 pins per game several times owing to members not being present. The medal for highest individual score goes to Will Young with a score of 277, and for highest average to C. A. Kuehn, whose average is 187 pins for 12 games. There will be a slight change in the teams for the coming series owing to the substitutes being put on the teams permanently in place of members who can not attend regularly, and much improvement is expected during the next series.

The greenhouses of Thos. E. Carroll, located just west of the city, were damaged by fire on the night of December 1, resulting it is supposed from an overheated flue. They caught at the end of the houses and before the fire was extinguished it had consumed about ten feet of the end. The houses are connected, having no partition walls, and all the stock was damaged to some extent, mostly by smoke. The loss will be considerable as it caught some Christmas stock. A bench of *Adiantum* 100 feet long and just ready to cut had the fronds all ruined; the plants are alive, however, and are starting to break up again. Some *Smilax* and carnations were also destroyed by smoke, while a fine bench of *Daybreak* was frozen before repairs could be made.

At the upper ends of the houses where the damage was not so marked he is cutting some fine *Fred Dorners* and *Mme. Albertini*; these are classed as about the best of their colors. *Daybreak* also was in fine shape, and these three varieties will be planted heavily next season. *Tidal Wave* was in good shape, but Mr. Carroll thinks its time is about past. *Fred Creighton* is being tested, and from its behavior so far is very much liked. All the stock here is looking clean and healthy and shows where most of the winning carnations at the St. Louis show came from.

There have been several new stores opened recently, the latest being one called *Elleard's* and located on Olive street, between 5th and 6th.

Alex. Waldbart, who has been confined to the house for some time past owing to severe illness, is reported to be improving slowly. R. F. T.

Boston.

The Co-operative Growers' Association appears to be prospering. The headquarters on Park street is a very lively place from 6 to 8 o'clock in the morning. Few people had any conception of the number of small growers bringing flowers to the city daily until this common meeting place furnished the opportunity of seeing them all together. There being no restrictions in the association to the contrary many of the members still make

regular calls at the retail stores and supply them in the old fashioned way, so "peddling" is by no means out of date yet. The small buyers from suburban towns and the street fakirs are both good customers at the exchange. These latter gentry are a mighty shrewd set and are quick to take full advantage of every opportunity that can be turned to account. Formerly the doors of the market were closed regularly at 8 a. m. Recently it has been decided to keep the place open all day, goods unsold at a certain hour being left in charge of Mr. John Walsh, the manager, for disposition during the day. This plan had not been long in operation before the fakirs ceased to be buyers in the early morning, and it soon became evident that they were acting in concert with the object of making better bargains on accumulated stock later in the day.

A company has been formed in Boston for the purpose of transplanting large trees. Improved machinery for the prosecution of this work successfully is controlled by the company, and it is claimed that trees with from six to twenty inches of trunk diameter can be transplanted without risk at almost any season of the year.

Toronto.

Trade during the last week has improved remarkably both in cut stuff and plants. Two or three florists report good sales of palms. *Chrysanthemums* are still to be seen in every store, but their day is over and their glory is a thing of the past. People are beginning to get into a Christmas state of mind now and are more inclined to open their hearts and loosen their purse strings.

The seedling *chrysanthemum* (No. 101) exhibited at the late show here by Mr. Ewald A. Suder, of Toledo, O., which was awarded a certificate of merit and the cup for the best seedling shown, has been named "Nemo." The stock has been purchased by Messrs. Nathan Smith & Son, Adrian, Mich., who will disseminate it. Seedling No. 231, exhibited by Messrs. Pitcher & Manda, also awarded a certificate of merit, has with their kind permission been named "Mrs. A. H. Ewing." Both these seedlings are very fine and will be heard from again next year.

The certificates of merit awarded for seedling *chrysanthemums* and carnations were sent to the respective winners of them this week. They are very prettily gotten up and will look well framed and hung up in offices.

Thanks, "W. S.," of Buffalo, for your complimentary note in *FLORIST*, page 396. The Toronto boys thoroughly appreciate it and the source from whence it comes.

The next meeting of the Gardeners' and Florists' Association will be that set for nomination and election of officers. It does not give the prophets a chance at all now that these two operations are performed the same night; canvassing for votes is a thing of the past and the future rulers of the destinies of the association remain in comparative obscurity until proclaimed by the voice of the ballot.

Although sundry malcontents have held two meetings (it is not likely they can get a quorum for the third) the association is morally stronger than ever at the present time; it has no doubt lost strength numerically lately, but those remaining can well afford to wait until the lost sheep get over their dissatisfaction and return to the fold, which they will inevitably have to do if they want

to keep in the swim. As I have had occasion to remark before, "There is nothing succeeds like success." The association has just held a successful show, it has promises of substantial backing from prominent citizens and it feels good over this; it will hold its annual banquet shortly and will doubtless feel still better after that. "Unity is strength," and much more can be done by working altogether than by each dissatisfied one airing his little twopenny ha'penny grievances before a little twopenny ha'penny meeting of kickers. If there are grievances and things to be set right—and I have no doubt there are—why not bring them up before the whole crowd and endeavor to set them right. Let us have a little common sense. E.

Thomas Tait.

Thomas Tait died at his home, Port Richmond, Staten Island, November 30, 1893, aged 70 years.

He was born near Kelso, Scotland, and served a regular apprenticeship to gardening; after that he spent several years in the Experimental Gardens, Edinburgh, along with many of the noted gardeners of that time, also at several places in England. He came to this country in the year 1852 and had charge of some of the best private places at that time. Thirty years ago he started business on Staten Island and was in active duty up to the time of his death.

He was an enthusiast in his chosen profession, a member of the old New York Horticultural Society, and one of the first members of the Florist Club, was a frequent exhibitor at the flower shows and a well known authority on nomenclature. A man of sterling integrity, his word was his bond, he had no enemies.

His funeral was attended by many of his old friends. He leaves an invalid widow but no children. H.

## The Seed Trade.

## AM. SEED TRADE ASSOCIATION.

W. ATLEE BURPEE, Philadelphia, president; A. L. DON, secretary and treasurer, 116 Chambers street, New York. Next annual meeting second Tuesday in June, (will probably be held in Toronto.)

VISITED CHICAGO: C. C. Morse, Avery Gallup, Dan'l De Con of Philadelphia, returning from Pacific coast, J. O'Neil of Philadelphia.

HARVARD, ILL.—Robert C. Uecke has succeeded to the Harvard branch of the nursery firm of Uecke Bros., the firm having been dissolved.

HARRISBURG, PA.—The Melrose Seed and Floral Co. have added two new houses, one 14x80 for ferns and palms and one 12x80 for violets. They have also put in a new boiler with sufficient capacity to allow the addition of two more houses next year. W. E. Machlin is proprietor and his plot of ground contains eight acres. The store, at 32 South 3rd street, will add a seed department in addition to cut flowers, etc., and is under the management of A. B. Machlin.

SPRINGFIELD, MASS.—At the adjourned annual meeting of the Hampden County Hort. Society officers for the ensuing year were elected as follows: E. P. Chapin, Pres.; R. H. Smith, 1st Vice-Pres.; Clark W. Brvan, 2d Vice-Pres.; Geo. S. Lewis, Jr., 3d Vice-Pres.; W. F. Gale, Sec'y; G. R. Bond, Treas. Seven exhibitions are to be held next year as follows: A pansy show in April, an exhibition of spring bulbs in May, a rose and strawberry exhibition in June, a sweet pea exhibition in July, a begonia show in August, a general exhibition of fall flowers in September and a chrysanthemum show in November. The first five exhibitions will be free and probably will be held on Saturday afternoons and evenings. The time and place of all of the shows will be decided upon by the committee of arrangements.

## News Notes.

BYRON, O.—Aaron Jones has started into the business here.

SAN FRANCISCO.—Mr. F. Gonzalez left last week on a trip to Japan.

JACKSON, MICH.—W. R. Hibbard has opened a floral store in the Hurd House block. Robert H. Heath built three new houses this season.

CHARLESTON, S. C.—Mr. J. M. Connelley, a leading undertaker, has added a greenhouse department to his business and has erected a fine range of houses on Meeting street, which will be devoted mainly to the production of cut flowers. Most of the greenhouse flowers used here in the past have been shipped here from the north.

WE HAVE RECEIVED from Mr. W. Wincott, Effingham Park, Babylon, L. I., a box of Marie Louise violet blooms of excellent quality. The fragrance had held remarkably well through the long journey and every bloom exceeded an inch in diameter. The accompanying foliage was as clean and vigorous as could be wished.

SHEBOYGAN, WIS.—Wm. Schucht & Co. have succeeded to the business of Otto Schucht. Trade has been fairly good, though the effect of the hard times is felt. Roses and carnations are in greater demand than any other kind of flowers. The principal trade is, however, in pot plants. The chrysanthemum craze has not yet reached here to any great extent, but calls are becoming more frequent.

MINNEAPOLIS, MINN.—Trade has been very dull this fall. Every florist is complaining. But the sales for Thanksgiving day compared very favorably with those of former years. Flowers were plenty, but were pretty well sold out. We are looking forward to a good Christmas trade. Flowers will probably be scarce, as it has been very cloudy lately, and unless we have more sunshine the supply of roses will be very short. The wholesale prices are generally so high that there is no money in buying, as the people here will not pay fancy prices.

## ROSES.

You will benefit the American Florist by mentioning it every time you write an advertiser in these columns.

## CARNATIONS.

I have fourteen houses planted to carnations, and they are under my special care and supervision so that I can guarantee every cutting sent out.

If you will kindly write to me stating what varieties you want, how many of each, and when they are to be delivered, I will give you figures and think we can make a deal.

ANNIE PIXLEY.—This is a new pink, and one that you want to try; it is one of those beautiful light pinks, just the proper color. The stems can be cut fifteen to twenty inches long, the calyx never bursts, and it is such a strong grower and free bloomer that you can't help but make money if you plant it.

Orders will be filled in rotation, beginning now. Price per 100, \$12.00; per 1000, \$100.00. Twenty-five at 100 rate, 250 at 1000 rates.

Samples of any stock free. Terms absolutely cash with the order or C. O. D.

L. B. 496.

ALBERT M. HERR, LANCASTER, PA.

## 100,000 VERBENAS. THE CHOICEST VARIETIES IN CULTIVATION.

Fine pot plants, \$2.50 per 100; \$20.00 per 1000. Rooted Cuttings, \$1.00 per 100; \$8.00 per 1000.

NO RUST OR MILDEW.

Packed light, and satisfaction guaranteed. Send for circular.

We are the largest growers of Verbenas in the country. Our sales reaching last year 215,500. Our plants this year fully equal, if not surpass, any we have ever grown.

J. L. DILLON, Bloomsburg, Pa.

## SWEETBRIER

Received 1st Premium for "best seedling of any color" at Phila., Nov. 7, '93. Color between Daybreak and Wilder.

"I like its color better than Daybreak."

EDWIN LONSDALE,

"Sweetbrier is all that can be desired."

W. A. MANDA.

Rooted cuttings, \$10.00 per 100; \$80.00 per 1000. Delivery to begin February 1, '94.

## OPHELIA

Was winner of Craig Cup for best seedling at Phila. Spring of '93. Color darker than Wilder.

"That beats Edna Craig." BENJ. DUFFEE.  
"It is the best flower in your houses." ROBT. CRAIG.  
Price and delivery same as above. Flowers of both the above brought \$5.00 per 100 wholesale at J. R. Freeman's, Washington, last winter. Send for price list of other varieties.

EDWD. SWAYNE, Kennett Square, Pa.

3 Centies Slip, NEW YORK.

## PANSIES.

I will have good little plants right along until April 1st. The strain is good, extra good, and the price is very low, quality considered. Per 100, 75c; per 500, \$3.00, free delivery; per 1000, \$5.00, you to pay the delivery.

## GERANIUMS.

Rooted Cuttings, all first-class varieties and good bedders. Price, in mixture, \$10.00 per 1000; \$1.50 per 100. In separate colors, \$12.00 per 1000, or \$2.00 per 100. There are no medium varieties among these; all are A No. 1.

## New Yellow Coleus.

The Golden Crown is a perfect beauty, On the lawn will do its duty.  
Its color, style, and growth are fine.  
"Will make the landscape fairly shine."  
Fine stock now ready, \$3.00 per dozen; (Golden Bedder we don't want you).

The Verbena of yore was a modest wee stymie, Scarcely as large as a silver dime.  
Until Henderson, the great floral artist, Produced them as large as a silver quarter.  
Still we're progressing, florists may laugh.  
Gibson shows them as large as a silver half.  
P. S.—We have a fair stock of the progressive seed and will gladly supply it to all who may need.  
500 seeds 50 cts.; ¼ oz. \$1.00. 500 seeds 35 cts.; ¼ oz. 60 cts. Post free.

Gibson's Pansies need no praisers, They're such beautiful, scented blazers,  
500 seeds 50 cts.; ¼ oz. \$1.00; nice stocky plants 50 cts. per 100; \$4.00 per 1000.

Dreer is the Letunia king, His elegant strains are just the thing.  
Double hand hybridized, per 500 seeds 75 cts.; 1000 seeds \$1.25. Plants and rooted cuttings, flats.  
Field-grown gold and silver variegated Vincas \$5.00 per 100. Snow Crest Daisies, nice young plants, flats, \$5.00 per 100. Cash with order please.

Address J. C. GIBSON, Woodbury, N. J.

PAEONIES, double white and double pink, two of the best, mixed.....\$12 per 100

Any of the above will be sent on receipt of price with order.

ALEX. SCOTT,  
Balto. Co., Lauraville, Md.

## CLEMATIS.

I have choice lot of nice, well rooted, one year plants, very suitable for potting now; these will make fine strong plants by sales time, grown in cold house and treated same as H. P. and other roses, in variety, Jackmanni, Duchess Edinburg, Henryii, C. Lovelace, Fairy Queen, Lady Neville, Gem, P. Alexandra and others, \$1.50 per doz.; \$12 per 100. Two year in var. \$3 per doz.; \$20 per 100.

F. A. BALLER, Bloomington, Ill.

HEADQUARTERS for WATER LILIES  
SEED, TUBERS AND PLANTS.

Embracing all the newest and choicest in cultivation. Awarded SIX MEDALS at World's Fair—the highest number of awards for aquatics.  
Illustrated descriptive Catalogue free on application.

Wm. TRICKER, DONGAN HILLS,  
New York.

Please mention the AMERICAN FLORIST every time you write to an advertiser.

THE BEST CARNATION IN THE MARKET.

# THE ADELMAIDE KRESKEN,

Which was originated in 1891, and flowered in the same year, is conceded by all to be the prettiest Carnation ever grown. Strong grower, free from rust, is two feet high, stiff stem, good calyx, and the flower (of a beautiful rosy pink color) averaging three inches and over.

## A VERY FREE BLOOMER.

In addition to recovering the **Best Seedling Prizes** at Cincinnati, O., Club Certificate at Springfield, Mass., and Milwaukee, Wis., Hunt Prizes, Indianapolis, Ind., it has received certificates of merit at The American Florists' Society, St. Louis, Mo.; also the best vase of pinks at St. Louis, Mo. The undersigned begs leave to submit the following exceedingly low prices for **Rooted Cuttings**, which will be ready March 1st, 1894:

\$2.00 per Dozen; \$10.00 per 100; \$45.00 per 500; \$80.00 per 1000.

Cash Must accompany all orders. Address all communications to

**PETER HERB, Mount Healthy, Hamilton Co., Ohio.**

PRICE, \$3.00 PER 100.

This stock has always been entirely free from disease of any kind. Inspection invited. Orders booked now. **H. HUEBNER, Groton, Mass.**

## Insect Affecting Violets.

ED. AM. FLORIST:—Yours of 9th inst., enclosing a specimen sent in by a subscriber and which is said to have been injuring violets, has been received. The specimen was in such a fragmentary condition that no definite determination can be made. It appears, however, to be a Myriapod of the genus *Julus*. The habit mentioned is unusual, and is it not possible that there has been some mistake? If your subscriber's observation is correct, the creatures were probably introduced to the violets with manure, and his best plan will be to attract the insects from the violets by slices of fresh beets poisoned with paris green or by cotton seed cakes poisoned in the same way.

C. V. RILEY, Entomologist.  
Washington, Nov. 13.

## The Secret Out.

Yes, the New York *Sun* has discovered the secret and like a dutiful *Sun* gives it free of cost to a waiting world. Here it is:

A florist was exhibiting to a visitor four or five young rubber plants with mottlings of grayish white on the leaves, the rich green of the plant looking the deeper for the contrast. "Do you know what made that?" he asked. "They're as healthy plants as I have in the place. It's charcoal. I fill the bottom of the pot with powdered charcoal, and that's what I get. I can't explain it. I only know it works that way with several plants. Here are a couple of dracaenas, for example. Normally they are a regular leaf of green. You notice that those upper leaves are as red as the finest October maple you have seen this year. It's owing to charcoal."

F. SANDER & Co., recently sued the Great Northern Railway Co. to recover £530, the value of orchids damaged in transit. It appears that in July 1892, Sander & Co. sent a consignment of some four hundred orchids and other plants to the Horticultural Exhibition and that at Hatfield station the truck containing the plants was run into, with the result that several were damaged. The defendants did not dispute their liability but contended that the claim was excessive. The jury returned a verdict for £350.

THE *Suburban Citizen* of Washington published a two column article on the front page of its issue for November 18, giving a very full description of the extensive greenhouse establishment of Messrs. Gude Bros. at Anacostia and an engraving of their handsome store building on F street in the city.

## Goodyear Rubber Store,

2 W. 14TH ST. NEW YORK.

## Increase Your Business

by fostering an interest in plants and flowers among the people in your vicinity. You can best do this by getting subscribers to

## GARDENING . . .

which tells people how to get the most satisfaction out of their gardens, and stimulates them to enlarge and extend their gardening operations.

**\$1.00 A YEAR** is the subscription price of this paper, which is issued twice a month, is handsomely and truthfully illustrated, is thoroughly practical, absolutely free from wind and gush and grinds no axes for anyone.

**SPECIAL LOW RATE** to florists who will act as agents. We want an agent in every city and town in America. Write for terms now to

**THE GARDENING CO.**

Monon Building, CHICAGO.

St. Paul, Minn.

Florists report trade brighter and prices much better. Our friends "the mums" are bidding us good bye and making way for Christmas flowers. Altogether the mums have exceeded everybody's expectations financially and not a florist but that expects to increase his stock of them another year.

The boys who went to the World's Fair chrysanthemum show saw some "eye openers" in the way of fine flowers and a number of orders for stock plants of the prize winners have already been placed. Perhaps another year the Twin Cities will have a show of their own. The only obstacle to a successful show is the inability to pull together. Isn't it about time, my florist friends, to drop petty jealousies and work together?

Stock about town is looking nice though most roses are now "off crop," recuperating for Holiday trade. As a rule florists think Holiday prices will rule lower than for several years.

A visit to the city greenhouses at Como Park reveals a veritable little paradise. Not only are the houses of faultless construction, the heating and ventilating apparatus perfect, but the stock is in the very "pink" of condition, while the neat and orderly arrangement of everything is but another evidence of Superintendent Mussbaumer's watchful care and tireless energy.

Coleus, geraniums and other bedding plants are grown principally, though a few palms, etc. are also seen.

Chris Hansen is recovering from a six weeks battle with typhoid fever.

Alderman Warren's family is spending the winter south, while he is reading the "Reveries of a Bachelor" and trying to enjoy it.

James Souden, the genial superintendent of May & Co's. greenhouses is smiling over the advent of a third daughter.

E. F. Lemke would rather not have had the snow storm as it completely demoralized his hunting trip. FELIX.

## Announcement to Florists.

We desire to announce the dissolution of the firm of Sipple Dopffel & Co., and to introduce to the trade its successor, The Syracuse Pottery Co., which will be under the management of William Dopffel and Conrad Breitschwerth. The business will be conducted as heretofore, except on a larger scale to meet the growing demand for our goods. We have accordingly enlarged our plant and capacity, and with unsurpassed facilities are now prepared to fill the largest order on short notice. Our latest improved machines are turning out the best and most serviceable flower pots in the market, and assuring you of our intention to lead in further improvements we solicit a continuance of your patronage in the belief that we can supply just what is needed at a price and in a manner satisfactory to all.

Send for price list and samples and we know you will give us an order.

HARTFORD, CONN.—At the annual meeting of the Hartford County Horticultural Society on December 7 the following officers were elected: President, John W. Crane; vice-presidents, W. B. May, John Coombs and B. E. Beemer; secretary and treasurer, E. S. Young. The annual report of the secretary showed that the recent chrysanthemum show netted a profit of over \$200. The next exhibition will be given on March 22 and 23.

THE BOOK "How to grow cut flowers" published not long ago by Mr. M. A. Hunt, Terre Haute, Ind., has sold so well that a second edition has become necessary. The quick sale of the first edition shows that the trade is not slow to appreciate a really valuable addition to the literature of the profession. While it is true that there is no room for the theoretical balderdash too often offered by men who know just sufficient to advertise their own ignorance, any work of real value written by a thoroughly practical man and so as to convey instruction of honest worth will always find a welcome.

FREDERICK, MD.—C. Hermann has added a new greenhouse. In addition to conducting his florist business he now has charge of St. John's Catholic Cemetery.

### Seasonable Hints.

There are several lots of cuttings that are best propagated as soon as you have the space and time. That useful plant *Abutilon vexillarium* that roots so indifferently in the fall will now root as easily as a verbena. Put in the tops of the young plants or the tender shoots of old plants if you lifted any.

Another useful plant for either flower beds or boxes, vases, etc. is *anthericum* (the California soap plant). The plants you lifted in the fall will now have sent up a lot of flowering stems, and from the joints of these stems any number of young growths can be got for cutting. Put them in the sand and they will send out their fleshy roots in a very few days. It is none too early to start them now—to have good sized plants by the end of May.

I am putting in *lobelia* cuttings from the few old plants lifted in the fall; these make much better plants for veranda boxes than those raised from seed.

This is the season when the conditions are most favorable for propagating almost all plants except perhaps those requiring the highest temperature. Carnations root very easily now and of choice kinds that you want to grow an increased quantity of it is no use to delay. I believe the ideal bench for them is where the heat of the house is kept as near as possible at 50° and the sand at 65°, but I am trespassing on other people's ground and must leave that subject to a specialist.

There are a few seeds that should be sown soon after New Years. Among them *Centaurea gymnocarpa*. Sow *Crzy cannas* at once. They will then be in bloom at planting out time, and many more can be sold if they are seen in flower. Don't forget to soak the canna seed a day or two and slice off a small piece of the hard shell. Good sharp clean sand for a covering of the canna seed is better than soil, for many times the young plants when an inch or so high are carried off by anthracnose, commonly called fungus of the cutting bed.

Very frequently the young *smilax* plants are not sufficiently strong when planted out in July. They should get a good growth in a 3-inch pot before they are planted out and then the first growth made after they are in the bed will make strong strings. Therefore sow early in January.

You are liable to receive your roots of *gloxinias* and tuberous rooted *begonias* at any time now, either from Europe or our own dealers. Put them in flats covered with some perfectly dry earth and keep in a moderately warm shed or cellar. You don't want them to start yet. The demand for the *begonias* is likely to be better than last year. Millions, or at least thousands, of people saw some grand beds of them at the World's Fair and in every city there were fine displays of them.

Those who want *hydrangeas* in flower for Easter must get them up from their resting place under the bench and start them going. They will want to be rushed along to get there in time for this very early Easter. I would advise not to try too many *hydrangeas* for Easter, for they are not the most satisfactory plant at that date and they come in competition with many other showy plants that are much easier grown for that occasion.

Don't delay a day after New Years in getting in your *Spiraea Japonica* from outside. They will want every day of the time to be in good bloom for Easter. Remember they will stand a deluge of water, but won't submit to any fumigating. Aphis don't trouble them, so grow them where you have no occasion to smoke, or cover thoroughly when you do.

The pot-grown lilies that are imported nowadays force very easily. Bring in a few from the cold pit every week. In a temperature of 60° at night they are in good flower in six or seven weeks.

When you cut and sell all your sweet *stevia* (*S. serratifolia*) at Christmas time don't forget to save one-half dozen plants. Down on the edge of the path is good enough for them for a month or two. This common flower will it seems be always useful and seldom any retail florist has a surplus of it. WM. SCOTT.

Buffalo, December 18.

Isn't she a little beauty though! Some of our most valuable goods come in small parcels, don't you know. Soupert is a diamond of the first water! As a summer bedder it is par excellence, and for spring sales sells at sight. Also an ideal Easter pot plant. So get in shape for Easter. Pot up year old plants late in the fall, keep dormant until about four to six weeks before Easter and it will come along full of buds and bloom, a thing of beauty, a charm all its own, "worth the money" too—"That little rose you sold me gave me more satisfaction than anything I have had in a long time."

But I am speaking now more particularly as to its forcing qualities. It will stand as much fire heat as Meteor, but requiring a less close atmosphere; will grow and do well though most anywhere. It is something of a "cropper," yet never without bloom and lots of it

too. Some flowers come all white, others purely pink, and again the prevailing type—white, pink center—while it is as fragrant as our grandmother's roses damask, cabbage or hundred leaf rose in common parlance.

Another good quality is that it keeps well as a cut flower. It is well liked by connoisseurs and gives special character to design work. A rose the size of American Beauty is not *always* wanted, and is out of place sometimes; so it is with the big chrysanthemums. Dainty prettiness and sweetness frequently rule the day a la violets.

"Sweeter than the lids of Juno's eyes,  
Or Cytherea's breath."

Some of our big flowers, like certain people we know, are disposed to crowd all else one side and are surprised, not to say disgusted, that modest merit should occasionally take precedence. What a difference the point of view *does* make, to be sure! Even a great big sunflower doesn't cover *all* the ground.

Ye judges, one and all, be a little "aisy"; wisely consider adaptability. Of course we don't expect you to make "a whistle out of a pig's tail," but kindly admit even a piggy's tail serves a purpose; note its graceful little twist—but "yank" it if music (?) is what you're after.

GROVE P. RAWSON.

[Mr. Rawson sent with the above notes a box of two dozen blooms of Souper and they certainly were worthy of all praise. In many cases there were two blooms to a stem. The stems were longer than when grown out of doors and were strong enough to carry the flower gracefully, but without stiffness. The flowers stood the long shipment well too, much better than would naturally be expected where many flowers were fully open. While probably it would not pay to force Souper for sale through the dealer those who retail the flowers they grow would surely find it useful.—ED.]

Carnation Notes.

Did you ever hear two carnation growers talking about them and agreeing on any number of the cultural points? I don't think you did, and what is more you never will. We explain this very easily by ascribing it all to the difference in the soils, and I suppose that is the principal reason for this unfortunate state of affairs.

I was talking with a party the other day who had just come from some of the crack growers around N. Y. City. He said he would not dare to grow his carnations as soft and watery as they did, for theirs would not stand the handling his carnations had to stand. The New York grower is right to give his plants extra high culture and produce large flowers on long stems even at the sacrifice of a little in substance, as his flowers can be in the consumer's hands by noon of the same day they are pulled. On the other hand the grower who has to send his flowers on a twenty to thirty hour trip before they even get to the store men has to sacrifice a little in the size for the

sake of getting them harder and more able to stand rough usage.

In conversation with a Chester county grower I found that he had the best (quite the best) results from plants that were planted in late. My experience is exactly the reverse; those that I planted in early in September could not be doing or looking much better; those that I planted in October are away behind in every respect. He has a perfect right to advocate late planting; I have the same right to advocate early planting; and so one could continue on indefinitely. There is only one thing to learn from this, and that is to make your own carnation notes. Make them once a week or once a day as the case may be, and read those of others; you may occasionally pick up a good idea that will be practical to you.

None of us know very much about carnations. I confess to knowing very little. Sometimes one thinks he has made a discovery that will be valuable for the next season, and the next season it may prove practically valueless. A, to me, rather singular incident is now transpiring in my Daybreak houses. There is a bench 100x3 that was filled with very poor soil and never received any manure, as we did not have quite enough to reach. The idea was to fertilize it with either liquid manure or bone meal, but as often happens this was not attended to in the rush of fall work, and they started off so nicely that I concluded to await developments before manuring them. They have received nothing yet and are now making me the finest Daybreaks I am cutting; fine large flowers with long and strong stems and a much finer color than those that are planted with manure, and in addition to their being better in every other way I never had such solid flowers and such good keepers. This might be construed as in favor of growing Daybreak in poor soil, and if they do as well the season through as they are doing now I may try it more extensively next season, yet I would hesitate to advise any one else to do so, as it certainly does not look like a natural result to expect.

There is one thing we can all agree on at this present time, and that is not to store any carnations in cellars or boxes with the idea of getting big prices over the holidays. Keep cutting all that will not keep and send them to market. It is a serious mistake made by some growers to hold back almost everything possible for Christmas. When they come to pull for that time a lot of flowers are put in that are not fit to sell, and yet they expect the store men to give them full price for the whole lot. This is all a mistaken idea and works injury to the carnation trade in general.

It is far better to have your flowers good to extra good and then ask a good price for them. You have not been making a fortune up to date, and now is your chance to get a little laid by for the dull times coming. It puts a far better tone to the market to ask a good price for real good stuff than to sell a secondary lot of it for much less, and there are often flowers sold that should go nowhere but on the dump. It has happened frequently that there were so many flowers held back for Christmas that when Christmas came there was a glut and the market went all to pieces. It is in our power to avoid this if we cut our crop regularly right along up to one week before Christmas, and then cut all the old flowers out and dispose of them. By old flowers I mean those that would begin to look a little seedy by the close of the week.

A. M. HERR.

#### Chicago Carnation Growers.

We started this week on a tour of investigation among our local growers in order to ascertain what is going on at the different establishments who mainly supply our home market, and note anything of probable interest to our readers. Starting with the north side, let us pay a visit to the establishment of Mr. Chas. Hartwig, a well known grower of carnations and roses, a man of large and varied experience, whose views on carnations especially should be of interest and value.

That Mr. Hartwig knows something about carnations is evident as soon as we look at his plants. The stock is as vigorous and healthy as one could wish. The houses, three-quarter span, 20x100, were built last spring, and are well appointed in every way. All the stock is grown on benches, there being plenty of head room; the benches are raised up pretty well from the ground, thus giving plenty of air and good light.

"What variety," we asked, "do you consider the best for red?"

"I still stick to the old and well tried Garfield. I find it the most satisfactory sort for my soil and locality. Of course it is not the ideal red by any means; there are some drawbacks. In the first place, it is rather late, as we all know; it is later even than usual this season with me, but the fault is probably as much my own as that of the carnation. I pinched it back a little too late, and as a consequence will not be able to bring it in with full crop for the holidays, and then this variety is also a bad cropper.

"Portia? Well, I have tried it, but the result has been disappointing with me. The flower, though of good form, is too small. I have tried Fred Dorner and other sorts with rather poor results, so at present I confine myself to Garfield.

"In white I mostly grow Silver Spray; I consider it one of the best for market, good strong stem, pure white and of good keeping qualities. It is apt to burst the calyx with me at times, but not badly. Here is a small batch of Puritan which I am giving a trial. The plants look strong and vigorous and are full of buds, but it looks to me to be too much of a cropper to suit me. There is also a small lot of Governor Russell which doesn't suit me, but before I pass an opinion I'll give it a little further trial."

"You used to grow Hinze's White extensively."

"Yes, but I have discarded it altogether. It is fine for late winter and spring, but of little value for fall and mid-winter, and then it isn't a clear white. Mrs. Fisher and Lizzie McGowan I tried, but couldn't do much with them. I shall give Uncle John a trial next year. To judge by what I saw of this variety at our late exhibition, it will be valuable. It appears to be a sturdy grower, is of good size and form, pure white and a remarkable keeper.

"Of the pink varieties, I grow Daybreak largely. I can do this variety better than any other. I have tried Grace Wilder, but it is of no use to me. My soil is evidently too light to suit this variety, for I have seen this sort grown very fine by a friend under the same treatment I gave mine, but his is a rather heavy clay loam. I am trying this year both Edna Craig and Nancy Hanks; you see them growing on this center bench side by side. I am inclined to think that Nancy Hanks will suit me best. It is a stronger grower apparently and the color of bloom is more even than Craig. But I can hardly judge as yet which may

DINNER TABLE DECORATION BY WARENDORF BROS. AT THE NEW YORK SHOW.

prove the better. I bought the plants this fall and until I propagate my own stock and grow it it wouldn't be safe to pass an opinion.

"The new sort Wm. Scott strikes me to have great merit and I shall try it next season. Also the variety not named yet, grown by the late Nicholas Singler of Washington Heights. I consider it an improvement on Daybreak. It is not quite so double, and opens more freely in cloudy weather. The color is nearly the same, but does not have the tendency to fade out into almost white, as you see some of my Daybreaks."

"What is your opinion of Adelaide Kresken as you saw it at the show?"

"I think it worth a trial. I rather like its appearance."

"Tidal Wave I have always grown in quantity and it is one of my favorites. It never has disappointed me yet. I consider it the best paying sort on the place. Of course in the first part of the season you will have to sacrifice a good many buds, as these appear in great clusters on the first flowering stems, but later on it behaves better."

"Do you ever disbud your carnations?"

"No; I don't think it pays. It takes a good deal of time to disbud a house and I hardly think we could get enough more on the market for the flowers to pay for this extra expense. I find that my stock sells more readily when I can show a good many buds in a bunch with the flowers."

"What effect did the long and severe drought of last summer have on your stock, and did you water during that time?"

"I noticed no bad effect on my plants except that the stock was somewhat smaller than in former seasons. Water? Yes, I kept the sprinkler going day and night. If I had not I doubt if I could have saved a single plant. My soil you see is a sandy one and the subsoil is of such a nature that the water passes through it like a sieve."

"Do I plant out my stock on the same piece of ground every year? Why, yes. It is Hobson's choice with me. My do-

main is rather limited and I can't help myself, but really I don't see any difference in the size and vigor of my stock of today and 6 years ago, when I first moved onto this place. Of course I manure the ground quite heavily every year with well rotted cow manure. I made the mistake once of using fresh manure, which cost me the better part of a season's crop."

"What kind of soil do you use in planting your carnation houses?"

"I use the old rose soil on my carnation benches—a mixture of clay loam and manure."

But let us see what the rest of the boys are doing, so we will say an revoir to our cordial host and take a peep at Mr. Naslund's place, just over the line in Ravenswood, and about a mile west of Mr. Hartwig's.

Mr. Naslund also has made his mark in growing carnations, and his houses are well worth seeing. But let us compare notes and see how far our friends' experience may agree on the subject of carnations. The first house we enter is filled with Garfield looking very strong and healthy, but as at the former place, very backward. The main crop will probably not be in until January. Mr. Naslund too regards Garfield as the best red and grows it quite heavily. He has two houses 100x18 filled with it, but he has a batch of Portia that look very fine. These are planted on a bench that has been piped for forcing; the plants seem to be relishing the heat and are flourishing. There is a great wealth of bloom of extra size and color.

In whites we find a fine looking house of Silver Spray, a mass of buds and flowers, but badly split, more so than we ever saw this sort before. And then there is a fine looking side bench of Puritans just coming into bloom. This variety here shows the same tendency to come in crops, but the flowers are perfect and there is no bursting of the calyx in any of the blooms.

Tidal Wave also looks well here and promises a fine crop.

"But now," says Mr. Naslund, "I want to show you my house of Daybreaks and see what you think of them." The plants looked certainly well enough; growth strong and vigorous and covered with buds and blossoms, but by looking at them a little more closely we could not fail to notice that the leaves on the lower parts of the plants were shriveled and looked as if they had been burnt. "The effect of red spider," observed Mr. N. "The plants were almost eaten up last summer by this little pest. I set out as fine a lot of young stock of this kind last spring as one could wish to see. They grew finely until the dry spell set in, and then the spider took hold. I had no means of attacking the enemy, for I could not water or syringe for want of proper facilities. I thought at one time the whole stock was destroyed; it was the measliest looking lot of stuff I ever saw. I had stock enough to fill two houses, but was afraid to even risk one house with them, but you see they came out all right after all. Oh, there is no doubt the plants suffered and they are not as good as they would have been. Yes, my soil is a trifle heavier than Mr. Hartwig's and somewhat lower; besides, there are no sewers near my place yet to carry off the water so freely. For these reasons my stock kept alive without water, but the plants were not nearly so large as those we grew last year. The ground was as dry as an ash heap when we lifted them this fall and of course every particle of soil shook off from the roots, but nevertheless the plants did very well as soon as we got them into the houses."

"Yes, I prefer the bench system for carnations. I think that by using a heavy soil I can carry my stock until late in the spring in as good condition as if I planted in solid beds, and in midwinter when flowers are of the most value I get better results this way."

"Yes, I tie up my plants as soon as they begin to grow after being benched, all but the Tidal Wave, this latter sort being of dwarf and stocky growth doesn't need it in my opinion, and so I let it grow without support."

"What is your opinion of Grace Wilder and some of the newer sorts of pinks?"

"Well, Grace Wilder is a good producer, but I doubt if it would pay me to grow it on my soil. I have only tried it in a small way, but find it rather unsatisfactory; it bursts the calyx badly with me and the color runs too uneven. I have a small batch of Edna Craig; the flowers are large, but it fades out badly. But I shall keep on trying the new sorts as they come out until I find something that suits me."

"But now let us take a look at your rose houses, Mr. Naslund." The first house we enter is filled with Perles that appear to be in splendid condition. "This house," remarks Mr. N., "was not planted until the middle of August, in fact all of my roses were planted very late. You will notice here and there a bullhead in this house of Perles, but on the whole I am satisfied with it." And well he might be. The stock couldn't look better. This can be said also of the house of Merrets and Brides. There is one mass of buds all over the beds. The Beauties though look rather poorly, and La France and Woottons are but indifferent.

And now we go about half a mile still farther west until we strike Mr. A. Harms' place. Mr. H. grows mostly carnations and has four houses of them 100x18 and 20. The soil on this place is different from that at the first two establishments and consists of a light clay loam. No great trouble was experienced in growing the stock through the summer on account of the drought. The plants were considerably larger, but did not seem to thrive as well as the former after being housed.

Silver Spray looks rather indifferent and so does Tidal Wave. Grace Wilder is the best of the lot and looks fairly well, although the flowers are badly split. Lucy Singler is grown for red and looks well. Mr. Harms prefers this sort to Garfield; he reports it a good seller in the market, the color is lighter than Garfield and of a shade that might be described as a brick red. The first batch of yellow we have so far noticed is Golden Gate, which looks poorly, the blooms being all crippled.

#### Nomenclature Committee.

We have now prepared a circular that we wish to have in the hands of every carnation grower who houses 1,000 or more plants. It will prove interesting reading to you, and you can be of great assistance to us if you will kindly drop a card, giving name and address of yourself or any other grower you know of, to Albert M. Herr, Lancaster, Pa., L. B. 496.

#### A Proposition Worth Considering.

That the American Carnation Society offer a prize valued at not less than one hundred dollars (\$100), to be competed for at the regular annual meetings of the society in February, for the carnation which is awarded first honors *three years in succession* and for *one flower* only to be set up for competition. It takes at least three years, and four is better, to determine whether a seedling is worth perpetuating or not, so that it would be

all in the line of improvement of the carnation, and the most meritorious variety would get the recognition to which it was entitled at the end of the three years.

Chrysanthemum Colors Under Artificial Light.

As the chrysanthemum when "on duty" is mostly seen after sundown under artificial light it is interesting to note its colors, which in a number of cases undergo a radical change—and I may add for the better.

The daylight magenta tones are almost obliterated under incandescent electric light; I am sorry for this, as magenta is a lovely color which we neither appreciate nor treat properly in conjunction with other commoner hues. But if magenta fails at night yellow, orange, red and pink do not. The effect under artificial light of a grand exhibition of large chrysanthemums is more beautiful than in daylight; but every vestige of blue goes under the yellowish light, and a great deal of the yellow goes along with it. One would naturally suppose that a yellow light on yellow color would make the latter look yellower; as a matter of fact it does; but facts and appearances are two very different things in regard to color. The yellow chrysanthemum in order to prove itself yellower under yellow light must have completely black surroundings, devoid of any light except that thrown on the flower, or else pure white light must illuminate everything else. Now, both of these conditions in the natural course of things are practically impossible; consequently the actual truth of color is overpowered by reverse appearances. Yellow light is thrown on everything; we entirely forget what white light is (at least our eyes do), and as a natural result a good deal of yellow stands for white. We know how common the remark is, "That will look a great deal yellower in the daytime." Such a remark is equivalent to the admission that we mistake considerable yellow for white at evening light.

Notwithstanding this admitted loss of color somehow the yellow chrysanthemum is prettier under gas-light. We also forget the variety and play of color in daylight among the red flowers which are more or less influenced with blue, and are only conscious of the fact that the reds are more brilliant when the gas is lit. Orange is also a color greatly enhanced by yellow light.

In a word, the whole tone of the chrysanthemum show has undergone a change when the evening lights are on. We feel this without exactly being able to account for it. This difference consists in just these two facts: at night every color becomes soft and brilliant, but loses in variety of tone; in daytime every partic-

ular tint asserts its separate individuality; but there is a coldness in its appearance accounted for by the fact that blue is exerting an influence, although not actually present in pronounced form.

In the list which follows of many new flowers, all of them particularly attractive under the incandescent light, I have mentioned magenta several times; I do not wish to be understood as saying that this color is destroyed by yellow light; it is not, but it undergoes a complete change and appears delightfully soft and æsthetic; at the same time the blue-red color is robbed of its individuality. Solferino I must define as a very near relative of magenta, but paler in tone and more nearly allied to crimson.

Mrs. Bishop. Pure unbroken yellow; a monotone.

Golden Ball. Golden yellow nearly a monotone.

Mrs. Hicks Arnold. Glancing golden yellow, orange in the depths.

Marguerite Jeffords. Golden yellow, with a fiery orange in the depths of the incurved petals.

Harry May. Golden yellow like Marguerite Jeffords, but with more play of color, as the petals are not so closely set; but it is not refined in tone as is the other flower. The inside depths are flame orange and the outside of petals is dullish yellow. The foliage is a beautiful bronze green.

Golden Wedding. Yellow leaning toward golden yellow, rich in surface color, and decidedly golden in the depths.

H. L. Sunderbruch. Paler than the Golden Wedding, nearly if not quite pure yellow in tone, and rather pure gold in depths. This flower appears similar in color tone to the M. B. Spalding.

M. B. Spalding. Pure yellow, but with little depth of tone. In daylight the flower could hardly be called pure yellow; there are too many broken tones visible then.

Mabel Ward. Pure yellow like the flower above, but golden in the depths, showing rich color in every interstice, round as a ball and perfectly soft in color effect.

Mrs. L. C. Madeira. Pure golden yellow, very deep in tone. The flower is also round and shows off its pronounced color very well at night.

Golden Queen of England. Its graceful reflex petals show a marvelously soft pale, pure yellow.

W. H. Lincoln. Golden yellow, paler than Golden Wedding and a little stronger than M. B. Spalding. It is not far from pure yellow at night.

A. H. Fewkes. Golden yellow, a monotone.

Fascination. A most delicate tone of palest possible yellow. It might be called palest lemon yellow white.

Mrs. Jerome Jones. Waxy white, not quite pure, and deep cream yellow in the depths. The flower is very large and not quite refined in color effect; in this respect it differs entirely with the older favorite, Mrs. Alpheus Hardy. The flower is sometimes flecked with little hits of crimson. The foliage is a magnificent bronze green.

Niveus. Pure white, large and refined in color effect. It merely suggests a cream tint in the depths. The handsome dark foliage greatly enhances the value of the white by contrast.

William Falconer. Like the Mrs. Alpheus Hardy in shape and character, less purely white, sometimes showing itself a pure pale yellow, but generally of a pale pinkish tinted white, undoubtedly

CHRYSANTHEMUM MUTUAL FRIEND

taking that effect of color from the influence of the decided pink which flushes the tips of the central petals. The pink color is hardly pure even with the advantage of artificial light. The yellow boss shows plainly.

Mrs. Joseph H. White. Pure white, a perfect ball, and in the interstices scarcely suggesting cream.

Wanlass. Palest æsthetic magenta pink, very rich color in the depths.

Olga. Magenta pink; the backs of petals whitish, and a touch of strong magenta in the depths.

W. N. Rudd. Pale magenta, paler and purer than Olga. Extremely dainty in color.

Roslyn. Light magenta pink, deep magenta pink in the depths; the flower is large but very refined in color tone.

E. A. Wood. Solferino pink, deep in tone, uniform in color and æsthetic in character. The foliage is dull sage green in color, and is in fine contrast with the flowers.

Ada H. Leroy. Deep magenta, in depths decidedly dark. The outside surface of the incurved petals is very pale magenta. The flower has a conventional, but pretty hemispherical form.

Mermaid. Very pale and very pure magenta pink, near crimson pink. Crimson pink in the depths of the loosely hung, broad, incurved petals.

Maud Dean. This flower will answer to the same description as the Mermaid, but it is paler and purer in color tone.

Dorothy Toler. Creamy crimson pink petals, inexpressibly delicate at the tips; the depths of the incurved petals are deep dull pink. The flower is ball shaped, set and conventional in character, but none the less beautiful for its primness.

Vivian-Morel. This flower has a remarkable habit of not looking always like itself; that is, it does not conform to a certain color tone, but varies greatly in force of color, according to the plant one

happens to see. I should call the last flowers I saw pale crimson pink, stained on the crown with rich crimson pink; but the flowers generally speaking are pure carmine pink, in various degrees of depth, always glowing and brilliant in artificial light. I remember some of the flowers I saw a year ago were almost if not exactly pure pink.

Eda Prass. Palest shrimp pink, perhaps not unlike a Malmaison rose pink, but inclined more toward the orange tone.

Harry Balsley. Palest pure pink, deep pink at the heart, and the surface of the outside petals pale creamy pink.

Duchess of Connaught. Very pale pure pink; the ball shaped flower shows some little play of dainty color when placed directly under the light.

Alice Comley. Bronzy red in color, with dull yellow tips to the petals, dark maroon in the depths. The water lily-like petals are pale maroon inside and yellow and red (smooched) outside.

Joey Hill. The color is like the Cullingfordii red, but with white-maroon outside the petals; it is not unlike the Alice Comley, but it lacks the redolent color the latter possesses. There is an undertone of yellow in the petals.

Mrs. G. W. Childs. Red of a terra cotta tone. The color is light but subdued.

Vesuvius. I hardly know how to name its color with accuracy. Perhaps it would be just to call it golden in tone, tempered with deep red until it resembles dull flame color. Its pinkish red and brilliant gold mixed together give the flower a bronzy orange appearance.

F. SCHUYLER MATHEWS.

#### Chrysanthemum Notes.

Now that the chrysanthemum season is closed the wise grower will carefully sum up results to ascertain if possible just how much of its old popularity the chrysanthemum retains and what the

prospects are for it being a profitable crop next year. We were told early in the season that fashion had discarded the chrysanthemum. We were told that there was no good reason for its popularity; that it was coarse and lacked fragrance; we were reminded of its resemblance to cold slaw, in fact the condemnation was worked through the daily press with such persistency that suspicion was naturally aroused as to the motive behind it all.

While it is doubtless true that the ultra fashionables in the great cities have abated their chrysanthemum craze and the chappy changed his mind as to the propriety of wearing an enormous bloom as an important part of his street costume, yet we submit that there is another and greater tribunal whose decree is of infinitely more moment to the florist trade than are the whims of fashionable society. We refer to the common people, the great American public, and no more convenient test of their temper can be obtained than through the medium of the public exhibitions.

Now that the exhibitions are over, what is the verdict? From all over the country comes the same testimony—crowded halls and greater interest than ever before. New varieties have been hailed with enthusiasm and the daily papers have found it wise to devote whole columns to descriptions of them. The public have been quick to appreciate and ready to applaud every advance made by our growers.

Prices have come down it is true. The days of six and nine dollars per dozen blossoms at wholesale have surely gone never to return. But that this means abandonment of the chrysanthemum by our leading growers we are slow to believe. A better understanding of the requirements of the plant and the application of economical and improved methods of cultivation will make it possible to produce the chrysanthemum, as has been the case with the rose, at popular yet profitable prices. This being the case, and the public being with us, there seems to be no good reason why the Queen of Autumn should not hold her sway for many a year to come.

#### Chrysanthemum Golden Wedding.

Noticing strictures on Golden Wedding chrysanthemum in recent issue of *FLORIST*, allow me to say a word in its favor. We had it 7 inches in diameter without disbudding. It was a beautiful rich golden color, double to the center. Foliage good and healthy, no insects infesting it. We considered it about the grandest variety we had out of over a hundred kinds, embracing many of the latest novelties.

W. H. CASSELL.

Canton, Miss.

#### Chrysanthemum Mutual Friend.

The illustration is from a photograph of this new variety which received the first prize as best white and a certificate of merit at Boston. The flower is very large and full with broad and long drooping florets, making a deep reflexed flower of the purest white; a fine stem and excellent keeping qualities. It was exhibited by Mann Bros., Randolph, Mass.

DO YOU WANT an alphabetical list of the chrysanthemums in commerce in America, with class and a brief accurate description of each one, and synonyms noted? You will find such a list in our trade directory and reference book.

## Palm Notes.

*Phoenix koebeleni* seems to occupy the same place among the other members of this useful genus that *Cocos Weddelliana* does among the cocos, being a decided dwarf in comparison with its fellows.

At present this phoenix is too rare to become available as a trade variety, but in the course of time it is quite possible that seeds will be as freely offered as are those of the commoner species, and if this does occur it seems probable that *Phoenix Roebeleni* may prove a useful species for decorative purposes. In habit this palm reminds one of a miniature *Phoenix rupicola*, but the leaflets are very narrow and the whole plant very light and graceful. The leaves are dark green and the plant soon begins to form a stem, some idea of the dwarf character of this plant being gained from the fact that a full grown specimen (that is, one capable of bearing fruit) is only about three or four feet high.

The plant in question is a warm house species and will most likely find congenial conditions under the same treatment as that given to *Areca lutescens*.

*Phoenix rupicola* is really the most beautiful of the stronger growing date palms, and I think will make a salable plant sooner than *P. reclinata*, though not quite so hardy as the last named for outdoor use in summer.

As a house plant *P. rupicola* is very effective and seems rather to enjoy the dry atmosphere that invariably prevails in dwellings, this dry air being possibly somewhat similar to that experienced by these plants through a considerable portion of the twenty-four hours in their natural habitat.

Some of the phoenix are also very satisfactory for vase plants or for planting in veranda boxes, *P. canariensis*, *P. reclinata* and *P. dactylifera* being among the best for this purpose, the last named being the slowest grower of the three.

The true latanias include some very handsome palms, though scarcely to be considered among those suitable for the ordinary florist from the fact that they are too slow in growth and require strong heat and a more than ordinary amount of attention to secure the best results. Of these, *Latania Verschaffeltii* (also known as *L. aurea*) is perhaps the handsomest, and is only a moderate grower, its root action being slow.

The latanias are fan leaved, the footstalks of *L. Verschaffeltii* being almost erect and of light orange color, while the leaves are dark green with bright yellow ribs, this giving a combination of color that is decidedly effective. *Latania Commersonii* makes a strong contrast with the preceding, the stems and ribs of this species being dark red and the leaves more spreading than those of the one just described, being also deeply cut into segments and the latter edged with some small spines.

These two species are the most effective in the genus, in which at present there is only one other species, and all require the same attention in regard to light open soil, good drainage and brisk heat in order to keep them in condition.

*Livistona chinensis aurea* is rather an oddity among the palms, and though not very new, is comparatively rare, its chief claim to distinction being found in its color.

The foliage of this variety is of the same form as the type, but both leaves and stems have a pale golden color that gives a pleasing contrast with dark leaved species, though at times reminding one of a

plant of the ordinary type that is badly in need of repotting.

This is probably an accidental form of variegation that may occur at any time among a lot of seedlings, and the uncertainty of its production naturally gives it some value among palm specialists and private growers, just in the same way that a nicely variegated specimen of *Areca lutescens* or *Kentia Belmoreana* would doubtless command a good figure.

*Licuala grandis* is not likely to become a trade palm, being probably too tender to be a useful decorative species, but it may be worth noting that the first shipment of seeds of this handsome palm that were received in this country within two years past turned out quite satisfactorily, germinating rapidly and resulting in fully 75 per cent of the number sown being potted off in a few months from the time of sowing.

W. H. TAPLIN.

## New York.

The past week stands out as one of the dullest of this very dull season and is by far the quietest ever experienced at this time of the year. Everything is in oversupply and the bulk of the stock received has been disposed of for much less money than previously. Even American Beauties have been sufficient to fill all demands and prices have not advanced. The highest figure obtained is 50 cents, but the majority of them are sold for much less. Testout seems to sell a little better than formerly. Bridesmaid has almost entirely superseded *Mermet* in this market. The latter is no longer salable at any price.

Carnations are in very heavy supply and are to be found in quantity in nearly every dealer's box. Wilders are the worst kind of a drug. The finer varieties, such as Daybreak, Buttercup, etc., when grown right sell well at good prices, but the commoner varieties bring only 35 to 75 cents per 100, and that with difficulty. *Harrisii* lilies sell fairly well at 12 to 15 per 100. Violets have had a very black eye this week. There were two or three days when no one would look at them and the price has fallen to \$1.25 to \$1.75 per 100 for the best, so that those who have been foolish enough to make contracts at high figures are losers. There are too many Roman hyacinths; the best quality can be bought at 15 per 1000.

The earlier part of the week was particularly severe on the wholesale men, as it was so very cold that it was impossible for the Greeks to go out on the streets, and stock piled up mountains high in the refrigerators. When the Greeks cannot sell flowers they are content to give their whole attention to dice throwing, and they have no interest whatever in the prices at which flowers are sold. This is the time when Johnnie Weir is in his glory and smiles inwardly, but never outwardly, over the fact that he has the entire field to himself. Of course at such times he never wants anything—they have to force it upon him—and he winds up by going home with a bigger load than usual.

Indications for Christmas are not very promising. No one seems inclined to name positive figures on holiday stock, but it seems to be the general impression that prices will not reach within 25% of last year's figures on small roses. It does not look from present appearances as though there would be a very large supply of roses, but appearances are often very deceptive at holiday time. There has really been but little or no inquiry

yet from important points for holiday stock. Some buyers indeed who have placed regular orders for certain kinds of stock are cutting down their orders even now. *Asparagus plumosus* will be plentiful at 50 cents a string and *Smilax* will have no show with it. There will be plenty of *Cypripedium insigne* at \$12.50 per 100 and a fair supply of *Cattleyas* at \$40 per 100.

Adolphe Le Mout, the florist at 170 Bowery, is financially embarrassed. He confessed judgments on December 14 for two notes of \$1314 and \$911, both for borrowed money. His property is heavily mortgaged. This failure is the chief topic of conversation and quite a number in the trade are involved for amounts more or less heavy. Dan Farson remarked at the club meeting last Monday evening that "New York will be a right smart town after a while." Probably it will.

The Flatbush Bowling Club will hold a prize bowling contest at Bantel's alleys, Flatbush, on December 28. A good time is expected.

Visitors in town this week: W. J. Palmer, Jr., of Buffalo and N. J. Herrick of Springfield, Mass.

## Boston.

The cut flower market is in a most unsatisfactory state. There is a widespread fear among the retailers and growers alike that Christmas trade will be light, and buying in advance is avoided if possible by the retailers, while the growers are unusually solicitous to take orders for holiday delivery. The week just passed has been cold and stormy, so that the street fakirs who form such a large outlet for much of the commoner grades of stock are unable to work, hence stock is accumulating in the hands of the growers in spite of themselves, and prices show no indication that Christmas is near at hand. Much complaining is heard regarding the low figures and the growers of holiday stock sigh as they think of the good days of big prices in the past.

Few are confident enough to talk old fashioned Christmas prices on anything, an order at moderate figures being considered preferable to a chance on high prices, and the only varieties that show any backbone are violets and such other popular stock as Daybreak carnations. On the latter some growers quote as high as six dollars per hundred.

The roses now in market average rather poor in quality and short in quantity. There is really little doubt that every first-class rose sent in at Christmas will find a ready sale. Carnations are plenty and good. Indications are that there will be a big reserve stock thrown on to the market for Christmas. Dealers in greens report sales as satisfactory, with holly going exceptionally brisk; quality good.

Lawrence Cotter has been awarded two prizes by the Garden committee of the Massachusetts Horticultural Society, one for the best house of chrysanthemums grown on benches, and the other for the best house of lilies grown for commercial purposes.

Mr. Edwin Lonsdale, president of the Philadelphia Florists' Club, has consented to read a paper before the Gardeners' and Florists' Club of Boston in January.

The sympathy of the trade is extended to Mr. W. J. Hargraves on the death of his wife, who has been ill for some months. Mr. Hargraves was formerly

A CORNER AT THE CHRYSANTHEMUM SHOW GIVEN BY J. C. RENNISON, SIOUX CITY, IOWA.

in charge of the Bowditch estate and is now foreman of one of the departments at Forest Hill Cemetery.

The preliminary schedule of prizes offered by the Massachusetts Horticultural Society for the year 1894 is just received. The amount appropriated for plant and flower premiums is \$4,500.

#### Philadelphia.

The Christmas holidays are upon us, and the prospects are that there will be plenty of stock of all kinds to supply the demand. Storekeepers are hopeful of a good business, but say there are very few orders as yet. What are roses going to be for Christmas is the question of the hour. No definite prices have been fixed at this date, although many whispered consultations have taken place between the growers as they happen to meet in the stores; some have been heard to say something about \$15 for the large teas, but it seems to us \$12 will be nearer the mark, while the smaller stock may bring \$8. Carnations are very plentiful now, and if the plants are hanging as full of flowers as they are said to be one need not worry about getting a supply sufficient for all demands at about 50% above present prices.

Some of the stock coming in the past week presented that briny appearance so common at this season; one grower accounted for it by the fact that he always smoked his houses the week before Christmas, so that they should not smell of tobacco at that time; some said it was the weather, and others spoke of sulphur, etc. A peep into the ice boxes and cellars of the growers at this time would prove a very interesting sight.

Prices are much the same as last week, with the exception of Beauties, which are up to \$35 for the best; prices of the larger teas range from \$5 to \$8, while the smaller roses can be bought as low as \$2 for fair Perles, while for the best stock \$4 is asked. There is quite a number of Kaiserin about, the best of which are very

fine; there seem also to be a good many seconds. This rose bruises very easily, and in this respect is not as good a shipper as some others. Carnations are very plentiful, much more so we believe than last season. The varieties that show up best at present are McGowan, Buttercup, Lamborn, Ophelia, Sweetbrier, Thos. Cartledge, Edna Craig, H. Keller, Portia, Freeman, Wilder and Daybreak. This last variety is often left on too long, and thereby loses that beautiful shade of pink that makes it so desirable; it should be picked at least three times a week.

Roman hyacinths and narcissus are very hard to sell; \$3 a hundred is highest for Romans and \$4 is outside price for narcissus. Valley is cheaper this year than ever, \$4 has been high, while plenty has been sold at \$3. For smilax no offer is refused, \$12 to \$15 is the asking price. Freesia has made its appearance, Atkinson & Son, of Edgewater Park, being first this season as they were last. Dannenbower, of the Darby Road district, brought in a very fine lot of chrysanthemums the past week, they were first-class flowers, mostly Mrs. Simpson, they were bought and "salted" for Christmas.

The streets have put on the regulation holiday appearance, many stores being decorated quite elaborately; one done by Graham is very attractive, having among other things a chime of bells swinging as if ringing. The street corners and sidewalks are lined with holly wreaths and branches, lycopodium and laurel wreathing and Christmas trees. Christmas time is a harvest for the colored folks who live in the Jersey woods, for a month or more before, they make wreaths and wreathing and about the 20th come to town to dispose of them; they prefer to sell at retail and seldom bother the stores to buy. The wholesale price of laurel wreathing is \$3 to \$4 per hundred yards. Holly wreaths \$10 to \$12 per hundred, lycopodium wreathing \$6 to \$8; holly \$3 to \$4 per case of 16 cubic feet. Some parties visited the Delaware district last season buying up holly, they provided the cases,

16 cubic feet, and offered the natives the large sum of 10 cents to cut and fill them up.

Longinette's team was defeated by only 9 pins in the 10-pin match Thursday night last; a little more enthusiasm would have done the business, as over 80 pins were gained in the last game, but the lead was too great. Charlie says the next match will be his sure. K.

#### Buffalo.

Last Tuesday evening saw a better meeting of the Florist Club than for many months just past. The resolutions introduced a month or two ago condemning the undue advertising of our business at funerals was taken from the table and after nearly every member had given vent to his views on the same was passed unanimously and ordered spread on the records of the club. Some of the charges were too shameful for us to believe that they ever (or "hardly ever") were practiced, such as printing one's business card on the back of a private card left to be attached to a funeral design. If such despicable acts have been perpetrated a mere vote of condemnation is altogether too mild for such miserable creatures. They are truly enemies to the business. The special feature of this alleged advertising, which the large majority wishes to see abolished, is the practice of attaching to the design your business card, on which is written the address of the people receiving the flowers. This unsightly business tag if not taken off at the door by the messenger who delivers the piece is too often left on. What a sight to see the remains of a dear departed one doing service as an advertising medium for half a dozen enterprising (?) florists. This same tag likewise does its advertising services at the cemeteries. Several of the older heads declared they never allowed a piece to go out of their establishment with a tag attached, but gave the messenger the address on a card which he could keep in his pocket, and their statement was not doubted. This is as it should be. It was deemed wise to keep this discussion out of the local press, but no objection to give it to trade papers was manifest. The secretary was instructed to send to the secretary of the Undertakers' Association a copy of the resolutions with a request "that if by accident a business card should be found attached to funeral flowers we would consider it a favor if they would remove it." Your correspondent believes that the passage of the resolutions and the discussion it provoked will bear good fruit, and for its agitation and earnest support we have to thank our venerable old war horse J. W. Constantine.

The high price of flowers at the holidays was the next subject. The majority thought it was an injury to the business, many people going without the luxury of flowers who would buy if their means allowed them. It was agreed that the law of supply and demand ruled the prices and if there was not flowers enough to go round on certain occasions the highest bidder would get them and "what are you going to do about."

Some of the younger members of the club thought our meetings too dry and monotonous and proposed that one month from date we have a "smoker." Thanks to New York for introducing the fumigating process. The idea was hailed with delight by the old heads as well as young, so a smoker we shall have. Mr. Bunyard, of Short Hills, was present and

told us how to conduct one, so it's bound to be a success.

Business grows better and there is at last some good sized weddings, dances, etc. in sight. There are enough flowers at present. Roses are getting fine in quality; violets are in good demand and very scarce. Store windows are looking gay with *Deutsche Perle* azaleas, poinsettias and cyclamen. We expect the usual good demand for greens, holly, etc. All hands are busy making up.

A call at a Cold Springs establishment one evening this week gave the writer an insight to the science of wreathing; seven men and boys tying and two chopping and preparing the greens. I was told the quickest worker (a lad) could make 10 yards of good wreathing in 11 minutes; that was record time, but his average for 10 hours was 40 yards an hour. W. S.

#### Chicago.

At the last meeting of the Florist Club there was quite a discussion on the use of foliage in floral arrangements and the necessity for a greater variety of foliage. It was shown that the growers for this market had rather neglected this demand, supplying but little outside of *smilax* and *Adiantums cuneatum* and *gracillimum*. A few send in some *Asparagus plumosus*, but the bulk of that used is shipped in from a distance. Though *Adiantum Farleyense* is considerably used and is largely called for, it must be imported from the east. The great value of croton leaves in giving an effective touch to arrangements was mentioned. Those used at the last exhibition came from Philadelphia. President Hauswirth spoke at length on the necessity for a wider range in material of this sort, and finally in response to a request he agreed to read a paper on the subject at the first meeting in January.

The committee appointed at last meeting to prepare resolutions expressing the sorrow of the club at the death of George Edward Thorpe reported and the resolutions presented were adopted by a unanimous vote.

The Florists' Exchange Pleasure Club, composed of a number of those who do business at the Cut Flower Exchange, has issued invitations to a reception and ball, to be held at Brand's Hall, Wednesday evening, Jan. 10.

Stollery Bros. at Argyle Park are growing some fine McGowan carnations. It certainly is a grand variety as seen here. The flowers are enormous, borne on strong stems, and lots of them too. But all the other stock here is looking fine also. Their violets are extra good.

Mr. O. P. Bassett of Hinsdale left last Monday for California, where he will probably remain for the rest of the winter.

Mr. Henry Holzapfel has gone to Washington with the World's Fair Bureau of Awards. He has charge of the horticultural division of the bureau.

This week began with a somewhat quiet market, though prospects are considered good for its close. Shipping orders have been placed for the holidays in a somewhat conservative manner, buyers evidently waiting until they could see the drift of the market. It is said that out of town retailers do not report so many advance orders as usual at this season. On Tuesday prices remained much the same as last week, Christmas prices not going into effect until Thursday. Beauties show an advance, they being extremely scarce, particularly in first grade, which ranges from \$3 to \$4 a dozen. Meteor brings \$8, and is in high

favor; \$12 to \$15 is the advance Christmas price for this rose, which seems to keep the highest in its class.

Carnations are not plentiful, colored ones being particularly scarce. Chrysanthemums are not out of the running even yet; common are quoted at \$2 to \$4, while fancies for Christmas are offered at \$8 to \$12; they are mostly white or pink, with but few yellows. Some very nice mignonette is coming in and sells out clean at \$4. Violets continue scarce; Romans and paper white are very plentiful, and there is an ample supply of valley.

Christmas greens naturally hold a good share of attention and the fakirs are busy with them at the street stands. The holly is extremely good and well berried. Mistletoe is not noted in any quantity. The imported mistletoe doesn't seem to make any figure in the Chicago market, almost all of the stock being the American plant.

#### Lancaster, Pa.

Lancaster is an interesting town, a town with a history, famous for its quaint old houses and historical landmarks, among which is the mansion of the late President James Buchanan, famous also for its hospitality, and last, but not least, famous as the home of the AMERICAN FLORIST'S versatile carnation correspondent, Albert M. Herr.

The hospitality of the town, floriculturally, is vested in the person of Mr. H. A. Schroyer. Mr. Schroyer told the Philadelphia florists once at a club dinner that Lancaster was a famous place for good eating and he has been endeavoring ever since, with most wonderful success, to prove the truth of his assertion.

A trip among the greenhouses discloses the fact that there is a very large acreage of glass in Lancaster County, all the various branches of the industry being well represented. A. M. Herr's establishment is devoted almost exclusively to carnations, as would naturally be expected from such a carnation enthusiast. Here one may feast the eye on 8,000 Daybreaks all in fine condition and blooming heavily. Besides Daybreak all the popular pink varieties, such as *Grace Darling*, *Aurora* and *Edna Craig* are grown. A new candidate for favor in this line is *Annie Pixley*, a seedling raised by Mr. Frank Kohr of Lancaster. In color it is almost identical with the beautiful *Grace Battles*, is perfectly healthy apparently and is remarkable for the length of stems, which run from 18 to 24 inches.

Frank Kohr, the raiser of *Annie Pixley*, is also largely in carnations and they are in promising condition. Geo. W. Schroyer, father, and H. A. Schroyer, son, have a fine range of glass which they manage together, roses and carnations being staple crops. Mr. Schroyer is particularly proud of his Chinese primroses, which are a specialty with him.

The Bitner estate has been divided, a portion of the houses being run by J. W. Bitner & Co., and the rest being leased to Mr. B. F. Barr, a young man who is making good success as a beginner and whose roses and carnations look most creditable.

The immense establishment of A. D. Rohrer & Bro. has been further enlarged by the addition of a range of modern houses, in which violets, carnations, roses, lettuce and tomatoes are the main crop. The cultivation of tomatoes and lettuce seems to be an almost universal practice with the Lancaster florists.

The establishment formerly conducted

by Willis Rohrer is now run by Lemon Landis. Here the roses, carnations and violets look well also and are thickly interspersed with the inevitable lettuce.

When one gets to the old Buchanan mansion he finds in the grand beauty of the landscape, in the associations connected with the place and in the genial company of Mr. Geo. B. Willson, the florist who now owns the estate, attractions enough to make him forget the passage of time and almost envy Mr. Willson his happy lot. Mr. Willson is an ardent old line democrat and can show many interesting relics of the former owner of the place, which have to him a double interest, but he finds time to look after a good sized range of glass where healthy carnations predominate, and which of course he proposes to add to in the near future.

#### St. Louis.

The Michel Plant and Bulb Co. will hold an auction sale of flowering and foliage plants on the 18th inst.

Trade for the past week has been slow, the weather being quite warm and stock plentiful. Should a severe cold snap appear during the week preceding Christmas it would have the effect of shortening stock considerably, as several shippers report the warm weather at present is about cleaning the crop off that was expected to last until the holidays.

As far as present appearances go the holiday trade will be way below that of ordinary years. As yet very few inquiries are being made regarding stock, and the orders that are being talked about are at one-half the usual price, say Mermets and Brides from 12 to 15, Kaiserin and Testouts 15 to 20, Perles, Woottons, etc. 8 to 10. It is hoped, however, in all quarters, that it may show unexpected strength as the time approaches.

On Thursday, the 14th, the regular monthly meeting of the Florists' Club was held. This is the first meeting since the flower show and a final report was made in regard to its affairs. The report showed that the deficit amounted to just \$198.08, which will be paid by the Florists' Club. Routine business was transacted and an informal discussion held in regard to the expense connected with the rental of the hall, the general idea being that too much has been paid for this item, we having paid during the present season a rental of close to \$800. No other hall could be suggested, however, which would answer the purpose, so the outlook for a change for the better is slim. We were pleased to have with us during the meeting Mr. M. A. Hunt, who was in the city for a short visit, and were edified by his remarks upon the unexceptional success of flower shows during the past season and also upon the great advantages derived from a well conducted show, both individually and generally, as well as the better knowledge and understanding it gives us of our fellow workers.

The second series of games has been commenced by the three teams composing the bowling club. Team No. 1 having defeated team No. 2 at the last meeting. As much interest is manifested as ever and the struggle for leadership will be close. The two medals authorized by the club have been procured and presented to their present wearers. There is to be offered in addition a medal by the manager of the alleys for the man having the highest score in the series, to become personal property after having been won three times in succession. R. F. T.

## Washington.

Trade is picking up quite a little; since Congress convened society people are beginning to entertain, and at the majority of the luncheons and dinners more or less floral decorations are used. The fashion of renting palms, rubbers, pandanus and aspidistras by the month for decoration of private houses is growing. The plants are replaced with fresh ones about every six weeks by the florist having the contract. Some of our florists do quite a good business in this line, and they say it pays in more ways than one, for they always get the order for the floral decorations for entertainments given by the parties thus furnished with plants.

Flowers are improving in quality and quantity and are bringing fairly good prices as follows: La France, Perle, 6; Bride, Mermet, 8; Beauty, 40; Wootton, 10; carnations (very fine) 1.50; violets (poor and scarce) 1.25; Romans, 2.50; valley, 4; paper white narcissus, 2.25; smilax, 25; asparagus, 50. Some fine Kaiserins are bringing as high as \$5 a dozen. Trade is quite up to last year and prices about as good.

C. LESLIE REYNOLDS.

## Worcester, Mass.

Trade, like the ragman, has been picking up a little, and although the sales are far behind those of last year we are all thankful for what we do get. We had a very good Thanksgiving trade considering the hard times, and the prospects point to a lively business during the holidays.

Prices are fair and stuff good and plentiful. Lange brought in the first single and double Von Sions December 8, and Roman hyacinths and paper white narcissus are plentiful and of first quality. Plenty of good Mermets, Brides, Perles and Gontiers are coming in and are bringing from two to three dollars a dozen. Carnations are fine and lots of them. Daybreak is very popular and is truly a fine thing. Carnations are selling for fifty cents a dozen. Violets are coming better and in larger quantities, of good size and color. We are getting \$1.50 a hundred. Home grown Harrisii have made their appearance and received a warm welcome, as those shipped here showed the marks of too much forcing, being very thin and having no keeping qualities.

SEEDLING.

## Germantown, Pa.

The annual meeting of the Germantown Horticultural Society was held in Association Hall on December 13, and the following officers were elected for the ensuing year; President, B. H. Shoemaker; vice-presidents, Jonathan Jones, Chas. J. Wistar, Albert Woltemate; secretary, Geo. Reddles; Treasurer, Walter Cliffe.

A resolution was adopted limiting the number of exhibitions next year to two. The secretary reported that the chrysanthemum show in November last was the best ever given by the society, but the attendance was disappointing.

MIDDLETOWN, N. Y.—A stranger calling himself G. B. Richter, a German, recently leased a florist store in Middletown, avowing his intention to carry on a florist business. He was plausible and smooth and succeeded in inducing several business men to cash his check for amounts from \$20 and upward and then disappeared. The checks were on the National Bank of Paterson and proved worthless.

SPRINGFIELD, Mo.—W. A. Chalfant added a new house 50x18½, Hitchings iron frame construction, last September. He held a chrysanthemum show November 7 to 10 that was attended by over 2,000 visitors. He displayed about 150 varieties including The Queen, Niveus, Golden Wedding and others. He has a golden yellow sport from Jos. H. White that is identical with that variety except in color.

GRAND RAPIDS, MICH.—The Central Floral Co. is a new firm, composed of C. F. Bennett and J. A. Creelman, that started into business here last summer. They have 8,000 feet of glass, heated by steam, and with all modern improvements. Mr. Creelman was formerly with the Grand Rapids Floral Co.

KANSAS CITY, Mo.—The Humfeld Floral Co. has added four new houses the past season. All are heated by hot water. They have also opened a store at 1010 Main street.

MANSFIELD, O.—Ed. Berno, manager of Berno's Greenhouses, will erect two new houses 16x40 the coming spring.

GREENWOOD, IND.—Bertrand L. Smith has moved his plant from Whiteland to this place with increased glass.

WHITEHALL, ILL.—Jas. Brown, Jr., has sold his business to P. W. von Bockelmann who will continue it.

## 150,000 PEARL TUBEROSES

Orders booked now for selected bulbs (4 to 6 inches in circumference) of above at \$8.00 per 1000; \$7.50 per 1000 in 5,000 lots.

SPIRÆA JAPONICA, - \$3.75 per 100  
GARDINER'S XX BERLIN LILY OF THE VALLEY PIPS, \$20 per case of 2,500

## English Mushroom Spawn.

Our fourth importation this season of above just received in splendid condition, \$7.00 per 100 lbs.

insertion in the issue for the following Thursday.

Address THE AMERICAN FLORIST CO., Chicago.

WE HAVE RECEIVED from Mr. Harlan P. Kelsey, Linville, N. C., a box of galax leaves and Leucothoe sprays. The leaves were very handsome, some deep green and others rich bronze in color. Their usefulness is now pretty well recognized. The specimens sent us were certainly very fine. The Leucothoe sprays were very pretty wands of foliage 2½ feet long, the leaves a rich green.

## The Seed Trade.

## AM. SEED TRADE ASSOCIATION.

W. ATLEE BURPEE, Philadelphia, president; A. L. DON, secretary and treasurer, 116 Chambers street, New York. Next annual meeting second Tuesday in June, (will probably be held in Toronto.)

## Yes, They are a Little Rattled.

Recent comparisons of estimates made by leading seedsmen on onion seed lists show a variation in prices on an order of less than 20 pounds to be over 100 per cent, one firm offering to fill for about \$15, while another firm named a price of \$30, and still another \$20. The present accepted wholesale price on the same stock at this date is \$23. A good healthy seed trust would come in handy for some of the boys just now.

DANIEL BATCHELOR of Utica, a member of the Niagara Falls Reservation Commission, and director of the United States Agricultural Experiment Station at Geneva, died suddenly in the New York Central depot in Utica. He had just returned from a trip to New York. He was born in England in 1818, and came to America in 1839. He conducted a seed store in Utica for thirty years, retiring a short time ago. He was widely acquainted among the farmers of the state.

FIFTY THOUSAND  
PEARL TUBEROSES

## F. O. B. NEW YORK.

We offer selected bulbs of above, from four to six inches in circumference, for shipment early in December, at \$9.00 per 1000. Orders accepted subject to being unsold.

## SWEET PEAS, California grown.

We are headquarters for California grown Sweet Peas, and parties desiring to contract for their requirements for season of 1894, will do well to write for prices.

WHY do so many Canna growers say they have a yellow Canna "As good as Florence Vaughan?"

Robert Craig, Chairman of Committee of Awards in Floriculture at World's Fair, says, Dec. 6, 1893: "Florence Vaughan has proved to be all that was claimed for it; it is still far superior to any Yellow Canna in commerce."

C. C. ABEL & CO., P. O. Box 920, New York.

Rooting Cuttings of Conifers.

"The latter part of December and January is the very best time in the year in which to root conifers from cuttings," said Jackson Dawson."

"For what reason?" inquired the AMERICAN FLORIST.

"Well, you see we are apt to have warm weather at the time when many growers make their cuttings, that is in September and October, and many cuttings are lost. They have not time to callous. With steady cold temperature they seem to get just in good condition to make a nice callous and then as soon as you put them in growing heat they start off at once. I root Abies concolor, Picea pungens and other difficult species in that way with a very small percentage of loss."

THE AMERICAN FLORIST and Gardening together to one address for \$1.75. Send orders to the American Florist Co.

PLEASE mention the AMERICAN FLORIST every time you write to an advertiser.

New Yellow Coleus.

The Golden Crown is a perfect beauty, On the lawn will do its duty; Its color, style and growth are fine. 'Twill make the landscape fairly shine. Fine stock now ready, \$5.00 per dozen; (Golden Bedder we don't want you).

The Verbena of yore was a modest wee stymie. Scarcely as large as a silver dime. Until Henderson, the great floral artist, Produced them as large as a silver quarter. Still we're progressing, florists may laugh, Gibson shows them as large as a silver half. P. S.—We have a fair stock of the progressive seed and will gladly supply it to all who may need. 500 seeds 50 cts.; 1 1/2 oz. \$1.00. 500 seeds 35 cts.; 1/2 oz. 60 cts. Post free.

Gibson's Pansies need no praisers. They're such beautiful, scented blazers, 500 seeds 35 cts.; 1 1/2 oz. \$1.00; nice stocky plants 50 cts. per 100; \$4.00 per 1000.

Dreer is the Petunia king, His elegant strains are just the thing. Double hand hybridized, per 500 seeds 75 cts.; 1000 seeds \$1.25. Plants and rooted cuttings, flats. Field-grown gold and silver variegated Vincas \$5.00 per 100. Snow Crest Daisies, nice young plants, flats, \$5.00 per 100. Cash with order please.

Address J. C. GIBSON, Woodbury, N. J.

GEO. HANCOCK, Grand Haven, Mich.

CARNATIONS.

Fourteen houses planted to carnations, all of which are under my own special care and supervision, so that I can guarantee all the cuttings sent out as first class.

The varieties I grow are Daybreak, Lizzie McGowan, Silver Spray, Grace Darling, Aurora, Portia, Edna Craig, Fred. Dorner, J. R. Freeman, Golden Triumph, Annie Pixley.

Not a big list but a mighty good list. Come and see them grow, or write to me for prices, stating how many you will want of each variety and when they are to be delivered. I think we can make a deal that will be satisfactory to us both.

L. B. 496.

ALBERT M. HERR, LANCASTER, PA.

COME AND SEE THE NEW AND BEAUTIFUL FANCY CARNATION "HELEN KELLER" GROWING AND BLOOMING.

It is Healthy and Productive. In form, size, and elegance nothing in sight can approach it. It is the greatest novelty among Carnations up to date.

Listen to what Mr. Robert Craig says about it:

"I am charmed with Helen Keller Carnation; it is very distinct and fascinating—will undoubtedly be very popular."

Two houses filled with this sterling new variety are worth going many miles to see: One at Summit, N. J.; the other at Wyndmoor near Chestnut Hill, Phila., where inspection is invited.

Flowers only for sale at present, \$1.00 per dozen; \$6.00 per 100.

EDWIN LONSDALE, CHESTNUT HILL, PHILA.

VERBENAS, stock plants.....\$2.50 per 100 HYDRANGEAS, Easter forcing stock.

" 4 1/2-inch pots..... 10.00 per 100 strong..... 25 to 35 cts.

CYCLAMENS..... 6 to 10 cts. REX BEGONIAS, 3-inch..... 6 cts. SWORD FERNS, 2-inch..... 8 cts. GREVILLEA ROBUSTA, fine plants, 15 cts.

MCCREA & COLE, BATTLE CREEK, MICH.

ANNIE PIXLEY.

From a commercial point of view right now at Christmas I can say for this carnation that it is the finest I ever grew. With only ordinary culture I can cut stems twenty inches long, the flowers are large, the calyx has never burst, the plants are more than ordinarily strong and healthy and the color is just right, one of those pleasing shades of light pink that people can't help but buy.

Awful strong claims to make but if you will try it you will have to acknowledge they are none too strong.

Orders will be filled in rotation beginning now, at \$12.00 per 100; \$100.00 per 1000. 25 at 100 rates; 250 at 1000 rates. As next year is another year, I do not intend to ruin my stock by over propagation to fill orders. Be wise.

Terms cash before shipping, or C. O. D.

Hamilton's Patent Sash Lifter.

The best thing of the kind ever invented for greenhouse use. Send for description and price list.

BAY STATE HARDWARE CO.,

272 Freeport Street, BOSTON, MASS.

## Phyllotænium Lindenii.

Replying to the question asked by P., Phyllotænium Lindenii is a stove aroid and enjoys liberal treatment in regard to heat and moisture. The soil best suited for this plant is composed of about equal proportions of rough fibrous loam and coarse peat, with the addition of some sand. Put plenty of drainage material in the bottom of the pot, and do not press the soil too firmly. Give a night temperature of 70°, and only a light shading during the winter, but in summer more shade and heat are admissible, and during the latter season well established plants will be benefitted by a watering with weak manure water at intervals of about ten days. W. H. TAPLIN.

## Greenhouse Thermostat.

Will some reader of the FLORIST tell me where I can get a reliable greenhouse thermostat? The three that I now use have to be set by guess and are liable to get out of order. What I want is a thermostat that can be set accurately to a certain degree and that can be depended upon. DAVID CLIFFE.

Germantown, Pa.

## Assessing Greenhouse Property.

ED. AM. FLORIST:—I would like to hear from florists in other cities as to methods of assessing greenhouse property for taxation—I mean to ascertain its taxable value. An exchange of experience in this matter might prove of considerable value to all. E. H.

## Swainsona

Business this week has been very much like the weather, very unsettled, sometimes below zero, at other times about the average for the time of year, but never above par. Times are bad and money is scarce, but florists' stores increase and multiply. Mr. J. H. Dunlop, wholesale grower, is the latest; he has opened a large store on Yonge street, and it is reported that he is about to open another on King street. There may be enough business to keep them all going until spring, but in the summer it is likely to be a case of "the survival of the fittest." I don't want to be pessimistic: I am sure I wish them all well, but there is a limit and in these hard times the limit won't expand much. It is bad taste to croak at Christmas time, I suppose, but I thought it better just to mention these things now in case three or four more stores should open before I wrote my next notes.

Chrysanthemums are now almost a thing of the past, and what there are left look, with few exceptions, very, very tired. I noticed a vase of good blooms of late sorts in Dunlop's window yesterday.

Carnations are plentiful and there is a good demand. Daybreak has the call and never gets left. E.

Valuable Discovery of the 19th Century.

SILVER MEDAL AWARDED

CALIFORNIA STATE FAIR OF 1890.

This preparation is a sure destroyer of the **Scale, Woolly Aphis** and **Insect Pests** of any and all descriptions. It may be as freely used in the conservatory, garden and greenhouse as in the orchard or vineyard. It is non-poisonous and harmless to vegetation when diluted and used according to directions. It mixes instantly with cold water in any proportion. It is **Safe, Sure** and **Cheap**. No fruit grower or florist should be without it.

Send for Circulars and Price List.

**R. W. CARMAN**, General Agent,  
291 AMITY STREET,  
FLUSHING, Queens, Co., N. Y.

## Increase Your Business

by fostering an interest in plants and flowers among the people in your vicinity. You can best do this by getting subscribers to

### GARDENING . . .

which tells people how to get the most satisfaction out of their gardens, and stimulates them to enlarge and extend their gardening operations.

**\$1.00 A YEAR** is the subscription price of this paper, which is issued twice a month, is handsomely and truthfully illustrated, is thoroughly practical, absolutely free from wind and gush and grinds no axes for anyone.

**SPECIAL LOW RATE** to florists who will act as agents. We want an agent in every city and town in America. Write for terms now to

THE GARDENING CO.

Monon Building, CHICAGO.

## THE CHAMPION Automatic Ventilator.

The cheapest, easiest to operate, and by far the best machine in the market. Don't buy a Ventilator until you have seen my illustrated descriptive circular, which will be sent you free, giving prices, etc. Also Champion Soil Pulverizer and Sifter.

Address, **E. E. WOLF**,  
Box 114, SPRINGFIELD, O.  
Mention American Florist.

THE PERFECT DRAINAGE

## BENCH TILE

For circulars, etc., address

**W. P. Wight**, Upland Green Houses,  
Send your business card. MADISON, N. J.

## CATALOGUE PRINTING. ELECTROTYPING.

Done with expert ability for Florists, Nurserymen, Seedsmen. Write to

THE CHRISTMAS TRADE for 1893 was decidedly a curiosity when compared with previous years. The warm, unseasonable weather seems to have prevailed uniformly over most sections, and this unusual element makes it rather difficult to make correct deductions from the facts given in the various reports, but it is evident that production has now practically caught up with the holiday demand in the large cities at usual winter prices, and in the future, except in cases of unfavorable weather and on certain fancy stock that may be popular at the time and in limited supply, holiday prices will average nearer those that have prevailed at Easter. But it is equally certain that the only lalling off in amount of cash returns—if any—is due to the financial depression recently experienced. In other words if Christmas prices were no higher than usual winter rates the people would quickly take all the flowers now produced at the holidays—and more.

Chicago Rose Notes.

Bowmanville is quite a greenhouse center. In and around this little village are upwards of a dozen establishments of more or less note.

The largest of this group is that of the Reinberg Bros., Peter and George, who have made rose growing their specialty. Last spring there were added to this already extensive plant a range of 20 new houses each 20x94, built on the new plan, with main exposure to the north, and it is in these houses we are naturally most interested. The day of our visit was unfortunately a very stormy one, in fact a blinding snow storm was raging and we could not judge satisfactorily the relative light admitted to these and the old style houses, but Mr. Peter Reinberg, who showed us through the place, is quite positive that at this season of the year when the sun is low the difference is very marked and decidedly in favor of the new style.

"You should have seen these houses yesterday when the weather was extremely cold, 2 below zero, at 10 a. m. the glass was covered with frost, but just as soon as the sun peeped out a few moments the glass on the south side was clear and the houses flooded with light. You see that the sun is just now, during the short days of the year, at the right angle to get the very best effect on the glass; besides as the pitch of the roof is steeper on the south side the snow is not so apt to lodge on the glass and leaves it comparatively clear."

"What drawbacks, if any, do you find in this style of house?" we asked.

"Well, there is a season in the fall of the year when I don't get the effect of the sun as I could wish. It is the time when the sun is just high enough yet to strike the ridge of the house or just glance over it. At this time the houses are darker than I could wish, but as a rule we have bright and sunny days at this season of the year, and it does not matter so much. The main points of advantage I find that in summer (and there is no doubt about this) the houses can be kept much cooler, which is a great advantage to the young stock, and now in the early part of winter when the days are short and often cloudy I find that every hour of sunshine tells in its favor. Yes, I certainly like these houses very much."

Of the above houses seven are planted

with La France and four with Albany. These plants did extremely well all the fall, but at the present writing several houses are badly affected with black spot, the effect of overwatering, so Mr. R. thinks. Next we find two houses of Madame Pierre Guillot, which are a failure. The flowers are all bullheads and crippled. "I have tried this rose for the last time," remarked Mr. R. "These houses are ever with good light and plenty of heat and yet you see the result. During summer and early fall the blooms were satisfactory, but I can't do anything with it in winter."

The violets, five houses, have done nothing as yet. The plants are free from disease but show little bloom and few buds. Mr. Reinberg can't account for this, as the stock was handled the same as in former seasons when the blooms grown here were as good as any that went to market.

Entering another range of houses, mostly built on the long span to the south plan, we notice some half dozen houses, 20x120, of Beauties that are looking fine. The plants are mostly grown on raised benches, but we observed one house in particular with one lot on bench and the other in solid bed. The latter look the most thrifty, but examining more closely we find a great deal of blind wood, much more than on the benches. "Yes," remarks Mr. R. in response to a question, "I find that with Beauties I get better results from those planted on benches than from solid beds; in the winter months especially I cut more blooms off the former, besides I find that the blooms develop in better form."

Brides and Perles are looking well, but Mermets are not so good. "Bridesmaid is bound to take the place of this rose," Mr. R. remarks. "I am propagating all the stock I can and next year will grow it on a larger scale. Caroline Testout I also regard as a fine thing. Wootton I shall give up entirely. I have devoted a number of houses to this rose for years with rather indifferent success. Meteor is the red rose for me."

A set of 4 houses in this range look very good; there are some crippled flowers and some blooms off color, but not many. These 4 houses were rebuilt last summer on the same plan as those first mentioned. The Meteors are all planted on benches, while most of the Perles, Woottons, Brides, Gontiers and Mermets are in solid beds. In Mr. Reinberg's opinion there is very little difference in the result in either mode of growing with these varieties, but if he should have to decide between the two he thinks he would prefer the benches. "Yes, I plant young stock every year in solid beds as well as on benches."

A few blocks west of Reinberg's is the establishment of Mr. H. . . . . Mr

Bauske has the reputation of knowing considerable about rose growing. The stock certainly does look to be in tip top shape. Every plant in the whole range of houses was carried over from last year. Mr. B. does not, however, make a practice of growing his roses for two seasons, but anticipating a ready sale for his blooms for all of last summer on account of the Fair he decided to take his chances for the following winter, and up to the present time is more than satisfied with the results. Of course to keep the plants (all on benches) in a healthy and growing condition required constant and intelligent attention.

A bench of Meteor in the first house is the best we have seen around Chicago this season. The blooms are well formed and of good bright color. Brides also look very fine and are covered with flowers and buds, as also do the Mermets, although these are rather poor in color. Wootton is rather indifferent; the blooms, though fairly good form and color, are small. Mr. B. says he is going to discontinue growing the variety in favor of Meteor. Perles are unusually fine, although we noticed here and there a bullhead. A fine house of Gontiers is just in for the holidays, blooms of fair size and good color.

We find in this establishment two houses of fine Beauties, and this is what Mr. Bauske says in regard to them:

"I intended to plant my houses of Beauties with young stock and accordingly propagated a lot of young plants. These were doing nicely up to nearly the time for planting, when, through carelessness of one of my employes, the plants were neglected, black spot attacked them and they were ruined. I then determined to replant my old stock, but I had not enough to fill the space intended, so I took some stock of last season from one of my neighbors, who intended to throw it out, and filled my beds. Well, in all my experience as a rose grower I never saw a finer lot of Beauties than these proved to be."

The first crop in fall was certainly magnificent. We were fortunate enough to see them when at their best—stem up to the roof, blooms large and fine color. The second crop is now on and the plants are again covered with blooms, but the stems are much shorter, though still of sufficient length to make the flowers saleable.

Mr. B. is keeping an account of his cut every day and reports that up to the present time he is considerable ahead of last season, with quality of bloom fully equal to last year's cut, which was produced from young stock. We shall report at the end of the season and compare the net result of young against two year old stock grown on benches. X.

#### Crossing Roses.

Some one inquired if a cross could be effected between the Perle and Meteor so as to get the Perle habit and Meteor color.

It seems reasonable to expect that something grand would be produced from the combination of two such fine varieties, but seedling roses are the most perverse things imaginable, going back on our expectations and being everything except what we want. Here they come, some single, some small, half double, dull colors, weak and strong growers, and if any are hybrid teas there will be the "lame, halt and blind," a pretty looking set. To select one even half as good as either parent would require a powerful pair of spectacles such as some people use

when describing novelties. We may imagine that certain crosses would bring forth something wonderful; the only way to know what they will do is to try them. This would be a comparatively easy matter if all varieties had perfect flowers.

A perfect rose consists of a circular cluster of pistils surrounded with a ring of yellow stamens, five petals, five sepals, with an ovary for the base. Compare this with some of our finest roses; take a Mermet for example; here we find most if not all the stamens transformed into petals; look in the center and you will see a cone shaped bunch of a light green color; this is another curious transformation in which the pistils are changed into sepals, and sometimes when the flower is very large into imperfect flower buds. I have counted as many as five or six of these secondary buds inside one rose. Often the center will be made up partly of pistils and partly of sepals, these intermixed in varying proportions, no two flowers being exactly alike; occasionally there will be enough pistils to set seed, and semi-occasionally a flower will have its full quota. These peculiarities are not confined to the Mermet, but are common in all the largest teas, their development depending on the state of growth of the plant. As the flowers increase in size the stamens and pistils diminish in number, until the flowers are utterly useless as seed producers.

Once in a while a rose comes along apparently perfect enough to make plenty of seed, but absolutely refuses to do anything of the kind. The Perle I have tried in season and out of season every month in the year for over six years and have never succeeded in obtaining a seed. There must be some internal derangement not easily seen by the unassisted eye. It may be that the style is solid or something wrong with the ovule; dissected under a microscope its deficiencies might be discovered.

In the animal kingdom hybrids are not capable of reproduction; may we not expect this law to extend to the vegetable? At any rate hybrid teas, which are produced by crossing distinct species, seldom or never make seed that will germinate. The Wootton is said to be a hybrid tea, but so freely does it make perfect seed that there may be some doubt as to its being a true hybrid, unless it is the exception that proves the rule.

To cross a Perle and Meteor appears to be a rather difficult if not impossible operation, though perhaps it might be done indirectly by crossing a yellow rose with the Perle and a red one with the Meteor; this would give two sets of seedlings, one set being half Perle and the other half Meteor. The best from each set could be selected and crossed together. And they also might be crossed each by its own pollen parent, which would make our next seedlings, one set three-quarter Perle and the other three-quarter Meteor. Then the best of these could be crossed together as before.

What sort of flowers might be expected from these seedlings? Though the Perle and Meteor are such fine varieties, it is more than likely that their brother and sister seedlings were poor affairs, but for some unknown reason the Perle and Meteor sported into something very superior to the average quality of the set of seedlings in which they were produced. If this is the case, must we not consider the Perle and Meteor sports rather than pure breeds? That is to say they will not reproduce themselves true from seed, as well bred strains of primula and cineraria do.

The probabilities are that our seedlings would resemble in a greater or less degree the worthless brothers and sisters of all the varieties used, or some of their poor relations, still there is a possibility that some enterprising youngster might sport above the average of his set and surprise us by being even superior to his parents.

This seems to suggest that if by repeated crossing and careful selection or by any other means we can raise the average quality of our seedlings when the enterprising fellow does come along he will have a higher average to start from and consequently sport into something correspondingly more magnificent.

RICHARD BAGG.

Bridgton, N. J., Dec., 1893.

**HYBRIDS IN BOXES.**—The plan of forcing hybrids in boxes is in favor with Mr. Edwin Lonsdale, Chestnut Hill, Pa. Being able to move them at any time to any place that may be desirable is a great convenience.

Carnation Notes.

**RUST.**—This is the carnation growers' bugaboo. It behooves every grower of carnations to acquaint himself with rust so that the day it puts in an appearance on his place he can proceed to exterminate it. No one can afford to neglect his stock and allow it to get the better of him, and above all no grower should propagate from stock that has a single spore of rust on it.

Mr. Halsted has forestalled me on this phase of carnation culture and I think has given us about as practical and common sense a view of it as I have yet read. The dire effects of rust have been so magnified and ably illustrated that many have conceived the idea that if the rust gets on a plant or two they might as well give up carnation culture. Experience has taught us that while we can not afford to let it get a start on our stock we need not give up in despair if we find a little on the place. The places where you will not be able to find a little are few and far between; at least I have not found many this season.

The first time I saw rust it was on a batch of cuttings I had procured of a new variety. A few weeks after they were potted up seeing that the skin on a few of the leaves was hursted and a dark brown powdery substance growing therein I immediately wrote to the party who had sold me the stock and wanted to know what this new disease was they had sent me and a good remedy for the same. The reply came: "Oh, that doesn't amount to anything; they will grow out of it all right." What little knowledge I had of fungoid disease led me to keep them separate from my other stock and they were planted that winter in a separate house, but instead of growing out of it they seemed to be growing into it, and I came to the conclusion that the best thing I could do was to pull them out and burn them. This was done with all but one variety that was so good I could not give it up. On this I used the ammoniacal solution of carbonate of

FIRST PRIZE VASE OF FIFTY ROSES AT THE TORONTO SHOW. EXHIBITED BY  
JOHN H. DUNLOP, TORONTO.

copper so strong that it killed all of the foliage and the young branches; afterward these plants sprouted out and I used the new growth for propagating, and from that same stock up to this day I have been propagating without any sign of the rust.

I fully agree with Mr. Halsted in saying that if you find a few plants in your house it is best to pull them out at once and burn them. But if you should happen to find your whole house more or less affected and do not have some other good use for the house it would certainly be poor policy to pull the whole house out and get nothing from it. As an illustration of this I will cite a house up the state that came under my notice. It was a house of Silver Spray and about as badly affected as anything I ever saw. After Christmas some boys were employed to pick the rusty leaves off; this did not cure the rust but it checked its progress considerably and the finest crop of flowers, both as to quantity and quality, that the party ever grew, was pulled from those plants.

Some varieties are claimed to be rust proof, and up to yesterday I thought so myself, but one lives to learn, and I learned that Daybreak, which I always upheld as being absolutely rust proof, would take rust along with the rest. I was visiting at a place where a rusted variety was planted alongside of Daybreak, and there were a few places where the rust had taken hold on the Daybreak. Other varieties are claimed to be rust proof, but I have no doubt that with very hard coaxing they would take it also. It would certainly be very nice if we could establish a race of carnations that would be abso-

lutely proof against rust, and I have no doubt that with very careful selection it can be done.

Some growers say that varieties that were badly affected with rust last season are almost free from it this season without having received any special care. Others who did not have any rust on their place last season and did not buy plants from any one have it this season. It looks as if we were all bound to get it at some time or other and about the best we can do is to make what we can out of a bad bargain. We will learn how to handle this rusty stock and at the same time to get rid of it, let us hope, in a few years' time. Some claim that fomite will rid the plants of it; others that the various formulas of Bordeaux mixtures will do the same; for myself I have found nothing that would entirely rid the plants of it without killing the foliage. If any one knows of a good cure he will confer a favor on all carnation growers by publishing it.

ALBERT M. HERR.

#### Carnation Helen Keller.

During a recent visit to the establishment of Mr. Edwin Lonsdale, Chestnut Hill, Pa., I noted many interesting seedling carnations. Far and away the best of these is Helen Keller, named after the wonderful young deaf and dumb girl. The plant is of robust growth, bearing large, well formed flowers on long, erect stems. The color of the blooms is somewhat similar to that of Chester Pride, being white with pink dashes, and it is very fragrant. Mr. Lonsdale has a whole house of this seedling, but he does not intend offering it for sale until the spring of 1895.

An idea which is popular here is to stake carnations by means of a wire rod bent like a croquet hoop. This gives each plant a firm, double support and is very neat in appearance.

JOHN WELSH YOUNG.

**CARNATION NOMENCLATURE.**—We have received from Mr. A. M. Herr, chairman of the committee on nomenclature of the American Carnation Society, a copy of a pamphlet the committee is sending to carnation growers in an endeavor to gather together for a report to the society at its coming meeting in Indianapolis all the information possible regarding the behavior of the different varieties in various sections of the country, in solid beds and raised benches, in light and heavy soils, and to make the official list of varieties full and complete. To accomplish the above the list of varieties now recorded has been printed with a blank space after each one for the entry of notes regarding same. It is to be hoped that every grower of more than 1000 plants of carnation will secure one of these blanks, fill it out with his comments and return same to the committee before January 20. Blanks may be had by applying to the chairman of the committee, Mr. A. M. Herr, Lancaster, Pa.

#### Judging Floral Arrangements.

The judging of floral arrangements at the recent Chicago exhibition brought out several very important points that should be very carefully considered in making up schedules for future shows.

One of the most important seems to be a scale of points, if judging is to be done by this method. The scale used in judging the table decorations at our last show was as follows:

|                                             | points. |
|---------------------------------------------|---------|
| Adaptability for purpose intended . . . . . | 45      |
| Arrangement and effect . . . . .            | 35      |
| Quality of material . . . . .               | 20      |
|                                             | 100     |

It seems to us that by the above too much prominence is given to adaptability. To illustrate: Any arrangement, no matter how indifferent, providing it be either high enough or low enough not to obstruct the line of vision, would be adaptable and would under the rules score the full 45 points. This was shown to have been the case in the decisions of the judges. Thus almost one-half of the points are covered and the exhibitor has got to overcome the remaining 60 points by arrangement, effect and quality. Quality should not stand very high and 20 points are probably enough. But arrangement should in our judgement stand first, and we think that if the first two were reversed the scale would be more just. [This point seems well taken. While adaptability is essential it should not be given such weight as to pull into prominence an arrangement that possesses little in addition to this one essential. It seems to us that the better way would be for the judges to first bar out all entries that were not adaptable and then decide between the remaining entries on a scale of points covering merely color harmony, composition (arrangement), and quality of material. To our mind the first two should have about 40 points each and the last about 20 points.—Ed.]

Little if any dissatisfaction was shown by the exhibitors concerning the decisions of the lady judges. Had the scale been as indicated above the result would probably have been different.

How shall we construe the word "basket?" If our schedule reads best arranged

basket, what would be admissible? In our recent contest in the class for best arranged basket of chrysanthemums there was entered an arrangement in the shape of a vase, the flowers arranged to carry out the idea of a vase. Are we to call it a basket because the frame is made of celluloid or wicker work? We hold that no matter whether of glass, china, gold or other material, so long as the form is that of an urn or vase, and the arrangement is such as to carry out the idea, we are not warranted in calling it a basket.

Another instance was in the class for rose baskets. In this class a vase of celluloid and willow splints, three feet high, was entered as a basket. This was filled with long stemmed American Beauties and a beautiful "vase" it was, but would you call it a basket?

Again, we noted in the class for chrysanthemum baskets a boat. This boat had oars and was placed upon a mirror to represent the water. The arrangement inside the boat was kept clearly to the lines; no stretch of the imagination could possibly call it a basket, and yet it was not ruled out of this class, as the judges did not feel warranted in doing so for want of a proper definition.

It would seem that in future schedules there should be an exact definition of what the committee in charge considers a basket, that the judges may be relieved from the necessity of guessing at their intentions.

Another point: What constitutes a 24-inch basket? Is the measurement to be when filled or unfilled, and is it to be measured across or in height? These questions may seem silly, nevertheless the matter seemed rather difficult of decision on a recent occasion. And when a class calls for basket of 20 inches in diameter, and an oval basket is entered which way do you measure the diameter? The man who enters a round basket says the short way and the man who enters the oval one says the long way of course. The schedule should be so plain that it would be impossible for such discussions to arise. B.

#### A Horticultural Reminiscence.

In 1862, when *Lilium auratum* was first exhibited before the Mass. Horticultural Society, the late P. B. Hovey asked permission to take pollen from the flower on exhibition to experiment in hybridizing some of his fine collection of *Lilium speciosum*, including the beautiful seedling *Lilium Melpomene*. He was so successful that in 1876 the result, *Lilium speciosum Hovey*, was presented for the society's prospective prize, which was awarded accordingly in 1879.

Francis Parkman had several years before received a similar prize for *Lilium Parkmanii*, which was also a seedling, resulting from the hybridization of *Lilium speciosum* in some of its darker forms with pollen from the original *auratum* blooms.

We are thus shown some of the progressive steps in the development of modern horticulture. WM. H. SPOONER.

Jamaica Plain, Mass., Dec. 1893.

DO YOU WANT an alphabetical list of the chrysanthemums in commerce in America, with class and a brief accurate description of each one, and synonyms noted? You will find such a list in our trade directory and reference book.

THE AMERICAN FLORIST and *Gardening* together to one address for \$1.75. Send orders to the American Florist Co.

#### New York.

We have passed through the most remarkable Christmas weather on record. A whole week of warm and sunny weather, each day like a day in spring, is a rare occurrence in December. It has had the natural effect on the cut flower trade, that is, over-production, and consequently low prices and a lack of activity throughout. It could not have come in a worse year, for it is only a part of a very discouraging fall experience, and there is little prospect that the rest of the season will improve matters much. Those growers who have been looking forward to the holidays with some hope that they would realize something from their crops at that time to offset the unfavorable results of the early fall are plainly doomed to disappointment.

The trade in green of all kinds has been splendid, and must have proved very profitable to those retailers who have made any special effort in that line. Holly in all forms has never sold so well, and this in spite of the fact that there has been an unusually large quantity of very poor holly in this market. Wreaths of green in variety, balls of green studded with scarlet berries or bunches of scarlet immortelles and suspended by brilliant ribbons, have sold about as fast as they could be prepared. Decorative plants, singly, in celluloid pots or in collections in jardinières and fancy baskets and tied with the inevitable broad ribbon have also been in great demand. Ericas and white azaleas with magenta bows, ardisias with scarlet bows, cyclamens with white bows, fern baskets in white, with the handles decked with sprigs of holly and mistletoe, etc., were to be seen everywhere, and detracted the attention of customers from the idea of buying cut flowers, and the retailers from any thought for the morrow as far as securing cut flower stock by giving advance orders. The retailers were satisfied to know that they were making good profits on these other goods, and the weather was such that they knew they had much to gain and nothing to lose by quietly waiting and taking their chances on such cut flowers as they should require when the time should come. So but little stock was engaged in advance and the wholesale dealers found themselves badly at sea all along and unable to give any assurances or comfort to their growers who anxiously pressed them for promises.

The uncertainty had the effect of causing a few growers of the class who blame their commission man for all the setbacks and misfortunes the cut flower trade suffers to transfer their allegiance and their goods to other houses, a performance which the commission men regarded with serenity and which the growers regretted almost as soon as accomplished. But the troubles which are besetting the trade at present are not to be laid bodily at the door of any department of the business. As it is the growers and the wholesale dealers suffer together, and the retail dealer is the more fortunate.

Stored roses, carnations and violets were to be seen in more or less quantity everywhere, but the practice was not indulged in to the extent it has been in former years. When stored stuff made its appearance it was quickly recognized and received but scant attention. Some of the best growers sent their goods twice and three times a day, and thus did all they could to furnish only fresh and salable stock.

In the two or three days preceding Christmas there was but little extra

activity noticeable at the market or at any of the wholesale establishments, a totally different state of affairs from what has been the rule heretofore. The advance on prices of ordinary stock of any kind was not great, and was maintained with difficulty on anything except such things as American Beauty and Meteor roses and Daybreak, Buttercup or Helen Keller carnations, which are not in large enough supply to satisfy everybody, and which on this account or because of high quality can be depended upon to bring extra figures. Roman hyacinths were very badly overstocked, and quantities of them must have been lost. Violets, too, were unexpectedly abundant. Some growers spoiled their violets by soaking them with water in packing, and when received by the dealers the flowers were completely ruined. There were a good many single violets about, which came from Philadelphia. There were a few yellow daffodils and tulips to be seen, the former of fair quality for such early forcing, and the latter of no use whatsoever. *Harrisii* lilies were abundant with fair demand. *Smilax* could not be handled at any price. The final figuring up of Christmas trade in New York will be a disappointment to the growers and wholesale dealers generally, and fairly encouraging to the retailers, especially those who were willing to handle everything and to accept such orders as came their way, however small. It has not been a good time in which to be too independent.

#### Boston.

It is not unlikely that Boston has seen the last of big holiday prices on cut flowers. Certainly after this year's experience it will take an unusual amount of pluck and blind confidence on the part of any grower who will hold out for big prices on similar occasions in the future. Several causes have contributed to the remarkable, but not entirely unexpected, smash-up which has taken place. The weather is one cause. Instead of the customary Christmas temperature it has been just such weather as is seasonable for a late Easter, mild and spring like, and the roses and carnations have revelled in it. Another reason for the condition of the cut flower market is the unmistakable transfer of public favor from cut flowers to growing plants for holiday gifts, a result caused largely by the dissatisfaction with the prices demanded for cut flowers in former years.

The retail dealers will not suffer. It is upon the growers that the load comes, and to some extent upon the commission men. The retailers' profits on cut flowers in previous seasons have been necessarily small. This year they buy at their own price and all accordingly. They all report a tremendous sale of plants of all kinds. There have been some good azaleas in the market and for these the demand was extra good. Holly has sold as never before. The amount handled here this year was at least double that of any former season. Mistletoe was not very much in evidence, but what there was offered was of excellent quality, and of the English sort exclusively.

In common with all other industries the cut flower trade has been feeling severely the effects of the prevailing business stagnation throughout the fall, and all through December prices have been terribly low, and with a supply in excess of the demand, notwithstanding the fact that the weather was steadily severe and such as to retard production of blooms.

SECOND PRIZE VASE OF FIFTY ROSES AT THE TORONTO SHOW EXHIBITED BY  
H. DALE, BRAMPTON, ONT.

So it was not entirely due to choice that Christmas week when it came found the cellars and refrigerators of the rose and carnation growers filled to overflowing with unsold stock. While there was a disposition manifested here and there to hold back stock in hope of enhanced prices, yet it is true that the market was so poor that there was not much chance to do anything else with much of the stock but to lay it away and take as good care of it as possible. There was a widespread presentiment that disaster was coming, but no one dared to risk bringing the general wrath down on his own shoulders by being the first to break and unload for whatever price he could get. Thus much valuable shipping trade was lost and the smash came finally just the same.

Notwithstanding the big overstock and low prices on roses and carnations of ordinary variety and quality, however, there were some pretty good prices paid for extra quality blooms—1.50 to 2 for the common run of carnations and 4 for well grown fancy, 6 to 8 for every day Mermet; 20 to 25 for fine specimens was about the way they went. The grower who has something better than anybody else has practically no competition and can make his own price almost.

The color most in demand was bright red. Scarlet carnations were scarce and sold readily at double the rates obtainable for white. For the same reason Gontier roses were also sought after and showed better results than Mermet or Bride. Meteors are not plenty in this market at any time and they had their own way entirely on both color and price. Harrisii lilies, callas and poinsettias all sold well, lily of the valley fairly well, Roman hyacinths and white narcissus poor and violets were badly overstocked.

PLEASE mention the AMERICAN FLORIST every time you write to an advertiser.

#### Philadelphia.

The Christmas trade has been quite satisfactory, all hands seeming to have had a good business. Christmas eve coming on Sunday gave a good chance to get out the work, and accounts in a measure for a falling off in the attendance at some of the churches. Although a great deal of the work was sent out Saturday the bulk of the orders was for Monday morning.

Am. Beauties and Belles were the popular flowers and were in great demand, the dealers being at their wits' ends to get enough for their orders. The price was from \$40 to \$60 per hundred, and he was a lucky dealer that could get more than 25 from a grower at a time; even a half dozen was received with thanks. Speaking of Beauties it would be interesting to know how long they can be kept without falling apart; it would seem as if some that were offered for the Christmas trade might have been cut about foot ball time, they being very much "off side" as regards color and presenting altogether a very tired appearance; but the price was there, accompanied by the assurance that they were fresh cut. One grower was asked to send in some roses Friday night, but said he would rather wait until Saturday morning, when he would send in fresh from the plants cut that morning. All the larger teas were in good demand and sold for \$15, a few going at \$12. Cusins and Wattervilles brought 10 to 12, and Gontiers, Perles, etc. were 8. J. Heacock had a lot of Brunners that brought 70, while some Laings sent in by J. Burton sold for \$40.

Carnations were very fine and brought good prices, ranging from \$2 to \$8 per 100. The great bulk sold for \$2 to \$2.50. Good fancies like Ophelia, Sweetbrier and Edna Craig brought 5, good Daybreaks 4, and the bright particular star, Helen Keller, \$7. Of this latter variety there are no seconds, so there is no trouble to

name the price; it would have brought 8 as easily as 7, as it was sold readily over the counter for \$2 per dozen, which we think breaks all records, at least in this market.

Romans were very plentiful and \$3 was high, while the bulk of the stock sold for 2. Valley brought 4 and narcissus 3. Double violets were quite plentiful and sold for 2 to 2.50, but mostly for 2; they were very good but the growers made the mistake, so often made, of holding them back for the holidays expecting to get a big price and spoiled the market by overstocking it. There has been a good demand for these flowers for the last few weeks and all could have been sold that are now likely to go to waste. It's the old, old story.

Smilax is very plentiful and sell rather slowly at 15. Quite a quantity was used, however, and we expect to soon see it quite scarce. The camellia seems to have dropped out for good, as we have not seen a flower on sale this season, and men used to gladly give \$50 a hundred for them for the holiday season. Will the Beauty ever drop out?

G. C. Watson is laid up with the grippe. J. Crawford is just able to be about, having had a severe attack of the same malady, and many others of the trade have been similarly affected. K.

The weather for delivering Christmas gifts in flowers could not have been improved upon, even if it had been prepared to order. The dull times do not seem to have had much effect upon the Christmas trade, every one of the florists seemed to be as busy as bees when called upon on the evening of Saturday. The Sunday intervening seems to be an advantage. It gives all an opportunity for a good night's rest before the great strain is over. The delivery is scattered over the three days, which must be a decided advantage to both grower and dealer.

At this writing there seems to be no great scarcity of any of the staple articles, and the demand is largely a question of the skill of the salesman to move that stock which is the most plentiful. Large roses, Beauties and Belles, are called for, and orchids. Cypridiums have played a large part in the flower trade this Christmas. Mr. H. H. Battles states that he has sold at least 1,000 flowers of the insigne alone during the month of December. Cattleyas of course are in demand, and there seemed to be enough to fill all the orders. Adiantum Farleyense was never so plentiful in Philadelphia as it appears to be now. It creates a good impression on would-be purchasers, and if the plants could only be trained to take care of themselves after they leave the florist they could not fail to become very popular.

In addition to George Craig's large trade for cut flowers he found palms in good demand. Mr. Craig also had some pot plants of chrysanthemums. There were many inquiries for them, and good plants of chrysanthemums would sell as freely at Christmas as any flowering plant that could be offered.

Heather (*Erica persoluta*) was seen in good form in many of the stores. Evidently this species will stand a higher temperature than has heretofore been thought advisable by growers in general to give heaths. It makes a very pretty plant for a Christmas gift. Some double white azaleas were in good shape, and there are few more appropriate flowering plants for this season. Poinsettia pulcherrima added color to many of the flo-

rists' conservatories. They were evidently grown from green wood cuttings. Robert Crawford was very well satisfied with the outlook for a profitable holiday trade. We saw a few stevia plants here and there, but I really can not understand who would buy this weedy looking plant for a gift. It ought to be a back number.

Violets as a flower seemed to be in as good demand as ever. I saw some of the newer "Lady Hume Campbell." It has long stems, but the color of the flower seems pale, about the same shade of color as the old Neapolitan. The claim for this new variety is that it has so far been free from the disease which has made the growing of violets so precarious an undertaking for some years past. But I am afraid that its color will be against its popularity. Time of course will tell.

Good carnations have sold at fair prices. All the good pinks brought \$5 per 100—Edna Craig, Grace Battles and Sweetbrier—without any kicking. Portia is still the best scarlet, and the best flowers of this variety have sold as high as the good pinks. Helen Keller, the new fancy, an improvement on Chester Pride, comes into market more uniformly good than any variety we have noticed. Daybreak, when it is fine, is very fine, but some growers cannot seem to fathom its requirements, for there are some quite indifferent flowers offered for sale. Lizzie McGowan is certainly the best white we have, both for grower and retailer. Crimson is not very plentiful. Coronet is about the best, but this is no larger than Portia. We want a better crimson. A first-class crimson would sell well, but the demand would not equal that of the pinks and some of the fancy sorts. Buttercup comes under the latter head, and it is certainly the best of its class on the market up to the present time. Unfortunately all growers cannot succeed with it. Good Buttercup flowers should never sell for less than from \$4 to \$5 per 100.

Pennock Bros. were busy, as they generally are, though they always have time to exchange the compliments of the season. Robert Kilt was almost too busy to talk; he did take time, however, to say that he was getting \$2 per dozen for Helen Keller carnation. Heron & Nisbet also seem to have a run on that variety. Mr. Heron says it is the best carnation he has ever seen. L.

#### Chicago.

Christmas proved a surprise to most in the trade, business being much better in every way than was expected. Indeed, the sales were really larger than last year, but in most cases prices fell considerably below former averages. However, neither wholesale nor retail men are inclined to complain, and as a rule they feel very cheerful over the result of the Christmas trade. Poor stuff had no chance at all, but the good flowers were disposed of rapidly. The weather was very unfavorable, having been very warm for some days, and Christmas itself turned out very dull.

In roses the colored sorts went better than white, and Beauty and Meteor went best of all. Some Beauties were retailed for \$15 a dozen, but a larger proportion went for \$9 to \$12. Meteor was \$3 to \$3.50 a dozen retail and a prime favorite. Gontiers sold very well, in consequence of the liking for red flowers, while Bridesmaid was a much better seller than Mermet. In carnations the colored sorts were rather scarce, and Daybreaks were

not in quantity enough to fill orders. The white flowers were sold for a lower price than colors and fancies, the three classes averaging \$1, \$2 and \$3, with perhaps a little increase in some grades. The demand for violets was far in excess of the supply. Romans were a glut, but still they sold; Harrisii went well at \$12.50 wholesale, but there was no demand for callas. Smilax could not be given away. Orchids sold excellently; Corbrey & McKellar report that their demand was larger than at any previous time. Some very good Vanda cœrulea, phalænopsis, angræcums and cypripediums were noted at their place. There were scarcely any pot plants sold by the wholesalers. Some unusually good cyclamens were offered by Corbrey & McKellar, but they were too high priced for this market.

Among the retailers the general expression is one of satisfaction. P. J. Hauswirth says his sales were materially larger than last year, though prices were lower. He sold violets rapidly until the available stock was gone, this flower being in great demand; in roses the Beauty led. Colored carnations sold excellently. Buyers were slow in placing their orders, most of them coming in the last two days before Christmas, and there is no doubt the store men were equally conservative in purchasing the supplies. This had something to do with keeping the prices at a very reasonable level. Holly sold very well, and was fine; mistletoe was rather poor. Colored wreaths of cape flowers sold well. Mr. Hauswirth does not handle plants, and his Christmas trade was confined to flowers, as was the case with most Chicago retailers.

At E. Weinhoeher's, which may be taken as representative of the North Side, a good trade was reported, and in most lines prices were about the same as last year. Flowers in all classes sold out clean, though the same preference was noted here as in other cases for colored roses and carnations. Red tulips, the first in the city, sold well, so did some extra fine mignonette. Harrisii sold in advance of callas. In addition to cut flowers this firm sold a large quantity of plants. Flowering plants were confined to primroses and cyclamens; the primroses sold admirably in baskets or pans, either alone or mingled with ferns. A quantity of shapely little mandarin orange plants, the only case where these plants appeared here, proved a great success; they were either sold singly or in baskets or pans, mingled with ferns. These little oranges are excellent for holiday trade, and it seems a pity that more do not appear in the Chicago market, which is very deficient in good pot plants. Palms did not seem to sell as well as ferns. Comparatively few flowers were used by the churches, they relying more on the effect obtained by the use of holly and other greens.

Over on the west side H. F. Halle needs special mention, for he is really the only florist in town who made a special effort in decorating his store for Christmas. His window was a most attractive one, having at the back arches of white and delicate green, hung with Christmas wreaths. The window itself was filled with palms and ferns, with a few white primroses and Harrisii lilies. Mr. Halle reports an excellent trade, exceeding that of previous years. All classes of flowers sold well, and there was quite an increase in the demand for bouquets. Among plants the more expensive ones were little called for, but plenty of ferns and fern

baskets were sold, also primulas and azaleas. Araucarias, which sold well last year, were not called for this; perhaps they were rather too expensive for prevailing conditions. But the primroses were in excellent demand. Mr. Halle spoke of the lack of good pot plants in the Chicago market; much of the material sold in the east cannot be obtained here and is entirely overlooked by local growers.

The wholesale men report an excellent shipping trade, though most of the orders were placed at the last moment. And it seemed likely to continue this week. On the 26th a very small cut was sent in by the growers, who had been cutting very close for some days, and this supply was soon sold out. Prices are less than those given out for Christmas, but they hold up very well, and the trade in Chicago have something to be grateful for—rather more it seems than their brethren of New York.

Aug. Jurgens is cutting some very fine McGowan carnations.

#### Toronto.

A most harmonious and lively meeting was that which the Gardeners' and Florists' Association held last Tuesday for the purpose of electing its officers for the coming year. After routine business had been gone through with and the president, secretary and treasurer had presented their annual reports, which were highly satisfactory, nominations and elections were in order, and compared with other years they were got through with in a surprisingly short space of time with the following result: Mr. A. Gilchrist, Toronto Junction, was elected president by a large majority, and the rest were elected by acclamation; Mr. W. Muston, Deer Park, 1st vice-president; Mr. Geo. Reeves, Supt. Reservoir Park, 2nd vice-president; Mr. A. H. Ewing, secretary; Mr. Hermann Simmers, treasurer; and Mr. E. H. Carter, assistant secretary. There were thirteen nominations for the executive committee, out of which the following are the chosen ones: Messrs. G. Vair, G. Manton, S. E. Briggs, A. Macpherson, C. Arnold, W. Hill and C. J. Tidy.

After the battle was over and the debris cleared away Mr. Geo. Vair, the G. O. G., got up on his legs and on behalf of the association presented the secretary with a purse of money as a slight recognition of his services during the last few years. The secretary did not seem to think there was anything slight about it and appeared to be dumbfounded, as he had no idea that anything of the sort was going to occur; he, however, managed to make some slight acknowledgement and congratulated himself that he had done all the speech making he intended to do that night, but he did not get off so easily, for some one brought in a large parcel and Capt. McMaster came up to the table and in a very neat and flattering speech presented him with a handsome marble mantelpiece clock on behalf of the members and others interested in horticulture, himself included. The secretary tried to protest and muttered some words of thanks, sat down and gazed at the clock. He has since desired me to convey to the members through these notes his most sincere thanks and thorough appreciation which he felt quite unable to adequately express at the time, having been altogether taken by surprise and quite unprepared.

Mr. Tidy brought up the annual dinner question and after some discussion the

SECOND PRIZE BASKETS OF CHRYSANTHEMUMS AT CHICAGO SHOW, ARRANGED BY THE GALLAGHER FLORAL CO.

president appointed a committee to make inquiries and report at the next meeting.

The executive committee was asked to meet and arrange for having essays read at meetings during the coming year.

Trade promises very well for Christmas considering the hard times. Carnations will be short and prices firm, roses ditto, violets ditto, Roman hyacinths plentiful.

Manton Bros. seem to have a corner in white azaleas in bloom. Plant trade has been very good this week. A palm for the window appears to be becoming a favorite Xmas present.

**CHANGE OF NAME.**—Owing to the fact that the name "Peach Blossom" had

been already registered with the secretary of the Chrysanthemum Society by another person, Mr. T. D. Hatfield has changed the name of his new chrysanthemum to "Prairie Rose."

#### Chrysanthemum Basket.

Our illustration shows the second prize basket of chrysanthemums at the Chicago show. Several varieties were used, the "other foliage" consisting of *Adiantum cuneatum* and *Asparagus plumosus*. The picture shows the arrangement so plainly that any further description seems unnecessary.

Please mention the AMERICAN FLORIST every time you write to an advertiser.

#### Buffalo.

At present writing (Monday a. m.) it is early to report what Christmas trade has been, but it is safe to say that it has been quite up to general expectations. As the chief topic with every one of late has been hard times an increase of business was not expected. All roses have sold well at good prices, but poor stock, of which there has been too much, has been a drag. Violets are selling well, and most of those coming to Buffalo are of fine quality. No flowers are in as good demand as fine carnations. The two varieties that have the call are Daybreak, easily first, and the new pink variety Wm. Scott.

Plants of most all kinds have sold well. There is a decided increase in the demand for small palms for Christmas gifts, palms that could be sold for \$2 to \$3 being in great demand. Azaleas, poinsettias, cyclamens and primroses have gone lively, and the azaleas above all else. There were a few hundred fine mums left in town and they brought good prices. They were Harry Balsley, E. G. Hill, Roslyn and La Fortune.

The din of Christmas rush is subsiding, but we look forward to good business for several weeks, as many big social events are yet to come and some are right here. Last year there was more holly than could be disposed of, and the ground pine was the scarcest. This year everybody wants holly and there is none to spare. Your correspondent's experience is that holly bought through regular florist supply houses has been very fine, while that coming through some eastern produce houses has been mere rubbish. Further particulars later. W. S.

### News Notes.

PEORIA, ILL.—Mrs. May Cole has opened a floral store on Main street.

TOPEKA, KANS.—R. J. Groves, Jr., has started in business here at 1173 to 1177 Clay street.

BRIDGEPORT, CONN.—The Loman Floral Co. has opened a handsome florist establishment at 195 State street.

FAIRBURY, ILL.—John Milne & Son have added three new greenhouses, two 12x80 and one 18x80, heated by hot water.

HARRISBURG, PA.—The annual meeting of the State Horticultural Association of Pennsylvania which was to have been held in Reading will be held in this city instead on January 16 to 17.

SPRINGFIELD, MASS.—The Springfield Amateur Horticultural Society held its third annual banquet in Grand Army Hall on the evening of December 15. Previous to the supper a meeting was held at which nominations were made for officers for the next year. The election will take place on January 5, 1894.

WELLSVILLE, N. Y.—The greenhouses of Stillman & Co., which were badly damaged by fire on November 16, the total loss amounting to over \$3,000, have been rebuilt and are once more in running order. The new boiler house and office have been constructed entirely of brick and glass and is thoroughly fire proof.

LANCASTER, PA.—In your Lancaster notes in last issue the item about the Bitner estate was not quite correct. Mr. Barr purchased the glass he now has and did not lease it. The item should have read: "The Bitner estate has been divided, a portion of the houses being run by J. W. Bitner & Co., while the rest, a new range of houses containing about 20,000 feet of glass, has been purchased by Mr. B. F. Barr."

HARRISBURG, PA.—Mr. Wm. Badger died November 13 in his 30th year. He was much respected and the loss is severely felt by his many friends. He leaves a widow and one child. Mrs. Badger will keep the business going and has engaged Mr. W. F. Schmeiske as foreman. Business is picking up a little. It is reported that one of the local growers sells carnations at 15 cents a dozen and roses at 30 cents a dozen.

# NEW DIRECTORY.

We have decided to issue a corrected edition of our

## TRADE DIRECTORY AND REFERENCE BOOK FOR 1894

February next.

In addition to the changes in the list of those in the trade the lists of roses, chrysanthemums and carnations will be brought up to date. All the other reference features will be retained and several important new ones added, among which will be

### Seasonable Hints for the Year,

covering each week separately, prepared by Mr. Wm. Scott, whose seasonable hints published in the FLORIST have been so helpful to our readers during the past year. This calendar of operations, in condensed form, and where it can be readily consulted at any and all times, cannot fail to greatly enhance the value of the book.

### Change in the Size of Book.

In view of the growing value of the book for frequent reference we have decided to reduce the size of the page sufficiently to make the volume of handy size for carrying in the pocket. This change will make the printed part of the page 3 1-2 inches wide and 6 1-2 inches long, instead of 4 1-2 by 7 1-4 as before.

### ADVERTISEMENTS.

In view of the reduction in size of page we have reduced the rates for advertisements to the following, each including a copy of the book:

|               |       |         |
|---------------|-------|---------|
| FULL PAGE,    | - -   | \$25.00 |
| HALF PAGE,    | - - - | 15.00   |
| QUARTER PAGE, | -     | 9.00    |
| EIGHTH PAGE,  | - -   | 5.00    |

Every adv. will be placed opposite important reference matter that will be frequently consulted by buyers of the book.

### Send Orders Now

to get the best positions.

## AMERICAN FLORIST CO.

P. O. Drawer 164.

## Chicago.

**KANSAS CITY.**—A florist of Jefferson City wants to know whether roses have been retailed at 50 cents a dozen in this city. He says a lady customer told him she could get all the roses she wanted for 50 cents a dozen in Kansas City. This seems a mighty low price just before the holidays. Can any of the boys answer his question?

**SHEBOYGAN, Wis.**—J. E. Matthewson, for some time foreman at Currie Bros.' greenhouses in Milwaukee, has leased the greenhouses of Otto Schucht in this city. The item recently published was not exactly correct. Wm. Schucht & Co. succeed to the store business of Otto Schucht, but not to the greenhouse department.

**ELMIRA, N. Y.**—Mr. Grove P. Rawson will start January 6 on a three months' trip to South America in company with the famous English naturalist, the Hon. J. J. Quelch, C. M. Z. S.

**JOHN C. MEYER & Co.** of Boston, the makers of silkline, have removed from their old quarters to 13 Otis street.

#### SITUATIONS, WANTS, FOR SALE.

Advertisements under this head will be inserted at the rate of 10 cents a line (seven words) each insertion. Cash must accompany order. Plant ads. not admitted under this head.

**SITUATION WANTED.**—By a young man: German, single, 21 years of age, as general greenhouse assistant; good experience. Address C W, 7000 Addison Ave., Chicago.

**SITUATION WANTED.**—By good grower of roses, carnations, violets, etc., also good propagator; 10 years experience; good references. D P, care Nielsen, 835 Rockwell St., Chicago.

**SITUATION WANTED.**—By an experienced florist; German, single, 31 years of age, as rose grower, tea and hybrids, and also understands growing cut flowers and forcing bulbs. Address L, College Point, L. I., New York.

**SITUATION WANTED.**—By gardener and florist; life experience; grower of roses, carnations, violets and general stock; also a good design worker, wants situation by February or March; age 31. Address S J, care American Florist, Chicago.

**SITUATION WANTED.**—In general propagation and growing of all requisites pertaining to first-class plantsman, in commercial place, including propagation and care of nurseries, ornamentals, roses, evergreens, shrubs, herbaceous plants, etc. Executive ability, experience, sober and industrious habits. Best recommendations. PRACTICAL, care Am. Florist.

**WANTED.**—A young man or boy who has had years of experience in a vegetable and floral establishment, who is strictly honest and sober; steady employment guaranteed. Address C. W. EAST, Lock Box 55, Canton, O.

**OBITUARY.**

MR. E. S. DODWELL.

Carnation growers all over the world  
will hear with sincere sorrow of the death  
of Mr. E. S. Dodwell, the distinguished  
English carnation grower, whose book  
on "The Carnation and Picotee" is justly  
regarded as a classic in its line.Mr. Dodwell was born at Long Cren-  
don, Buckinghamshire, in 1819, and had  
just completed his 74th year. He was  
engaged in business in London, but lived  
at his birthplace until 1845, when he  
went to Derby. While at Derby he be-  
came an enthusiast in carnation culture,  
becoming a successful exhibitor and  
hybridizer. He cross-fertilized very sys-  
tematically, raising some remarkable  
forms. From Derby he went to Clapham  
(London) in 1860, continuing his work  
and becoming well known in connection  
with carnation societies as well as con-  
tributing freely to carnation literature.From London Mr. Dodwell went to  
Oxford in 1881. For the last nine years  
an annual carnation show has been held  
in Mr. Dodwell's garden, which was very  
largely attended. Like all English grow-  
ers he paid great attention to carnations  
as outdoor bedding plants, and his garden  
at Oxford was a brilliant show. He also  
grew some 3,000 plants in pots. His  
carnation garden is described as unsur-  
passed, and nothing could exceed his in-  
terest in all this class of plants. Last  
year English carnationists united in pre-  
senting a handsome testimonial to Mr.  
and Mrs. Dodwell, on the occasion, if we  
recollect aright, of their golden wedding.Mr. Dodwell leaves a widow and sev-  
eral sons and daughters. He was buried  
at Oxford December 5.

## The Seed Trade.

## AM. SEED TRADE ASSOCIATION.

W. ATLEE BURPEE, Philadelphia, president; A. L. DON, secretary and treasurer, 116 Chambers street, New York. Next annual meeting second Tuesday in June, (will probably be held in Toronto.)

THE NEW TARIFF seems a little difficult to interpret horticulturally, but those who have studied it most incline to the belief that garden seeds are intended to be free, other seeds 10%, while flower seeds, plants and bulbs are difficult to locate. Trouble is anticipated in liquidating the entries.

NASHUA, N. H.—A. H. Dunlap & Sons, seedsmen, have received word from Philadelphia that a swindler under the name of A. H. Dunlap, Jr., was collecting bills in that section and New York in their name. How extensively they have been swindled is not known.

THE UNIVERSITY OF MINNESOTA EXPERIMENT STATION, through W. M. Hays, its agriculturist, is out with a circular suggesting that the U. S. Department of Agriculture at Washington supply the various State Experiment Stations with seeds for free distribution to the farmers of the different states, and not only that, but suggests that franks be supplied to mail such seeds free from the state stations. This is certainly in the line of doing away with the mail seed trade with a vengeance.

FREMONT, WASH.—The Woodland Park Floral Co. has added a fine palm house; it is octagon in shape, having a central dome 30 feet high. They have also opened a retail store in Seattle.

BROXTON, N. Y.—At the annual meeting of the Chautauqua Horticultural Society Irving A. Wilcox, of Portland, was elected president. The offices of secretary and treasurer were combined and S. S. Crissey, of Fredonia, was elected. The next meeting will be held in Fredonia.

## Hulsebosch Brothers,

OVERVEEN, HAARLEM, HOLLAND.

Will exchange for Hydrangeas and Genlstat.

St. Louis.

The Christmas trade here was very fair, quite a number of shipping orders having been filled on Saturday, thus shortening the market up considerably. The several unseasonable and very warm days preceding Christmas rushed the stuff along at such a rate that there was about enough to go around (with the exception of colored roses) being cut, and not counting the flowers saved from the earlier part of the week; upon this the warm weather had the most disastrous effect and rendered it absolutely worthless. A person can hardly help pitying a grower, while at the same time having a sort of fellow feeling for him, when he sees the result of the short sighted policy of saving stock for several days and then expecting critical buyers to take it as readily and at the same price as stock that can be held for sale several days. Take the following case: A wholesaler wanted Beauties badly during the earlier part of the week, but wrote in vain for them; Thursday, however, a consignment arrived, but so far open as to be worthless. Or another example: A wholesaler secures Saturday a shipment of about 1200 roses; by the time they are unpacked and sorted he has 200 roses and 1000 stems, and so on indefinitely. But why multiply instances; they seem to have anything but the desired effect upon the persons they are supposed to instruct, so probably the less said about the evil the slower it will spread.

The prices were about what was expected, being about one-half of that of former years. Some fine cypripediums were received from Brown & Canfield which were quoted at from 15 to 25 cents, also a large shipment of carnations from A. M. Herr, which ranged from 3 to 5 cents. Romans and narcissus were in good supply, but not quite as many as in former years.

Perle roses were the scarcest stock in the market, they having been in short supply for a little while back. Meteors also were hard to get, as a limited supply only reaches this market.

The advertised auction sale of the Michel Plant and Bulb Co. took place on Monday, the 18th, and was quite well attended; the plants brought about wholesale prices; the stock chrysanthemums failed to find a bidder, and the bulbs, mostly tulips, were sold very cheap and will be used principally by buyers in planting out, quite a number having been purchased for the city parks. R. F. T.

WHEN SENDING us newspapers containing items you wish us to note please do not fail to distinctly mark the item so it can be easily found, as we can not spare the time to hunt through the mass of papers sent us for unmarked items.

Denver.

The most delightful winter in years. Freezing point is not reached often. Surely this is a case where the winds have been tempered to the shorn lamb, and we all are grateful that this December is not a mate for that of '92.

Our president, H. H. Givens, has been out to his place this week. He looks very badly and his doctors say he has been as near the boundary line as can be and not pass over. Congestion of the brain was the cause.

Now that all the show fever is down to normal some interest is awakening over some new seedlings, one especially, a crimson carnation of August Schenkel's. It has the glow of our western sunsets, so we all expect to hear of "Colorado" again soon. Some mum sports have shown themselves. One at Mr. Adams' from Ada Spaulding now looks as if it would do to try again.

Two new stores, and on 16th street too. Mrs. Mauff, who already controls some splendid trade from the hill at her old place. Mr. Albert Mauff is to hold the fort.

Locan & Lacky, who have for some time handled part of their stuff from a stand, have built a brick glass front opposite the Masonic Temple.

Trade is much better than we expected; a good call and quite an abundance of material to fill it. Beauties are short as they always have been.

Mr. Beach, who has been at Petersburg, now is at Mrs. Mauff's wholesale place. LYLE.

Please mention the AMERICAN FLORIST every time you write to an advertiser.

CINCINNATI—Christmas trade was far below last year in all branches. Roses sold fairly well, as did violets and carnations. Lily of the valley and all forcing stock was a perfect glut. At the flower market stock was almost given away.

Do you want a list of the leading cemetery superintendents? You will find such a list in our new trade directory and reference book.

THE HOLIDAY TRADE, as shown by reports printed in this issue and that for last week, averaged a vast sight better than we had dared to hope in view of the business depression. It is plain that the people still have money to spend and will spend it too, when occasion arises, and when prices are moderate. While the returns to the large wholesale growers will undoubtedly be short in many cases it would seem that most florists who retail their own product have realized more than ever before on account of the increased cut, due to the favorable weather. Where prices have always been moderate everything went at usual rates. On the whole we may feel exceedingly well satisfied.

FLUSHING, N. Y.—The wife of Mr. Samuel B. Parsons died December 29, aged 70 years.

CHRYSANthemUM NIVEUS has been awarded a first-class certificate by the Royal Horticultural Society of England.

Do you want an alphabetical list of the chrysanthemums in commerce in America, with class and a brief accurate description of each one, and synonyms noted? You will find such a list in our trade directory and reference book.

PARLOR DOUBLE DOORWAY

### Holiday Decorations.

When the guest enters the room which has been decorated by a florist for his reception, through the liberality and good will of his hostess, his eye sweeps over the whole arrangement, and with a glance and one or two compliments the work which took hours to accomplish is passed and dismissed from the mind.

It is somewhat discouraging for one who has expended a great deal of anxious care over something artistic to have it meet with indifference from other eyes. The indifferent eye is absolutely disheartening; the critical one is decidedly preferable; at least the latter shows life and interest, although it may be of a kind we consider unfavorable.

What we want most nowadays is novelty, at least that is the word which is generally in use to express our wish to escape from everything commonplace. To be sure there is a little unhealthiness in this constant craving for something new, but there is no gainsaying the fact that our American life is full of sameness; our houses and scarf pins are all turned out by the thousands from barely two or three patterns. The decorations of a parlor or dining room are no exception to this rule; whether it be wall paper or flowers and plants it is always the same, there is no variety. Mrs. Jones' house is so much like Mrs. Smith's that it is hard to remember the little differences.

The suggestions which follow for the decoration of a dwelling house on some special occasion by flowers and greens are intended to point out the way in which one can overcome the danger of being commonplace. There is no room without its vase or stand, and there are many little ways in which one may use a bit of bric-a-brac or a ribbon which will remove the florist's work from every appearance of monotony and conventionality.

If there is a blue and white Japanese umbrella jar it may be used effectively in the way my sketch indicates, and placed

in some prominent position in the decorative feature of the hall. The hat stand might be decorated simply with greens and the mirror left so it will reflect a bright bit of color in some flowers which should be placed opposite in a tall vase.

AN UMBRELLA JAR

I do not hesitate to recommend such an arrangement as the accompanying one for the parlor double doorway, although it necessitates the use of four small nails in the woodwork, and two common Jap-

anese brackets for the little jars holding some delicate vines, and if one desires it a few dainty flowers like orchids or *Begonia incarnata*.

The Jerusalem cherry is a charmingly prim little plant and it might be used to advantage in any spot where the whole of its figure will be seen. It needs a pretty pot and some moss to hide the homely clay pot it grows in; the same applies to the azalea. But in using the latter it ought to be placed where it will be seen by itself. I do not wish to speak in any derogatory terms about anything which seems to me devoid of artistic merit; it is much better to pass what is worthless and draw attention to that which is really beautiful; but I must say that the fashion of massing a lot of plants together is in the majority of cases, especially in moderately larger rooms, decidedly tasteless. The azalea and the Jerusalem cherry should be isolated.

Note my arrangement for the corner of a room; instead of banishing the beautiful black silk, gold embroidered Japanese screen it might be fastened flat against the wall and thus furnish a splendid background for a specimen of *Deutsche Perle* azalea. The smilax or asparagus can be fastened to the picture moulding and hang gracefully until it touches the edge of the screen.

My suggestion for a mantel presupposes the style of this to be Colonial, but the idea can be worked out with a mantel of any style. No material for holiday decorations impresses me with its artistic worth quite so strongly as this long needle pine (*Pinus Australis*), which is capable of being arranged very beautifully in some prominent point of the decorated room. On the mantel shelf

A DECORATED MANTEL

This removal of things in general from all appearance of the commonplace means that it is better to cut loose from all usual customs in the decoration of a room, and adapt flowers and plants to every condition of furniture and architecture; the bookcase, cabinet and china dresser all afford some excellent points for the display of flowers. The top of a bit of furniture which is just below the level of the eye can be covered with greens and a vase placed in the midst filled with a strong bit of color, or the sweeping lines and effective form of a plant like the

question, where the ribbon was crimson in hue, and as a consequence the delicate sober color of the flowers was completely spoiled. Such a hanging bowl or basket is a delightfully appropriate accessory to artistically arranged flowers; there are many pretty designs made in silver plated ware of this order, any of which would be

FOR THE CORNER OF A ROOM.

THE TOP OF A CHINA DRESSER.

palm or even the poinsettia. Narcissi and cyclamens should never be placed more than a couple of feet or so above the floor; they are plants which (as they grow naturally) we look down upon, and I see no reason why we should not adhere to natural methods in working out a decorative scheme.

Whenever flowers are to be accompanied by ribbons these should be very carefully selected lest the colors interfere with each other. In the little drawing of a hanging silver bowl containing a bunch of the magenta *cattleya* the ribbon is supposed to be of a bluer tone than the flowers. Any other color than a dull magenta or a purple magenta does not serve the purpose quite so well; I have seen this fact demonstrated beyond all

A HANGING SILVER BOWL.

I should place white and yellow carnations and mignonette; in the vase at the right a fine bunch of yellow or white roses would be pretty; and last, but not least, is the effective little lamp whose dainty light will cast a soft glow over the neighboring flowers. A fairy lamp would also add materially to the beauty of the design.

an acquisition to the florists' stock in trade.

The expression of good taste in the decoration of a room with flowers and greens depends upon the methods which are put in practice. If one side of the parlor is banked up with a "medley" of palms, ferns, roses, poinsettias and a variety of evergreens, no matter how skillfully these may be arranged, I should be sure before looking at the group that

something of good taste was lacking. The method here is at fault; without doubt there would be a *dozen* places in the room which would need some of the greens, which were jammed together in one spot; not that I do not believe in making some particular point in the decorations pronounced and effective beyond all others, but I *do* think it very unnecessary to overcrowd beautiful material in the attempt to produce beautiful effects. The florist who fails to display the charming figure of the calla, the azalea or the palm, loses half the artistic value of the material he handles.

Possibly the individualization of different plants in a decorative scheme may meet with the criticism that the effect is weak and thin; *that* depends upon the skill of the decorator. A method of work so different from what is usual is apt to meet with adverse opinions; but the telling effect of a small number of plants so admirably distributed that the beholder is not conscious of the fact that he sees something less than is usual, will carry the day. And in the end the vulgar profusion of plants and flowers which the uninventive florist uses to hide his ignorance of artistic methods will fail to produce an impression, and the *artistic* florist will be asked to display his good taste in an unlimited manner and with unlimited material.

F. SCHUYLER MATHEWS.

## CHRISTMAS TRADE.

### Reports From All Sections.

Following we give reports from all sections not covered by our regular correspondents. These reports were made on blanks covering the following inquiries: "Were the total sales (meaning the amount in money value and not in quantity of flowers, etc.) greater or less than last year, and if so, about what was the percentage of increase or decrease? How did retail prices obtained compare with those of last year? Was the supply of flowers, etc. equal to the demand? How did they compare with last year in quality? In view of the low wholesale prices did you buy more than in previous years, and if so was it all sold at a profit? Did you note any marked increase in the call for any special flower, etc.? Did you note any interesting peculiarity in the trade this year not covered in above questions?" All the comparisons are with the trade of last year except where otherwise noted.

MOBILE, ALA.—Much larger. Prices about same. Sold all we had. Better quality. General call was for mixed flowers.

LAWRENCE, KANS.—About 10% greater. Prices same. Supply not equal to demand. Quality better. Greater demand for roses.

BLOOMINGTON, ILL.—Slightly better. Prices about same. Supply equal to demand. Quality better. Increased call for carnations.

OTTAWA, ONT.—About 20% larger. No change in prices. Supply short. Quality equal. There were no low wholesale prices in Canada.

TAUNTON, MASS.—About 25% larger. Prices a trifle lower. Supply equal to demand. Quality better. More call for pinks and less for roses.

NASHUA, N. H.—A little larger. Prices trifle lower. Supply equal to demand.

Quality fully equal if not better. We bought more and sold all at a profit.

NEW ORLEANS.—A little larger. Prices a trifle better. Supply equal to demand. Quality compared favorably. Depended on home grown stock. Increased call for violets.

YOUNGSTOWN, O.—About  $\frac{1}{4}$  less. Prices  $\frac{1}{3}$  lower. Supply was equal to demand. Quality about same. Did not buy any. Increased call for the cheaper flowers—carnations, etc.

LANCASTER, PA.—Orders were not so liberal in size but no cut flowers were left over. Prices about same as last year. Increased call for cheaper grades of plants, something "for from 25 cents to \$2.00."

BIRMINGHAM, ALA.—Increase of 50%. Prices lower. Supply was equal to demand. Quality finer. Bought none. Plenty of home grown. Sales in smaller quantities. No demand for blooming plants this year.

TERRE HAUTE, IND.—About same. Retail prices ditto. Supply not equal to demand. Quality better. Bought no more than usual. Increased call for violets and Beauties. Holly and galax leaves sold better than ever before.

CINCINNATI, O.—About  $\frac{1}{3}$  less. Prices very much lower. Supply equal to demand except Beauties, Mermets and Brides. Quality under—so much salted stock. Not so much bought. The trade did not buy until the last moment.

TOPEKA, KANS.—About same as last year. Prices too. Short of roses and carnations. Quality same. Bought a little heavier. On account of the warm weather the stock shipped here did not arrive in good condition, some of it being a total loss.

PORTLAND, ME.—About 30% less. Prices about equal. Supply more than equal to demand. Quality equal. Wholesale prices were as high as last year. Had to retail on small margin. More demand for the cheaper grades of roses in place of the finer varieties.

PITTSBURG, PA.—About 10% greater. Prices 25% lower. Supply about equal to demand. Shipped in stock not quite so good. Bought more freely and all sold at a profit. Heavy increased call for violets and a general protest against the high price of same.

EASTON, PA.—Exceptionally good and much better than we expected. General sales were 17% greater and with prices 10 to 15% lower. Big call for holly, greens and mistletoe. Most call was for colored flowers. Very little white sold except carnations.

GRAND RAPIDS, MICH.—About 30% less. Prices 20 to 50% lower. Supply equal to demand on all but a very few things. Quality about as usual. Much less shipped in. Call was mainly for the cheaper flowers, still could have sold more Beauties and Meteors.

NEW LONDON, CONN.—Sales about  $\frac{1}{4}$  larger. Retail prices about same. Supply sufficient to fill all orders. Quality better, especially carnations. We bought less, only a few carnations, which were all sold. Cheap palms were much asked for—clean bushy plants at \$1 each.

HAMILTON, ONT.—Fully 30% greater. Retail prices lower. Plenty of flowers except carnations. Quality good. Bought less. Marked call for good flowering plants. There was a decided inclination

to withhold orders until the last moment on account of the fluctuation in prices.

EVANSVILLE, IND.—About 20% increase. Prices about same. Supply equal to demand. Quality some better. Did not buy any—had enough home grown. Loose roses had the call. An important peculiarity was that our customers, as a rule, paid cash for what they purchased.

MINNEAPOLIS, MINN.—Sales  $\frac{1}{3}$  more in value. Retail prices  $\frac{1}{2}$  lower. Supply equal to demand. Quality fully equal. Bought about same as last year, but made no profit on it. Most call was for roses. Trade ran mostly to blooming plants and loose flowers; no bouquets or baskets.

COLUMBUS, O.—Somewhat larger. Prices about same. Supply not quite equal to demand. Quality improved. Bought about same as last year, but could have sold more. Increased call for carnations and violets. More orders came in late and more calls at the last moment than formerly.

SYRACUSE, N. Y.—Orders came in late, but finally averaged about same as last year. Prices practically the same. Supply was equal to demand. Quality good. Seems to be a growing tendency to fight a little shy of roses on account of high prices usually charged at the season. Blooming plants sold well.

HAVERHILL, MASS.—Very good indeed, although not quite up to last year. Prices about the same, except roses, which were a little lower. Carnations were the prevailing favorites. The demand for holly and Christmas greens increases every year and everything in that line was cleaned out.

ST. PAUL, MINN.—About 15% less. Prices from 10 to 30% lower. Supply fully equal to demand. Quality better. Bought less than usual. Roses had the main call as usual, and notwithstanding the high prices violets were in strong demand. People bought in smaller quantities, orders averaging much less in size than in former years.

MILWAUKEE, WIS.—About 10% larger. Prices about 30% lower. Supply about even except of carnations. Quality averaged better. Bought more than usual and sold out at a profit. A slight increase in demand for carnations. Sales were entirely in small lots. New Years trade was the best in five years. The low prices is surely what did it.

ELMIRA, N. Y.—Slight increase. Prices 15% lower. Shortage in supply of roses and carnations. Quality fully equal to last year. Increased call for roses, carnations and violets. With the exception of freesia there was no call for bulbous stock. Increased call for violets may have been due to mild weather. Holly sold better than last year.

LOUISVILLE, KY.—About the same. Sales greater, but prices about 25% lower. Supply was equal to demand. Quality equal. But little shipped in. Increased call for violets. Sales of holly and lycopodium were larger but prices lower. On account of fine weather more was sold, but in smaller quantities. Decorations were missing this year, except small ones.

FT. WAYNE, IND.—Increase of 40%. Prices on roses were  $\frac{1}{3}$  less; other flowers about same as last year. Supply equal to demand except on colored carnations, which were a little short. Quality much better. Bought but little. Not much call for bulb stuff. Greens of all

kinds sold well. Also primulas, *Harrisii* lilies and other plants in bloom and at good prices.

**LITTLE ROCK, ARK.**—About  $\frac{1}{3}$  more both in quantity and money value. Prices equal. Supply hardly equal to demand. Quality fully equal if not better. We can not buy from a distance and sell again at a profit at the wholesale rates for Christmas, so depended upon our home supply. Big call for roses and carnations. Sold lots of hyacinths, as in the round up it was hyacinths or nothing.

**LONDON, ONT.**—Increase of about 22%. Prices 25% lower. Supply equal to demand except of carnations. Quality equal except Mermets, which were pale. Very little stock bought from a distance. Orders were nearly all small, and for loose flowers. Very marked increase in call for blooming plants. A very agreeable change was that while total sales were larger those charged were 65% less.

**CAMDEN, N. J.**—Much larger. Prices about same. Supply larger, the mild weather increasing the yield. Quality superior. Philadelphia wholesale prices were decidedly too inflated to allow a margin of profit to the dealer. We bought as little as possible. Increased call for carnations, holly wreaths and mistletoe. Main call was for loose flowers. Altogether Christmas trade was very encouraging.

**FALL RIVER, MASS.**—Trade was good here, but prices considerably lower than usual. Mermets and Brides sold for \$1.50 per dozen, carnations 45 cents, violets \$2 a 100; Perles, Wattevelles, Gontiers and Hoste, \$1 a dozen. There was an increased demand for holly, ferns and palms. At 3 o'clock Christmas day everything was sold out and stores closed. There was a great shortage of violets and carnations.

**UTICA, N. Y.**—About same. Stock of good quality brought about same prices; poor stock not wanted. Shortage in orchids, violets, pink carnations and pink roses. Quality about same. Bought little from distance. No basket work. Mainly boxes of choice flowers and with almost every order a request to put in maiden-hair fern. Much increased call for orchids excepting *Cypripedium insigne*, for which there was scarcely any call.

**PATERSON, N. J.**—Much larger. Prices of flowers, greens, etc. were about same as last year. Supply just about right, and everything sold. Carnations, hyacinths and similar flowers were fine; roses were a little inferior. Bought only a few roses which about held their own—nothing more. Seemingly an increased demand for carnations. The main peculiarity of trade this Christmas was that there was so much money to spend for flowers these remarkably hard times.

**DES MOINES, IA.**—Prices 25% lower, hence income less. Had to lower prices to induce sales. Supply short. Did not buy as much as usual for fear of being overloaded. Quality generally good. Increased call for red roses and carnations and holly. Customers would not book early orders; were undecided as to whether they would buy, but came in late and were then disappointed. Hard times cry kept us from buying as much as usual fearing would not have good call.

**DETROIT, MICH.**—Gross returns were about 10% less, but consider net results equal as the mild weather saved time, wrapping material, etc. Prices were a trifle less on cheap stuff, but held up on

stock of good quality. Supply fully equal to demand. Could not buy here for less than last year's rates. In some cases paid more for good stuff. Increased call for violets. Breitmeyer retailed 20,000 in three days. A great demand for holly wreaths. Sold twice as much as last year.

**INDIANAPOLIS, IND.**—About the same. Trade better than expected. Prices somewhat lower, though good flowers brought good prices. Supply equal to demand except Beauties and violets. Hyacinths, valley, etc. were a glut. Shipped stock was the poorest in years. Increased call for violets, Beauties and carnations. Decorative plants sold well; also blooming plants. On account of pleasant weather many flowers were worn on the street. The bad policy of salting roses for a higher price is still in vogue.

**DAVENPORT, IA.**—Somewhat larger. Retail prices about the same, except on roses, which were rather lower (except Beauties). Supply about equal to demand. Quality good. Some bought more, but the majority depended on home grown flowers only. One florist reports big call for roses and that he sold long stemmed Beauties at \$9 a dozen. Not so many large orders but more small ones, so the total shows an increase. Good call for plants. One florist sold more palms Christmas week than before in a year.

**PROVIDENCE, R. I.**—Christmas orders did not come until very late. Customers bought about as liberally as last season, but kicked everlastingly on account of sudden jump in prices. Nothing short but American Beauty and Meteor roses. Prices were about same as last year, with an abundance of nearly everything. Romans and paper white were too plentiful. Demand for holly, mistletoe and greens was very good, but not until the last two or three days. The sudden rise in prices is detrimental to business, as regular customers don't expect it.

**NEW BEDFORD, MASS.**—Christmas trade here was very good on the whole. Prices went a little lower than last year. The supply was short in colored pinks. Day-break was especially in demand. Roses sold fairly, but violets went unexpectedly slow. The biggest demand was for potted plants. Palms, ferns, primroses sold better than ever. Evergreens of all kinds went well on account of the snow in the woods which prevented people from going out and getting their own trees, and made it hard for the farmers, as they had not laid in a stock. Little call for bulbous stuff.

**SPRINGFIELD, ILL.**—Greater, owing to increase in number of florists; ergo, flowers. Prices  $\frac{1}{2}$  less on roses; other stuff slightly less than last year. On Christmas morning we could have sold twice the amount. Quality good. Very little bought; retail prices were at wholesale notch. Increased call for carnations and violets. People wanted these and roses. Buyers waited till last moment and did not order in advance as usual. Some of the florists sold roses of all kinds indiscriminately at \$1 a dozen. Trade was very quiet for two weeks preceding Christmas.

**NEW HAVEN, CONN.**—Better than last year. Customers bought more of both greens and flowers. Retail prices were about the same as heretofore. The stock was good and carnations were about the only thing that ran out. This they generally do, as they are more for the money and the cheapest. Roman hyacinths,

smilax and narcissus were overstocked. There is a growing demand for better roses. American Beauties were in demand even at the high prices, and there was a great call for violets. The demand for holly seems to be growing rapidly. Sales here must have been double what they were last year. There was also quite a good call for mistletoe.

**READING, PA.**—Prices about the same as last year. Demand better than ever before, but the supply rather less than last year in consequence of so much glass having been devoted to chrysanthemums. All flowers were well used up except bulbous stuff, which was equal to the demand. Taste ran decidedly in favor of loose flowers with long stems, roses being most in favor. The weather was very mild. Many palms and poinsettias were used in the different churches, but holly and laurel wreathing were not as much in demand as in former years. This trade has been overdone by all the hucksters in town. A good trade was done in potted plants and jardinières and mixed fern dishes. Palms in 5 to 7 inch pots sold well, with kentias taking the lead. Cyclamens and primroses also sold well.

**SPRINGFIELD, MASS.**—Christmas trade was very late in starting; There was quite a noticeable falling off in orders for the more expensive flowers; prices about the same as last year. Violets were short until the last moment and then offered by growers at a much less figure than three days before. Other stock was abundant, and Romans and paper whites overabundant. The demand for holly was very slow until the last minute, when the supply was not sufficient. Other greens were abundant, but not in much demand. Churches, at least some of them, voted to do away with their Christmas decorations and "give the money to the poor." As one church man said, "the poor we always have with us, but as Christmas comes but once a year I question the wisdom of doing away with these special decorations."

**ROCHESTER, N. Y.**—Christmas trade was good, but in smaller sales than last year, still the amount of cash sales was a few dollars ahead. People seemed to come out the last moment. Credit sales are not in shape yet. They may be more or less than last year. Some of the wealthy people gave to the poor instead of buying flowers and only bought greens. Everybody sold out of holly. There was a lighter purchase made than usual, as we did not think the demand would equal other years. Evergreens did not sell so well, as the churches had very little decorations. Flowers were less in price than last year. Roses sold at \$2 to \$3 per dozen and carnations at 60 and 75 cents. The warm weather affected the roses; a good many went to pieces, Gontiers particularly. Violets did not sell well. Carnations sold best of all. Most florists had flowers left when the day closed, but not a large amount.

#### Greenhouse Construction.

We present herewith a cross section of one of the new iron houses erected by Mr. John H. Taylor, Bayside, N. Y.

The house is 22 feet wide, the rafters and purlins are of iron, the glass 16x20 and sash bars 1x1 $\frac{1}{4}$ . The other dimensions are given in the engraving. A feature that has attracted much favorable comment is the use of what might be termed "solid beds" built up of coarse crushed stone, through which steam pipes

SECTION OF ONE OF MR. TAYLOR'S ROSE HOUSES

are run, the soil being placed on top of the stone. This gives all the advantages of a raised bed and is as permanent as the usual solid bed.

Mr. Taylor is a firm believer in the value of side ventilation. As will be noted by reference to the engraving he has ventilators on both sides as well as at the top. The houses are separated one from the other to prevent any possibility of snow laying in the gutters, and there are no side benches.

We believe our readers will be much interested in this cross section of a house that represents the results of the thought and experience of one of our most successful growers.

#### Philadelphia.

Perhaps it may be a little late to speak of the holiday business, but there is one feature of it that deserves mention, and that is the increasing demand for plants, both flowering and ornamental foliage, such as palms, crotons, dracenas, etc. Florists who make a specialty of plants and have greenhouses attached to their stores report having had a surprisingly large sale for this class of stock. Thos. Cartledge, of Pennock Bros., said it was the best Christmas they ever had for plants; it was a sort of a "little Easter" in this respect. Robt. Crawford said in substance the same thing, reporting that plants and jardinieres sold remarkably well. It was the same at Geo. Craig's. The principal blooming plants were primroses, poinsettias, begonias, stevias, callas and Harrisii lilies, and some very nice plants of azaleas, the latter being sent in by Mr. Harris and a few by J. Becker. These were in great demand and were soon sold out. There were some very pretty ericas from Long Island which sold well. S. Edwards & Son sent in quite a lot of ardisias in 4 and 5-inch pots which were remarkably well berried, these went like hot cakes. There was also a very large sale of ferns, as everybody had the little table fernery fixed up anew for the Christmas dinner. We believe there will be quite a demand for choice blooming plants at Christmas, for some years to come, and it is to be hoped that "old Prob." will favor us with just such weather as we had this year, which would seem to have been intended for Easter, it was so mild.

Many of the carnations that supplied the Christmas trade, while they looked very well when received from the grower,

went to sleep shortly after. It is all right for the grower to get a good price for his products, but he should give good value for the money. The retailer must charge a high price for his flowers at such times to come out, and be ought to be able to deliver fresh flowers and not those that will wilt or go to pieces as soon as they are placed in a warm room. There is also something said at times about seconds, but not at Christmas time, the first and second quality seem to be congenial friends about this season and are to be found huddled together in bunches with a first class price attached. There is just as much robbery in this as there would be in giving the grower a lot of damaged money, out of every dollars worth of which he could only use 80 to 90 cents, the rest having to be subject to a discount. Yet the retailer has to accept their stock at first class prices and make the best use he can of the seconds he finds in it.

The past week business has been very quiet, still prices have been held up, the growers saying they would not drop much until after the first of the year. Mermets, Brides, La France, Meteors and such stock started the week at \$12, dropped to \$10 and later on some were sold at \$8. Perles, Cusins and Wattevelles ranged from \$8 to \$6, with some closing the week at \$5. Beauties and Belles started at \$60, dropped to \$50 and some good flowers sold at \$40. Carnations opened the week at \$2.50, dropped to \$2 with some good white at \$1.50, this color seeming to be the most plentiful. For the fancies \$4 was asked for Ophelia and Sweetbrier and the best Daybreak, while Edna Craig sold for \$5, and Mr. Lonsdale seemed to have little trouble to get \$7 for Helen Keller.

The prices of all stock held up very well considering the volume of business; bulbous flowers are about the same, all this class of stock is so plentiful that the price depends a good deal upon the ability of the man who buys it. The average price of valley is \$4, Romans and narcissus \$2 to \$3. Smilax is still plentiful at \$15, while \$20 is asked for some extra fine.

New Years business was not such as to warrant any increase in the price of flowers; it was a good busy day, but there was little to remind one of the old times when the growers and commission men were told to "Duplicate our Christmas order." Will those good times ever come again?

Faust Brothers have purchased the

business of Mrs. John Plender at 29th and Girard avenue, and will manage this establishment together with their nurseries at Bala.

The Longinette team of bowlers were again defeated by the Baker faction at the alleys last Thursday evening. George McLean was responsible, as he put up a score of 229 in the last game and pulled the match out of the fire. Baker sustained his reputation as a kicker, he is certainly the greatest of them all.

Mushrooms have sold as low as 25c. per pound recently, and hot house tomatoes are down to 30 and 35. Very low for these products at this season of the year.

K.

#### Chicago.

Referring again to the Christmas trade, it was certainly full of surprises, some of a very pleasant nature and some otherwise. For weeks the most doleful predictions regarding holiday trade were made, and the state of the business up to the very eve of Christmas seemed to fully warrant them; the outlook was certainly gloomy.

The first pleasant surprise to the retailers came in the shape of holiday price lists. For the first time in the history of the flower trade in this city the prices of roses were most reasonable.

The next surprise (not of as cheerful a nature as the former) came to the commission men. The retailers were not dazzled enough by the low quotations to jump in with very heavy orders. Everybody seemed to be very conservative in their purchases, so when business opened on Saturday all orders for stock were filled promptly at the lowest quotations. Choice roses went at \$10, with few sales of extra choice La France, Testout and Meteor at \$12 to \$15, small roses at from \$3 to \$5.

After the first orders were filled in the morning the retailer laid low. In the afternoon came the break in the market; prices went all to pieces; good stock from Gontiers up to Meteors sold at \$25 for 1000 lots, and then some of the large dealers went in heavily. The trade was brisk, contrary to all prediction, but the downward tendency of the market was not checked until Christmas day. Prices on that day ruled firm at figures as first quoted. Beauties were about the only roses that did not suffer in the general slump; 50 cents for best quality was the ruling price; the supply was far larger than at any former season, but the demand was far in advance of the supply.

The biggest surprise we imagine will be that of the grower when he receives his returns from the commission man, and it will certainly be a very disagreeable one. Much of the stock was undoubtedly pickled and not worth more than the prices obtained for it, still good stock had to suffer in consequence of the enormous quantity of poor truck that was thrown on the market. Where lies the remedy? Time and again this matter has been discussed. It seems that only by hard experience a useful lesson can be taught.

There is no doubt that much of the stock that was slaughtered could have been disposed of at fair prices in the three or four days preceding Christmas. The wholesale houses were then almost bare and the dealers could scarcely get enough material to fill orders. The shipper of pickled stock is certainly the one most to blame for the present state of affairs. If the commission dealer would take some measures and consign this truck at once

to the bargain counter and not let it come in competition with fresh stock much of the evil results would be done away with and the shipper of good stock would not have to suffer for the sins of the unscrupulous.

New Years trade, while it showed a great falling off from Christmas, was certainly up to expectations. Some of the retailers say they were very quiet, and it is certain that there were no large decorations, but a fair amount of material was sold in the form of loose boxes of flowers. Baskets or bouquets were very little called for. The demand was in much the same lines as at Christmas, though perhaps the demand for red and similar colors was less marked. Among roses Beauty of course stood at the head, ranging from \$5 to \$6 a dozen wholesale; some extra flowers are reported at \$7.50. Meteor ranged from \$10 to \$12 a 100, but a few with extra long stems sold for \$15. The larger teas averaged \$8 to \$10, smaller \$4 to \$6. On the whole it seems that prices generally went about 25% below Christmas. Carnations were not overstocked; such fine varieties as Daybreak, Edna Craig and Buttercup were \$4 to \$5; Tidal Wave and other deep pink or red were \$3, and whites \$2. Short stemmed carnations are unusually scarce.

In bulb stuff a few tulips are now in, yellow and red; they have been bringing about \$4. Valley holds at \$4 and \$5 and was in good demand for New Years. Harrisii sold well too; it keeps at \$12.50 and sells much in advance of callas. Paper white narcissus and Romans are still extremely plentiful; trumpet major has not made its appearance, except in some isolated cases. Violets sold admirably all through the holidays, and the demand keeps up. Consignments of violets from local growers continue small. Smilax is still a glut for the reason that there is absolutely no call for it; it has been a drug on the market all winter. The demand for common ferns has also been small this winter; probably the limited call for these greens is partly due to the very small amount of decorating done. There has been a very small amount of decorating around the holidays, excepting a few arrangements in which holly took a leading part.

Prices naturally dropped January 2, but it happened that there was rather a limited supply in the market on that day; some of the plants are now off crop and they had all been cut pretty close for a week or so. Brides, Niphetos and Perles keep quite plentiful, but not the colored sorts, which are the best sellers. Although New Years trade was quiet, it was better than expected, as this holiday has been dead to the florist for several years.

Christmas noon there was a wedding at the residence of Mr. J. C. Vaughan. The bride was Miss Florence L. Vaughan, a sister of Mr. Vaughan, and the groom was Mr. Carl Cropp.

#### Boston.

Cut flower trade has been generally satisfactory since Christmas. There has been but little sun and the production has not been heavy enough to overstock on anything except possibly white carnations. Lily of the valley, narcissus, Roman hyacinths, in fact anything white, have gone somewhat slowly, the main demand being for colors, which are none too plenty in either roses or carnations.

New Year's receives but little attention

here as a holiday and the demand is nothing more than a good average winter trade would be. Prices on everything have dropped since Christmas, and indications are that they will rule lower in this market all season than ever before.

The cities of Cambridge and Newton have appropriated large sums of money and have extensive plans under consideration for the beautifying of their surroundings and the development of their park systems.

#### New York.

The unexpected happened on Christmas day and the demand for flowers at the last moment was a great surprise to all concerned. This healthy state of affairs lasted until the middle of the week, when it dropped off as suddenly as it came and trade was about as bad as it could be until New Years. This holiday is not what it used to be in New York. Every year sees it retire further into obscurity, and now it is of practically no account as a factor in the flower trade with any effect upon prices.

It is not only the common or abundant grades of flowers that are suffering now; American Beauties, violets and such goods that are supposed to be always salable when good are sold at less than one half of the prices of a year ago, and with difficulty even then. Violets, Grace Wilder carnations and Harrisii lilies find no takers and pile up mountains high in the wholesale establishments. However, there is a hope that the New Year's trade may take a turn similar to that of Christmas and that conditions may yet show an improvement.

The dark, muggy weather is having its effect on colored roses. There is no sunlight and artificial heat can not be put on, so that Mermets, Wattevelles, etc. have no life to their color. A box of Meteors shows a confused mixture of blue, black, scarlet and purple that would puzzle even an F. Schuyler Mathews to describe. Bridesmaid and Cusin alone of the small roses seem to hold their own in color. Many rose houses are standing still, and a majority of growers claim to be "off crop," so that with any life in trade prices ought to be good for the stock that is coming in. A number of growers complain that Mermet shows a tendency to throw much blind wood this season.

Alfred Dimmock sailed on steamer Umbria on Saturday, December 30. Robt. B. Young starts for California this week. J. N. May has been confined to his home for two weeks with a severe attack of the grip, but is now happily improving.

The annual prize bowling meeting of the Flatbush Bowling Club was held on the evening of December 28, at Bantel's alleys. About twenty gentlemen were present, including three or four invited guests. The Flatbush boys know how to enjoy themselves, and no more jolly and sociable a party could be found, from the youthful veteran, President Charles Zeller, down to the youngest member.

The scores made were not the highest on record, but the method adopted for the distribution of the premiums gave the owner of the lowest score an equal chance with all the rest to get the best prize. The only advantage to the best bowler was first choice of the row of mysterious looking packages on the table, which were packed up in such a manner as to disguise as much as possible the nature of their contents.

The selection and opening of these packages was attended with much merriment

and many surprises were encountered. Decanters were won by those least in the habit of using such things, while articles useful only to those enjoying a life of double blessedness were sure to fall to the lot of the unmarried young man, and a toy horse became the property of the oldest man in the party. Eugene Daille-douze carried proudly home with him a prize which with ordinary care he can make good use of every day as long as he lives, and his brother Henry became the happy possessor of a piece of cheese strong enough to make his house burglar proof and to reduce rents in his immediate neighborhood. The annual supper, which took place after the distribution of the prizes, was a very pleasant affair. The president, Mr. Chas. Zeller, occupied the seat of honor. Much regret was expressed at the inability of Mr. P. B. Meissner to be present with his old associates, and that his health may continue to improve until he has fully recovered was the wish of every one present.

It is announced that Mr. W. A. Manda has severed his connection with the corporation of Pitcher & Manda.

#### Montreal.

As far as I have been able to ascertain the trade this year has been better by 25% than last year. The greatest improvement was in plants, the demand for which exceeded the supply. Of course anything in the way of plants in bloom sold, but palms, rubbers, ferns and such plants were more called for than on any former occasion. Good azaleas were much sought after and brought good prices. Lilacs and Harrisii lilies made their appearance here for the first time for Christmas and were quickly bought up; there were also a lot of good cyclamens which sold well. There were more Dutch hyacinths and tulips ready this year than usual. These were grown in pans and found a ready sale.

In cut flowers the trade called mostly for loose flowers; very few bouquets, some baskets, but less than in former years. Roses and violets as usual were in greatest demand, carnations following close, with Daybreak as the favorite. The present custom of cutting all carnations with long stems has caused that flower to become a formidable rival of the rose as an all-seasons and all-purposes flower.

On account of the dull weather and the unusual amount of snow during the past month the supply of home grown roses was short, but there being a surplus in some of our neighboring towns our dealers got all the stock they wanted without paying any customs duty. The supply of carnations, though not being equal to the demand, was of an exceptional high grade this year. The varieties showing up best are Daybreak, Silver Spray and Tidal Wave.

The supply of Romans was a little over the demand, also of paper whites, for which the demand seems to be falling off. A few cut tulips were offered, with but little demand; valley was scarce and but little called for. The supply of cut adiantum was very short. Smilax was abundant. One grower supplied splendid freesia cut with all the foliage, for which there was a ready sale. There was a fair supply of chrysanthemums, for which there was a fair demand at good prices.

Walter Wilshire had a nice lot of lilacs in pots for Christmas, also azaleas and cyclamens; his roses were good.

J. Bennett had a nice lot of good chrysanthemums in small pots, which sold

well. This gentleman says his trade was about 25% over last year, particularly in plants. He had a good demand for small palms and ferns.

C. Campbell as usual had a large general stock, his roses being very good and his trade about 25% better than last year.

J. S. Murray reports trade about as good as last year, a falling off in the demand for made up work and an increase in loose flowers and plants.

P. McKenna & Son had a nice lot of *Harrisii* lilies in 6-inch pots, three bulbs in each, which sold well; also a nice lot of *freesia*. Their carnations were very good, especially Daybreak. They report trade somewhat better than last year.

Wilshire Bros. did a good trade in plants; loose flowers in greatest demand, an improvement all round on last year.

A. Martin reports a good trade all round. He had a nice lot of azaleas, hyacinths and tulips in pans, which sold well.

As the writer had no chance to interview the rest of the florists, special mention cannot be made, but the same story would stand for all—a general improvement over last year.

#### Buffalo.

As I ventured to say last week trade was satisfactory at Christmas and has been quite up to the average at New Years for the past few years, but the latter date has for many years been nothing compared to Christmas. On the whole prices were equal to any year and no more kicking occurred, perhaps a little less. Plants were less in demand as holiday gifts at New Years than on the 25th. I don't know that any better way could be thought of to give you an idea of holiday trade than to quote the exact words of interviews with the several members of the trade and they are as follows:

W. J. Palmer, Jr., of the firm of W. J. P. & Son.—“We sold a big lot of flowers, got a big price and nobody grumbled; never handled so many violets in my life.”

W. A. Adams, of Adams & Nolan.—“We did all we wanted to, my boy, and what made a holy terror of the rush was we had a lot of funeral work come piling in. Had to sleep in a bath house Saturday night; no time to go home.”

S. A. Anderson.—“Had an awful big stock, thought I should be stuck but it all went; got a lot of orchids on spec. and they went; so busy I missed divine worship Sunday morning.”

J. H. Rebstock.—“Am well satisfied; had an enormous stock and stayed there till it was sold. You bet we are going to have some fun on the snow; wait till Easter, I'll show you.”

E. I. Mepsted, care of Wm. Scott.—“It was certainly a better trade than last year, bought flowers to my heart's content and sold them all even if it does make the old man tired; no, thank you, I'll take a glass of milk.”

C. F. Christenson, of Delaware avenue.—“My dear boy, trade was all right; we got fine prices, disposed of all our rubbish, and what is better we have a mighty fine job on this week, the bigswell Buffalo Club ball; that, my dear fellow, is the society event of the season; come back to the office, we have just time for one more.”

Mr. Stuart.—“Best Christmas I ever had.”

James Milley.—“We sold all we had and could have sold more if we had laid in a bigger stock of roses, carnations and violets.”

Wm. Belsey.—“We did better than last

year, and I think a good deal better; I saw no evidence in my trade of hard times; won't you come indoors a minute?”

Dennis O'Connell.—“Trade was out of sight; had a big run on orchids and roses; begorra, I'm satisfied.”

Dan'l B. Long (commission merchant).—“Disposed of a great amount of stuff and most of it at prices which must be most satisfactory to the growers; wish it was Christmas week every week with me.”

W. S.

#### Toronto.

Christmas trade in this town has been fair, good, one might say, considering the times. There being considerably more florists' stores this year than last the trade was more divided up, but still the old established ones say that their receipts were nearly up to last year, and the new ones say they did a good business.

There must be a large increase in the number of buyers, for everyone says that individual buyers who spent, say \$5 last year, only spent \$2 or \$3 this year. These facts seem to be pretty good proof that the total business done must have increased considerably, and this fact is a pretty good pointer that when good times come again the florist business will not be such a bad one after all. Waiting for the good times is where the pinch comes though.

Orchids showed up well in many windows. Manton Bros. sold many nice plants of *Cypripedium* insigne for presents. J. H. Dunlop had some fine spikes of *Zygopetalum Mackayi*. C. J. Tidy had a variety.

Pink carnations Daybreak and J. J. Harrison were the special favorites in carnations and sold easily for 75 cents a dozen.

Roses were dear and the retailer did not make much profit on them.

There appeared to be an abundant supply of everything. Holly did not go off in such large quantities as usual perhaps and there was some left over. A considerable quantity of evergreen wreathing also was left over.

The weather was fine and mild and could not have been better for delivering goods. The streets on Saturday night were crowded, everyone carrying a parcel or parcels.

At the last regular meeting of the Association Manton Bros. brought some very fine J. J. Harrison carnations; they seem to grow it to perfection. Mr. G. Hollis brought some blooms of a seedling white carnation of 1891 which showed exceptionally good qualities; his stock of it is for sale.

E.

#### Washington.

The weather during Christmas week was such as one would have expected at Easter season and a late one at that. Up to Sunday night everything looked gloomy for a good business. Christmas morning it began to pick up a bit, by noon it was brisk and before the day closed all our florists were more than satisfied. While it was perhaps not quite up to last season, the demand went beyond expectations and a few were obliged to turn some customers away. Both growers and retailers are rejoicing.

Prices were about the same as last season, if anything a shade lower. The most of our retailers relied entirely or nearly so, on home grown stock. A number had been buying in New York up to within a few days of the holidays, they then withdrew their standing orders, lest they

should be overstocked as all predicted a dull trade.

Each year marks an increasing demand for growing plants at Christmas season rather than cut flowers. The demand this season was largely for small flowering plants, chiefly azaleas, primulas, poinsettias, geraniums, narcissus and Roman hyacinths grown in pans, etc. There was a marked falling off in the demand for large palms, araucarias and large single specimens of any kind. The demand for bright colored flowers was very noticeable.

The trade in holly and other Christmas greens is almost exclusively confined to the country people, principally colored, who bring their stock in from the surrounding country. They had a very good trade this season, but say it was not up to last year. Mistletoe was scarce and poor in quality yet it brought an excellent price.

Both growers and retailers all express themselves as being more than satisfied with the holiday trade.

C. LESLIE REYNOLDS.

#### Seasonable Hints.

New Years will have cleared you out of a good deal of stock either as plants sold or cut and you will have room now to expand what is left, which will much benefit some of it. The *Begonia incarnata grandiflora* which you have left after cutting for holiday trade will not pay to grow on for another later crop, so keep sufficient old plants that have not been cut down too closely for your supply of cuttings for next season. Don't put them down by the side of the path, but give them a moderately warm light place and you will get a lot of strong cuttings. Potting zonal geraniums from 2-inch to 3-inch should occupy a good bit of your time just now, and a few of the stronger growing kinds, such as the Bruant type, you might put at once into 4-inch. They will come in useful at Easter.

Easter is the next big event for the florist and you cannot get your crops in just right without constant watching, and, I may add, moving. *Lilium Harrisii* and longiflorum will want constant watching to “get there” at Easter, and most of them will want all the heat you can give them. Longiflorum will want more forcing than *Harrisii* as they are not potted as early and are not naturally as early to flower.

You can bring your azaleas in for that important date with a little manipulation. Remember azaleas will stand anything but freezing and if you see such early sorts as Mme. C. Vander Cruysen or any other showy early flower you can retard them greatly. And such late sorts as the beautiful Emperor de Brazil will want a moderate heat of 50° at night, and be about right. After you have cut down your crop of *Adiantum emarginatum* is a good time to thoroughly clean them, and don't give too much water until the young growth begins, and put them at the coolest end of the house until they start. It does not pay to be cutting a few of the best fronds off the pots and leaving a lot of poor growth to turn brown. Try to clear off all the matured growth and bring another crop along in succession and then you will have fronds and a crop that will pay.

If you have not sown seeds of the following do so at once: *Crozy canna*, *Centaurea gymnocarpa*, *cyclamen* and *smilax*.

I am putting in the first crop of *coleus* cuttings from the plants propagated in

August. You can't wait and put them all in in March and April, and these cuttings besides making fine large plants give you a lot more cuttings later. Ivy geraniums that were propagated in September will now have a good cutting on them and will be all the better for a stop. Propagate ageratum now and throw the old plants away, the young ones will grow like weeds and you can get any quantity from them, and the old plants are a sad harbor for red spider. The same can be said of *Salvia splendens*, get young plants growing.

After you have cut your flowers of *Cattleya Trianae* and *Percivaliana* and *Laelia Arnoldiana* and autumnalis, give the plants a rest by keeping them in a temperature of 55° to 60° at night and very little water for two or three months. *Calanthe*, which is a truly herbaceous orchid, and flowers at mid-winter, after the flowers are cut the pots should be laid on their side under a dry warm bench and can be allowed to get a good rest. They will show evidence of their wanting to grow again in April or May, when they should be shaken out and started growing again. They are essentially a terrestrial orchid and with good drainage and good rich compost will thrive in a pot as easily as a geranium. Their beautiful pink sprays of flowers are most useful at this season. Wm. Scott.

Buffalo, January 1, 1894.

## St. Louis.

After the Christmas rush business has  
settled down apparently to its usual  
state. There is nothing much going on,  
but owing to a very short supply of  
stock, caused by a cold snap following  
the unusually warm weather, dealers  
have been kept busy getting enough to  
fill regular orders. Christmas trade was  
very much in the nature of a surprise  
party, the demand having exceeded the  
calculations of the retailers, and the re-  
sult was satisfactory to them, the principal  
reason advanced by them being the  
reduced rate at which flowers were sold  
as compared with former seasons. Green  
stuff also developed unlooked for strength;  
several firms which usually have enough  
stock to carry them through reported  
being sold out early in the day.

The bowling teams have settled down  
to work and the second series of games  
is in progress. Team number 1, owing  
to regular attendance of members, is  
already opening a gap between itself and  
the others which it will be almost impos-  
sible to close.

In speaking with Mr. E. H. Michel  
regarding the auctions which the Michel  
Plant & Bulb Co. have held recently, he  
said the deduction to be drawn was that  
auctions paid; good stock brought good  
prices, but anything that was put up  
with the intention of sacrificing to get rid  
of it would be sacrificed with a vengeance.

Mr. Alex Waldbart, our well known  
florist, has entered suit against H. Clay  
Pierce for the sum of \$267.10, balance  
due on account with interest at the rate  
of 6% from November 14, the same being  
balance of account for sodding and flow-  
ers furnished.

## The Government Seed Shop.

The public journals are full of comments criticizing Secretary Morton's report recommending the abolishment of free distribution of ordinary kinds of garden seeds at the public expense.

As is known to most of our readers, the Secretary has taken this position, which is certainly the only position that any broad minded, patriotic citizen could take. He says "If there ever was a good reason for the original purchase of new and improved varieties of seeds for gratuitous distribution there is now certainly no valid reason for the purchase and distribution of ordinary seeds, bulbs and cuttings which are common in all the states and territories and easily obtainable by the people generally."

Now why the government should purchase and distribute year after year the ordinary varieties of turnips, cabbage, celery and other seeds which are common in all the states and territories and are obtainable at low prices by the people in general is certainly a very pertinent question for the Secretary to ask. Why should the government expend as it did \$135,000 in 1892 for the purchase and distribution of enough common varieties of beans to plant 4,000 acres, of beets enough to plant 2,500 acres, of sweet corn enough to plant 7,800 acres? All of these including such heavy seeds as beans or corn were sent through the mail at the cost of another \$100,000 or more to the Postoffice Department. Is there any better reason why the government should distribute these ordinary market kinds than that they should give away the ordinary necessities of life—flour, sugar, cloth, hats or shoes?

We admit the possible wisdom of procuring and distributing rare and improved varieties of seeds, although we doubt if the enterprising seedsmen of the country would concede that any possible bureau established by the government and under its control could more thoroughly bring before the American public any novelties worthy of dissemination than they now do.

Representatives in Congress who have long used this means as a bait to their constituents will doubtless protest stoutly against the change. One of the former Secretaries of Agriculture once stated that in his opinion it was impossible to accomplish this reform because of the opposition in Congress, and Secretary Morton will surely do a work worthy of a whole term's service in his office if he brings about the accomplishment of what he has outlined. Doubtless a powerful lobby will be engaged by those financially interested in the maintenance of this bureau in its present condition. All who are receiving monies directly or indirectly are of course likely to make a strong attempt to retain the old order of things.

An article in the New York Morning Advertiser of December 18 states:

"The value of the products of the floriculturists, who are constantly stimulated by liberal distribution of choice seeds by the department, amounts to \$25,000,000 per annum."

Such of our readers as are acquainted with the facts in the case will certainly deny that floriculture is stimulated (?) to the extent of even 25 cents per annum.

Better than  
Ever for  
1894.

## Is Different from Others.

It is intended to aid the planter in selecting the seeds best adapted for his needs and conditions and in getting from them the best possible results. It is not, therefore, highly colored in either sense; and we have taken great care that nothing worthless be put in, or nothing worthy be left out. We invite a trial of our seeds. We know them because we grow them. Every planter of vegetables or flowers ought to know about our three warrants; our cash discounts; and our gift of agricultural papers to purchasers of our seeds. All of these are explained in the Catalogue, a copy of which can be yours for the asking.

# Headquarters for CHRYSANTHEMUMS.

The main and essential thing is to get healthy stock. Stock must be prepared by open air culture a year prior to taking the suckers. All our stock is thus treated, and for the season of '94 we can give to all our customers young plants with just the same healthy vigor as those that won the Premiums at the shows. We will send you healthy, vigorous plants, but to properly prepare our stock we cannot afford to offer it in competition and at the low price that house-grown and box-grown plants are offered. It pays to get the best.

Very many people have asked for our list of the winning 48 at Chicago which was shown in the excellent photo-engraving in the FLORIST. They were as follows: *Abraham Lincoln, Lagoon, Elegant, Beauty of Richmond, Mrs. Joseph Thompson* (pure white), *Mrs. P. W. Smith, Robert McInnes, Mrs. Wm. Trelease, Mrs. Craige Lippincott, The Queen, H. E. Widener, Joey Hill, Flora Hill, Mlle. Therese Key, Mrs. C. Harmon Payne, Madame Ed. Key, Madame Isaacs, Secretary Farson, Ada LeRoy, C. B. Whitnall, C. H. McCormick, Etoile de Lyon, Eda Prass, Ed. Molyneux, Harry Balslev, Roslyn, Andes, Mt. Whitney, Mrs. Wm. Coupland, Mrs. J. W. Crouch, Niveus, Vivian-Morel, Octave Mirbeau, Century, Mrs. Jerome Jones, Mrs. Maria Simpson, G. W. Childs, Mabel Simpkins, Judge Hoitt, Eleanor Sievers, Louise Sievers, Beauty Poitevine (pink), Maud Dean, Pres. Smith, Mrs. F. L. Ames, Mrs. E. W. Clark, Minnie Wannamaker, Challenge and Eugene Dailedouze.*

The above will win in any entry, if properly grown. We offer the above plants, one of a kind, including the two prize winners Dailedouze and Challenge for

**\$6.00; 100, two of a kind, \$10.00.**

There never was a finer collection of select varieties than is now offered by E. G. Hill & Co., at Richmond, Ind. Prices never so low. You will want good commercial varieties for benching. Well, we have them: *Queen, Niveus, Lippincott, Balslev, Newett*, and all true, tried and tested sorts. Prices within the reach of all.

The unprecedented demand for Challenge, Beau Ideal, Mrs. E. G. Hill and Dailedouze makes it necessary that you should have these, if you would win the coming autumn. We will send you for \$6 our five new varieties and Major Bonaffon, Mrs. J. G. IIs, Marie Louise, Pitcher & Manda (P. & M.), Laredo, Achilles, and Mutual Friend; the 12, cream of the year's novelties, for \$6.00.

New Geraniums, New Carnations, New Roses, in fact everything valuable in our line.

## E. G. HILL & CO.,

Richmond, Ind.

## IN THE FRONT RANK! NEW WHITE CHRYSANTHEMUM "MUTUAL FRIEND"

It is sure to be a prize winner and a leading variety for '94.

**FIRST PRIZE and CERTIFICATE of MERIT MASS. HORT. SOCIETY, '93.**

Orders booked now for March delivery, 50c. each; \$4.00 per dozen. At these prices all should try it. We know it will please. Send for descriptive circular.

**MANN BROS., Randolph, Mass.**

## New Chrysanthemum, MRS. J. GEO. ILS,

A CALIFORNIA SEEDLING.

Flowers sent from San Francisco to the Chicago Show awarded a MEDAL.

A grand white, of remarkable substance, size and depth of flower. See Illustration in AMERICAN FLORIST of November 16th. The very vigorous habit, and our large stock of this novelty, enables us to assure the trade of good plants, and to guarantee safe arrival. To be sent out the 1st of March, 1894, at the following prices to the trade:

75 cents each; \$7.50 per 12 plants; \$14 per 25 plants; \$25 per 50 plants; \$40 per 100.

ORDERS BOOKED NOW BY

**JOHN H. SIEVERS, 25 Post St., SAN FRANCISCO, CAL.**

## Chrysanthemums.

Send for catalogue. I. L. PILLSBURY, Macomb, Ill.

Baltimore.

This was a market man's Christmas sure enough, and they were the men that reaped the harvest. No doubt much of the complaining done by store men was due to the great display of plants and flowers at the markets, where the pleasant weather tempted thousands of purchasers. As it is a popular idea that market stuff is cheap, the hard times and mild weather co-operated to bring about such a Christmas market as has not been seen in years. The weather has been very warm indeed for December, the thermometer getting up to 70° one day this week, and very little below freezing at night for two weeks.

In store circles trade was pronounced very slightly improved during the week, and there it will probably stand until severe weather stops market competition. Violets are plentiful at \$1 to \$1.25 a hundred. Roses are coming in more freely, Perles 6 to 8, La France 10 to 12, Gontiers 6 to 8. Roman hyacinths are not in such a glut as they were, though still plentiful. On the whole the supply is and has been equal to the demand.

The store windows have presented a very pretty sight, the full supply enabling the proprietors to decorate them very freely with flowers. Orchids appeared in many of them, Mr. Jas. Pentland showing two enormous Cypripedium insigne covered with bloom.

Now comes the tug for Easter and when well over the strain of the holidays we can begin to speculate upon the probabilities of the next big sales day; if it too proves a market man's day, coming as early as it does the store men will have to go to standing at stalls in the future.

Mr. R. J. Halliday is still improving.  
MACK.

**W. C. KRICK'S**  
PATENT

**NOW** is the time to prepare for Spring trade. *First quality stock. Low prices. Arriving just as trade in Spring opens* is a combination of circumstances which we have arranged for, calculating to save money and time for grower and dealer. If you can use any of this stock to advantage, no matter how small the amount, it will pay you to write us.

Our **new Plant Tub** is a **MONEY SAVER**. If any one issuing a catalogue has not yet received electro and price list, please telegraph us or write at once.

We don't wish to withhold such a good thing from anyone. We also have a *Dandelion Puller* that many like; it's cheap and sells well.

WE HAVE TWO LARGE LATANIA BORBONICA, AND TWO SEAFORTHIA ELEGANS TO DISPOSE OF. THEY ARE A BARGAIN FOR SOME ONE. WILL SEND PHOTOGRAPH AND FULL PARTICULARS ON APPLICATION.

WE WANT A PERFECT SPECIMEN OF STANDARD ORANGE TREE IN FRUIT. ANY-ONE WHO KNOWS OF SUCH A PLANT, PLEASE ADVISE US PROMPTLY.

We have made arrangements to supply our trade with stock for **ponds**—Nymphæas, Lotus, etc. If you are interested in this line, please write us.

*Cut Flowers and all Florist stock at Wholesale.*

Correspondence solicited. Estimates cheerfully furnished.

**LYMAN FELHEIM, ERIE, PA.**

## Heating Pipes.

How many feet of 4-inch pipe will be required to keep a greenhouse 17x100 and 9 feet high at a temperature of 60° in zero weather? BEGINNER.

To determine the number of feet of 4-inch pipe it will require to maintain a temperature of 60° in a greenhouse, the outside temperature being at zero, the following formula will be found correct: Take the number of surface feet of glass exposure and add to same one-tenth of the number of surface feet of wall exposure, if of other material than glass, and divide the result by 2¾, which will give the number of lineal feet of 4-inch pipe required.

L. PIERSON,  
Sec'y Lord & Burnham Co.

WHEN SENDING us newspapers containing items you wish us to note please do not fail to distinctly mark the item so it can be easily found, as we can not spare the time to hunt through the mass of papers sent us for unmarked items.

KANSAS CITY, Mo.—Mr. G. E. Probst has sold his interest in the Probst Bros. Floral Co. and has started in business on his own account at West Plains, Mo.

SAVANNAH, GA.—Christmas trade was about 50% larger than last year. Retail prices about as usual at the season. Supply was equal to demand. Quality superior owing to favorable weather. Increased call for decorative plants, especially palms.

KANSAS CITY, Mo.—Christmas trade shows a decrease of about 10% from last year. Retail prices not quite so good. Supply not equal to demand. Everything was sold by noon of Christmas day and had lots of calls later that couldn't meet. Quality was better all round. Roses seemed to have the call. Mixed flowers sold after roses were gone. New Years trade was better than last year.

### Carnation Notes.

Has Christmas taught us anything? I think it has, the first and most important one of which is that the supply is fast catching up to the demand, and is in serious danger of getting ahead of it. If you have been thinking of putting up another lot of houses next summer right now is a good time to put on your thinking cap and do a little real hard thinking. Will it pay to double up on your place from the present outlook of things? It certainly does not look that way now, for if the Christmas trade once becomes an ordinary every day affair then I don't see where we growers come in.

We also notice in looking over the reports that all secondary stock was a drug in the market. This should and will teach us to grow only the very best of varieties and grow them to perfection, there is no use in denying the fact that the flowers of the future must be superior to those that we used to be able to sell. How it was in other places I do not know, but I noticed in this little country town of ours that about the only thing that counted was a good large flower with a good long stem, and poor flowers were not wanted at all. We have educated the people up to a high standard and the only thing left is to fill the demand for that class of flowers, and the grower who has four or five houses of good flowers will be better off than the one who has twice that many with commoner ones.

I have heard a few growers talking over their Christmas returns and speak of retrenching their expenses by discharging some help. This is a serious mistake, for if there was none too much help on the place before there will be nothing gained by reducing the force now when everything points toward the necessity of extra labor and care to be in the market with your stuff.

Now is a very good time to revise your list of varieties and get rid of those that do not pay, but do not be too hasty, as it sometimes happens that a variety has through some cause or another not turned out as you expected and yet is too good to discard with one failure. As an instance of this I know that there are a number of growers disappointed with Edna Craig, yet it is certainly a fine carnation and with a little care in selecting the stock will make a standard sort that will not soon be replaced. I have cut some blooms of this variety that were

almost worthy of the name they bear. There are of course some streaked ones in the house, but by being careful not to propagate from those I think in another season I will have them in good shape. It is not always the variety that is at fault, it is often ourselves.

One thing I have had demonstrated to my own satisfaction, and that is that you can handle carnations better on benches to get your crop in at a stated time than you can in solid beds, but by disbudding and high culture the flowers from the solid beds will be the best every time, a few varieties excepted. I have two houses to Fred Dorner, one benched and the other in solid beds. Those on the bench yielded a fine crop of flowers for Christmas, while those in the solid beds have a fine crop of buds on, but as they will not stand quite as much forcing without injury to the plants the result is that they will come in when not wanted so badly.

Another Christmas item that is becoming almost a chestnut but is of vital importance to the cut flower trade is the storing of flowers for a week or more before the time they are wanted. This class of stuff is always in disfavor, and if customers get it and it goes to pieces for them almost at once they will either fight shy of that dealer or even hesitate about buying at all another season.

A. M. HERR.

### Carnation Rust.

I notice Mr. Herr's remarks on the carnation rust, and also his invitation to those who know of a possible cure to make known the same.

During the past two years we have been much troubled with the rust on all kinds except Portia. Daybreak has been as badly affected as any other, and to remedy the same sulphide of potassium has been used, also the ammonia and lime formulas of the Bordeaux mixtures, all without benefit to the plants but with various other results. As a final resort the preparation known as fir tree oil was tried last winter and it has completely checked the progress of the rust, the pinks have grown out of it entirely and are producing fine crops. We use it at the strength recommended for mildew, applying it with the syringe while the mixture is still warm. The only objection to fir tree oil is its cost, which would be considerable if used on a large scale, it does not injure the most delicate shoots or roots if applied as directed on the bottles.

I notice also in the notes of your correspondent "L," of Philadelphia, that when speaking of violets he states that "the claim for this new variety is that it has so far been free from disease." Whether this was claimed or not by the distributor last year I do not know, but I do know that he has never had disease on his

plants except when once some Marie Louise were planted in the same plot. These last speedily went out of existence and the Campbell remained. I have examined his plants at all seasons and could never detect any disease on them, but it does spot with others under certain conditions, it is hard to say just what, but the Campbell will thrive and do well where most have failed with the older kind.

The Bordeaux mixture is of no use in checking the violet spot; we have given it a fair trial for four winters and have never had much success from its use. Fir tree oil has given us best results of any, but this was applied too late to be sure whether the benefit came from the use of it or from other causes; we shall try it again another year. It would be curious if, as Prof. Galloway believes, the trouble is not of fungoid origin. E. O. ORPET.

#### Chester County Carnation Society.

The January meeting was held at the rooms in Kennett Square, Pa. It being the annual meeting, the old officers were re-elected as follows: President, J. H. Ladley; vice-president, E. Swayne; treasurer, J. J. Styer; secretary, W. R. Shelmire.

The secretary gave details of the Boston flower exchange as reported by Mr. Davis, who had recently visited the "Hub." The question was discussed at length and favorable to the adoption of some such scheme in Philadelphia. The committee on sale of flowers was authorized to look the matter up and report later.

The committee on flower exhibit reported interview and correspondence with Secretary Farson of the Penna. Horticultural Society looking towards a union with that society for an exhibition of carnations. The report was accepted and the committee continued with power to act.

The secretary read an invitation for the members of the society to attend the annual banquet of the New York Florists' Club.

On motion it was agreed that the society insist that the committee having in charge the bestowal of the gold medal offered by this society shall use the scale of points adopted here some time ago.

Mr. Darlington had used odorless fertilizer as a plant stimulant in the greenhouse with marked advantage; C. J. Pennock had used Stockbridge manures. Mr. Darlington had lightened soil on benches, part with coal ashes, sifted, and part with sand, and found the mechanical condition much better where ashes were used. Pres. Ladley had used lime for the same purpose successfully.

Wm. Swayne reported a lot of plants grown under glass on a bench all summer that had made a strong growth, were remarkably healthy and were making an abundance of bloom.

The exhibit of cut flowers was exceptionally fine. C. Love showed one, a deep pink; Mrs. Starr sent several seedlings of this year's production; P. Barnard showed Brutus X McGowan in several colors; E. Swayne showed one, Caesar X Golden Gate, of Chester Pride type, large and showy; Wm. Search showed a white in style of McGowan; Sec'y Shelmire showed 30 varieties of yellow, "Sons of Caesar," and some others of extra merit, also three flowers in distinct colors from same plant; I. Passmore showed several seedlings of promise. Altogether the flower exhibit was the

best ever made at a regular meeting, the seedlings being especially strong. C.

#### American Carnation Society.

The third annual meeting of the American Carnation Society will be held at Indianapolis, Ind., Feb. 20 and 21. The following program has been arranged:

New carnations and their introduction into commerce—Fred Dörner, La Fayette, Ind.

Border carnations—Prof. Bailey, Ithaca, N. Y.

Carnations for cut flowers—Eugene Dailledouze, Flatbush, N. Y.

Desirable varieties, and how they may be improved—R. Witterstaetter, Cincinnati, O.

Carnations in Canada—Walter Muston, Deer Park, Ontario.

The discrimination of diseases without the use of the microscope—Prof. Arthur, La Fayette, Ind.

Flowers for profit—J. T. Anthony, Chicago, Ill.

The meeting and flower exhibit will be held in the Dennison Hotel, corner Ohio and Pennsylvania streets. All persons interested are welcome to the sessions and growers generally are invited to exhibit flowers. The Chester County (Penna.) Carnation Society offers a gold medal for best six blooms carnations, any variety, not introduced before 1892—open to all growers. Certificates of merit will be awarded valuable varieties.

Further information may be had on application to C. J. PENNOCK, Sec'y.

Kennett Square, Pa.

#### Portia and Lady Emma.

In a recent issue of the AMERICAN FLORIST I find reference is made to carnations Portia and Lady Emma. Portia is distinct from Lady Emma both in color of foliage and habit of growth. I have not seen Lady Emma for at least 6 years, but I recall the plant very positively. The foliage was of a dull leaden green, the habit branching and brittle, whereas the foliage of Portia is silvery grey. The habit of the plant is very compact, keeping quite close to the soil. At the time I raised Portia there were a number of scarlet seedlings in the same batch. Before the death of the late Mr. Osborne of Mamaroneck and about the time I mention I used to send him seedlings not distributed. I forget for the moment the name of Mr. O.'s gardener, who after Mr. O.'s death successfully grew several of my seedlings. It is possible the variety now known as Lady Emma may be one of these. I would like very much to see a plant of the one known as Lady Emma.

JOHN THORPE.

4 Jackson street, Chicago.

#### Carnation Lady Emma.

As to Lady Emma, which originated with Mr. Starr, we in this locality do not know of a single plant in existence. My attention was first called to the spurious Lady Emma in November, 1891, at Madison Square Garden, N. Y., when I involuntarily exclaimed, "That isn't Lady Emma, that's Portia," and brought quite a storm about my ears. I thought then and still think it Portia pure and simple, and find my opinion well corroborated.

Kennett Square, Pa. EDW. SWAYNE.

#### Correction.

Mr. John Welsh Young requests us to state that since he wrote his note about

carnation Helen Keller Mr. Lonsdale has been persuaded to disseminate the variety next March, hence his statement regarding date of dissemination requires correction.

#### Displays for Effect at Exhibitions.

At the World's Fair Chrysanthemum Show two very attractive features were the general displays, not for competition, made by the Gallagher Floral Co. and E. Wienhoeber & Co. Neither of our illustrations do justice to the subjects, but will serve to give merely a general idea of the means employed to obtain what were in the originals very taking effects. The canopy of red cloth used in Gallagher's display came out very poorly in the photograph and the engraver endeavored to paint in the folds in the cloth but made a poor job of it. The palms in Messrs. Wienhoeber & Co.'s display are only faintly outlined in the picture. There was not sufficient light where the exhibit stood to get a good photograph.

All who saw the originals will we are sure agree with us that such displays should be encouraged, and we believe managers of exhibitions will make no mistake in offering liberal premiums in classes for say, "Best general display of plants and flowers arranged for effect, open to all, any material admissible," and "Best display of flowers arranged for effect with accessories."

Certain it is that the general public takes much more interest in effective general displays of this sort than in any other one feature of an exhibition, unless it be the table and mantel decorations, and we must keep the interest of the public at the highest possible tension to make the exhibitions financially successful.

In the compilation of premium lists for another year we would recommend that these features be made quite prominent:

Vases of chrysanthemums containing 50, 25 and 12 long stemmed blooms.

Vases of roses and carnations containing similar numbers of blooms (with adequate premiums for same).

The two classes for general displays mentioned particularly in this article.

Table decorations.

Mantel decorations.

Every one of the above will be a strong drawing card with the general public and the various competitions should take place on different days, so as to have a "special feature" for each day, and further, to give every one a chance to take part, for no one could well compete in all these important classes on the same day.

#### Exhibition Management.

I wish to heartily indorse every point made by B. in his "Review of a flower show" in the FLORIST for December 14. In every particular he has given my ideas of how an exhibition should be conducted and the exhibits that draw the best and are the most talked about. While chrysanthemums should be the leading feature at a November show other flowers should not be put in the background, as they have been heretofore. As he says, the premium list should be issued as early as possible, not later than January, and be as explicit in every particular as it can possibly be. Give premiums on roses that will at least cover the retail price, and let us have roses in dozens and collections as well as chrysanthemums, and give sufficient to bring out a really creditable showing in this department. If you wish to give the retailers a show let them have a class by themselves. Do not make the

GENERAL DISPLAY BY GALLAGHER FLORAL CO. AT THE CHICAGO SHOW. THE CANOPY WAS DARK RED WITH FESTOONS OF PALE YELLOW

poor grower compete against the retailer's money, for it is not fair competition. We want all classes and conditions but let each one stand on its own footing.

In regard to plants the size of pot should be stated in every case, so that every grower would know just what to expect, and let us by all means see that it is understood that the pots must be washed clean and everything in shape.

O. P. BASSETT.

#### Euphorbia Poinsettia.

Every florist ought to grow at least a few of these showy plants. There is nothing that will brighten up a palm or fern house so well as a few well grown poinsettias.

The cultivation is simple. Cut up the canes to one eye cuttings from March 15 to April 15; put in cutting bed of good sharp sand with bottom heat of 75°. When they show signs of roots put them in 2½-inch pots and when rooted through shift to 4-inch or plant in the center bed of the greenhouse in 6 inches of loam and well decomposed cow manure mixed well with one-eighth part of sand. Plant in rows 8 inches apart with 12 inches between the rows and tie the plants to wire or stakes, as they require it. If good large blooms are wanted do not grow but one cane to a plant. Keep well watered during the growing season and by October 15 water with liquid manure

twice a week and more sparingly to harden them up.

When for pot culture shift from 4-inch to 6 or 7-inch, according to size of plant, and plunge them in the ground in a sheltered place outside or place them in the houses. I prefer inside culture, as they keep their foliage much better and make more perfect blooms, and are not so apt to be much neglected. The old plants can be grown, but I have always had better blooms from young plants, and blooms from 12 to 24 inches across are surely a thing of beauty. J. FULLER.

#### Forcing Asters and Sweet Peas.

1. Which is the best white aster for forcing either in greenhouse or frames?

2. Can sweet peas be successfully forced to be in bloom by Christmas, and with what temperature and when must seed be sown?

G. W. G.  
Belleville, Ill.

1. Asters are not first-class subjects for forcing so far as my experience with them has gone. They are liable to become rusty and are an easy prey for thrips in a forcing temperature, and if they are brought along slowly they take too long to produce their blooms, occupying space longer, according to our judgment, than is profitable. If "G. W. G." feels as though he must make the trial, and as locality

sometimes has some influence on success or failure, and in Illinois asters may behave more creditably than they do hereabouts, the Truffants Perfection is one of the most popular sorts for outdoor blooming, so are the chrysanthemum flowered varieties. The Victorias, on account of dwarf habit, are more suitable for pot plants. All varieties, however, grow taller under glass than they do outdoors.

2. Regarding the forcing of sweet peas to be in bloom for Christmas. Up to the time that I discontinued growing them under glass for winter blooming I had not been able to do so. I am inclined to think that the best way to proceed with them with that object in view would be to sow the seed directly in a solid bed in a house with movable sash, sowing the seed toward the latter end of July. It might take two or more years experimenting to hit the correct date for planting for each locality to bring the crop just right not to conflict with the late outdoor crops and yet be in full blast for the holidays. The sash should remain off the house where the seed is planted as long as it is safe for the plants, though they will stand considerable frost without injury. Some years ago I had some plants the seed of which was planted about the middle of July. They grew luxuriantly and formed buds, but not a flower was produced. They braved the

wintry blast until the thermometer registered ten degrees above zero, when they reluctantly succumbed. Judging from that experience it is reasonable to suppose that good sweet pea blossoms ought to be produced in paying quantities for Christmas.

EDWIN LONSDALE.

#### Seasonable Hints.

After your second crop of smilax is cut, which should be about now, is a good time to give the bed a mulching of manure. For that purpose half decomposed cow manure is the best material. If too new the ammonia arising from the same will burn the young tender tips of the leaves unless you can keep some ventilation on, and on many days at this time of year you cannot do that. Don't water at the roots until the young growths are up a foot or so or the roots will rot. The crop now starting should be large enough to cut at Easter and then a fourth crop can easily be had in June before you are ready to throw out the bed to make preparations to start afresh in July.

The demand for small ferneries this winter has exceeded even that of last winter, in fact it was a feature of the Christmas trade, but the demand to have them filled or more often refilled is pretty steady from September to June. I find in nine cases out of ten the order is "Fill low and fine." They don't want long straggling fronds; compact and finely cut foliage is what is desired, but alas it is difficult to get enough of those desirable sorts. Keep them in as small a pot as is consistent with the welfare of the plant; for general use plants grown in a 2½-inch pot are plenty large enough; big soft growth you don't want, and at this dark season don't keep them under the shade and drip of palms or orchids; until the sun gets much stronger a rosehouse temperature on a light bench is about right; they will then get in such a condition that the dish will last in a satisfactory state for at least four or five weeks, and with that customers should be satisfied.

If you have not already planted any gladiolus bulbs among your carnations do so. They are certainly clear profit. While I don't at all approve of turning the carnation house into a vegetable garden—not if you are going to grow the carnations for all there is in them—there is no harm at all done by a few gladiolus. What they rob of the soil is nothing and by the time their leaves will cause any shade we have light sufficient and to spare. I once took the advice of a writer and merely pressed the bulb into the soil, leaving the top of the bulb entirely exposed. This I found was much less satisfactory than planting the bulbs with a covering of a good inch of soil. Don't over do it, every other row is enough.

Excuse what may begin to appear an old story, but I notice that fine white azalea—most invaluable at Easter—"Borsig," is coming too early for that harvest time. Remove at once to the coldest corner you have and they can be retarded.

I have not noticed any of the noble army of carnation specialist saying much about the rust this winter. Having visited nearly all the big and little growers in this vicinity and also a good many other growers in several states and provinces, it is my opinion that the rust is a very serious affair and more widespread than ever. Last year a large grower in Corfu, N. Y., remarked he would rather battle with rust than red spider. He has altered his tune entirely.

Nothing but a persistent application of some remedy will keep this scourge in check. I have this winter before inserting the cuttings in the sand dipped them in Bordeaux mixture, again before being potted another bath, and kept the young plants as far as possible from the old infected stock. There is no doubt old Silver Spray is the worst addicted of all varieties to this disease and the beautiful Day-break easily catches it if at all exposed. With old plants I have tried both Bordeaux mixture and fostite. With the fostite I have had much the best results completely holding the disease in check. It is more easily applied than Bordeaux mixture and does not stain the foliage. Fostite can be readily washed off. I believe if the latter preparation were freely dusted on the plants in the field on dewy mornings and followed up every few weeks in the houses, this new enemy to the florist could be conquered.

Buffalo, Jan. 8.

WM. SCOTT.

#### New York.

The annual supper of the New York Florists' Club came off according to program on Saturday evening, January 6. Every seat at the long table was filled, about fifty members in all being in attendance. The table and mantels were handsomely adorned with vases and baskets of the choicest products of New York's famed greenhouses and the arches draped with smilax, all of which had been generously contributed by the various growers. In the place of honor sat President Manda, on his right President Lonsdale, of the Philadelphia Florists' Club, and toast master Charlie Weathered, and on his left Messrs. John H. Taylor and Ernst Asmus in dress suits, smiles and expansive shirt fronts looking for all the world like a pair of twins.

After the inner man had been fully satisfied and the orchestra had done its share towards the general enjoyment toast master Weathered took charge of the proceedings and called upon W. A. Manda to respond to the toast "Our Nights." Mr. Manda extended a hearty welcome to all and spoke of the great value to the cause of horticulture of such gatherings as the present, which bring into friendly intercourse all departments of the business and do so much towards establishing closer relations between the members of the club.

The next toast was to the Society of American Florists and was responded to by Secretary Stewart, who referred to the National Society as the great instrumentality through which these pleasant social gatherings had been made possible and predicted a good time for all those who should visit Atlantic City on the occasion of the convention next August. Edwin Lonsdale, who responded for "The Affiliated Societies," put the house into a state of hilarity by stating that he had come from Philadelphia to New York for the purpose of getting a rest. He extended a cordial invitation on behalf of the Philadelphia Club for all present to come to Atlantic City next August, and concluded by saying that he never came to New York without learning something.

John H. Taylor was next called upon to say a word on the "Future of the New York Florists' Club." Mr. Taylor spoke eloquently on the mission of the club and of the possibilities for the future if dissensions are avoided and the present harmonious relations and prosperous condition be continued. The health of absent friends who had been with us in the past but were prevented by sickness from at-

tending was then drank standing, and J. M. Keller was called upon to respond, which he did in a feeling manner, making particular allusion to the enforced absence of the president-elect, Mr. P. O'Mara.

The toast master then called upon Mr. Lonsdale to favor the company with that old familiar song "The Brave Old Duke of York," which he asserted had never been equalled even by Patti, and the ever popular melody was then rendered in the most approved style with vigorous chorus accompaniment. Mr. Fred Storm responded to the toast "Horticulture on Long Island," and spoke eloquently of the elevating influence of working among flowers. The next speaker was D. N. Roberts, who spoke for "The Kindred Trades." His allusion to the great glass industry in the United States and his vigorous declaration that he wanted "to see nothing on top of a greenhouse, through which the sun of heaven shines, but American glass," was received with the greatest enthusiasm and was cheered to the echo.

After a few words from Dr. Presby Mr. John Turner, the famous banjo player, was called upon for some music, which he furnished in such an acceptable manner that he was forced to respond to several vigorous encores. Ernst Asmus was then called upon to tell where all the money goes to, but claimed to be unable to throw any light on the subject and asserted that very little of it finds its way to his pocket at the present time. Mr. E. Wells then made an interesting little speech in which he advocated the promotion of friendly relations free from all selfish interests as the most necessary step towards realizing the ideal association, and was followed by James Logan, who said a few words in behalf of the old gardeners and concluded with an apt quotation from Robert Burns.

C. W. Ward, in speaking on the subject of carnations, made reference to his experiences as a boy in the country, "where the wolves howl," told of his achievements in carnation culture and predicted the future triumph of the carnation over the rose. The allusion to the wolves excited Ernst Asmus' hunting passion and he was with difficulty restrained from going home to get his gun. Charles Zeller was next introduced as one of the oldest and most honored horticulturists in the community and was listened to intently while he told of his old time experiences and expressed over and over again his all-absorbing love for plants and flowers.

After a song by Mr. Wallace, Alex Burns was called upon as another man who ought to be able to tell where all the money goes to. He refused, however, to give away the secret, but claimed that the commission man did his part towards helping the growers and retailers to accumulate their share of the money, and declared that if the commission men were closed up for one week there would be lots of sore heads.

Treasurer Weathered was then called up by President Manda and received a great ovation as usual. He spoke of his association with the club as the happiest experience of his life, and said that he would always consider it a pleasure and a privilege to serve the club in any possible way. John Scallen being called upon as a retailer to explain where all the money goes to disclaimed any knowledge of it and asserted that he hadn't got it, anyway. All the speakers were enthusiastically applauded and the leading favorites were each greeted as they rose with a vigorous rendering of "For he's a

GENERAL DISPLAY BY E. WIENHOEBER &amp; CO. AT THE CHICAGO SHOW.

jolly good fellow," in accordance with precedent. The whole affair was most successful all through.

There is little to be said of the flower trade at present except that it is still dull and the overstock of all varieties has forced prices down lower than ever for this season of the year. The policy of the retailers of buying "by the mouthful," in small lots for immediate needs only, makes the business very uncertain and particularly trying on the wholesale dealers, but there seems no remedy for it at present. It is fortunate that many of the growers are just now off crop, for with a full cut all round the situation would be much worse.

It is hard to understand why any one should try to force tulips for this early date, for they are never of any use when brought in. There are quite a number of these abortive blooms coming in but nobody wants them at any price.

Dailedouze Bros. are very enthusiastic over the carnation Bouton d'Or which they are growing now for the third season and which bids fair to be the standard yellow for the immediate future. The principal objection against this variety by those who have tried it in the past has been that it roots with difficulty, but Dailedouze Bros. say that they find no trouble in this line. Carnation Puritan is doing well also at this establishment.

Among the carnations which the Flat-bush growers intend to abandon after this season are Grace Wilder, Silver Spray and American Flag. Over at G. Bergmann's the cyclamens are very handsome and are well worthy of a visit. An unusual sight is a bench of Bennetts at G. Messeberg's which are equal to the best ever shown in the Bennett's best days.

Ernst Asmus is not satisfied with the behavior of Mme. Cusin as grown in the beds in his new houses. It seems to do better on the old fashioned benches. Among the finest roses coming to the N.

Y. market at present are the Bridesmaids from Frank McMabon.

James Purdy feels much elated over the support received from the uptown florists in his new 43d street store. This was his old ground before his down town venture and he seems to have got all his old trade back again.

A. H. Langjahr is making a success in his wholesale business in Brooklyn and is enlarging his store.

Some of the largest contractors are using American glass in preference to foreign in greenhouse construction, among them being some who have used foreign glass exclusively up to the last season.

It is said that H. H. Francis contemplates selling out his establishment at Madison.

Mr. P. O'Mara, president-elect of the Florists' Club is quite ill with the gripe.

#### Chicago.

That the cut of roses this holiday season was far in excess of last year admits of no doubt. The increase is variously estimated at from 30 to 50%; between 35 and 40% would probably be about right. How do we account for the enormous increase? Let us see what some of our largest growers have to say on this subject, and we will at the same time ask a question in regard to returns. The holiday price list is not always a safe criterion to go by. Brides and Mermets may be quoted at 10 to 12, but how much does this stock actually net the grower?

Poehlman Bros. report returns of 12 for Brides, Mermets and Meteors, 10 for Perles and Woottons, and 6 for Goutiers. These are probably as high figures as were obtained anywhere, but their stock was very fine. Their cut this season was larger than last, owing to the fact that almost every house was in full crop.

Reinberg Bros. also report an increase over last year, but when we take into account that 20 new houses were added

to their establishment it would show that the cut from the older ranges of houses was less than last year. This is accounted for by reason of the roses being partly off crop. This firm reports prices firm as per price list.

O. P. Bassett's cut was good, but we were unable to obtain definite information.

F. Stielow's cut was fully up to last year's, but there was no marked increase.

O. Mailander reports a heavy crop, considerably larger than last year, all his houses being in full crop.

A. Harrer, G. Harrer, J. Meyer, Lindberg and others, all of Niles Centre, report a normal cut.

Many other growers report more or less of an increase, while others cut a decreased amount, that is in comparison to the same amount of glass. It would therefore seem safe to assume that the increase was not due so much to a larger yield of a certain amount of glass, so we must look for other causes. One important factor was probably the number of new establishments which have sprung up like mushrooms the last year, and additions to the older places. Or, could it be that an unusual amount of pickling was indulged in? Pickling? Perish the thought! What grower would be guilty of such a thing? We tried to locate the sinner for the last two days, but have been unable to find him yet.

The net amount realized for roses, exclusive of Beauties, varies from \$4 to \$8 per 100. Very few report the higher figure. Of course the quality of the stock cut an important figure. It goes without saying that these prices were disappointing to the grower.

Mr. Lindberg of Niles Centre has a fine house of mignonette in bloom; the variety is Machet. The benches are covered with fine bloom, which finds a ready sale. This is the second season Mr. L. has grown this variety with good success.

Stollery Bros. of Argyle Park are growing a bench of a giant mignonette known as the John May strain; the trusses on this bench are very fine.

J. T. Anthony at Bowmanville also has a good bench of the Machet. The blooms here are larger than at Mr. Lindberg's, but fewer in number. Mr. A. is growing a couple of beds of Blanche Ferry sweet peas which are doing well. The seeds were sown September 15 in 5-inch pots. After attaining a height of about 6 inches the seedlings were planted in the beds where they are now growing finely. A few of the leads are beginning to show buds, and a full crop is expected by February.

Poehlman Bros. have the first batch of freesia in. The blooms are good and sell well. At this place we noted the first really fine bench of heliotrope we have seen for years. The plants are covered with large blossoms which scent the house. A house of pansies of fine strain, grown for cut flowers, are now coming in at this place.

Harrisii lilies promise to become plentiful now. J. T. Anthony, F. Stielow, Adam and George Harter and a number of other growers have each a large batch just coming into flower.

The finest thing we have seen for years is a plant of manettia at J. Meyer's of Niles Centre. The plant is growing in one of Mr. M.'s rosehouses, where it twines around a post from a distance of about three feet from the ground until it reaches the roof (the house being rather low where the plant grows). The vine has twined round and round until it formed a cone shaped mass five feet long and three feet in diameter, which is fairly loaded with blooms. The bright little flowers, combined with the dark green of the foliage, make a most charming effect.

Walter Kreitling celebrated Christmas eve in his customary happy manner. It matters little to Walter what the state of the weather happens to be; ice or no ice, he is sure to have his skates on. At midnight, according to time honored custom, he started on a tour around town to wish the boys a Merry Christmas, not forgetting to lubricate his skates. This year he appeared on his first round with a Japanese doll in his arms, which was made to perform all manner of antics, but the doll being confiscated on the first round, Walter went for reinforcements, soon turning up with triplets this time. These also soon disappeared, but nothing daunted he turned up a few minutes later with the choicest collection of some 3 or 4 dozen dolls, jumping jacks, monkeys, roosters, etc., ever seen in a Japanese bazaar. These were distributed with a generous hand among the boys. Happy Walter!

J. C. Craig's store at 157 Wabash avenue has been closed.

John Kidwell has opened a retail store at 3832 State street in addition to his place on Wentworth avenue.

Burglars were very neatly caught in the act of blowing open Corbrey & McKellar's safe in the Exchange early in the evening of January 3. Mr. McKellar, who was detained after everyone else had left, returned from supper to find the outer door fastened on the inside. His suspicions had been aroused by some strangers who had hung about the place during the day, so he at once summoned an officer, who called up a detail from the Central Station. The building was surrounded, and, after a search, three young men were found in Corbrey & McKellar's telephone box. A hole had been drilled in the safe, but the burglars were inter-

rupted before they could blow it open. All three have police records and they have been held to the Criminal Court under heavy bonds.

Trade has been very quiet for the past week, and although there is not a heavy stock of flowers now coming in, they are quite up to the demand. Prices have taken a drop, as might be expected. Meteors still hold a good place, selling at \$7 to \$10; perhaps the next favorite is Bridesmaid, which outclasses Mermet, La France or Wootton; it is a great favorite; it sells for \$5 to \$7, while Mermet does not often go above \$5. Good Beauties sell without any forcing at \$25 to \$35; it is worth noting that in times of dullness first-class stock sells, while inferior or low grade material has no chance at all. Colored carnations are more plentiful than they were a week ago; \$3 is the highest quoted for best fancy, \$1.50 to \$2 being the average. Violets are more plentiful, but not ahead of the demand; they bring \$1 to \$2. Some excellent stock is now coming in from local points.

In bulb stuff Harrisii are plentiful, running from \$10 to \$15, and they are selling pretty well. Romans and paper white are still too plentiful at \$2 to \$3; valley is fairly plentiful at \$4 to \$5. Tulips are not yet coming in in quantity; some extra stock has sold at \$8 per 100, but \$4 is the average. Von Sion narcissus are not seen in the market, though a few are noted here and there about town.

Rather more orchids are seen than in previous years; cattleyas are selling at 50 cents each, cypripediums at 25 cents. The retailers say trade keeps very dull; there are few large entertainments this season, and elaborate decorations are the exception rather than the rule. The big charity ball this week made very little impression on floral circles.

#### Philadelphia.

The January meeting of the Florists' Club last Tuesday evening was very well attended. The special attraction being the discussion of the coming meeting of the S. A. F. next August, and the large attendance showed how alive the trade were to the importance of the convention and their desire to do what they can to make it a success. The various committees are to be appointed by the president and will get to work at once.

There was quite a discussion as to the future of the building or real estate of the Horticultural Society. The trustees seem to want to sell the site and after investing two-thirds or more of the proceeds in good interest bearing securities to put up a suitable library and meeting room for the uses of the society. Quite a number of those present however seemed to think that the hall should be rebuilt and that the funds necessary to make a modern hall complete in every respect, could be raised with comparative ease, as there were a great many wealthy persons connected with the society who would loan or contribute money if given the opportunity to do so. Something decisive will no doubt be done before long.

Trade the past week has been, well, just medium; some days very dull, others more lively; next week promises better, the first assembly ball being held Friday evening, the 12th. This is the first important affair of the season and is likely to keep the boys busy, although the number of bouquets carried has fallen off a great deal in the past few years.

Roses are down a little both in price and quality. Meteors, Mermet, Brides and La France are now selling at from 8

to 10; Cusins, Wattevelles 5 to 6; Perles, Gontiers, etc. 4 to 5; Kaiserin and Test-outs 8 to 12. Beauties and Belles are not near as good as they were and seem to feel the effect of the forcing they got about Christmas. The best bring 60, the majority selling for from 30 to 40. Carnations hold up very well, 2 being still asked for good ones, while for best Daybreaks 4 is the price, and the same for Ophelia and Sweetbrier. Edna Craig commands 5 and Helen Keller seems to sell well at 7. Valley is getting plentiful, the new crop now coming in; 4 is the price. Romans plentiful at 2 to 3. Double violets are now to be had in quantity at from 1 to 1.50 per hundred for the best. Callas are 8 and Harrisii in full supply at 12.50.

G. Anderson and Smith & Whiteley are now in the market with Brunners for which they ask \$50. J. Burton will have another lot of hybrids in the coming week.

Some of the growers say it is hard work keeping mildew down during the warm muggy weather we are having. There has been no severe weather as yet, in fact with but few exceptions the temperature has not been below freezing point and the ground is still open. This should make quite a difference in the coal bills which played such an important part in the expense account of last winter.

C. Y. Danenhow, of Woodland avenue, had a slight fire in one of his houses last week; it was gotten under control however before much damage was done; it originated in some wood work near the boiler.

Isaac Kennedy has resigned his position with Henry A. Dreer and is now foreman for John Burton. K.

#### Boston.

The week following New Years has been a fairly prosperous one, with a good sale for first quality stock in roses especially. Those who make a specialty of number one roses have had no difficulty in finding customers for such goods and claim that they could have disposed of many more if they could have furnished them. The weather has not been favorable for the production of good stock. It has been unseasonably warm and muggy with but little sunlight and most of the roses coming in show the bad effects of these conditions.

The January meeting of the Gardeners' and Florists' Club was better attended than usual, this being the occasion of the inauguration of the new president, and further interest being excited by the announcement that the essay committee would present some novel plans for increasing attendance at the monthly meetings.

After routine business had been completed the retiring president, Jackson Dawson, made a few remarks thanking the members for their support and kindness during his term of office, asserting his readiness to work in the ranks as hard as ever and wishing all a Happy New Year, and then introduced his successor P. Welch. President Welch on taking the chair thanked the club for the honor they had conferred upon him and begged their indulgence for the coming year, his intention being to try to emulate his predecessors and to deal justly with every one. He then introduced the vice-president elect, W. H. Elliott, who said he would be content to perform a thinking part for the year, and would not feel a bit slighted if the president should be on hand at every meeting. Secretary L. H. Foster and treasurer Ed. Hatch were next pre-

sented, the latter being happily introduced as "the most important officer to make his bow to you." Mr. Hatch gave a few figures which he said showed that he takes better care of the club's money than he does of his own. President Welch as an introducer and treasurer Hatch as a respondent are a powerful team.

Lawrence Cotter, Elijah A. Wood and Jas. Wheeler were announced as the committee on essays, and Wm. Martin, John Walsh, Geo. A. Sutherland and Jos. A. Carrol as the executive committee for the ensuing year. The essay committee presented suggestions and plans for future meetings advocating radical changes in their character and introducing social features as the prominent attraction. A very spirited discussion resulted in the assignment of the subject to the next regular meeting.

An invitation from Secretary John Young on behalf of the New York Florists' Club to attend the annual banquet of that organization was read and accepted with thanks, M. H. Norton facetiously making the motion "that we all attend and charge expenses to the club," and treasurer Hatch indignantly objecting.

Information of the sudden death of the wife of Lawrence Cotter having been received, remarks expressing sympathy were made by several members and motions were carried to prepare resolutions of condolence, to send a floral tribute, and to appoint a committee to represent the club at the funeral.

There was a large audience present to greet Mr. Edwin Lonsdale on the evening of January 8, and listen to his paper on "Possibilities in Horticulture." The essay was highly commended and the discussion which followed was spirited and interesting. The paper together with a synopsis of the discussion will be presented in our next issue.

The funeral of Mrs. Lawrence Cotter on January 4, was attended by quite a large number of florists, and the Gardeners' and Florists' Club sent a tribute in the form of crossed palm leaves fastened with a knot of ribbon, and orchids. Mrs. Cotter was a most estimable lady devoted to her family, and much sympathy is expressed for Mr. Cotter and his three little motherless children who have met with such an irreparable loss.

#### Buffalo.

Trade has entirely subsided to its normal condition and the brief period of excitement which prevailed at the holidays has entirely passed away. Flowers of all kinds are in plentiful supply with a fair demand at very reasonable prices. Violets are coming in much more plentifully and the price is down just now; \$1.50 per hundred wholesale is the price for the best. Roses are plentiful and quality good. Carnations brought a big price at Christmas, \$5 per hundred for Daybreak and a few other fancy sorts, but that should not be considered high when quality is considered. Compare Daybreak with its 3-inch flower and 18-inch long stem, and that the thickness of (almost) the ideal carnation, with the puny little flowers with 6-inch stems that were sold ten years ago. The best flowers of to-day must be considered cheap at one dollar per dozen.

Home grown lily of the valley is here and of good quality and so are good long stemmed tulips of *Chrysolora* and *La Reine*. The demand for tulips has only just commenced. It is to be hoped it will be good although it looks at present as

if they had permanently taken a "back seat." After reading the reports of holiday trade from many towns, it seems that we were, both as regards volume of business and prices, well up with the best. It is very certain our local growers and commission men assumed their most tony prices, so a good retail price we had to get.

Mr. Simmons, of Geneva, Ohio, gave us a call on New Year's and was so pleased with the appearance of his celebrated offspring "Daybreak" that he had to purchase a few dozen and send to distant friends. A few of our store men wish me to announce that they have several thousand yards of green wreathing for sale which they will sell very cheap now. There was either too much of it here or the demand was not as good as last year. Holly was entirely cleaned up. W. S.

#### St. Louis.

Since the last report the market has broken and all are looking for the cause. It can not be a reaction after Christmas, because there was nothing very great at that time to react from. There has been but a limited supply of stock coming into the market, as everyone appears to be off crop, but still there is not enough doing to even keep this reduced quantity moving. What will happen when the crop comes on again and heavy cutting begins is something hard to decide. All are going ahead, however, and hoping for the best. Valley of the present season's crop has made its appearance in market, and although short of leaves is good in all other respects.

Being in Belleville the other day the writer availed himself of the opportunity to call on Mr. Will Huckle, who has during the past season erected three equal span houses running north and south, two being twenty feet wide and one ten feet. The two larger houses are planted with roses, Brides and Bridesmaids being the varieties grown. They are strong and vigorous, and although planted late have apparently lost no time by the way-side, the Bridesmaid being especially strong and full of heavy canes from the bottom. The roses cut from these plants have been the finest coming into the St. Louis market during the season, and they promise to stay to the fore. A few Testouts were being tried and had made a strong vigorous growth and promised well; it is doubtful, however, if it will ever prove as popular as it should.

The smaller house was planted to carnations, Lizzie McGowan being the variety most grown. It has proved itself to be the best white variety for the Belleville soil. Some good Fred Dorner and Daybreak were also noted, the carnations all through averaging up fully as well as the roses did. The plant is heated by steam, one twin Florida soft coal surface burner taking care of the place easily. The system of piping employed is what is known as the "single pipe system," the originator of which is a resident of Belleville. The peculiarity of this system is that one pipe answers for both flow and return, the pipes entering the houses at one end and having a raise of one inch to ten feet to the upper end where an automatic air tap is placed. The advantage over the ordinary system is that the heat can be much better controlled where one pipe is put on at a time, and where the valves are all at one end of the house, it being impossible to get the wrong flow or return valves open and have some pipes fill with water at the risk of burning out the boiler. When the system was

being put in all florists who saw it were of the opinion that it would never work, but Mr. Huckle having a good guarantee was willing to take the chances, and has surprised everyone by the satisfaction it gives. It is admitted, however, that it will not work smoothly when the steam has to be carried two hundred feet or more.

We visited several other places, but will reserve descriptions for a future occasion.

There has been a division of partnership in the Ayers Floral Co. Mrs. Ayers continues the Easton avenue store under the same firm name, and Messrs. Bucksah & Berning assume the business at 2602 Olive street under the firm name of Bucksah & Berning. R. F. T.

#### Washington.

The weather during the past month has been unusually mild and the greater part of the time damp and cloudy.

The growers say they have had no cause to grumble at the holiday trade, neither have they much to brag of. Plant sales were not as good New Years day as Christmas. They say this is owing to the Saturday before New Years day being very stormy, preventing many customers from getting to the markets.

The stores report excellent trade New Years day, fully up to Christmas, and like it in respect to persons putting off giving their orders until the last moment. Most of the stores sold out everything and everyone seemed happy. There was comparatively little stock purchased of the commission men. The majority of our florists have greenhouses, and not looking for a great demand for flowers this season, owing to the stringency in the money market, they hesitated about putting in much stock, preferring to cut their own close and be on the safe side. Therefore the demand was a trifle beyond the supply. No one was caught badly.

Luncheons, teas and receptions are the prevailing fashion in society circles this season and furnish our florists with the greater part of their work. Germans, which a few years ago were all the rage, are now seemingly a thing of the past.

New Years day is really the beginning of social life and events in Washington. It is one giddy whirl from then to the beginning of Lent. Many orders have already been placed for decorations. The retailers have had quite a good business the past week. Some of the most conservative of the fraternity predict a good trade during the social season this year.

Flowers are plentiful just now and the quality is usually very fair, showing the want of a little more sun light.

C. LESLIE REYNOLDS.

#### Toronto.

The general verdict concerning business at New Years is that it was "rotten." The weather was cold and about as bad as it could be, so that people were unable to get out of their houses; altogether it was a great contrast to Christmas, and though it might be called seasonable it was not a pleasing contrast to the florist at any rate. Roses have dropped very little in price yet.

In my last notes I said that there was not so great a sale for holly as usual this Christmas time; this was a mistake; the total sales were as large if not larger than in former years, but it sold in smaller lots; only some rubbishy stuff was left over.

The executive committee of the G. and F. Association met last week and arranged for a series of essays to be read at

future meetings. The chrysanthemum show of '94 was also discussed and various improvements in the prize list suggested. The preliminary prize list will if possible be published in February or early in March. Mr. Geo. Manton was chosen for chairman of the executive committee.

The seed trade here are discussing what can be done to make the association happy in the event of Toronto being chosen for holding the next convention. E.

### News Notes.

TOLEDO, O.—Christmas trade was somewhat less than last year and prices a trifle lower. Supply was equal to demand, and quality about same as last year.

WILMINGTON, DEL.—Christmas trade was much better than last year with no change in prices. Supply was equal to demand, and quality about as usual at this season.

PORTLAND, OREGON.—The money value of Christmas sales was about 20% greater than last year. Prices were a little lower. Supply equal to demand. Increased call for carnations and violets, also holly.

SAN FRANCISCO.—Christmas trade was 50% larger than last year. Prices same as usual at the season. Supply was equal to demand. Quality about as usual. There was an increased call for palms.

HARRISBURG, PA.—Christmas trade was about 25% larger than last year, and no material change in prices. Quality superior. Increased call for palms and blooming plants. Trade was very satisfactory.

ELGIN, ILL.—Christmas trade was about 1/2 less than last year and prices decreased about same proportion. Supply rather greater than demand. Quality better. Took in more pennies, nickels and dimes and fewer dollars.

SALT LAKE CITY, UTAH.—Christmas trade was about 25% larger than last year. Prices lower. Supply not equal to demand. Quality about same as last year. Sent in large orders to wholesalers but they were not filled in full. Increased call for chrysanthemums.

DENVER, COLO.—Christmas trade was 20% larger than last year, and with prices 40% lower. Supply was equal to demand. Quality better than last year. Am. Beauty roses were high priced at wholesale, but low at retail. Increased call for red flowers, especially red roses. Very few baskets. Poor sale for valley.

LOS ANGELES, CAL.—Christmas trade was about 40% larger than last year. Prices about as usual at the season. Supply not equal to demand. In quality carnations were better, roses poorer. We bought more largely than usual and sold all at a profit. There was an increased call for roses, carnations and violets.

LYNN, MASS.—Christmas trade was much smaller than last year. Roses generally sold at \$1 to \$1.50 a dozen, Beauties at \$2. Plenty of flowers but demand slow. Violets were in best demand and sold at \$2 a 100. Mistletoe, palm leaves, mountain laurel, evergreen and southern pines were in great demand. Sold much more of these than last year.

BRIDGEPORT, CONN.—Receipts from Christmas trade were about 10% less than last year. Carnations and violets held up to usual Christmas prices, but

roses sold at about 50 cents a dozen less. Supply was abundant. Quality superior. More call for the cheaper flowers. The volume of business was greater than last year, but customers spent less money and were satisfied with a cheaper grade of flowers, there being very little call for high priced roses.

### SITUATIONS, WANTS, FOR SALE.

Advertisements under this head will be inserted at the rate of 10 cents a line (seven words) each insertion. Cash must accompany order. Plant ads. not admitted under this head.

**SITUATION WANTED**—By a Scotchman; single; age 25; a good man in every respect. Please address QUEEN, care American Florist.

**OBITUARY.**

AVERY GALLUP.

There were few better known men among the horticulturists of the west than Avery Gallup of Denver. The news of his sudden death at his home January 4 will be a very sad surprise to hundreds of his intimate and dear friends among the florists. He was probably one of the best posted men in the world as to the stocks carried by the leading wholesale horticultural establishments of this country and Europe, having personally visited all of them. Being a very close observer with an excellent memory, he carried at his tongue's end a critical knowledge of the whole world's supply—not alone in our trade, but in art, merchandise and nearly every branch of human industry. His wide experience, travel and knowledge of men and things, combined in a rare degree with an epigrammatic way of stating things, made him a most companionable man and all who met him his friends.

## Catalogues Received.

Wm. Swayne, Kennett Square, Pa., carnations; Texas Seed and Floral Co., Dallas, Tex., seeds and plants; Webster Bros., Hamilton, Ont., plants; Wm. Elliott & Sons, New York, seeds; Sunset Seed and Plant Co., San Francisco, Cal., seeds, plants and nursery stock; T. H. Spaulding, Orange, N. J., chrysanthemums; Hitchings & Co., New York, greenhouse construction, heating, etc.; James Mott, Orlando, Fla., nursery stock and plants; Wilhelm Pfister, Stuttgart, Germany, seeds and plants; Reasoner Bros., Oneco, Fla., plants and nursery stock; New York Market Gardeners' Association, New York, seeds; O. H. Will, Bismarck, N. D., seeds.

ALBANY, N. Y.—Christmassales amount to about the same money value as last year, with about 25% more stock sold. Prices on small roses were lower, but good large stock sold well at prices as good as last year. Supply was equal to demand. Quality better. Bought more and sold at lower prices than last year but made a fair profit. Good stuff brought good prices. Increased call for American Beauties and violets. Orders came in late and there was a big rush on Saturday and Christmas day. Holly sold better than ever on account of low price. Roses were not held back by growers so the retailer had fresher stuff. Increased call for fine large roses.

HILLEGOM, HOLLAND.—Herman Budenberg, bulb grower, has been adjudged bankrupt by the court, which appointed Mr. C. G. Von Reeken solicitor.

## The Seed Trade.

## AM. SEED TRADE ASSOCIATION.

W. ATLEE BURPEE, Philadelphia, president; A. L. DON, secretary and treasurer, 114 Chambers street, New York. Next annual meeting second Tuesday in June, (will probably be held in Toronto.)

## Judgments Against Philip Stimmel.

OMAHA, Jan. 6.—The sheriff took charge of the stock and furniture of the seed and implement specialty house of Philip Stimmel, at 911 Jones street, this morning. Stimmel confessed judgment in favor of the Omaha National Bank for \$38,000, and in favor of Montgomery, Charlton & Hall for \$6,000, and the sheriff immediately took possession. The judgment to the bank is on three notes, given January, 1893, December 27, 1893, and November 18, 1893. The other judgment to Montgomery, Charlton & Hall is on a note executed January 5, 1894. Stimmel has been engaged in the seed business extensively and has been rated as worth \$25,000 to \$30,000. He has had lately some trouble with the growers from whom he procured his seed, and yesterday suit was commenced against him by one of them for \$700. Mr. Stimmel has been doing a large business for the capital invested, and has been a heavy borrower. Some months ago he was sued for about \$24,000 by Deering for binding twine, of which he had bought \$75,000 worth in 1892. Stimmel claimed an offset of \$30,000 to \$40,000 in the nature of damages for failure to fill the contract. The case was continued and has not yet been disposed of. Stimmel usually carried a stock of about \$50,000. His last statement to the mercantile agencies was this: Gross assets \$135,000; liabilities \$77,000. He has been in business here about eight years.—*Chicago Herald Jan. 7.*

SELECTION IN SEED GROWING, a paper bound volume of 98 pages recently issued by W. Atlee Burpee & Co., includes, in convenient reference form, the valuable essays read at the Seedsmen's Sessions of the Horticultural Congress held in this city last summer, with the discussions following their reading. In addition to this there is a variety of information concerning operations at Fordhook Farm, Mr. Burpee's trial grounds. The operations of seed testing and selection will prove very interesting to the general reader, as well as to the professional, and the convenient form in which the essays are presented give this little volume permanent value, though of course the primary object of the publishers was to advertise their seed business, and a number of pages are devoted to reprints of press notices the house has received in the past.

## CARNATIONS.

Fourteen houses planted to carnations, all of which are under my own special care and supervision, so that I can guarantee all the cuttings sent out as first-class.

The varieties I grow are Daybreak, Lizzie McGowan, Silver Spray, Grace Darling, Aurora, Portia, Edna Craig, Fred. Dorner, J. R. Freeman, Golden Triumph, Annie Pixley.

Not a big list but a mighty good list. Come and see them grow, or write to me for prices, stating how many you will want of each variety and when they are to be delivered. I think we can make a deal that will be satisfactory to us both.

L. B. 496.

**ALBERT M. HERR, LANCASTER, PA.**

## COME AND SEE THE NEW AND BEAUTIFUL FANCY CARNATION "HELEN KELLER"

(A very much improved "Chester Pride"), **GROWING AND BLOOMING.**

It is Healthy and Productive. In form, size, and elegance nothing in sight can approach it. It is the greatest novelty among Carnations up to date.

**PAUL DAILEDOUNZE** (of Dailedouze Bros.), says: "We must have at least 1000 of this. She's a dandy."  
**JOHN WELSH YOUNG** said: "Let me have 1000 just as soon as possible."

Two houses filled with this sterling new variety are worth going many miles to see: One at Summit, N. J.; the other at Wyndmoor near Chestnut Hill, Phila., where inspection is invited.

Orders booked now and filled strictly in rotation, commencing March 15, 1894. Strong Rooted Cuttings, \$3.00 per dozen; \$12.00 per 100; \$90.00 per 1000.

**EDWIN LONSDALE,**  
CHESTNUT HILL, PHILA.

**JOHN N. MAY,**  
SUMMIT, N. J.

## "COME AND SEE THE BOYS"

—AND—

## THE YELLOW CARNATION BOUTON D'OR.

After growing this variety for the past three winters we are convinced that it is the best Yellow Carnation ever introduced.

**WHAT WE CLAIM:**—That it is decidedly a good, strong grower and free bloomer; color a beautiful yellow penciled with dark carmine. That it is of the best form and fully as large as Buttercup. That the calyx is perfect, the stem long and stiff, and the foliage possibly better than that of any other carnation.

PRICE, \$2 per Doz.; \$10 per 100; \$75 per 1000. **ROOTED CUTTINGS READY MARCH 1, 1894.**

Orders filled in strict rotation. Come and see it grow and be convinced. Only one hour from New York City.

**Dailedouze Bros., Flatbush, L. I., N. Y.**

## Ferns and Smilax.

Will you kindly inform me whether or not it is harmful to syringe ferns overhead or not and if liquid cow manure is good for them, and if it is any way beneficial to smilax, as mine is growing so spindly, if you will kindly inform me should be much obliged.

SUBSCRIBER.

Ferns in general are better without syringing, and liquid manure is not very beneficial to them, unless it be in the case of certain strong growing species that have become very much pot-bound, and even then the manure should not be very strong.

Smilax will be benefitted by watering with liquid manure occasionally after the plants have become well rooted, but if the plants referred to are very weak and spindly it is possible that they have received too much water before becoming established in the soil, and if so may not be able to assimilate much manure yet.

W. H. TAPLIN.

## Lady Campbell Violet.

Your Phila. correspondent "L" has struck the aspiring Lady Campbell a rather hard blow in stating that it is "about the same shade of color as the old Neapolitan."

I have before me as I write flowers of M. Louise, Lady Campbell and Robt. Garrett. Unfortunately I could not secure Neapolitan. As nearly as I can remember it is a trifle lighter than Robt. Garrett. Between the latter and M. Louise there are a number of shades, one of which belongs to Lady Campbell, but it is much nearer M. Louise than to Robt. Garrett. This of course applies to the three varieties as grown here, they may vary in other soils. I believe Mr. Huebner, of whom I purchased my stock of L. C., claims that it is darker than M. L.

**WHY** do so many  
Canna Growers  
say they have a  
Yellow Canna  
"As good as  
Florence Vaughan?"

Robert Craig, Chairman of Committee of Awards in Floriculture at World's Fair, says, Dec. 6, 1893: "Florence Vaughan has proved to be all that was claimed for it; it is still far superior to any Yellow Canna in commerce."

**W. S. POWELL & CO., Baltimore, Md., U. S. A.**

## HOWARD'S <sup>Royal</sup> VERBENA SEED.

New Crop, Home-grown, Honest, Reliable.

Selected with great care from plants producing the largest trusses, finest substance of petals, with most brilliant and desirable colors.

### EVIDENCE OF QUALITY.

Editor Wm. Falconer in GARDENING:

"On Oct. 24 we received a box containing six bunches of blossoms of Verbenas from A. B. Howard, Belchertown, Mass. The flowers were very beautiful, and represented over fifty distinct shades of color; the trusses were large and the petals of fine substance. We had seeds of this strain from Mr. Howard and raised a number of plants from them last spring and the plants have been in bloom all summer and are in excellent flower still (Oct. 25), and they are a beautiful and multi-colored assortment."

C. B. Willard, Oswego Falls, N. Y., says: "I tried your Royal Splendor Verbenas last year and never had as many nice plants or such beautiful flowers from a package of seed, though I have tried all the leading seedsmen. The colors were gorgeous, and such a variety!"

Choice mixed colors, per trade pkt. 50c; 1/4 oz. \$1.00; per oz. \$4.00.

Address **GEORGE WITTBOLD,**  
1708 N. Halsted St., CHICAGO.

Syracuse, N. Y.

We were very pleasantly surprised with the results of the Christmas trade in this vicinity, it being fully equal to past years. The demand for holly and evergreens was in excess of supply. Loose cut flowers sold well; roses, violets and carnations were in brisk demand, the stock of carnations being exhausted long before the day was over. There was but small demand for baskets or made-up work, almost everything being sold loose. Romans and paper whites went slow, most of the establishments here having a surplus left on hand.

Customers as a rule bought more sparingly than in the past, but the use of flowers seemed far more general. Plants in bloom sold well and the very mild weather made delivery comparatively easy. In fact we think the fine weather had much to do with increasing the sales, inducing many to come on the streets, see the stock and thereby become purchasers, who under other circumstances would have remained at home and forgotten that holly, Christmas greens and flowers were necessary adjuncts to the full enjoyment of the holiday.

Prices were lower than in past years, with the exception of violets, which, owing to their scarcity, sold at good figures. The demand for good flowers at moderate prices is on the increase and the disposition to pass inferior stock even at low rates is becoming pretty general.

On the whole the Christmas trade for '93 has been quite satisfactory considering the general depression in most other lines of business. P. R. QUINLAN.

Denver.

The entire trade during the holidays has been a surprise to all. The call has been equal to any preceding year. Every one has had to refuse or cut orders. Prices of course were good. Carnations seem to have the popular call; \$1.00 to \$1.25 for good pinks. Holly and wreathings are handled everywhere, and yet the florists seem to have had all the orders they could attend to. Cloudy and cold has been the report for 10 days.

Mr. Given is down again. He could not keep away from business, and now after a week the report is that he is gaining.

A visit to Mr. Glauber's place will do anyone good. Everything speaks for the knowing care he gives his plants. His carnations are said to be the best in our market. LYLE.

UTICA, N. Y.—Owing to increasing business, Hart & Crouse, makers of the Royal hot water heaters, are making large additions to their factory.

## Zirngiebel's Seeds for Florists.

QUALITY GUARANTEED.

GIANT MARKET AND GIANT FANCY PANSIES.

**NEW YORK CITY.**

Worcester, Mass.

On the whole the Christmas trade was equal to that of last year, perhaps a trifle better in some respects. The supply as a rule was fully adequate to the demand, with the possible exception of Mermets, Beauties and Gontiers. There was a rather small demand for Liliun Harrisii, which were plentiful and good. Von Sions, paper white and Campernelles were brought in in large quantities and sold well for \$1.25, \$1 and 50 cents respectively. Carnations are just as popular as ever. Grace Wilder easily took the lead, though Daybreak sold at sight. McGowan is the best selling white, with Silver Spray a close second. The price of carnations advanced to 75 cents a dozen. Violets were plentiful and sold readily at \$3 a hundred, and a few good mums were in the markets, which brought from \$1.50 to \$2 a dozen. Stevia, Romans, bouvardia, callas, etc. we had in quantity and got rid of most of it at slightly advanced prices.

There was a noticeable falling off in church and other plant decorations, probably caused by the large number of unemployed which the churches are helping. The demand was almost entirely for cut flowers. We had an unusually good trade in palms, ferns and foliage plants; this branch of the trade is improving greatly.

Holly sold better than ever before, and although we laid in larger quantities than last year the supply was short. Laurel and evergreen wreaths were in good demand, but mistletoe sales were small. It don't pay to handle mistletoe; the general public prefer holly.

Although New Years day is not a legal holiday in Massachusetts yet we had a splendid trade all along the line. There was a very noticeable increase in the observance of the day and in the number of society people who received during the afternoon and evening. This of course meant decorations and trade to the worthy florist, and consequently our receipts went considerably over those of last year.

Everything was plentiful with the exception of roses, which were in very short supply. Prices were a little lower than those of Christmas though roses held pretty nearly the same. Violets dropped to \$2.50 a hundred retail, and carnations to 50 cents a dozen, though we got 75 cents for a few specials. Red carnations are especially popular this year and we are getting a lot of E. G. Hills that are hard to beat, fine flowers on strong, long stems.

## Announcement to Florists.

We desire to announce the dissolution of the firm of Sipfle Dopffel & Co., and to introduce to the trade its successor, The Syracuse Pottery Co., which will be under the management of William Dopffel and Conrad Breitschwerth. The business will be conducted as heretofore, except on a larger scale to meet the growing demand for our goods. We have accordingly enlarged our plant and capacity, and with unsurpassed facilities are now prepared to fill the largest order on short notice. Our latest improved machines are turning out the best and most serviceable flower pots in the market, and assuring you of our intention to lead in further improvements we solicit a continuance of your patronage in the belief that we can supply just what is needed at a price and in a manner satisfactory to all.

Send for price list and samples and we know you will give us an order.

DES MOINES, IA.—For some months past there has been some heavy cutting in prices by local florists. Realizing that this sort of competition was doing serious injury to all alike the principal growers and retailers got together lately and agreed on a minimum scale of prices, each one being at liberty to get as much more as he could. Those so agreeing are I. W. Lozier, W. L. Morris, R. L. Blair, Julius Lay, Peter Lambert, E. W. Bergstrom, A. Anderson. It is to be hoped that a better feeling will now prevail and that we may have a chance to make a living profit on sales.

ROCHESTER, N. Y.—The 39th annual meeting of the western New York Horticultural Society will be held in this city January 24 at 11 a. m. in the Common Council Chamber. The society has a membership of about 400. The president is Mr. W. C. Barry and the secretary Mr. John Hall, both of this city. The address of the secretary is 406 Wilder Bldg. The program for the meeting includes 15 essays, and a feature will be the answering of questions, of which no less than 40 are printed in the program. Copies of same may be had of the secretary, at the address above noted.

### Carnation Notes.

There are more ways than one of killing a duck. If you have a dark shade of pink and want a light one, let your flowers age on the plants and if they have been disbudded they will at the same time increase in size and produce a much finer stem. I have found this to work admirably on Grace Darling and Aurora, and have no doubt it can be done with many others. Aurora can be left from four to six days and Grace Darling from six to eight, and then they will be at their best for a light pink. These things are well to know if you happen to have a house of a dark shade and your trade begins to want light shades.

If your flowers are not large enough, jolly them along with some good manure water and do not be afraid to let your temperature run up to 75° or 80° on all bright days. Your cuttings may not be quite so good with this treatment, but if the flowers are improved enough to bring a good fair increase it is a small matter to buy the cuttings and you will be better off than to try to grow good cuttings and get only medium flowers.

Being in Philadelphia on New Year's day, I took a drive through the Park, Germantown and into Chestnut Hill, there to grasp the hand of the genial Ed and see his new carnation Helen Keller, which, as he truly says, is worth going many miles to see. Helen herself has about all of the goodness that can be put into one young lady, and her namesake has about all the good points that can be put into one carnation. Mr. Lonsdale's example might be followed by some hybridizers with good advantage to the trade. I have visited at his place quite a number of times and, as he is a great enthusiast on carnations, there are always some new seedlings blooming, some of them with very good points, but he has set up an ideal, and unless his seedlings reach that ideal they are never boosted on the trade.

While in Philadelphia I learned that selected Edna Craigs brought as high as \$8 per 100, the average run \$5 and the seconds \$3 per 100, while Helen Keller sold for \$7 straight. Now there are very few of us in the business for sentiment; if we are we should be growing forget-me-not or orange blossoms. If we are in it for money we should grow that which will give us the best returns.

A great many growers are now begin-

ning to propagate their stock for next season. It's an old story, but you can't have too much of it. In the first place be more than careful to take cuttings only from those plants that are perfectly healthy and are making a good crop of bloom. The side shoots from the flowering stems make the best cuttings and they should be grown in a temperature as nearly that of the house from which they came as possible. As soon as they are fairly well rooted plant them into soil, either in pots, trays or on a bench. Do not have the soil too rich and do not wait too long to do it; the sooner after they are rooted the better, for if they are left in the cutting bench too long they will become weakened and you will be laying the foundation for a sickly plant all through the season.

ALBERT M. HERR.

### The Bordeaux Mixture for Carnation Diseases.

Requests have come to me from time to time concerning the Bordeaux mixture for plant diseases in the greenhouse. The Bordeaux mixture is a compound of sulphate of copper, quick lime and water. It is made of various strengths, but the standard formula is: Sulphide of copper 6 pounds, quick lime 4 pounds and water 22 gallons. The copper sulphate is dissolved in the water, hot water may be used to advantage, a gallon or so for securing the solution. The lime is placed in another vessel with a gallon or so of water, and shortly the milk of lime thus secured is slowly added to the copper solution in the first vessel, stirring constantly, and then strain all through a sieve or coarse gunny sack. Finally add the 20 gallons of water to make the mixture of the full strength. Within the last two or three years equally good results have been obtained with a mixture of half the above strength which is secured by either doubling the amount of water or halving the copper and lime. Even a weaker solution,  $\frac{1}{3}$  of the standard strength, has been found sufficient in many cases. The weaker solution, possibly this last named one, will be all sufficient for the work in the greenhouses. The color given to plants that are sprayed with the Bordeaux mixture is a pale blue, and not unlike that which obtains naturally in the carnation plants, so that on this score of discoloration there is no excuse for not using the Bordeaux mixture for carnation troubles.

Upon some of the finer leaved and more delicate plants, especially those grown for ornamental foliage, it may be better to use a second formula which has the advantage of not coating over the surface of leaf with a layer of the lime. This remedy is known as the ammoniacal carbonate of copper compound, and in full strength it consists of carbonate of copper

5 ounces, ammonia water 3 quarts and water 30 gallons. The carbonate of copper, which may be obtained through any druggist, is wet up in a quart of water and to this is added the ammonia, and when completely dissolved the solution is diluted with water and the compound is ready for use. Here again it is possible that a half strength formula would answer fully as well.

As to time of spraying: As the plants are under glass and not subject to the changes which obtain outdoors the spraying may be quite uniformly one week apart, wetting the plants thoroughly with a fine mist of the formula produced from a force pump of some sort bearing upon the end of the rubber tube a nozzle which will produce a fine spray.

The latter remedy, namely, the carbonate of copper compound, has been quite effective in some greenhouses in checking the black spot and other troubles of the roses; in fact either of these two remedies may be used with good effect upon greenhouse plants that are troubled with one or more of the many kinds of blights and other fungous diseases. BYRON D. HALSTED.

Rutgers College.

Roses in Kansas.

In reply to your correspondent, Paul Wittrup, in reference to the trouble with his roses, I have examined them very carefully and can form no idea as to the absolute cause of his trouble, but think that a good deal of it arises from lack of proper fertilizing matter in his soil. If my memory serves me right my experience, or rather my judgment, of the soil of Kansas is that it contains a large amount of alkali, and to modify this as much as possible to make it congenial to plants of the nature of roses it must have a certain amount of animal matter in it to give some ammonia. The best thing for such soil that I have ever found is well decomposed cow manure; its nature is cooling and at the same time stimulating enough for all practical purposes. Horse manure, on the contrary, is too heating. Herein, I presume, lies the bulk of his trouble with the early planting of his roses. The mushroom compost, or manure from mushroom bed, as he calls it, is not at all suitable for such kind of soil as they have there, and I believe that the trouble with his roses getting into the condition he describes is largely due to the above facts.

While roses can be grown to perfection in light, and some places very light soil, it is where and when other conditions are of equal advantage to the plants. In his place I am inclined to think the main conditions are lacking, viz.: a cool retentive base for the plants to grow in.

Another cause of his trouble, and I think a very material cause, particularly with the conditions of his soil to contend against, is his night temperatures; 70° in the day time to 75°, or even a little higher in bright sun, is not far out of the way, in fact is about right, but 60° to 65° at night is altogether too high; I would advise him to keep his temperature down to 55°, or from 56° to 58°. Water liberally

CELASTRUS ARTICULATUS CELASTRUS SCANDENS.

when on the dry side, giving all the air practicable on favorable occasions, and with the present condition of affairs get a mulching of cow manure on the surface of soil as early as he possibly can; watering, syringing, etc. will carry the ammonia down to the roots and give strength and vitality to the plants, developing the flowers to perfection.

Circumstances, soil and other conditions must always be taken into consideration in every locality where an attempt is made to grow roses; and it is only by strict observance of the conditions appertaining thereto which will lead the operator to success.

During my experience with correspondents in the state of Kansas I have found the facts quoted above to be the cause of much of their trouble. True, I have never been over a very large portion of the state of Kansas, but that portion which I have traversed convinced me that the alkali natural to the soil and climate was very detrimental to the rose, hence all possible means must be adopted to counteract it.

JOHN N. MAY.

#### A Few Ornamental Fruiting Shrubs.

In planting grounds for decorative effect too few of our gardeners take into consideration the value in such work of fruiting shrubs and vines. Landscape gardeners are just beginning to see the possibilities in a judicious selection and arrangement of berry bearing plants, especially those which hold their fruit into late fall and winter, and to realize that these are almost as indispensable as those whose particular beauty lies in their flower or foliage alone.

To the florist and interior decorator these have a value that, with one or two exceptions, is not recognized as it should be. The holly, with its rich glossy foliage and scarlet berries, has come to be an indispensable material for decoration in our Christmas and midwinter festivities, and the beautiful *Ilex verticillata*, or black alder, with its heavy laden branches of dazzling scarlet (sometimes yellow) fruit, and whose only misfortune is that it is "common," is well known and appre-

ciated among our country cousins, who use enormous quantities of it in the preparation of their holiday greens for market and find in it the ready material to trim up their holly wreaths. Many a "holly" berry has been sold that never had the honor of growing on a holly tree.

The specimens shown in the illustrations are only a few selected at random from the very large number of shrubs of this class which have been making the grounds of the Arnold Arboretum attractive.

*Celastrus scandens*, or bitter sweet, is a well known American climber abundant in rocky woods, where it climbs to the tree tops and festoons them with its drooping racemes of scarlet fruit. *Celastrus articulata* is a native of China and Japan. Like *C. scandens* the orange scarlet fruit is enclosed in a yellow three-lobed capsule or persistent calyx, which opens at maturity and exposes the berry. In the illustration the valves on *C. articulata* are opened, while those of *C. scandens* are closed. *C. articulata* is a much more rapid grower than *C. scandens*. The racemes are not so large, but are much more abundant, and it is more graceful for decorative purposes. It can be cut in streamers from one to five feet in length. One thing regarding *celastrus* must not be forgotten. They are all dioecious and in planting care should be taken to secure only seed-bearing plants.

Another illustration shows *Pyrus prunifolia* in two varieties, one with red and one with yellow fruit. These Asiatic apples are extremely beautiful when in bloom in spring, as well as when in fruit. The fruit of the red one especially hangs well on the trees until after very severe frosts, and the loaded branches are splendid for decorative work. An additional advantage possessed by this fruit is that it makes a jelly of unequalled flavor.

*Berberis thunbergii* is a popular Japanese species, and in foliage, flower and fruit is one of the best plants introduced into this country for many years. On moderately poor soil it gives brighter autumn foliage and fruits earlier and heavier than on rich ground. The berries

PYRUS PRUNIFOLIA. TWO VARS.—RED AND YELLOW FRUITED.

are brilliant from early autumn until the leaves come in the spring. Probably the way to preserve them in best condition, however, would be to cut the branches in early autumn and put them away in moist sand in a light freezing temperature. Not long ago the gentlemen's smoking room in a Newport mansion on a wedding occasion was decorated exclusively with *Berberis Thunbergii* branches with grand effect. The other *Berberis* shown in the illustration is *B. vulgaris* var. *Amurensis*. *B. vulgaris* is our well known common barberry. The variety shown is a beautiful Asiatic form from the Amoor River. The berries are more brilliant in color and the racemes much longer than in our common variety. The foliage is also superior.

The next illustration shows two climbing vines in fruit, *Ampelopsis heterophylla* and *Menispermum canadense*. *Ampelopsis heterophylla* is a beautiful species from Japan, where it is called the "blind grape." It is a rapid climber, very effective in covering trellises, etc. The fruit is very striking in color. In the same bunch it will be of all shades from pale green to deep violet, in porcelain, robin's egg and ultramarine and speckled with tiny black spots. The branches grow naturally in fruited festoons from eighteen to twenty-four inches long, but if trained specially for fruiting purposes they could doubtless be produced much longer. There is also a yellow fruited form of this.

*Menispermum Canadense*, as shown in the illustration, bears its fruit suspended in bunches by slender thread-like stems. In two or three foot festoons it is very

effective, but the blue-black berries are somewhat lustreless and are in condition only in early fall. JACKSON DAWSON.

#### Possibilities in Horticulture.

BY EDWIN LONSDALE.

[Read before the Gardeners' and Florists' Club of Boston January 8, 1894.]

Just as soon as I had accepted your kind invitation to read a paper before you this evening I felt that a mistake had been made, and the nearer this date was approached and the more the matter was thought over the more I felt sure I had blundered. However, the words of the gifted Helen Keller occurring to me, that this is the City of Kind Hearts, I took courage and determined to keep my promise, and here I am.

The subject selected is one on which much speculation can be indulged in, but I do not propose to go very far beyond the realms of probability. Judging from the immediate past we may reasonably expect to advance very rapidly in the future. Every decade will show a decided and distinct gain in a more pronounced American horticulture. We have a great deal to learn yet from the Old World, and we are both willing and anxious to do so, but we must appreciate the fact that America is assuredly evolving a horticulture almost completely her own. I say almost advisedly, because everything appertaining to horticulture is more or less based upon what has been accomplished by our forefathers in days gone by. Who could have predicted twenty-five years ago the amount of money which

is now being spent annually in cut flowers? I do know that about that time a very noted horticulturist stated in my presence that the demand for cut flowers was only a passing fancy. The methods of production and the quality of the product (especially does this apply to the magnificent roses as produced under glass in the winter season) are as distinctively American as it is possible to be. Climate of course has had a great deal to do with the matter, but the American people have not been slow to appreciate well grown flowers and have cheerfully paid good prices for them.

What will the next twenty-five years bring forth? It is very difficult to answer that question, but the possibilities to bring about a love for plant life for its own sake is great. It is the duty of every one of us to foster and encourage a love for the *growing* plant among the people. It is the loving care and attention necessary to cater to the needs of a living plant which brings us in closer touch with horticulture. Who among us has not noticed in passing many of the public institutions for the care and education of children a woeful lack of congenial surroundings? The possibilities for the betterment of the human race by inculcating a love for horticulture is immense in just such places, for it is inborn in every child to love the green grass, the noble trees and the beautiful flowers. Greater and more organized efforts should be made to develop that affection in the human heart for everything that grows. All educational institutions should be made horticulturally attractive, so that we will be educating and giving pleasure to the young and receptive mind at the same time.

As a general rule, so far as I have been able to observe among the professions, medical doctors are the most intelligent laymen horticulturally, and the only explanation I can think of is that botany is one of their studies, and many plants are used medicinally, and this intimate knowledge has drawn them closer to plant life.

Education in ten years from now will mean more, far more than it does to-day. Not only will the mind be trained in the rudiments of arithmetic, grammar and penmanship, but the liberal arts will find exemplification in our public system; the muscles and the eye must be trained. The scholars should be taught the use of tools. Every boy and girl born under the stars and stripes should know how to turn their talents or gifts to the best possible use. There should be no drones in America. The more intelligent the people the more they will love their country and nature, and horticulture in all its grandeur and beauty will follow in the wake as surely as sunshine follows rain. The dead language Latin should be taught in our public schools as the English language now is, and with as much thoroughness. This consummation would bring minds in closer communion with other minds and with nature. Most of us have experienced a feeling of depression when, on being questioned by an enthusiastic admirer of some particular plant, its name, and on its being given according to science has produced a dejected and listless look in our companion and the chord of sympathy is broken, and the merest commonplaces are indulged in thereafter. No heart to heart feeling as there should be in the educated men and women of the future.

To come nearer to what we are doing to-day adaptability must play an important part in developing a still more pro-

nounced American horticulture. Many plants which are now being coddled all the year around in glass structures will flourish yet in the summer days to come, in the open air and full sunshine. Take crotons as an example, these plants are rapidly forging to the front, and their adaptability for outdoor decoration in summer time in many parts of America will be the means of other classes of plants being used more or less freely for the same purpose. The abutilon may prove to be one of these, although it has not that shining gloss which its more aristocratic neighbor, the croton, possesses, yet it can lay claim to one or two advantages all its own which the croton lacks. That of producing flowers in its several shades and colors, being carefully selected, would make a most pleasing contrast with its yellow and green or other variegation in the pleasure grounds of the wealthy, and another is that of being increased easily and at small expense, bringing it within easy reach of all persons.

In order to point out what adaptability has done to establish an American horticulture I need only to point to the three leading classes of plants which are used here for cut flowers during the winter season. All these are hardy in Europe, yet we can attain the best results with them by giving each a glass structure to grow in the year around. The hardy rose flourishes under glass here in winter better than it does outdoors anywhere at any season. Then again the carnation, the hardy *Dianthus caryophyllus* of Europe, prospers better here under the protection of glass than it does in its native land. We are rapidly and surely producing a race of this dianthus that is superior for American requirements, that is distinct from those originating in Europe. The lines now laid down by the carnation enthusiasts of America can not possibly fail to produce surprising results, which will be apparent in the very near future, much sooner than many conservative minds can at this time realize. It is not only improved varieties that we will see but improved methods of cultivation. Many of the more meritorious varieties will require special treatment. Only a few days ago I saw one of the very old varieties luxuriating under a different mode of culture than had been tried on it before on that place, and the results were gratifying. It was the old sort Buttercup—having been grown under glass all summer. It was healthy and robust and without a speck of disease of any kind. A very bad case of the much dreaded carnation rust has been cured completely by a course of treatment under glass all the year, and it was the protection afforded by the glass which was the greatest factor in that cure. The dews which are considered so beneficial to vegetation in general seem to cause black spot in roses, rust in carnations and the disease in violets.

The rose, the Queen of Flowers, while we can grow and bloom it to perfection yet so far we have not been able to compete with Europe in the raising of new varieties, in numbers at least. The possibilities here are very great. We are expecting great things from some of the more favored states of the south, where the seedling plants can be treated to an all the year around outdoor treatment, and from Rosa's paradise, California, where some systematic operations are now in progress with the object in view of improving the rose for American horticulture.

The violet, the sweet and popular vio-

BERBERIS THUNBERGII AT TOP. BERBERIS VULGARIS VAR. AMURENSIS BELOW.

let, which grows and blossoms in shady nooks and on grassy banks in Europe, is found to do better under glass here all summer than it does in its native habitats. The disease which has made the growing of violets under glass in some parts of the country so precarious the past few years can now be successfully combated by a course of rational and judicious treatment under glass all summer. And instead of the stocks of all our staple articles becoming enervated by what is yet by many people considered in opposition to the well being of the plants they really become stronger.

Much has been done recently in the improvement of glass structures for plants, and much more remains to be done. Something good will evolve from the radical innovations in greenhouse construction which we are now passing through. The possibilities are great for the production of much of the material which is largely used in horticulture here, and which is imported at great expense annually from other lands. Holland bulbs, azaleas and many other articles with our varieties of soil and variations in climate can be grown here, and will be taken up some day soon and special lines developed to such proportions that can hardly be realized by the conservative mind of to-day.

We must enlist the daily newspapers in our cause. We now have excellent amateur and trade papers devoted exclusively to horticulture, but it is the daily newspaper which is the power in the land to-day. Some of our daily papers are already doing good work, but much more

remains to be done to elevate horticulture to the plane to which it is entitled.

Every Gardeners' and Florists' Club or other society devoted to the advancement of horticulture should have on its lists of standing committees a press committee, the duties of which should be that of furnishing reliable news items and plain cultural notes and other horticultural reading matter as often as possible to the leading daily newspapers in their respective cities. It is not advisable or necessary to prepare long exhaustive papers, for frequently the length of an article, no matter how much valuable information it may contain or how carefully prepared it may be, destroys its usefulness. Don't make them too scientific, giving only cold prosy facts, but matter that will appeal to the heart, drawing the readers closer to plant life, is what is most needed. The press has already awakened an interest in horticulture by their reports of chrysanthemum and other flower shows and it will be only too glad to keep up the good work if only the right kind of matter is furnished to it. Very much more could be said on this interesting subject, but I am afraid I have already taxed your patience too long.

Washington.

The first state dinner of the official social season by the President and Mrs. Cleveland at the executive mansion was both an elaborate and brilliant affair. It was what is known as the cabinet dinner. Mr. Henry Pfister, the gardener in charge of the conservatory at the White House, had every reason to feel very

AMPELOPSIS HETEROPHYLLA ABOVE AT RIGHT MENISPERMUM CANADENSE AT LEFT.

proud of his success in this decoration. The state dining room is a large affair just adjoining the conservatory on the east end. The table was the shape of a Roman I; the centerpiece was an ellipse  $2\frac{1}{2} \times 5$  feet of various kinds of adiantums thickly studded with *Cypripedium* insignae. At either end of this centerpiece and just under the handsome crystal chandeliers were mounds of ferns and cypripediums, having a plant of highly colored *Anasassa sativa variegata* for a center. Beyond these again on the transverse sections of the ends of the table were three 12-inch pans of cypripediums, each having from thirty to forty fine flowers in it. At either end of the table the gold candelabra held tapers under scarlet shades, while the wax candles in the silver candelabra were under yellow shades. At each lady's place was a corsage bouquet of orchids backed with asparagus, a single orchid flower being at the place for each of the gentlemen. The window recesses and mantels were banked with ferns, cypripediums and pineapple, among them here and there scarlet poinsettias. The entire dining room decoration was especially effective and graceful.

The mantels in the red room were banked with plants of *Begonia Bruantii* finely set with flower; ficus, crotons, palms and dracaenas being used in every nook and corner to good effect.

The blue room was decorated with various kinds of foliage plants. The mantel was banked with primulas in full bloom. The large divan in center of room was crowned with a fine specimen of variegated pineapple.

In the green room were arranged some fine specimens of crotons, dracaenas, anthuriums and ferns. On the mantel were a few choice plants in celluloid baskets. The plants in this room were not at all crowded and each plant showed its individual character.

In the east room, which is the reception room, the greatest display is always made. The arrangement of the plants and flowers in this room is always in charge of Mr. G. H. Brown, Supt. of Public Grounds. On this occasion Mr. Brown did some very fine work. It was said by some to be the finest decoration ever attempted in this room. The two mantels at the north and south ends were banked with various kinds of ferns, the mirrors above being draped with smilax. Under each mantel was a mound of tastefully arranged high-colored crotons, ferns, *Anthurium crystallinum*, dracaenas and small *Pandanus Veitchii*. The six windows had each a large plant of *Areca lutescens* for a center; grouped around each were fine specimens of crotons, pandanus, ferns, anthuriums and small palms. In the large east window were three large plants of *Seaforthia elegans*

reaching to the ceiling; banked about these to the height of about 15 feet and sloping back to the window were bright colored dracaenas, ferns, pandanus, anthuriums, crotons and several varieties of small palms. The three large crystal chandeliers were festooned with smilax. On the top of the large divan which stood in the center of the room was a magnificent specimen of *Dracæna Kuerkii*. On either side of this divan, at a distance of about eight feet, was a pyramid some 7 or 8 feet high of foliage plants with a large *Kentia Belmoreana* for a center. Over the doorway leading to the main corridor was a bank of decorative plants (leaning so as to hide pots). On either side of the doorway stood a plant of *Rhapis flabelliformis* and *R. humilis* surrounded by a variety of decorative plants. The two west mantels were also banked with foliage plants. Hanging from these were long strings of *Cissus discolor*, which added grace to the entire mantel. The heaters under mantels were banked with foliage plants. The two large mantels on the east side of this room were banked with roses, carnations, valley and Romans, while the mirrors over them were draped with smilax, this being the only display of cut flowers in the east room decoration. The four large columns were festooned with smilax, producing the effect of a number of green anchors resting on white ground.

The main corridor, where hangs the picture of each president who has occupied the White House, was tastefully decorated with plants. Mr. Pfister keeps plants always in this corridor, removing them twice a week. It is a dark place, being what might be termed an inside room, and is therefore very trying on the plants.

At a recent visit to the large establishment of C. Strauss & Co., the Washington rose growers, now covering about 7 acres, the first thing to attract my attention was their five new houses, which are of the most modern style. The roof is sharp, running up about 25 feet, glazed with the finest selected French glass,  $16 \times 24$  inches. They claim it is the most economical glass they can use, as they have fewer lights broken and no bad spots to cause burning. The houses have no partitions between and one can see all over them from any part of either house. They are all planted with carnations, Mrs. Fisher, Grace Wilder, McGowan and Lady Emma being the varieties grown in quantity. They are the finest and most healthy plants I have seen this season, covered with a mass of finely formed buds. The houses contain about 3,000 plants; they have several other houses devoted to carnations, in all about 50,000 plants, all in as fine condition as could be desired. Every inch of space is utilized in this carnation range, the steam piping being below the stagings, which are about 5 feet above the ground; this ground space is used to store their bulbs in when first brought in before being put into forcing heat. The space under the gutters between the benches, which is about 10 inches wide and about 18 inches from bench to gutter, is filled with *Lilium Harrisii*, some being 10 to 12 inches high and very robust in growth, the bulbs being the finest selected stock. *Aspidistras* are arranged along the fronts of some of the pathways, which are about 2½ feet above the ground. The carnation plants were lifted about the first of October and planted in the houses, where they have taken root nicely, looking as though they had never been moved; this demonstrates beyond a doubt that car-

nations, with proper care and attention, can be grown in this section. Some hold that they do not do well in the District of Columbia, the soil not being adapted to them.

A house of American Beauties was filled with splendid plants; fine, clean, strong, healthy shoots were as thick as could be wished for, each one showing a strong bud. My attention was next called to a house of Brides, which had been carried over from last season. They had lately been pruned and pinned down, had begun breaking nicely and were looking remarkably promising. Next came a house of young Mermets, which was at its very best, finely set with buds, thrifty and healthy; old plants are not to be compared with them. From this house we passed into a house of Christine de Neve of young stock planted very late; nevertheless they were in grand condition. Both Mr. Durfee and Mr. Cain say this is one of the very finest outdoor roses in cultivation, being a fiery red when grown outside and of a grand size and substance. They do not think it sufficiently good for commercial purposes to warrant them in growing it in large quantities. We passed on into a house of Perles as fine as could be wished for, a perfect sight when looking down the full length of the house, some 300 or more feet. We next inspected a house of old Perles, which had been treated as hybrids (allowed to dry out). They had recently been pruned sharply, watered, fed and a little heat turned on. They were breaking nicely and in every way look promising. They are also experimenting with a house of old Perles, treated in the same manner, but without pruning, which are doing remarkably well, producing a quantity of fine buds and making good young shoots from the ground. We were next shown a house of young Kaiserin, planted late in August. They were a grand sight. Such magnificent flowers, some of them measuring 7 inches in diameter, with four feet of stem. I have never seen their equal. They were as large as any Beauties and can be cut with as long stems. There were buds by the thousands in all stages of growth. They think this rose has a great future. They are all grown on their own roots. The grafted plants are not doing so well as those on their own roots, but are showing an immense crop of fine flowers, though the wood does not have the same vigorous, healthy appearance. They will grow no more grafted stock.

The house of old Woottons had just been pruned and pinned down; they were breaking nicely and making fine growth from the bottom. This rose has been considerably abused, but I think unjustly so, for they succeed wonderfully with it here and find ready sale for all they can produce. A house of old Mermets lately pruned and pinned down was looking well, finely set with buds on strong healthy wood. A house of old plants of white La France, which had been dried out and lately started, was showing up nicely, promising a fine crop the first part of January. A bench of the new rose American Belle, which was planted September 20, was looking unusually fine, considering the lateness of planting. This is a lovely rose, being cherry pink in color. Mr. Durfee thinks it will be a good commercial rose. A bench of Golden Gate was looking strong and healthy, just coming into flower. They think a good deal of this rose and will plant a house of it next season.

A house of young White La France which was planted in July was a sight.

I don't think its equal can be seen in the United States. One could cut superb flowers with stems 3 feet long by the thousands. This house is 365 feet long, with every plant in most perfect health.

A bench of the new carnation Ruth Cleveland next caught our eye. It is a delicate salmon pink, nicely fringed and unusually fragrant. The plants were finely set with buds, though not a strong grower. The majority of their carnations are grown in stiff, strong soil. They have sweet peas planted along the fronts of their carnation benches, about 4 or 5 feet apart, which are looking very well, being about 2½ high; they are expected to be in full flower about January 10.

They grow 5,000 *Adiantum Ballii* for cutting from and say it is one of the finest ferns for all round use on the market. Their stock is looking remarkably well, showing superior cultivation.

C. LESLIE REYNOLDS.

#### Philadelphia.

The weather for the past week has been for the most part mild, but very cloudy and dark, with little sunshine. With such weather as this it is almost impossible to get color into the roses, and as off color Beauties, or in fact any other kind of roses, are hard to sell, the dealers are not carrying very large stocks. The Brunner is king, and Beauties and Belles have now to take a back seat; this beautiful rose is clearly the most popular of the hybrids. While the stem is not quite as long as the majority of the Beauties its brilliant color and luxuriant foliage more than make up for this deficiency.

For the Assembly hall, on Friday last, the Brunner was clearly the favorite, and the dealers had a hustling time to get stock enough for their orders. Anderson, Burton and Smith & Whitely seemed to have hit it nicely and had quite a stock, but there were not enough to go round, and the repeated raids by special messengers and telegrams to these growers' establishments before the day was over completely used up every bud that had a bit of color to it. There were not as many bouquets for the ball this season as last, and as this has been the rule for some years past it would seem as if the bouquet was being tabooed, and its presence at the balls will soon be only a tradition. However, the debutante is still left us, and on her will we continue to shower our most artistic bunches.

While the stock of roses of all kinds has not been plentiful yet the demand has been so poor that prices have not been sustained. Beauties can now be had for from \$25 to \$40 for the best. Brunners are \$50, and a few Laings sell for \$35. Mermets, Brides and La France bring \$6 to 8, a few extras 10. For the smaller stock such as Perles and Gontiers 3 to 4 is asked, and Casins, Watteilles and Hostes \$4 to \$5. There are a few Bridesmaids, Testouts and Kaiserins which sell for from 8 to 12.

Carnations are now from 1.25 to 1.50 for the general run and 2 to 3 for extra stock, such as Daybreak, Sweetbrier, etc.; Edna Craig commands 3 to 4 and Helen Keller is still 7, with no prospect of a break. Valley is plentiful at 4. Romans 2 to 3, narcissus about the same. Double daffodils and large trumpet major bring 6 to 8. Double violets sell for from 1 to 1.50 for the best.

There have been several meetings of the committee having in charge the revision of the schedule of the Horticultural Society for the spring show, and as the

Chester County Carnation Society are to be associated with them, or perhaps we should say are going to make a special carnation exhibit on that occasion, the premium list will show a special preference for the divine flower. It has not yet been decided where the show will be held, but some seem to favor the Armory where the chrysanthemum show was so successful. Among other premiums it was suggested that one be offered for the best keeping carnation; we doubt very much in the light of past experiences whether any of the varieties would be wide awake enough to attract the attention of the judges on the second day of the show.

Edwin Lonsdale has solved the problem of the best way to stake carnations, and that is to grow varieties with such stamina that they don't need artificial support, but are able to take care of themselves. His house of Helen Keller is growing entirely without stakes, and yet the large heavy flowers are borne perfectly erect on stems sufficiently strong to support them. Mr. Lonsdale has been doing Boston and New York the past week. One of the growers was asked if the mild weather did not save the coal bills, and he replied that while the coal pile might not suffer so much these dull days the crop of flowers was so small that it was just as hard to pay the bill. "Give us good bright cold weather and we won't say a word about the coal."

K.

#### Chicago.

The Horticultural Society of Chicago held its annual meeting last Saturday afternoon at the Sherman House club room. President Chadwick submitted a very full report of the work of the society during the past year, covering especially the details of the World's Fair chrysanthemum show, in which the society took such an active part. Mr. J. T. Anthony, treasurer of the exhibition, made report to the society, the joint committee being now so widely scattered that there was no likelihood of its having a meeting. He reported a surplus of some \$1600 in his hands after all premiums and expenses had been paid, though there was a contingency to be provided for in the matter of medals. The exhibition management was to pay the Exposition Co. the cost of making the World's Fair medals awarded by it, and the exact amount cannot yet be ascertained, as the medal subject is still tied up in the red tape of the Government commission. But Mr. Anthony thought it would be safe to pay a dividend of 15% on the guarantee fund, and on his recommendation the society concurred in such action. The society agreed to purchase the vases used at the show for \$200, which item will swell the surplus, as the cost of the vases had been charged as an item of expense.

With a minor exception the full list of officers was re-elected to serve another year. Those who will administer the affairs of the society for 1894 are as follows: Pres., Wm. H. Chadwick; 1st Vice-Pres., F. Kanst; 2nd Vice-Pres., J. A. Pettigrew; 3d Vice-Pres., E. G. Uhllein; Treas., Melville E. Stone; Sec'y, Wm. C. Egan; Ass't Sec'y, P. J. Hauswirth; Directors, Geo. Schneider, Philip D. Armour, Andrew McNally, C. L. Hutchinson, W. H. Rand, Jas. W. Ellsworth, S. W. Allerton; Executive Committee, the president, vice-presidents, secretary, treasurer and Geo. C. Gardner, J. T. Anthony, G. L. Grant, O. P. Bassett, J. C. Vaughan, W. N. Rudd.

The executive committee was instructed

to prepare and issue a premium list for the exhibition of 1894. The committee will take action at a meeting to be held next Saturday afternoon, and the premium list will be issued as soon thereafter as it can be printed.

The Florists' Exchange Pleasure Club's ball at Brand's Hall on the 10th inst. was a very enjoyable affair. About 50 couples were present and the dancing continued until well into the morning. The hall was prettily decorated with wreathing, the floor was in fine condition and the music was excellent.

The Columbian Floral Co. succeeds John S. Forster at Evanston. The company is composed of Messrs. H., G., F. and A. Hunt.

The Kroeschell Bros. Co. succeeds the firm of Kroeschell Bros., boiler makers. The management will remain much the same as before.

Continued sunless weather, warm and foggy, has taken all the life out of the flower market. The retailers have little to do, and the demand is very small for this time of year. In most lines there is not an extra amount of material cut; if there was it would swamp the market. Buyers are critical, too, and want only good flowers. Roses in many varieties are suffering from want of sun; many of the Beauties are poorly colored and flabby, in addition to being short stemmed, while the Meteors are almost black, with stubby and crumpled petals, in which condition they do not sell. Some very good Woottons are noted, but they are in the minority. Mermet suffers greatly from the dark weather, and can not compete with Bridesmaid; this last variety, however, is little grown around Chicago. Carnations have dropped in price, and few go over \$1.25 except Day-break, which sells well at \$2. A few Wm. Scott have also appeared; they are much admired and sell for the same as Day-break. There is a good demand for scarlet carnations, and not many in the market; they are pretty well confined to Portia, and this is often objected to on account of its small size.

In bulb stuff there is plenty to choose from, and at low rates. Harrisii lilies are extremely plentiful, with but moderate sales. In price they range all the way from \$2 a dozen for selected long stemmed stock to \$5 a hundred for a fair average grade, and it is needless to say there is more sold at the latter price than the former. Romans are still sent in by the bushel; they must have been purchased in immense quantities, for the stock does not seem to diminish a particle. They run from \$1 to \$3; paper white the same. White and yellow tulips go well at \$4 to \$5; red sell rather slowly at \$3. Double daffodils have made their appearance, bringing \$6.

Greens continue to go very slowly; smilax was never less in demand. Orchid flowers form part of the regular stock now with many florists; cypripediums, cattleyas, vandas, angracums and cœlogynes are most frequently seen; they are usually sold by the box. Fine cyclamen plants were noted at the Exchange; they were in 6-inch pots, well bloomed, and sell at \$9 per dozen.

#### St. Louis.

The regular meeting of the St. Louis Florists' Club was held during the past week and was well attended. The final report was handed in by the finance committee having in charge the S. A. F. entertainment during their last session. The report was accepted and the com-

mittee discharged. The report should have been made some time ago, but was unavoidably delayed owing to several accounts not being closed. The unexpended balance in the hands of the committee was turned over to the club treasurer. Some fine carnations were shown by Mr. Carroll, but when called upon for the essay he had been appointed to read on carnations he asked that his time be extended until next meeting, as he was not fully prepared, which was done. An informal discussion, however, was indulged in regarding the above flower, which showed that all present were interested in and alive to the importance of the subject.

The next meeting promises to be very interesting, if not exciting, as there will be the carnation paper, as well as the question of the advisability of holding another show, this matter having been flamed as special business, and the opinions being various. The outcome is hard to see, but the majority express a hope that there will be found some way of continuing them. Prof. Trelease stated that the medal offered by the trustees of the Shaw estate at the St. Louis show and known as the "Shaw Medal" was not as yet finished owing to the time it required to make the dies after getting a satisfactory likeness of Mr. Shaw. It was promised, however, shortly and would be forwarded to the winner, F. Dorner & Sons, as soon as completed.

Quite a discussion was indulged in regarding the single pipe system of heating used by Mr. Will Huckle, the general opinion being that it was desirable on small places.

Mr. E. W. Guy of Belleville was recently called upon and found giving his Perles a top dressing of bone meal to help them along in their spring crop. He is troubled, as most of the florists here are, with soot, owing to the use of soft coal for fuel and the proximity of largemills. The trouble is noticed most during the dull months when all possible light is needed; in the spring and fall the cut is all right. An effort is also made to have stock to cut from during the summer, La France, Perles and Woottons being relied upon in the order named. A general collection of plants is also grown for cut flowers. A number of Harrisii were noted both in pots and planted in benches; the latter method has been found the more economical and will be increased next season; this applies more especially to Christmas stock. The roses were looking as well as could be expected. Some Kaiserin have been tried, and from the way stock is being worked up it promises to be a good thing. The propagating bench has a half inch layer of crushed charcoal spread over it before the sand is placed on it; this enables several crops of cuttings to be taken from the same sand without any fungus making its appearance. As the successive crops are put in the charcoal works upward, finally becoming thoroughly mixed with the sand.

At Dr. Halsted's place everything was in good shape; the best, however, was the carnations. Here, as at the other places, Lizzie McGowan proved to be the best white; it cuts quantities and keeps it up throughout the season. Hector was also strong, but the habit of coming in late is against it. Tidal Wave was fair, the objection to it being the number of short stems it produces. Quite a number of roses are grown here, principally La France, Albany and Perle; they were all strong and making good growth. A number of hybrids in pots had recently been brought into the houses and were

making strong breaks. A house of violets were making a new growth, which was very clean; they had become so infested with fly during the fall that freezing had to be resorted to as a means of ridding them; at present they promise well for the balance of the season. A block of Harrisii in pots were remarkably uniform. A bench of callas in the same house in 12-inch pots were remarkably vigorous.

There is another florist in town. He arrived in Mr. John Young's family as a New Year's gift. The added importance can be seen in the manner in which Mr. Young carries his cane. He is kept busy responding to congratulations.

R. F. T.

#### Buffalo.

Business for this season must be called nothing but extremely dull. This is a time when social events have in former years come thick and fast and kept us all busy. This year since the holidays there has been a perfect cessation of such occurrences. The weather has been altogether out of season for a northern city—one day a little freezing and the next none, and mostly none. But the weather has nothing to do with the business. It is simply that there are no fashionable weddings, and parties of various kinds are dispensed with and the money and energy of our wealthy people are devoted to charity's cause, for which every big city seems to have plenty of opportunity this winter.

Flowers of all kinds are plentiful and are bound to be until Easter time comes. This would be an excellent time for those growing flowers to think deeply before erecting more glass the coming season. Flowers from September until close to Christmas were plentiful, very low in price; only the best found a market, and enormous quantities were wasted. A few days after New Year's they again dropped to a very low figure and are bound to remain so for the balance of the season. Only for the short space of two weeks was the supply short of the demand and the prices good. Can we afford to increase our area of glass for that brief time? I think not, and for the general health of our trade it would be much better to let the demand outstrip the supply. It would be a pleasant task to catch up.

With all the dull times our club brought off its first "smoker" with a good deal of success. The talent displayed towards the evening's amusement was remarkable. A few friends of the florists gave us some fine instrumental as well as vocal selections. And nothing "Soothes the savage breast" between stories like music. The efforts of several of the members are worthy of mention. None shone out so brilliantly as our worthy president (D. B. Long). His stories of his own boyhood in connection with "destrict" schools, rural "meetin" houses, etc., were given in anecdote style. Mr. Charlie Keitch was little behind the best in the same style of anecdotes, too seldom heard nowadays. The professor (J. F. C.) favored us with a reading from Mark Twain's latest, and got Niagara Falls, the Garden of Eden, Adam and Eve and chestnuts so mixed up it was difficult to follow him, but it was fine withal. Mr. Mepsted gave us a splendid exhibition of Indian club swinging. Mr. Belsey sang sweetly "Never too late to mend." Mr. Constantine, who participates in nothing frivolous, gave us a philosophical talk, and in an interesting talk talked about

what we ought to talk about. W. S. started to sing "Annie Laurie," but was stopped in the middle of the line of the first verse and subsided. In fact all helped to make it a very pleasant evening, and we feel sure that on another similar occasion many more will attend. We all went home well pleased with a most pleasant recollection and a corn cob pipe of our first smoker. W. S.

#### Montreal.

The New Year's business was away behind this year. The principal florists say their trade this year was 25% less than on the first of January, '93.

Flowers, on account of the unusual dark weather, are scarce, especially carnations and roses. Christmas prices still rule for carnations. There is talk of one of our oldest established concerns moving to a place outside the city, where they will have more elbow room, and should it take place we look forward to seeing an establishment in size and style fully "up to date."

Harry Stocking, the hard working and popular secretary of the G. and F. Club, who has been some time foreman for Mr. Bennett, St. Denis street, has left there and has taken a similar position at the "Broadland" nursery, Cote St. Paul.

There is a movement on foot to bring about the amalgamation of the G. and F. Club with the Montreal Horticultural Society, and a committee of the latter society was named at their last meeting to consider the question, but we have not heard of a meeting of the committee yet.

Mushrooms are a drug on the market here just now, and if all the mushroom beds that were put down last fall in this locality materialized they would be worth about as much per pound as cabbages.

We hear a great many complaints about Garfield carnation. It is turning single with many growers. We would like to know the cause. BEAVER.

#### Worcester, Mass.

Since the holidays everything has been rather quiet and trade poor. Stock of all kinds is plentiful and extra good and prices very reasonable. Carnations are coming in in large quantities and are very fine. Noticeable among the best are J. J. Harrison, Lizzie McGowan, Daybreak and E. G. Hill; this last we consider our best scarlet, as it is of a good bright color, fair size, doesn't burst, comes on a long, strong stem and is a free bloomer. White Dove is also a fine thing, which I think will pan out well in this vicinity. Roses are not coming very fast, though there is no particular shortage, as the demand has slackened considerably. The demand for violets, which has been very fair, has kept the price up to \$2 a 100 retail.

Receptions and balls are conspicuous by their absence, and although a few society people have given Germans, they seemed to do it on the economical plan, so the florist disconsolately sings "There's nothing in it."

We have been having very mild weather, with a large percentage of dark days, but it has suddenly grown colder, the thermometer dropping to five below zero last night.

Edwin Lonsdale and Wm. J. Stewart spent the afternoon and evening of the 11th with us and were the guests of Hermann Lange and left on the midnight for New York.

The Horticultural Society has issued its lecture schedule, which includes addresses

and readings by prominent floriculturists and horticulturists, and will wind up with a big reunion and banquet.

#### SEEDLING.

ELIZABETH, N. J.—Christmas trade was about 10% larger than last year. Prices about as usual at the season. Supply was equal to demand. Quality superior.

PITTSFIELD, MASS.—At the annual meeting of the Berkshire County Gardeners' and Florists' Club President Walter Cutting and Secretary W. M. Edwards were re-elected for another year.

RICHMOND, VA.—Christmas trade was much better here this year than last owing to the favorable weather. Prices were about the same as last year and American Beauties, pink roses and violets were the leading flowers. One firm alone sold 25,000 violets on December 23. The increase in trade is estimated at about one third.

#### SITUATIONS, WANTS, FOR SALE.

Advertisements under this head will be inserted at the rate of 10 cents a line (seven words) each insertion. Cash must accompany order. Plant ads. not admitted under this head.

**SITUATION WANTED**—To learn the florist business. C. A. M. PIER, 7 Winthrop St., Worcester, Mass.

**SITUATION WANTED**—By first-class gardener and florist in private place. Good references. Address O. M., care American Florist, Chicago.

**SITUATION WANTED**—By a single man, aged 25; private or commercial; 6 years' experience, spent in two places. Address S. Q. D., 65 Tappan St., Melrose, Mass.

**SITUATION WANTED**—In commercial place, by a man thoroughly experienced in general greenhouse and floral work. Good references furnished. Address J. A. G., care Geo. A. Sutherland, 67 Bromfield St., Boston, Mass.

**SITUATION WANTED**—As gardener, in a commercial place preferred; have been in present place 14 years as head gardener. Am also a first-class design maker. Good recommendations given. Address G. P. WENTWORTH, Bucksport, Me.

**SITUATION WANTED**—By florist; practical and solvent; 8 years' experience in growing roses, chrysanthemums and carnations. Can furnish first-class references. Address ROSE GROWER, care American Florist.

**SITUATION WANTED**—By a German, single, age 31; 17 years' experience in growing roses, palms and general stock, including propagation; wants situation by February or March. Best of references. Address E. F., care American Florist, Chicago.

**WANTED**—Charge of greenhouses. Can invest a small capital. D. R., care American Florist.

**WANTED**—Seed and plant catalogues. Address J. F. BROWN, E. Haven Hospital, Richmond, Ind.

**WANTED**—Single man, experienced in propagating and growing of roses and chrysanthemums. Address, stating wages desired, etc., P. O. Box 556, Cincinnati, Ohio.

**WANTED**—A young man (German) of good habits, who understands general greenhouse work. Steady employment. State wages wanted. ERNST NITSCHKE, Dallas, Texas.

**FOR SALE**—Six large lots near Milwaukee Ave., 4 miles from Court House. Ground has been used for florist garden 11 years. Address C. E. WOOLLEY, 539 Fulton St., Chicago.

**WANTED**—A competent and reliable florist to grow cut flowers and plants. Permanent place; good treatment and fair wages. Address EAST P.A., care American Florist, Chicago.

**WANTED**—A young man for general greenhouse and nursery work; \$24.00 per month and board. Will increase wages and give steady employment to the right man. H. KADES, Gainesville, Texas.

**FOR SALE**—\$5,500 will purchase 12,000 square feet of glass, well stocked; 1 acre of land, and 8-room dwelling, in Chicago; or will rent greenhouses. Address H. S. DRECHSLER & Co., 90 La Salle St., Chicago.

#### WANTED.

Experienced florist and propagator. As good a position as this country affords to the right man. Must be a thorough rose grower of executive capacity. Address B., care American Florist.

#### CONTRACT NOW for FORCING ROSES

for your next season's planting and secure well rooted stock grown specially for your order. Last year, owing to the heavy demands made upon us at planting time, we were unable to fill many orders, thus disappointing our customers. We are now contracting to grow, for delivery when wanted, the leading varieties of forcing roses—including the new kinds **BRIDES-MAID**, the best pink grown; **KAISERIN** and **TESTOUT**; also **Meteors**, **Beauties**, **Woottons**, **Brides**, **La France**, etc., etc.

We earnestly request intending purchasers to submit as a list of their wants, and we will be pleased to quote them special prices for strong, well rooted plants to be delivered when they may designate.

We make a Specialty of Growing Roses for the trade. Having experienced and competent growers. Our stock is first-class in every particular and we guarantee satisfaction. Of the many hundred unsolicited testimonials we append the following: "Roses got of you last year have been the best bearers we have in our houses. RIVERSIDE FLO- RAL CO., Marshalltown, Iowa."

Order Early and secure the Best.

**L. L. MAY & CO.,**

Florists and Seedsmen, ST. PAUL, MINN.  
Our Wholesale and Retail Catalogue for 1894 mailed free on application.

WHILE IT IS TRUE that there has been exaggeration and misrepresentation in some horticultural catalogues, and that these have worked injury to horticulture, it is certain that the great majority, giving honest descriptions and much information of real value, have been a powerful factor in the wonderful advancement in the last quarter of a century. Among this educational class of catalogues that of the Philadelphia firm of W. Atlee Burpee & Co. has always ranked high, and the copy of their annual for 1894, just received, shows a marked advance. But what makes it worthy of special note is the list of books on horticultural subjects therein given, all published by this firm and offered in such a way that they are beyond the reach of none. In this work Mr. Burpee is conferring an incalculable benefit upon every one interested in horticulture. To be sure the books contain his advertisements and much benefit will accrue to his firm, but at the same time such broad dissemination of really useful and dependable information on horticultural subjects can not fail to indirectly benefit a host of others. For the books are good—not trashy compilations such as are too often foisted upon the public. Each is written by a practical specialist, is free from theoretical vapors and gives really helpful information. Most of these little books are about growing various vegetables, but the latest addition is "The Beautiful Flower Garden," by F. Schuyler Mathews, about which we shall have something to say later.

A BOX OF PRIMULAS, received from Henry S. Rupp & Son, Shiremanstown, Pa., included some excellent forms, both for size and color. A fine white, two inches in diameter, some good rose pink and cerise, and a cristate form of fimbriata were all fine. Our standard for these flowers is now high, and every dealer should rigorously weed out the flimsy or poorly colored specimens, which cannot compete with high grade flowers.

## The Seed Trade.

## AM. SEED TRADE ASSOCIATION.

W. ATLEE BURPEE, Philadelphia, president; A. L. DON, secretary and treasurer, 114 Chambers street, New York. Next annual meeting second Tuesday in June, (will probably be held in Toronto.)

KEOKUK, IA.—John G. Hartel, the seedsman, died suddenly January 4.

## Catalogues Received.

R. & J. Farquhar & Co., Boston, Mass., flower seeds; James Vick's Sons, Rochester, N. Y., seeds and plants; Geo. Hancock & Son, Grand Haven, Mich., carnations; H. Cannell & Sons, Swanley, Kent, England, seeds; J. C. Gibson, Woodbury, N. J., seeds and plants; Benj. Chase, Derry, N. H., wood labels; Zocher & Co., Haarlem, Holland, Dutch bulbs; Ch. Molin, Lyon, France, new plants; Iowa Seed Co., Des Moines, Ia., seeds and plants; Good & Reese Co., Springfield, O., plants and seeds; T. W. Wood & Sons, Richmond, Va., seeds; Plant Seed Co., St. Louis, Mo., seeds.

## Springfield, Mass.

At the annual meeting of the Amateur Horticultural Society officers for 1894 were elected as follows: President, Chas. L. Burr; 1st Vice-President, Rev. W. T. Hutchins; 2nd Vice-President, Jos. Aumer; 3d Vice-President, Mrs. W. H. Pinney; Secretary, Geo. H. Lapham; Treasurer, L. D. Robinson.

Arrangements were made to hold a spring exhibition June 19 and 20. It was also decided to have a fall exhibition this year but date was not fixed.

At the next meeting of the society, February 2, the subject for discussion will be "Hardy roses," and invitations to be present will be sent out to the Hartford, Holyoke and Hampden county horticultural societies.

WE HAVE RECEIVED some very fine carnations and Souvenir de Wootton roses from Mr. Loveridge, manager for J. C. Murray, Peoria, Ill. The carnations included Daybreak, Tidal Wave, Lizzie McGowan and Silver Spray. Daybreak, which Mr. Loveridge considers the most profitable variety he grows, was particularly fine, equal to the very best we have seen this winter. Tidal Wave, which is mentioned as next to Daybreak the most profitable variety to grow, was good; so were the white sorts, McGowan being the finer of the two. The roses were excellent, with fine stems and clean foliage; the grower writes us that this is his first trial of Wootton, which he finds very profitable.

## Water Lilies

Finest stock of Egyptian and American Lotus, and lustrous Nymphaeas in the country. Lowest prices. Our new N. Superba is the best known aquatic in its culture. Several thousand Water Lilies at \$2.50 per 100. If interested in this line write us, we can save you money. Geo. B. Moulder, Lily Park, Smith's Grove, Ky.

FRESH IMPORTED ORCHIDS.  
Cattleya Gaskelliana,

5-7 Bulbs, \$.75 each.  
7-12 Bulbs, 1.25 each.  
Larger plants, \$2.00 to \$5.00 each.

I. FORSTERMAN,  
Newtown, N. Y.

**WHY** do so many  
Canna Growers  
say they have a  
**YELLOW** Canna  
"As good as  
Florence Vaughan?"

Robert Craig, Chairman of Committee of Awards in Floriculture at World's Fair, says, Dec. 6, 1893: "Florence Vaughan has proved to be all that was claimed for it; it is still far superior to any Yellow Canna in commerce."

# Pitcher & Manda's PRIZE CHRYSANTHEMUM SEED.

We look for MARVELOUS RESULTS from our NEW CROP of CHRYSANTHEMUM SEED, just harvested.

It is saved only from the

## CHOICEST NEW AND SUPERB EXHIBITION SORTS

in existence, after being carefully hand hybridized.

**Hybridized Seed**, saved from the best double types. 15 cents per trade pkt., 8 pkts. for \$1.00.

**Hybridized Seed**, saved only from Prize Varieties, of 1893 introduction. 25 cents per trade pkt., 5 pkts. for \$1.00.

**Hybridized Seed**, saved only from New Double Seedlings, of 1892 introduction. 50 cents per trade pkt., 3 pkts. for \$1.25.

It is an acknowledged fact, both in this country and Europe, that our collection of Chrysanthemums is the most select and contains more varieties than that of any other house in existence, which fact is made plain by the numerous orders already received from all parts of the globe; but as our stock of this superb strain of seed is limited, orders should be sent in at once.

## United States Nurseries, Short Hills, N. J.

Better than  
Ever for  
1894.

## Is Different from Others.

It is intended to aid the planter in selecting the Seeds best adapted for his needs and conditions and in getting from them the best possible results. It is not, therefore, highly colored in either sense; and we have taken great care that nothing worthless be put in, or nothing worthy be left out. We invite a trial of our Seeds. We know them because we grow them. Every planter of Vegetables or Flowers ought to know about our three warrants; our cash discounts; and our gift of agricultural papers to purchasers of our Seeds. All of these are explained in the Catalogue, a copy of which can be yours for the asking.

## Indianapolis, Ind.

The committee of arrangements of the State Society and local Florists' Club to arrange for the annual meeting of the American Carnation Society, which is to meet in this city February 20 and 21, was held at the Dennison House recently. Among those present were M. A. Hunt, E. G. Hill, Fred Dorner and local members. It was decided to hold the meeting at the Dennison Hotel in rooms 17, 18 and 19. These are arranged in one large room and will seat about 125 to 150 persons. The exhibition will be held in Parlor D on same floor. A committee of the Florists' Club will have charge of this room.

The entertainment for the visitors will be held Tuesday, 7 p. m. This affair of course will be in the usual Hoosier style, only a little more elaborate. Don't be afraid to come to Indianapolis. We want you all and guarantee satisfaction with every invitation.

Sec'y Bertermann of the State Society presented a statement in regard to the past chrysanthemum show. The report is very encouraging. On the strength of it it was at once decided to hold the 8th annual floral festival beginning November 6. A committee consisting of Fred Dorner, Henry Rieman and John Hartje was appointed to get up advance premium list and report at the annual meeting which will be held at the Florists' Club hall January 31 in this city.

The financial statement of the last show is as follows:

Total receipts with balance of last year—\$3351.99.

Total expenses—\$3197.45.

Leaving balance—\$154.54.

A letter from J. D. Carmody, Evansville, explained his inability to be present on account of a crushed foot, which will compel him, as he humorously wrote, to walk on four legs for some time. W. W. Coles of Kokomo explained his absence by being compelled to attend a meeting of stockholders in that city.

The annual meeting of the Society of Indiana Florists will be held in this city January 31, at 8 p. m., in the Florists' Club hall, corner of Massachusetts avenue and New York street. In addition to election of officers and other routine business a paper on "Curiosities in plant life" will be presented by J. J. B. Hatfield.

W. B.

## CHOICE SEEDS.

PETUNIA FIM. FL. PL.

The largest and finest strain of double fringed and mottled Petunias to be had. All who see these Petunias say they are the finest they ever saw. Selected specially for florists. Extra.

### VERBENA GRAND.

This fine strain of Mammoth Verbenas gives perfect satisfaction to my many customers and is justly claimed to be the finest in cultivation. Flowers an inch in diameter. In immense numbers, of the finest colors.

Per liberal Trade Packet of each of the above, 25 cts.  
3 pkts. 60 cts.; 6 pkts. \$1.00.

JOHN F. RUPP, Shiremanstown, Pa.

ALWAYS mention the AMERICAN FLORIST when writing to advertisers.

# CARNATIONS.

My list is not a big list but it is a mighty good list, and the cuttings are equally good. I would like to quote figures to you on any of the following varieties. In writing please state how many you will want of each variety. Daybreak, Lizzie McGowan, Silver Spray, Grace Darling, Aurora, Portia, Edna Craig, Fred Dorner, J. R. Freeman, Golden Triumph.

## Annie Pixley and Helen Keller.

PIXLEY is one of those beautiful light pinks, with a fair sized flower and good, strong calyx. With ordinary culture stems can be cut twenty inches long. The flower is a model in form, and the growth is strong and healthy.

KELLER you know all about, they are both sure to make good paying varieties for cut flowers.

Pixley per 100, \$12.00; per 1000, \$100.00.

Keller per 100, \$12.00; per 1000, \$90.00.

L. B. 496.

ALBERT M. HERR, LANCASTER, PA.

## COME AND SEE THE NEW AND BEAUTIFUL FANCY CARNATION "HELEN KELLER"

(A very much improved "Chester Pride.") GROWING AND BLOOMING.

It is Healthy and Productive. In form, size, and elegance nothing in sight can approach it. It is the greatest novelty among Carnations up to date.

MR. GEORGE M. STUMPP, New York City, said: "How can people help but like it? The flower is large, and a good shape and it has a fine stem. When people buy it once they ask for it again, and that's a good sign. When it may be had in quantity so that it can be used for dinner table or luncheon decorations, it is sure to become popular."

Two houses filled with this sterling new variety are worth going many miles to see: One at Summit, N. J.; the other at Wyndmoor near Chestnut Hill, Phila., where inspection is invited.

Orders booked now and filled strictly in rotation, commencing March 15, 1894. Strong Rooted Cuttings, \$3.00 per dozen; \$12.00 per 100; \$90.00 per 1000.

EDWIN LONSDALE,  
CHESTNUT HILL, PHILA.

# A CARNATION of great merit.

## THE "JACQUEMINOT" The Best Crimson Carnation ever Introduced

—Say leading Carnation growers.—

Is, we believe **FAR IN ADVANCE** of anything in its class, yet introduced. In color, a brilliant solid crimson (lacking any trace of black), blooms large, petals of great substance, and being thrown well out of a strong calyx before expanding, removes the cause of splitting.

The flower stems are long, stiff, and wiry, and when grown on a bench, produces lateral shoots 8 to 15 inches in length with large and perfect flowers. It is **EXCEEDINGLY FREE BLOOMING**, making it **A DECIDED ACQUISITION**.

We would advise all intending buyers to **INVESTIGATE** first, as we want to introduce this gem on **ITS MERITS**. Send 10c. for postage, and **WE WILL MAIL SAMPLE BLOOMS**. By this means **YOU CAN TEST** its shipping and keeping qualities **AND SEE EXACTLY WHAT WE OFFER**.

A NEW AND VALUABLE SHADE in Carnations. ROOTED CUTTINGS READY FEBRUARY 20th.

## CARNATIONS AND VERBENAS.

ROOTED CUTTINGS.

We have a large stock of Daybreak, Puritan, Edna Craig, Aurora, McGowan, Nellie Lewis, and other leading varieties. Also immense stock of Mammoth Verbenas.  
Send for prices on what you want. Catalogue ready about January 15th. Send for it.

VICK & HILL, Rochester, N. Y.

## "COME AND SEE THE BOYS"

—AND—

## THE YELLOW CARNATION BOUTON D'OR.

After growing this variety for the past three winters we are convinced that it is the best Yellow Carnation ever introduced.

**WHAT WE CLAIM:**—That it is decidedly a good, strong grower and free bloomer; color a beautiful yellow penciled with dark carmine. That it is of the best form and fully as large as Buttercup. That the calyx is perfect, the stem long and stiff, and the foliage possibly better than that of any other carnation.

PRICE, \$2 per Doz.; \$10 per 100; \$75 per 1000. ROOTED CUTTINGS READY MARCH 1, 1894.

Orders filled in strict rotation. Come and see it grow and be convinced. Only one hour from New York City.

**Dailedouze Bros., Flatbush, L. I., N. Y.**

## Rooted Cuttings. CARNATIONS. Rooted Cuttings.

ALL THE BEST VARIETIES IN CULTIVATION.

FINE STOCKS OF DAYBREAK, EDNA CRAIG AND CARTLEDGE.

NO DISEASE! NO RUST!

Catalogues ready January 1st, '94. Correspondence solicited.

Address **H. E. CHITTY, Paterson, N. J.**

The Best Carnation in the Market.

## THE ADELAIDE KRESKEN

Which was originated in 1891, and flowered in the same year, is conceded by all to be the prettiest Carnation ever grown. Strong grower, free from rust, 18-21 in. high, stiff stem, good calyx, and the flower (of a beautiful rosy pink color) averaging three inches and over.

**A VERY FREE BLOOMER.** In addition to recovering the Best Seedling Prizes at Cincinnati, O., Club Certificate at Springfield, Mass., and Milwaukee, Wis., Hunt Prizes, Indianapolis, Ind., it has received Certificates of Merit at the American Florists' Society, St. Louis, Mo.; also the best vase of pinks at St. Louis, Mo., and Certificate of Merit at Toronto. The undersigned begs leave to submit the following exceedingly low prices for Rooted Cuttings, which will be ready March 1st, 1894: \$2.00 per doz.; \$10 per 100; \$45 per 500; \$80 per 1000.

Cash must accompany all orders. Address all communications to

PETER HERB, Mt. Healthy, Hamilton Co., O.

**Wm. Swayne,**

P. O. Box 226. KENNETT SQUARE, PA.  
Mention American Florist.

Baltimore.

A gentleman connected with the trade here, when asked to give his opinion as to the cause of the hard times here, remarked about as follows: "The people haven't the money to spend. Aside from the fact that all business is, and has been, very dull all summer, there were sixty thousand tickets sold by the railroads here for the World's Fair; that, allowing each visitor to spend on the trip one hundred dollars, means a drain out of the city of six million dollars, with no return of a business nature whatever, or about twelve dollars for every man, woman and child in town. No wonder money is scarce." Probably there is money enough, however, as the banks and deposit companies are full, but people get in an economical humor occasionally, and while it lasts it will have to be endured. Meanwhile good roses and violets are selling very well and the market is not to say glutted with anything, while prices are still quite high enough to enable the grower to eat roast beef whenever his appetite runs that way.

Mr. Robert Halliday is still confined to the house with illness.

Mr. A. J. Edmonds of the United States Nurseries took in the town on his way to Washington.

Mr. Hornicke, head gardener at Mr. Robt. Garrett's city conservatories, has quite a stock of orchid seedlings, the result of careful crossing; a recent visit showed his entire collection to be in splendid condition.

At the club meeting the final report of the show committee was very much to the liking of all. In spite of the fact that the expenses were \$700 more than last year there was still several hundred dollars left after everything was paid.

A paper by Mr. McNab on use of commercial fertilizers was exceedingly interesting, as it was a summary of the writer's experience, and was very ably written. His rule for the quantity to be used is to calculate the number of feet in an acre and compare the quantity of soil in benches to that and use fertilizer accordingly. At the same time he would consider the needs of the plants upon which it was to be used.

Trade shows some improvement in demand, but supply of fine huds is rather short; otherwise the market is unchanged. MACK.

SELECT Chrysanthemums.

THE QUEEN and NIVEUS, best white.  
MISS KATE BROWN, largest white, October sort.  
TUXEDO, best amber yellow.  
HARRY BALSLEY, best pink, very large.

Toronto.

Business has got down very low again and there is comparatively nothing doing now, and not much prospect of more until Easter. Roses are plentiful and more than supply the demand; in consequence prices have taken a tumble. Other flowers have of course followed suit.

J. H. Dunlop's window is very attractive just now with great bunches of the finest roses.

In reply to "Subscriber" of Baltimore, Messrs. Manton Bros. say that their J. J. Harrison carnations are grown on a solid bed in light sandy yellow loam, night temperature from 45° to 50°; they were taken in from the field in September and have bloomed continuously ever since; comparatively few burst their calyx. They were propagated from stock obtained 6 years ago which has never been worked or forced hard. E.

Cincinnati.

The annual meeting of the Cincinnati Florist Society was held at the society's rooms in the new floral market, Monday evening, January 8. The attendance was large and the meeting very enthusiastic. Ten new members were elected.

Our society now is an incorporated body and at this meeting directors were elected as follows: R. Witterstaetter, B. P. Critchell, Geo. Corbett, Fred Walz and R. J. Murphy. Immediately after the regular meeting adjourned a director's meeting was held and officers elected as follows: B. P. Critchell, president; E. G. Gillett, secretary; Geo. Corbett, treasurer. After mapping out rules and by-laws this meeting adjourned.

We now have the pleasure to announce that L. Kyrk & Co. have opened a new flower store, and that Huntsman and Hardesty have consolidated. We trust both new firms shall have a prosperous business. E. G. G.

## Announcement to Florists.

We desire to announce the dissolution of the firm of Sipple Dopffel & Co., and to introduce to the trade its successor, The Syracuse Pottery Co., which will be under the management of William Dopffel and Conrad Breitschwerth. The business will be conducted as heretofore, except on a larger scale to meet the growing demand for our goods. We have accordingly enlarged our plant and capacity, and with unsurpassed facilities are now prepared to fill the largest order on short notice. Our latest improved machines are turning out the best and most serviceable flower pots in the market, and assuring you of our intention to lead in further improvements we solicit a continuance of your patronage in the belief that we can supply just what is needed at a price and in a manner satisfactory to all.

Send for price list and samples and we know you will give us an order.

SUGAR MAPLES AND MAPLES IN WINTER  
is the title of a recently published mono-  
graph by Prof. Wm. Trelease, of the  
Missouri Botanic Garden. It is illus-  
trated by sixteen plates, of which those  
showing the winter character of maples  
are specially interesting. It is an inter-  
esting contribution to silvan literature,  
particularly in light of the recent changes  
in varietal names of this genus.

**VIOLETS IN POTS.**—Mr. Henry Schwarz of Cincinnati recently sending in a bunch of well colored violets says he has given them a fair trial in pots, but finds it does not answer, while he has fine success with them planted out in frames. The pot plants produce very fine flowers, but not enough of them.

**PASADENA, CAL.**—On January 1 we had our annual "Tournament of roses," and as usual it was a great event. The procession of decorated vehicles was a beautiful sight, the decorations being more elaborate than ever before. The event drew many strangers to the city.

**HEMPSTEAD, N. Y.**—Mr. H. Weston, formerly foreman for Harry Chaapel, of Williamsport, Pa., has started in business for himself here, near Greenfield Cemetery, having bought out the business of J. H. Bardain.

### Chicago Violet Growers.

At Argyle Park Stollery Bros. are new beginners and have gone but lightly into violets; there is but one bench of them, but these are doing extremely well. There is not a diseased leaf on any of the plants, which look strong and vigorous, the blooms are large and of a fine dark color. The stools are well covered with buds.

R. J. Donovan, of Rosehill, is an old hand at the business and has generally succeeded in growing fine violets. Part of Mr. D.'s stock is looking very well, while a couple of benches are doing so poorly that nothing much can be expected from them. These two benches occupy the center space in one of the houses and have more light and air than any other. The stock that is planted in them, so Mr. D. reports, is the very best he had, and yet the result is a lot of the poorest stuff we ever saw on this place. The plants are diseased, but it is not the regular so-called violet disease. The trouble Mr. D. thinks lies at the root of the plant. The only reason he can assign is that the stock this year, owing to the extreme drought, was benched at a much earlier date than has been the habit in former years. These benches we are speaking of were the first planted. Immediately after taking in the plants the weather turned very hot for several days and the plants (as fine stock as was ever handled) began to suffer at once and have never recovered. The leaves seem to be rotting on the plants. We doubt if this be a specific disease at all, but are inclined to think that the plants suffered through insufficient root action. We found this same trouble at various other establishments, and in every case it can be traced to the same source, the trouble commencing immediately after the plants were moved into the houses. Aside from these two benches the plants are doing finely. The regular disease has been troublesome this fall as in former seasons, but is now well checked and the effect is not very noticeable. The plants are blooming well and quality of flowers is of a high grade.

Mr. Donovan called our attention to one bed (by the way, all the plants that are doing well here are grown in solid beds) about 100 feet long which was planted with what appeared to be two kinds and the line where one left off and the other commenced is very sharply defined. One set of plants looked much more vigorous than the other, foliage much darker and blooms larger and deeper in color. "This lot," remarked Mr. D., "was grown from rooted cuttings, while the rest of my plants are grown in the usual way by stool division." It would appear from this that cuttings would make the best stock, but let us see what other growers say on this subject.

Good violets have been grown around

Bowmanville in former seasons, but this year the crop is a failure. Reinberg Bros. have five houses, but the plants have done very little up to the present time. Several houses look fairly healthy, but blooms are few. The rest are diseased. This stock suffered very much by the drought as well as from lifting in the fall.

Budlong's stock was entirely ruined by the dry season, and none of the stock was benched. J. T. Anthony's went the same way. His were housed but proved worthless and were thrown out to make room for sweet peas.

At Niles Center we find one or two establishments that look well in this line. J. Meyer, who has the reputation of producing violets second to none, comes to the front as usual with a couple of fine houses. His plants also suffered to a considerable extent, and in consequence the crop is somewhat later than in former years. Very few good flowers were picked previous to December 1. The disease appeared soon after the plants were taken in and in a short time much of the foliage was badly affected and had to be removed. At the present writing none of the bad effects are apparent. The plants look healthy and are flowering freely. The size of the blooms is remarkable, the finest ever produced here. Mr. Meyer runs his violet houses at a very low temperature, at night from 38° to 42°, never letting it rise above 45°, and in the day time not to exceed 60°. Mr. M. uses no fertilizer for feeding, but applies a mulch of well decayed manure and stable litter, more for the purpose of keeping the soil loose on top than for anything else.

F. Stielow is growing three houses this year, but the plants have done nothing as yet. Mr. S. reports his stock in fine shape at the time of benching. He is quite a Nimrod and generally takes his vacation in the fall at the opening of the game season. After benching his violets this year he started out on his annual hunting expedition. As a result he reports: The loss of a fine horse, value \$175; a smashed up buggy (two wheels left uninjured), value \$100; the crop of three violet houses for three months, amount of loss unknown. The horse and buggy Mr. S. took with him but failed to bring them back; the violet plants he left behind him but failed to find them on his return; at least there was such a small remnant left that it took a magnifying glass to find what remained of them. "Yes," remarked Mr. S., "the boys must have neglected the stock badly during my absence of three weeks. Nearly every leaf gone. They are just beginning to grow again and will flower probably by spring when the better part of the season is gone."

Do I think I could have saved my plants if I had given them my personal attention? Well, really I wouldn't like to say. Violets do act queer sometimes. If we find this year that we have discarded something of great value and apply it next season we may find it worthless."

George Harrer has one bench that is looking well. The yield is satisfactory and quality good.

Poehlman Bros., at Morton Grove, have three houses, each 12x150. The plants are not doing well. This can not be attributed so much to the disease as to other causes. We notice here the same rotting of the foliage as at Mr. Donovan's. Mr. P. pulled up several of the plants. There was not a healthy root, in fact apparently no new roots had been formed since the plants were benched.

Charles Northrop, of La Grange, is picking fine violets just now. We have not seen his plants, but Mr. N. reports his stock looking well, though the pick up to the present time is less than in former years. "Have you ever been troubled much with the disease?" we asked. "Well, no, I have had a few plants now and then which showed the effect of it, but slightly. I am inclined to think that the so-called violet disease is no more a specific disease than that of mildew is on the rose. Whenever the disease appeared with me I could trace it to a certain cause, the same as you can mildew. For instance, last summer in the field where my violet stock was planted I noticed two spots where the plants showed unmistakable signs of disease while all the rest were perfectly healthy. I kept an anxious watch over them, expecting it to spread, but the lines remained sharply defined, as at first noted. For quite a while I couldn't account for this, but finally I accidentally discovered what to my mind had caused the trouble. The plants were set out in rows running north and south; on the east side of the plants I planted a row of sweet peas which formed a hedge some 4 or 5 feet high; in this hedge there were two gaps several feet wide where the peas had died out; now it happened that one morning just about sunrise I was walking past this row of peas and I noticed that the rays of the sun were striking directly through the gaps in the row onto the plants which showed the disease; the leaves wet with dew were directly exposed to the rays of the sun, which at that season of the year is quite hot even at an early hour. I felt satisfied in my own mind that I had discovered the cause. These same plants are now doing as well as any on my place. I have tried rooted cuttings and stool division, and where the latter is practiced with care and the plants are set out properly I find very little difference. I have practiced both methods with practically the same result. I have experienced little trouble with my plants after benching them. I am very careful to take up the plants properly so as to cause the least disturbance to the roots. I regard this as one of the most vital points in growing violets. If you secure proper root action in your plants when removed into the house you will not be troubled with diseased plants unless they are grossly neglected."

Mr. Tonner of Galewood has made violets a specialty for a number of years and

generally succeeds in growing good flowers. His plants this year came in bloom pretty early and blooms were quite abundant. Mr. T. was consequently much gratified with the result, as the demand for the flowers was brisk and prices good. But Mr. T. has a very bad boy employed at his place who applied a decoction of liquid manure from hen droppings, and the result may readily be guessed. Both foliage and roots were badly injured by the strong liquid, and it will take several weeks for the plants to recover.

#### The New York Florists' Club.

We present in this issue portraits of the officers of the New York Florists' Club for the year 1894. Unfortunately we were unable to procure photographs of two of the trustees, Messrs. W. H. Siebrecht and Fred A. Storm, but our readers are assured that these two gentlemen are both as good looking as those whose portraits are herewith presented.

The New York Club is one of the most noted and successful organizations of its kind in existence. It was organized in July 1887 and incorporated in February 1891. The preliminary and early meetings were held at the places of business of Wm. Elliott and W. S. Allen and then at Cooper Union. Afterwards the headquarters were at Goerwitz Hall on Third avenue, then the club room on West 27th street, and now at the Industrial Building on 43d street and Lexington avenue.

There were about a dozen or fifteen gentlemen at the initial meetings, and the whole membership during the first year was not over sixty. Now there are two hundred and eighty names on the roll and the treasury after encountering several reverses contains a balance of over \$1,500 besides the sum of \$1,000 still due from the Madison Square Garden Co. to the club. The presidents of the club have been J. N. May, John H. Taylor, Alex. Burns, James Dean, W. A. Manda and the present incumbent, P. O'Mara. There have been but two secretaries, W. S. Allen and John Young, and three gentlemen have served as treasurer, viz., Peter Henderson, A. D. Cowan and C. B. Weathered. The club has always had the support of the most honored and prominent men connected with horticulture in and around New York. Among the prominent members who have been taken away by death were Peter Henderson, John Henderson and Charles Anderson.

The exhibitions given under the auspices of the New York Florists' Club have always been on a very extensive scale, the premiums being the largest ever given for such purposes in the United States. Over \$6,700 was distributed in prizes at one exhibition alone. The attendance at the first chrysanthemum show at Madison Square Garden was over 56,000 people in one week. The generosity and public spirit of the club is shown by the interest which they have taken in the encouragement of a love for horticulture in the minds of the children of the city, a most laudable undertaking in which they are associated with the Kindergarten and Potted Plant Association of New York. The sum of \$400 was distributed in prizes to the children at the recent exhibition at the Industrial Building.

For such a young organization the New York Florists' Club has made a most enviable record and is now well equipped to take its place as one of the leading horticultural institutions of the country. Through the liberality of Mr. Mestaniz, the manager of the big Industrial Building,

the club now enjoys the privilege of a club room without expense, and the prospects for notable floral exhibitions and general prosperity in the future are exceedingly bright.

#### Variety in Spring Stock.

To have sufficient variety in stock to supply the demand without unnecessarily multiplying species is the effort of many of our retail growers, and it really becomes a problem of some importance to those having only a limited area of glass in which to produce their spring stock, and at the same time to keep up their cut flower supply to meet the home trade.

Of course the only way to find out just what stock pays the best is to keep accurate records of the quantities raised and sold each season, this giving the information in a nut shell, and showing what plants may be safely dispensed with the following season in order to give space in which to try a few novelties. A certain space should be devoted to this latter purpose each season, for most of us know that the enthusiasm of the introducer of a new plant may sometimes lead to the warping of his judgment to a greater or less degree, and while the introducer may be unconscious of this fact yet it is safer to test the introduction for ourselves.

Really good novelties have been comparatively scarce during a few years past, the chief efforts in this direction having been among roses, carnations and chrysanthemums, and being rather in the improvement of existing types than in the production of new ones. But if new plants of remarkable quality have been few and far between, yet we have been enabled to find out more about the capabilities of some of the old favorites, as an instance of which the bedding out of crotons and acalypsas may be noted, as also sanchezias and *Phyllanthus nivosus*. It is admitted that these plants may not be universally successful for such purpose, but we do not know how much they will stand until we try them, and though a lake breeze or a "Washoe zephyr" may be more than they can endure, yet the fact remains that in many localities they are both beautiful and effective.

The tuberous begonias will naturally be included in the stock of every florist who can accommodate them this season, for the demand will doubtless continue to increase, even though they may not be an entire success in every locality. *Begonia semperflorens* Vernon is another useful member of this extensive family, and seems to flourish in quite exposed positions. This plant is as readily propagated by means of cuttings as are all the begonias, and has already proved to be quite an acquisition among bedding plants. It is none too soon to begin getting up a stock of these plants for the coming season, for thoughtful buyers will sooner pay a fair price for a strong and well established plant than to get a small, weak specimen for a low figure.

If crotons are to be tried this season it should be remembered that strong moist heat is required to grow them on rapidly, though they should be hardened off for a week or so in a cooler house before being used outdoors, else dissatisfaction may result. A night temperature of 70° to 75° with abundant moisture will furnish the most suitable conditions for the rapid development of these plants, and will enable one to secure strong stock in 4 or 5-inch pots in a reasonable time.

The acalypsas should certainly not be overlooked, *A. musaica*, *A. marginata* and *A. Wilkesiana* being the best for bed-

ding, and may be had from cuttings in almost as little time as coleus, providing a warm and light place is given them. When planted outdoors the acalyphas enjoy full sunshine, and will bear nearly as much pinching as a coleus, though like the latter the colors of the foliage are brighter when the shoots are not pinched or sheared too closely.

*Sanchezia nobilis* used to be looked upon as merely a warm house foliage plant, but this also has been proved useful for vases,

veranda boxes and bedding, and while not needed in the same quantities as the acalyphas, yet may prove a useful addition to the stock.

*Phyllanthus nivosus* with its colored stems and mottled foliage may be profitably added to the stock of vase plants, and like the *sanchezia* is not difficult to increase by means of cuttings. In some localities there may also be some demand for bedding of very formal design, and it is well to be prepared for this also by

having some stock of cotyledons (as our old friends the *eccheverias* are now termed), some plants of *Sempervivum arboreum* var., *S. calcareum* and *S. arachnoideum*, also some *Kleinia repens*, and one or two of the low growing sedums. These with an abundance of *alternanthera* and some *pyrethrum* "Golden Feather" will provide material for a considerable variety of work of this character.

Some demand may also be found for small edging plants to be used around

beds of flowers or foliage, and among these *Peristrophe angustifolia* var., *Acorus Japonicus* var., and *Festuca glauca* should find a place, the peristrophe being readily produced from cuttings, while the other two are most easily secured by division. W. H. TAPLIN.

#### Carnation Notes.

It may be sort of a chestnut, and I may repeat some things I have said before, but I have had quite a number of inquiries in regard to rooting cuttings; what I know you are welcome to.

To be successful with cuttings you first want a good healthy cutting; never think of taking a cutting from any but perfectly healthy plants; the parent plant should be strong and vigorous from the lowermost leaf to the top of the plant. No plant that has the least sign of rust, spot or any other of the diseases common to carnations is fit to reproduce itself. Another important thing in reference to taking the cuttings is that you should never use them from plants that have been forced hard, either by heat or by extra stimulation in the way of liquid manures. These plants may be in the best of health and the cuttings would root up nicely and look well, but to keep them in real good working order they have to be continually watched and petted, and the high pressure must be kept up right along, and ten to one there is something going to burst before they are ready for the next season's bloom.

After you have a lot of good cuttings you will want a good propagating house or bench. I will describe my own and my methods, which can be modified to suit your house, as the fundamental principles are all that is necessary to successful propagation. My propagating houses are each one hundred feet long by ten feet wide, equal span, running north and south same as a house for growing plants and flowers. I may be wrong, but my theory has always been that if a cutting can be given plenty of sun after it has started making roots it will make a healthier plant than one that is grown in a north side house that never gets the direct rays of the sun.

The benches are in the middle of the house, and are six feet wide with a path on each side, thus getting away from the drip and dampness always found along the sides of houses. They are four feet from the bottom of the floor of the house and are boarded tight from the top down three feet (that is the sides). This leaves an opening of about one foot at the bottom and keeps the air underneath the benches constantly changed. Under each bench there are six 1-inch steam pipes, each pipe with a globe valve and a check so that we can run one, two or all of the pipe as we wish, keeping the temperature right all the time. These benches are made of an ordinary quality of pine lumber, and with the exception of placing the bottom boards a little closer together they are put up the same as if for plants. I never could see the possibility of growing good healthy cuttings on a bench with a water tight bottom. The sides of these benches are made of boards one

foot wide, thus throwing the shading from five to six inches from the tops of the plants.

Everything being ready we put in about four inches of clean river sand; when we are ready to put in the cuttings it is made moist, nicely leveled off and patted down not too hard. To put in the cuttings we take an ordinary table knife to make the drills and then stick the cuttings in from one half to one inch apart according to the size of the cutting; after a row is put in the sand is pressed tightly against them to close it up and the next row made, leaving about two inches between the rows. After they are in we water them well once and that is all they get until they are rooted, and then we never water unless they are getting dry.

Every morning they are syringed excepting on cloudy days, and they are carefully shaded from the time the sun gets on the house until it gets off again in the evening; this is done until they begin to form roots, when the shading is left off a little longer at each end of the day until it can be left off entirely. Care must be exercised in syringing, as some varieties like Daybreak, Silver Spray and Golden Triumph will develop spot in the cutting bench if they are kept too wet. There is also a difference of from a week to ten days in the rooting of varieties. Slow rooters should be put at one end of the bench so that the others need not be covered waiting on them. For shading I use a cheap grade of muslin and put it on rollers six feet two inches long, these are thrown across the beds and rest on the sides as I have said before some five to six inches from the tops of the cuttings. It is a matter of about ten minutes for us to syringe and shade the two houses.

When the cuttings are first put in we keep the sand about 50° and the top temperature about 45° to 50°; after they are in a week this is increased to 55° to 60° for the sand and 50° to 55° for the top. A good all around rule for temperature is to keep the top temperature about the same as that in which the parent plants are growing, and the sand about five degrees higher.

Following these methods they should be rooted in from four to six weeks, and at least 90 percent should root. I put in annually about five batches of 150,000 each, the first lot quite early; these root some 60 percent. The last lot in the spring generally does not make over 50 percent, but the intermediate three lots will run about 95 percent rooted.

ALBERT M. HERR.

#### Crotons and Nephenthes.

EDITOR AM. FLORIST:—Will you kindly advise me through the FLORIST if crotons are benefitted by feeding with liquid manure at this time of year? The house they are in is well lighted and the night temperature is about 60°. Also I should feel obliged if you would give me some information in regard to coloring pitchers of nephenthes—should they be exposed as much to the light as possible, and when growing freely does it improv. them to water with liquid manure? S. R.

If the crotons are old plants and are potbound they will be improved by a little extra feeding, but young plants may be potted on instead of giving manure water. A night temperature of 60° is not enough to give the best results with crotons, and an increase of from 5° to 10° would be an improvement in that particular.

At this season the nephenthes should have full light, though in summer some shading is required. When in full growth some weak manure water may be given if the plants are well established, but it is best to proceed with caution in this matter, while observing the general rules of giving plenty of pure water at the root, a moist atmosphere and thorough syringing with a minimum temperature of 70°.

W. H. T.

#### Asplenium Nidus.

EDITOR AM. FLORIST:—I have an old bird's nest fern and it doesn't seem to grow very well with me. Would you let me know through your paper some of the principal requirements needed to succeed with such a plant? It has a stem about a foot high; should this be covered with sphagnum, or should such ferns be potted down to the leaves?

#### BIRD'S NEST FERN.

The bird's nest fern (*Asplenium Nidus*) is a shade loving species and thrives in a temperature of about 60°. The soil best suited for this plant is a coarse and fibrous one largely composed of peat, and the plant should not be potted very firmly. Water should be given freely, but during the winter especially should be kept off the foliage. The covering of the stem with sphagnum is not absolutely essential, but may induce additional roots to appear and thus be some advantage.

W. H. TAPLIN.

#### Hollyhock Diseases.

There are several fungous diseases of the hollyhock and between them all this old and popular perennial ornamental plant is a sorry sight in most places. One of the latest destructive comers is the hollyhock rust (*Puccinia Malvacearum*, Mont.), which during the past three years has spread with remarkable rapidity and fatality. This genuine rust, of the same family of fungi as that of the wheat and beet and carnation, causes the orange blotches upon the leaf and leaf stalk, and in the worst cases upon the whole stem.

A fungus that is a good second to the rust is the hollyhock leaf spot (*Cercospora Althæina*, Sacc.) It is wide spread over the country and may be known by the peculiar dark angular spots which it causes in the affected leaves. These spots may be small and distinct at first, but soon they become confluent and the leaf breaks up in large patches.

Figure 1 is a solar print engraving of a badly attacked leaf and the light centers of the dark spots show where the leaf has become thin and lost all its original color, or the tissue has entirely disappeared. This trouble begins quite early in the life of the plant, for the writer has seen many hundreds of seedlings that were suffering severely from the leaf spot and were not worth anything. The spores of this fungus are long and slender like candles in shape and are produced in great numbers upon the surface of the spots.

A third form of fungous disease of the hollyhock is shown in figure 2. To the ordinary untrained eye this is at once seen to be widely different in its effect from the leaf spot shown in figure 1. This may be known as the hollyhock leaf blight (*Phyllosticta Althæina*, Sacc.) This parasite works more thoroughly than the leaf spot in that it spreads from a center of infection and destroys the leaf almost entirely as it goes. Thus there may be but one or two points where the

THE HOLLYHOCK LEAF SPOT. [FIG. 1.]

THE HOLLYHOCK LEAF BLIGHT [FIG. 2.]

germs found entrance, but from such points the disease works its way through the whole leaf. The engraving is of a leaf that has two such spots, one much larger than the other and having already produced a large and irregular hole.

#### REMEDIAL MEASURES.

There seems to be no sort of hollyhock that is exempt from these diseases, so that very little can be done in the line of selection of blight-proof sorts.

In the first place it is important to have seed that is strong and if possible from plants that are not affected with the rust and blights. If the seedlings become spotted or rusted they should be cast out, for young plants do not as a rule

overcome these troubles. Some good can be done to old plants by spraying them with the Bordeaux mixture at least once a week during the growing season.

Unless something is done hollyhock growing will be a lost art in this country.

BYRON D. HALSTED.

Rutgers College.

#### Notes by the Way.

At Lansdowne, Pa., there are several important florists' establishments, one of the most extensive being that of Smith & Whitely. These gentlemen are now running the old Price place in addition to their own plant and seem to be doing a thriving business to judge from the ap-

pearance of both places. Roses, chrysanthemums and carnations for the Philadelphia market are their main products, although they also grow some ferns, smilax and one or two other minor stocks.

Mr. Smith, who kindly showed the writer around on the occasion of his visit, has the reputation of being one of the best growers in this vicinity, and there were evidences of the truth of this on every hand. One house of Beauties and Meteors looked the best of anything I have seen in my travels this season. Another house 100x20 devoted to Brunners looked well, and a house of Laings was extra fine.

Mr. Smith is a strong believer in front ventilation for hardening up the wood. The Price establishment is provided with thorough front ventilation, and also has slate benches with iron supports, and altogether is a very substantially put up range with modern improvements. In the Mermet house a fine lot of Bridesmaids were seen. Mr. Smith thinks a good deal of Bridesmaid and predicts for it a prominent place among commercial roses. In fact it already occupies quite a prominent position in this section. Gontier and Hoste occupy one half of another house with Wootton occupying the other half. Mr. Smith finds Wootton one of the most profitable varieties and has a larger space devoted to it this season than last year. Brides, Niphetos and Sunset make up the balance of the sorts grown here.

The chrysanthemums most largely grown are Minnie Wanamaker, Ivory, Madeira, Lincoln, H. E. Widener, A. J. Drexel, Jessica, J. G. Whildin and Ada Spaulding.

In ferns Mr. Smith believes most in *A. cuneatum* for an all round sort, but he grows a quantity of the new *A. Balli*, which he considers a good thing and a great acquisition.

McGowan holds the fort here as the best white carnation; Hinze being grown in smaller quantity for a late crop. Edna Craig looms up great among the pinks and is as much of a favorite as ever.

Like most of our florists who have grown wealthy, this firm has a cinch in their real estate, which has greatly increased in value recently on account of a new railroad which is to run within about a quarter of a mile of their site in the near future. The Laird of Dumbiedykes dictum "be aye stickin' in a tree, Jock; it'll be growin' when you're sleepin'," is not "in it" for money making compared with a shrewd investment in real estate. When one can sit still and let some other fellow do the "stickin'" and then when the good time comes reach up and pluck the apple one begins to appreciate the blessings of "the land of the free and the home of the brave."

Phila.

G. C. WATSON.

#### Asparagus Plumosus.

ED. AM. FLORIST:—In how many ways can *Asparagus plumosus* be propagated and what are they? F. L. BUTLER, Danbury, Ct.

It can be done in three ways: by seed, division and layers. Seed can only be produced on old plants with very mature foliage, and then their setting is uncertain. They germinate and grow freely in a light soil. By division it can be done very successfully; one plant can be divided into about six and make plants of the original size with a year's growth. Layers are rather uncertain, some layers producing very fine plants, others none at

all. I don't think it has ever been successfully propagated by cuttings.

Brighton, Mass. W. H. ELLIOTT.

#### Seasonable Hints.

The first week of February is late enough to take off your last cuttings of zonal geraniums that were propagated in the fall. The cuttings, if potted into 2-inch pots firmly, will root quite as well as if put into the propagating bed for 3 or 4 weeks yet, and make better plants than those "struck" in the sand. And this gives the plants which have been topped plenty of time to break and make fine plants by the month of May. There is no particular care needed for the cuttings, only they should receive one good watering, and after that only water when they are quite on the dry side; bottom heat is not at all necessary; any ordinary bench where a night temperature of 50° is kept is the place.

I notice some beds of tulips that have been uncovered up to this date, possibly because of a very mild winter. This is just the winter when the bulbs will soon be raised to the surface through continual freezing and thawing. Cover them at once, if it has not been done, with a few inches of litter from the stable. This will prevent the beds from feeling the extremes of temperature.

As the season advances it is much less trouble and expense to force tulips and daffodils. A night temperature of 60° will now bring them in flower in about 20 days, and unless the house is very bright little shading is needed. I allude to such varieties as *La Reine* (white), *Yellow Prince* and *Chrysolora* (yellow), *Vermilion Brilliant* (scarlet), *Joost Von Vondel* (striped). Don't try to force any of the double varieties until the first of March. They are in no great demand and are only disappointing when forced too early. You soon now comes to perfection when given the above temperature.

Lily of the valley has forced splendidly with me from Christmas on with a sand temperature of 80° to 90° and a top temperature of 65° to 70°, but as we gradually approach their natural flowering time less heat is required, particularly at top, therefore the same place is found unsuitable. In a few weeks an ordinary propagating house where the sand is kept at 65° to 70° and the atmosphere at 50° to 55° will be found to give the best results, and have them at all times in such shape that you can water the roots without wetting the flowers. This lesson is taught us by the destruction to a bed of these sweet little flowers outside when we get a heavy rain on them while in flower.

If you managed your *Lilium lancifolium* as I suggested a few months ago you will find some of them making a growth of a few inches. Remove those that have made any growth to the light. But keep them at the coolest end of the house. You don't want to force them.

It is unlikely that any of us will have our Easter crops just in the same condition or in the same degree of earliness. I will remind you once more of the extremely early date on which Easter falls this year. My own observations among others in the trade and my own stock is that the main crop of *Harrisii* lilies will want pushing hard. If they are not showing bud by the first of February it will take a high temperature to get them in by the 25th of March. *Spiraea* will also want lots of pushing. *Cytisus* will in a cool house be just about right. Azaleas

will also nearer hit the mark with little trouble than if Easter was three weeks later.

There is a beautiful shrub forced in moderate quantities this year which it would be well to make a note of. It is "*Staphylea Colchica*." It much resembles the white lilac, but is even more beautiful and its delicate odor is quite as acceptable. It is more easily forced than the lilac and can be had in flower without any trouble for Christmas. Plants of it and lilac put into heat on the same day were in flower two weeks before the lilac.

It is time now to put in your first crop of chrysanthemums. It's a long while yet before you will propagate your main crop, but you can't wait until then and the tops of these you now put in even with the third and fourth generation will make fine cuttings. The same bed that you would propagate carnations in is the place for the mums. WM. SCOTT.

Buffalo, January 22.

#### New York.

Up to within the past few days there was but little stirring in the cut flower trade; the latter half of the past week, however, has seen quite a little spurt. Roses especially have felt the impetus and there is a fair demand for those that are coming in, when they are of first quality. Many of the rose growers are "off crop" at present, and there have been two or three big balls and other society events, and these together with the dull weather have helped the situation, as flowers open but slowly at such a time. Prices have not advanced much if any and there is no great hustle for anything. The shipping trade is almost extinct apparently, and dealers have to depend entirely upon local demands.

Carnations are in full supply and do not move very rapidly. Violets are going fairly well; about \$1.50 is the maximum price for the best. Tulips, hyacinths and *Harrisii* lilies are as plentiful as ever and can be bought at very low prices in quantity. Lilacs of very fine quality are being received from several growers.

It is hoped that the little trade revival which is being experienced will be more than temporary, as on account of Lent coming in so early this year the busy season will be but short at the best.

Confidence in the future is not lacking, however, on the part of many growers who are planning more or less additions and improvements in their glass structures during the coming season. Mr. W. A. Manda, who has severed his connection with the Pitcher & Manda company, has now in course of erection at South Orange a range of six houses which will be ready in February and which are only a beginning of what is intended to be a very extensive establishment. The construction is being done by Thos. W. Weathered's Sons, and several novel improvements are being introduced. Mr. Manda's intentions are to do a general business in seeds, bulbs and plants, both hardy and tender, giving especial attention to the testing and introducing of novelties which give promise of being valuable. Mr. Manda is personally one of the most popular men in the trade in this country. His high ideals and ambition are well known and he will no doubt carry with him in his new venture the good wishes of every florist and gardener. With his experience, youth and determination his chances of success are certainly of the best.

The January meeting of the Florists' Club was but slimly attended, the mem-

bers evidently regarding the dinner of two nights previous a good and sufficient excuse for absence at this time. The discussions were mostly informal and covered a number of subjects of more or less interest. An invitation from Mr. W. Bayard Cutting for the club to visit him early in June, during the blooming time of the rhododendrons, was received and accepted with thanks.

Mr. Chas. Zeller, of Flatbush, has been called upon to bear a severe affliction in the loss of his wife who died suddenly on Thursday, January 11. Mrs. Zeller was a lady highly esteemed by neighbors and friends and much sorrow is expressed over the sad event.

The railroad accident on the Lackawanna Railroad last Monday demoralized the flower market in some localities for the time being, as the roses from some of the large New Jersey growers were aboard that train and consequently did not arrive until very late, and some did not arrive at all.

Early on the morning of January 13 the extensive range of greenhouses of Thos. J. Slaughter, at Madison, N. J., was damaged by fire caused by a defect in the smoke pipe. About one thousand running feet of glass was destroyed.

#### Boston.

With the exception of fine roses there are plenty of flowers in this market. White flowers are a little too plenty in fact. If the demand was what it should be for mid winter there would be a decided dearth of roses; as it is they sell well if good. *Harrisii* lilies are overstocked, so also are freesias and white carnations.

On Saturday, January 20, there was a most beautiful display of rare orchids at Horticultural Hall, brought by Mr. Wm. Robinson, gardener to Mrs. F. L. Ames. A magnificent plant of *Lælia anceps Sanderiana* was the center of attraction. It bore nineteen spikes of pure white blossoms, averaging five blooms to a spike. Three of Mr. Robinson's special pets, hybrid *masdevallias*, which he has named *Henrietta*, *Mary Ames* and *Rebecca*, were also among the gems admired by the orchid lovers. A certificate of merit was awarded for each of these, as well as for the *lælia*, and in addition a silver medal to Mr. Robinson personally for success in raising hybrid *masdevallias*. Certificates of merit were also awarded for cut blooms of a new hybrid *selenipedium* named *Helena* and the beautiful hybrid *Lælia Mossiae Digbyana*. Chas. Stour received a certificate of merit for a hybrid *cypripedium*. Jackson Dawson showed a fine plant of *Dendrobium nobile* grown naturally on a piece of coconut fibre, and L. H. Foster a vase of good Day-break carnations.

It was interesting and almost amusing, after Mr. Lonsdale had delivered his essay on general horticultural subjects at the recent meeting of the Gardeners' and Florists' Club, to note how quickly the discussion and interest crystallized on carnation matters. And much valuable information on this subject was elicited by the questions that were propounded. For instance, Mr. Lonsdale is of the opinion that bursting of the calyx is due largely to cultural conditions rather than to varietal characteristics. He had noticed that when plants are forced along for Christmas or other special occasions bursting of the calyx is very common, but that the trouble disappears with the reduction of the temperature. Regarding disbudding he said that stouter stems and flowers a trifle larger are obtained

by this practice. Disbudding is only a recent introduction into carnation culture and its full value is not yet known. It certainly does not make as much difference in the resulting blooms as is the case with chrysanthemums. If disbudding is done the sooner it is done the better.

The matter of prices was also freely discussed and it seemed to be the general opinion that with carnations of better quality there is no good reason why prices obtained might not be higher in the future than ever before. Mr. Lonsdale advised that the best way to get big prices for new or specially fine varieties is to ask big prices. The cutting of long stems and foliage will have a tendency to weaken plants and it may yet be found necessary to grow separate houses of plants for propagating purposes only. With proper handling most varieties can probably be kept in good shape for an indefinite period. Speaking of future efforts in the production of new varieties he said that Malmaison would be found to be worthless as a parent for American varieties. The proper course is to breed from successful varieties, first making up your mind as to what is wanted and then breeding towards it. As to the future development of the carnation he ventured the opinion that at the present rate of improvement we shall yet have carnations as symmetrically formed as the camellia is today.

Wm. Nicholson of Framingham says that in his experience with carnations he has never known Wm. Scott, Nicholson, Ada Byron, Hector or Mrs. Fisher to take rust. He has a batch of Golden Triumph which is loaded with rust, in the center of which he has set a plant of Nicholson, but up to the present time the plant is perfectly clean. Hector, Scott and Nicholson all are in fine condition with him. Among the best carnations coming to Boston are Hectors with stems fully two feet long which Welch Bros. are receiving from E. G. Bride of Woburn.

Kidder Bros. of Lincoln are still sending in fine blooms of chrysanthemum Miss Minnie Wanamaker to this city; and they look just about as crisp and jaunty as if it were November instead of January.

James Delay had his plants and show cases badly wet down in his store on Boylston street on January 14 by the bursting of a water pipe on the top floor of the building.

The greenhouse of R. M. Barnard at Everett was damaged by fire on the morning of January 15 and fine plants amounting in value to several hundred dollars were ruined.

Geo. A. Sutherland has introduced electric lights all through his wholesale establishment on Bromfield street.

The wife of C. Thompson Adams, of West Medway, died January 20.

#### Philadelphia.

The active members of the Penna. Horticultural Society are in much the same condition on the spring exhibition question as that famous army of the brave old Duke of York, for sometimes they are up and say "Well, we will try it again," and at the next meeting they will be down and say "No, it won't pay, we can't afford it." At the last meeting of the committee called to consider the matter it was decided to hold a spring exhibition and a schedule was partially prepared. But at the regular meeting of the society held last Tuesday evening all was changed. Now nearly everybody is at the bottom of the hill and there is to be

no show. It seems to us that this conclusion is a great mistake. Here is a society composed on the one part of active working horticulturists who are always willing to put their shoulders to the wheel and push all together as is evidenced by the successful exhibitions of the society in the past. Another valuable adjunct is its large membership, composed of the best people of the city and neighborhood; many of them have extensive private greenhouses and their best plants and flowers are standard features of the shows; their annual membership fees are also a great help to the society. In addition there is the property left to the society through the generosity of Mr. Schaffer and his sister, which has grown to be worth at least \$300,000, and finally over \$30,000 now in the hands of the trustees. With all this wealth of energy, with all this clientage of wealthy and distinguished people, and with all this magnificent Schaffer endowment and money in the hands of the trustees the management of the society feel so poor that they are afraid to risk holding an exhibition that may cost them from one thousand to fifteen hundred dollars over the receipts.

The society should hold an exhibition in the spring as well as in the fall. It could be made one of the finest of the year. Magnificent azaleas should be grown especially for this occasion. The society should buy up or import perfect large specimens and pay some one to bring them in from year to year. Fine genistas and acacias would also make grand decorative plants. Such stock as this, that does not pay commercial florists to handle, should be provided for by the society and form a groundwork, to which could be added other choice flowering plants and artistic effects with plants and cut flowers, which a liberal and well arranged premium list would be sure to bring out. Such an exhibition would no doubt pay its expenses by the increased patronage, and if once established would be looked forward to from year to year by flower lovers, as the small boy looks for the circus.

There has been a better tone to business the past week, good stock of all kinds moving lively. The quality of many flowers is, however, poor. Particularly is this the case with carnations. Wilder seems to be no size at all; whether this is by comparison with the newer varieties or whether it is degenerating seems hard to say; it also seems to burst very badly and in many cases it is streaked with lighter pink or grayish white. Roses have been very much off color, but are getting a little better. Some growers say that dull weather affects the stems as well as the color, as a few days of continuous sunshine braces the stems up wonderfully.

Prices remain much the same as last week, there being very little difference. Job lots of poor carnations with a sprinkling of good ones among them sold the past week for \$6 per thousand, and were to be seen on the street soon after for from 12 to 15 cents a dozen. Double daffodils are getting plentiful, but the price does not get below 6. Tulips are about in small quantities, but not yet up to the mark as to quality; they sell for from 4 to 5. Cattleyas are down; 50 cents each has been the price for these orchids from their introduction as a commercial flower in this market until the present time, and some growers even now ask the same, but since \$40 is quoted it will likely be the price for a while at least. Edwin Lonsdale has a cattleya which has produced flowers with footstalk and

stems twelve inches long with a width of flower seven inches in diameter, a remarkable flower. Orchids are gradually gaining ground, and it will not be many years before they will form a part of every florist's stock. Brunners are getting very scarce, the early crops being almost cut out. Heacock has a house just coming in, and Anderson will have another in a week or so. Burton is sending in some good Laings. Beauties and Belles are also scarce and the stock about is only fair.

H. F. Michell, the seedsman, is putting in a new front. Business he says has been very good and he feels much encouraged over the prospect for spring trade.

Robert Scott & Son have had great success with their mushroom house this season, cutting some days as much as one thousand pounds out of the house; these were all sold at prices ranging from 35 to 75 cents per pound. Mushrooms are now selling in this market at from 40 to 50 cents per pound, hot house tomatoes 25 cents per pound for good stock.

William Patterson, Robert Craig's father-in-law, died on the 15th inst., aged 70 years.

The bowling match between the teams selected by John Walker and John Crawford resulted in a victory for the Walker faction by some 50 pins. K.

#### Chicago.

Mr. H. Izawa, who was in charge of the Japanese horticultural exhibit at the World's Fair, left January 19 for his home in Japan. Mr. Izawa made many friends during his stay here and all will be glad to learn that he will probably return to America two years hence. He took a deep interest in the work of the Florist Club while here, and says he will attempt the formation of a similar organization in Tokio.

Business continues extremely quiet; large decorations are literally unknown, the floral arrangements at most social affairs being extremely small. This week the real estate banquet at the Auditorium called for some little work in this line; instead of the diners being at one or more large tables the tables were small, seating six or eight, and were decorated merely with vases or bowls of flowers.

Stock in some lines is rather scarce at present, particularly roses of first quality. Good Beauties, which average \$3 to \$4 a dozen, are scarce, a large proportion of the flowers now coming in being short stemmed and frequently malformed, rarely going above \$1.50 a dozen. Brides, Mermets, La France and Wootton are worth \$4 to \$5 a hundred, and there has been an increase in the demand for light colored roses recently, owing perhaps to extra funeral work. Around the holidays red roses had preference, but now the case is reversed. Meteors, however, still hold their own and are worth \$7 to \$10. Perles, Niphetos and other small roses are worth \$2 to \$3. Carnations, without being extra plentiful, are still well able to meet the demand; they run from \$1 to \$1.50, with fancies such as Day-break and Wm. Scott at \$2. Portia is the only scarlet seen in any quantity, though a few Garfields are coming in; they are preferred to Portia on account of size.

Bulb stuff moves very slowly as a rule. Romans are still overloading the market, and there is plenty of paper white, which sells a shade better than Romans, but still very slowly. The demand for valley is even, but not extra good. Tulips are more plentiful and average \$4 for yellow

and white; red does not sell. Tulips seem to be bought more for decorating the florist's window than anything else. Double daffodils are going at \$4 to \$6; there is not an extra demand for them, and a good many poor flowers. *Harrisii* is still plentiful, and a good many flowers of poor substance are noted; they run from \$5 to \$8. Callas are not selling very well, and a good many appear to have unusually short stems.

Violets hold their popularity and range from \$1 to \$2; \$1.50 is a fair average. *Smilax* appears to be going a little better than it did. Complaints of dull business are general, both shipping and local trade suffering alike.

#### St. Paul, Minn.

I have perused with pleasure the communication from Aug. S. S. in your issue of December 7. It is needless to add that our florist friends recognized the writer of the article without looking for his name at the bottom.

His expose of my misrepresentation is very pleasing indeed. With an apology to the editor for encroaching on his valuable space, I wish to reply to some of the "exceptions" taken. If Aug. S. S. will give the names of the "many florists here as well as in Minneapolis who have been stretching their imagination" in the endeavor to locate me I will cheerfully comply with THEIR wishes and make myself known. I will certainly appreciate the "needed information" which they are so "anxious" to impart.

I have not at any time intended to give Minneapolis news and do not understand why any florist there should take exception to my St. Paul news.

Passing over the first item of October 19, to which an "exception" is taken and to which I will refer later, I have this to say in regard to the second exception noted by Aug. S. S. While I am aware that there were as many as fifteen so-called greenhouses in the city ten years ago the most of them were only poor apologies for such and would scarcely be recognized as greenhouses by the trade to-day. There may not be an establishment containing as much glass as I mentioned, as I merely made an estimate, which I presume Aug. S. S. did. Perhaps, however, he has measured them. Be that as it may, the point which I intended to make was this: That there is a much larger area of glass now in proportion to the population than there was then. I venture to say there is ten times the area devoted to greenhouses now that there was ten years ago, while the annual production may even be larger in proportion. Houses are constructed and equipped much better now than then and any one at all conversant with the business must know of the enormous increase in the business in the past ten years.

The leading concerns are "taxed to their utmost." At certain seasons I venture to say that even Aug. S. S. would wish for more room. At the same time Aug. S. S. has been in the business long enough to know that an establishment may be taxed to its utmost and still have surpluses in certain lines at certain seasons. There isn't a reputable greenhouse establishment in the country I venture to say but that has this same experience. If Aug. S. S. or any other florist has acquired the art of growing just enough and no more for the demands made upon him in each particular line he can be classed as an expert and a seer.

If "we would all be better off if there was a third less glass" why is it that

some of our brethren are continually sending to Chicago and other places for flowers that can not be obtained here? And why, pray tell me, should our leading growers—Hansen, Lemke and May & Co.—increase the number of their houses every year or two if there is no demand to justify them in doing so? Some florists may have too much glass for their trade, but that is no reason for their blaming their more prosperous neighbors. In my opinion the demand in this city has always kept a little ahead of the supply.

Now the writer would never have mentioned that "mum" show "committee" if he had thought any one would take it seriously. Does Aug. S. S. remember the last committee and their attempts at holding a "mum" show? It turned out very *mum* indeed and has remained very *mum* ever since.

My item of November 2, to which attention is called, is so "misrepresenting" that we can not pass it by. If those cheap roses were obtained in St. Paul what a bitter dose it must have been for our Minneapolis brethren to swallow. And how lamentable my ignorance when I might have obtained the "needed information" by asking the Minneapolis florists or Aug. S. S. where the roses were obtained.

If "all" the Minneapolis florists wish to be excused from following my advice in the construction of their greenhouses they have my consent. I presume the old adage of the fox and the grapes will apply in their case, though I should like to hear from *them* before passing judgment.

Those in St. Paul who take exception to the statement that "mums" were not in greater demand than roses for the charity ball must be those who had plenty of roses and few mums. But of course trade varies with different stores, and while one may report good sales in one line another's trade may be quite the reverse.

Regarding those plants sold by the department store. They were advertised extensively and the crowd went early to buy. The plants were soon all sold and disappointed purchasers went to the nearest flower stores (which didn't happen to be Aug. S. S.'s) and purchased plants rather than to be disappointed. I don't think a single florist cut prices but they sold the plants just the same.

We are just as confident as ever that Minnesota roses beat the world. By this we do not mean that they can be grown as cheaply as further south. No doubt it costs from 50 to 75 per cent more to grow them here than in warmer latitudes, but the color, form and fragrance are Minnesota's own, and with the same care and treatment I believe will excel those of eastern or other growers. Of course every florist can not grow roses. I do not pretend to say that St. Paul has any expert rose growers, but the roses speak for themselves, and if Aug. S. S. doesn't think so he had better take a peep about town in some of the best rose grower's houses.

Now to conclude let us set aside all prejudices and look at this department store business squarely in the light. No one would like to see them driven out of the business of selling flowers more than the writer. But how, pray tell me, can you do it? If we refuse to sell them here they will go to Chicago, Milwaukee and other eastern cities and our own flowers will rot on the dump heap. We should make the most of a situation which we can not destroy. What is true of the floral business is true of the drug, the

shoe, the clothing, the hardware, the jewelry and even of the grocery business. These same department stores cut into all of these lines more or less and local jobbers are compelled to sell them or *lose* that much trade.

It isn't a matter that can be regulated by combinations or boycotts. If they don't obtain the flowers here they *can* and *will* elsewhere. Flowers are sold by such stores chiefly because they make the stores bright and inviting. They all admit there is "no money in flowers." Sooner or later this "fad" will run its course and the flower business resume its natural channels. People will have become educated to like flowers and in the end the florists will be the gainers, not losers.

Minneapolis florists have suffered more than St. Paul from this class of trade. But competition is really the life of trade and glass block prices can not always prevail. Besides the department stores do not affect the regular bon ton trade. It cuts more heavily into the trade of the common people, which at best is fickle and not to be depended on. FELIX.

[The above was received soon after the notes by Aug. S. S. were published, but owing to pressure on our columns this is first opportunity to give it space.—ED.]

#### St. Louis.

Trade for the past week has been rather dull. There is but little stock coming in, however, which is fortunate. Really good stock is bringing a fair price, while poor stock is hard to get rid of at all. St. Louis, like all large cities, has at all times a market for first-class stock. Anyone growing such and shipping regularly can get as good returns here as anywhere. If, however, good stock cannot be placed on the market it is the fault of the grower and not of the market that the sales are not satisfactory. The above I think will hold true most anywhere and simply emphasizes the old saying of "Plenty of room at the top."

Von Sions and Dutch hyacinths have made their appearance in this market in limited quantities. The former sell at from 3 to 5 and the latter at 8. The demand for carnations has slackened up and they are rather slow sale at from \$1 to \$1.50 per hundred; a few, however, that are above the average go at a higher figure.

The last meeting in the second series of games arranged for the bowling teams of the club occurred on the 17th. Team number 3 started out in a vain endeavor to overcome the lead number 1 had piled up; they fell by the wayside, however, losing three straight games by 184, 157 and 27 pins. This allows team number 1 to retain first place, team number 2 advances to second and team number 3 drops to third position. As in the first series number 1 has been fortunate in having the attendance of all its members at its contests, while number 2 and 3 have had on several occasions to accept scores of 100 pins in place of members. As three games are rolled each meeting, the absence of a member costs his team anywhere from 75 to 250 pins, and in evenly matched teams this is more than anyone can stand.

Comparing the totals of the first and second series, number 1 gains 7 pins, number 2 loses 96 and number 3 loses 560 pins. The losses are accounted for by absentees, as the actual rolling has improved. The medal for highest score goes from Will Young to C. Beyer, who

is lucky man with a score of 269. The medal for the highest average stays in the possession of C. A. Kuehn, who in twelve games has an average of 205; this is the second time Mr. Kuehn has been skillful enough to win this trophy, and the next time it will become his personal property. In practice the other day he rolled 18 strikes in succession and the spectators were convinced that there was a groove in the alley until they tried to find it.

Mr. Schuerman is building a greenhouse on Grand avenue for the growing and keeping of plants he uses in his trade. Mr. Alex. Waldbart is recovering from the attack of sickness he has passed through and his numerous friends will be pleased to hear of his having been out several times lately. Mr. Geo. Waldbart has during the past week opened his pretty and attractive little greenhouse and store on Grand avenue and is well located to do a first-class business.

There has been considerable delay in forwarding the photographs taken of the S. A. F. while in session here, but they should reach all who have ordered them by the end of next week. Anyone not receiving their copy by that time can have the matter looked into by addressing a postal to Robert F. Tesson, West Forest Park.

R. F. T.

#### Toronto.

The weather continues mild and dull, altogether unlike the typical Canadian winter. Trade is also very, very dull and at the meeting of the G. and F. Association the other night every allusion to it brought forth ironical smiles and jeers. One member suggested that the city scavengers be asked to bring down a report of the cut flower trade at the next meeting. However, on reading the papers about the hard times elsewhere, it is I suppose only human nature to feel consoled by the fact that we are no worse off than our neighbors.

Mr. A. Gilchrist's place at Toronto Junction, about five miles from the city (but connected by electric cars) was visited for the first time by your correspondent the other day. Mr. G. goes in largely for outdoor herbaceous "stuff," and he is quite an enthusiast in that line. Of course this kind of "stuff" is "off color" just now, but as there was no snow on the ground one could see the large extent of land devoted to it. At the back of the place was about an acre of as fine spruce from 2 to 4 feet high as could be seen, also a splendid lot of *Pinus Austriaca*. Joining the dwelling house are three greenhouses; one was devoted entirely to carnations, the middle bench all Day-breaks in fine condition, the color especially good. In another house was a lot of pretty bushy *Cytisus* in various sizes, very healthy looking stock. Mr. G. makes a specialty of ferns and he has a large stock of them in great variety and in all stages of growth. A bench of two year seedling palms of various sorts looked very thrifty and flourishing. Another house was full of general florist's stock, a batch of *Harrisii* lilies looking especially well. In the violet house I saw *Lady Campbell* for the first time in quantity and am bound to say I did not think much of it, though Mr. G. seemed to be of opinion that it would be useful.

The annual meeting of the Toronto Electoral District Society took place on Wednesday last and the G. and F. Association succeeded in getting another of its members on the board of directors, Mr. S. E. Briggs of the Steele, Briggs,

Marcon Seed Co. This is the society that holds the flower show here in July and is in receipt of a government grant. It would take too much space to tell all the ins and outs of this society in connection with the trade, but it is sufficient to say that the above is a little bit of a triumph for the association.

The annual dinner of the association will take place on Wednesday, the 31st inst. at Webb's dining rooms. I need not say that any of the brethren on the "other side" who can make it convenient to drop in about 8 o'clock on that evening will be heartily welcomed.

E.

#### Washington.

The committee having the S. A. F. charter matter in charge have been pushing it all they possibly could, but owing to the present temper of the House they find it impossible to get the matter through in time for the S. A. F. Executive Committee meeting, as had been hoped. Chairman Hatch of the committee on agriculture has reported the bill to the House this session and had it again referred to his committee. Mr. Durfee has arranged to have the bill acted upon at once in the Senate when sent over from the House, and there is little doubt that the charter will be granted long before the next annual meeting of the society in August.

The decorations at the luncheon given by the wife of Vice-President Stevenson in honor of Mrs. Cleveland were all in green and white. The parlors were decorated with palms and ferns, as was also the hallway leading from the parlor to the dining room. Scattered through the plants in the hallway appeared many electric bulbs, producing a brilliant effect. The centerpiece was an oval plateau of *Adiantum* ferns studded with *Bride roses* and bordered with green ribbon and fringe.

At the diplomatic reception the absence of cut flowers was noticeable, the decorations being almost entirely plants. The mantels of the east room were banked as usual with cut flowers upon a background of green. The new scheme of massing tall palms and other foliage plants with multi-colored electric lights gleaming among the branches was a departure from the conventional plan which was much appreciated.

C. LESLIE REYNOLDS.

#### Montreal.

To say that trade is dull is drawing it exceedingly mild. "Nothing doing; never saw such a dull season; only for a little funeral work we might as well shut up shop," are the answers received on all sides to the question "How is business?" Flowers of all kinds are fairly plentiful, and as a result of the clear weather we have had for a couple of weeks are of a better quality.

The regular monthly meeting of the G. and F. Club took place on the 9th. A paper on "Insects and how to destroy them" was read by (Prof.) J. Bray, which although it contained nothing really new brought out a very interesting discussion. Judging from the essayist's practical system of prevention and extermination it would be a very bad thing for the insect who strayed into his greenhouse. He said, though he preferred cold water himself he sometimes treated mealy bug to whisky.

The nomination of officers for the ensuing year took place, and judging from the number of candidates the club is going to

be well managed this year. Imagine! ten candidates for the office of president! In fact out of the 41 members present I don't think a single member escaped nomination for at least one office. BEAVER.

#### Ottawa, Ont.

The annual meeting of the Gardeners' and Florists' Club was held in the Capitol of the Dominion January 11, with a full attendance of the members. Previous to the regular business Mr. J. Watkins read a learned paper on the native cacti of Florida which was much appreciated. President H. F. Sims occupied the chair, and after reviewing the business of the club during the past year called for the annual election, which resulted as follows: President, Mr. H. F. Sims (re-elected); 1st Vice-President, Charles Scrim; 2nd Vice-President, James Hickey; Treasurer, John Graham; Secretary, Harry Parks; Committee of Management, Messrs. George Taylor, Tom Nicholson, A. Geddes, T. Elmett, Luke Williams, A. Hickey, A. Robb and T. J. Benbow; Auditors, Messrs. T. J. Benbow and A. Geddes. A considerable amount of routine business was then proceeded with, among which was the decision to hold the annual dinner of the club in the first week of February.

J. M.

#### Denver.

The Denver Florist Club has adopted the following resolutions regarding the loss to the club through the death of Avery Gallup:

*Resolved*, That by the death of Avery Gallup this club has lost one of its most valued members, one who was a leader among us and who had done much to further the best interests of this organization and of horticulture in the state of Colorado.

*Resolved*, That we express to his bereaved family our heartfelt sympathy and assurance that their loss is likewise our loss, and that the memory of him who has gone will ever be treasured in our hearts.

NEW BEDFORD, MASS.—At the annual meeting of the Gardeners' and Florists' Club the following officers were elected: President, Josiah Eaton, Jr.; vice-president, John P. Rooney; secretary, Frederick Puckering; assistant secretary, Chas. F. Riley; treasurer, Robert Taber; executive board—Robert Mitchell, Dennis Shea, Peter Murray and the above officers.

PITTSFIELD, MASS.—The annual meeting of the Gardeners' and Florists' Club of Berkshire County took place January 10. There was a large attendance, and the following officers were elected for the year: President, Col. W. Cutting; 1st vice-president, John White; 2nd vice-president, William Griffin; secretary, W. M. Edwards; treasurer, A. P. Lucas; auditor, A. P. Meredith; guard, J. G. MacArthur; executive committee—A. P. Meredith, J. F. Huss, Edward Dolby, George Thompson, Robert Johnson, Thos. Campbell.

NEWPORT, R. I.—At the annual meeting of the Newport Horticultural Society officers for the ensuing year were elected as follows: Pres., Andrew K. McMahon; 1st Vice-Pres., Ludlow Mahan; 2nd Vice-Pres., Earnest J. Dexter; Sec'y, Alexander MacLellan; Financial Sec'y, Chas. D. Stark; Treas., Richard Gardner; Sergeant at arms, Thos. Beattie. The society decided to hold a chrysanthemum exhibition in the fall. The last exhibition was the most successful that we have had, but from present indications it will be excelled this year.

## FOR SALE OR TO RENT.

Nine greenhouses, well stocked; also wind mill, barn, pots, etc., a mile from New York City. For full particulars, address J. & W. L. 328 Flushing Ave., Astoria, L. I., N. Y.

## FOR SALE.

Five hundred cash and two thousand on easy terms will buy my florist plant, stocked and running. Possession at once. Profits will soon pay for it. Worth more than double. Anyone wanting, will buy it at once on seeing it. Have paralysis and rheumatism and cannot attend to it. Location and city first-class; cars pass and connect all roads. Come at once and secure bargain. LEWIS R. FOX, 117 E. Fulton St. Gloversville, N. Y.

## FOR SALE OR RENT.

Three greenhouses 18x50 ft. each, 5000 ft. of glass, on large lot 90x250 ft. on main street in town of 6000 inhabitants. 1 hour's ride from Phila. in a live town, connections with Penn. & O. and P. & R. railroads. Everything new, heated by steam. Must sell on account of sickness. A Yearly Trade. Possession at once. Will sell right; or will lease for term of years. Address FLORIST, care American Florist.

## WANTED.

A first-class man with experience in growing roses, carnations, chrysanthemums and palm stock. Only a man of thorough capacity wanted. Address GROWER, care Am Florist.

## WANTED.

Experienced florist and propagator. As good a position as this country affords to the right man. Must be a thorough rose grower of executive capacity. Address B. care American Florist.

## FOR SALE.

A large commercial establishment in New Jersey, consisting of about 10 acres of land, with 22 greenhouses of the following dimensions:

8 houses 18 feet wide by 100 feet long.  
6 houses 10 feet wide by 100 feet long.  
1 house 10 feet wide by 100 feet long.  
2 houses 12 feet wide by 100 feet long.  
4 houses 12 feet wide by 100 feet long.  
1 house 22 feet wide by 100 feet long.

All connected by a long shed and heated by the most improved Steam Boilers. The firing is all done in one place, and the ashes can be wheeled out. Finest water system in the world; six houses can be watered at one time without affecting the pressure.

This place is situated in a flourishing town—Market value of property is \$1000 per Acre. It is 9 miles from New York by wagon route—all hard roads. Five minutes walk from Railroad Station; sixteen trains each way daily. There are two Auction Houses in New York and two Markets, the finest in the world for disposing of plants. It is also near two other large manufacturing cities, both 4 miles from one and 8 miles from another, both having good plant markets.

The out-buildings consist of a new barn 25 by 52 feet, the upper part of one-half being fitted up for man and family to live in, a large boiler house and carpenter shop, a flower cellar and Cut Flower room.

Without exception the location for a wholesale cut flower or plant establishment is unsurpassed.

Well stocked for Spring. Price \$32,000. Will accept one-half cash, balance on bond and mortgage at 6 per cent. Address BARGAIN, care American Florist, Eastern Office, 67 Bromfield St., Boston, Mass.

## New Chrysanthemums.

**YELLOW QUEEN**—The greatest acquisition of the year. Its qualities are: Exceeding earliness, fine shape and large size of flower, extra stiff stem and handsome foliage, and dwarf, sturdy habit, averaging 2½ ft. high. A most beautiful clear yellow. For the past two years we have cut this variety to extra fine condition on Oct. 10th. Good, strong plants ready March 1st, per dozen, \$3.50; per 100, \$25.00.

Also the following 5 other extra fine new varieties.

**ACHILLES**—Winner of the first prize at New York show in open class. General build of flower in the style of "Ed. Hatch" but with a much better stem and foliage. Color when in perfection, a clear pearl white.

**MALMAISON**—Very large, deep, clear rose pink at base, silvery pink on outside of petals. A grand variety.

**MAYFLOWER** (White)—A very fine bold flower, incurved; good second early.

**MINERVA**—One of the finest yellows ever introduced. 2½ to 3 feet high with extra fine stem and foliage. Ready to cut Oct. 25. Two certificates.

**ITALIAN**—Very large, deep, clear rose pink; very late. These five varieties at \$6 per doz.; \$55 per 100.

## NEW ROSE.

**MRS. W. C. WHITNEY**. The greatest acquisition of the year. Winner of the Whitney Cup in New York, two Medals and two Certificates of merit, also the Columbian Medal and Diploma at Chicago, where it was blooming all last summer in the New York Florist Club exhibit.

\$7.50 per dozen; \$40 per 100; \$250 per 1000.

**CARNATION "IAGO"**—The best crimson to date; deep, bright color, extra fine stem and very free flowering. \$10.00 per 100; \$80.00 per 1000. And all the other real acquisitions in carnations of recent introduction. Also all the new Chrysanthemums introduced this season by other raisers, and all the cream of the older varieties. Price list of the same now ready, and will be mailed to all applicants.

JOHN N. MAY, Summit, New Jersey.

## CONTRACT NOW for FORCING ROSES

for your next season's planting and secure well rooted stock grown specially for your order. Last year, owing to the heavy demands made upon us at planting time, we were unable to fill many orders, thus disappointing our customers. We are now contracting to grow, for delivery when wanted, the leading varieties of forcing roses—including the new kinds, BRIDESMAID, the best pink grown; KAISERIN and TESTOUT; also Meteors, Beauties, Woottons, Brides, La France, etc., etc.

We earnestly request intending purchasers to submit to us a list of their wants, and we will be pleased to quote them special prices for strong, well rooted plants to be delivered when they may designate.

We make a Specialty of Growing Roses for the trade. Having experienced and competent growers. Our stock is first-class in every particular and we guarantee satisfaction. Of the many hundred unsolicited testimonials we append the following: "Roses got of you last year have been the best I ever saw in our house. RIVERSIDE FLORAL CO., Marshalltown, Iowa."

Order Early and secure the Best.

## Society of American Florists.

The executive committee of the Society of American Florists will meet in annual session at the Colonnade Hotel, Philadelphia, on Tuesday, February 13, 1894. Many of the members of the society no doubt have ideas as to subjects which could be with profit embodied in the program for next summer's convention or could suggest to the executive committee plans of improvement or advancement in the society's work. Now is the time to bring such matters to the attention of the executive committee that they may receive careful consideration and all such assistance from the members at large is sure to be welcomed by the committee. Communications should be addressed to Secretary Stewart.

The three members of the executive committee whose terms expired with the year 1893 are W. A. Manda, Short Hills, N. J.; P. Welch, Boston, Mass.; H. W. Buckbee, Rockford, Ill. President-elect Anthony has selected J. C. Rennison, Sioux City, Iowa; E. A. Wood, West Newton, Mass.; Alex. Waldbart, St. Louis, Mo., as the three new members who will take their places.

WM. J. STEWART, Sec'y.

## Catalogues Received.

R. Witterstaetter, Sedamsville, Cincinnati, O., chrysanthemums and carnations; Chas. D. Ball, Holmesburg, Phila., Pa., decorative plants; Seven Oaks Nurseries, Union Springs, Ala., plants; Alfred F. Conard, West Grove, Pa., plants and seeds; G. R. Gause & Co., Richmond, Ind., plants and seeds; R. Frotcher, New Orleans, seeds; Drumm Seed and Floral Co., Fort Worth, Texas, seeds and plants; D. M. Ferry & Co., Detroit, Mich., seeds; Haage & Schmidt, Erfurt, Germany, seeds and plants; W. Piercy, Forest Hill, London, Eng., chrysanthemums; Thos. H. Spaulding, Orange, N. J., chrysanthemums, cannas and begonias; R. & J. Farquhar & Co., Boston, Mass., seeds and plants; J. Seuburger, Oakland, Cal., seeds, plants and nursery stock; H. G. Faust & Co., seeds; O. M. Richardson, Canton, Me., plants and seeds; Harnden Seed Co., Kansas City, Mo., seeds; Robert Scott & Son, Philadelphia, plants and seeds; Jos. Breck & Sons, Boston, seeds and plants.

THE PROGRAM of the 160th horticultural exposition of the Societe Royale d'Agriculture et de Botanique, of Ghent, Belgium, recently received by us, contains schedule of premiums at the show November 11-13, 1894. Chrysanthemums are naturally prominent, but there is quite a lengthy list of other classes, both of flowering and foliage plants.

## The Wilson Tariff Bill on Seeds.

Messrs. D. Landreth & Sons, Philadelphia, are out with a circular dated January 17, 1894, asking if it is not time for the American seed growers to meet in convention to protest against the new Wilson tariff bill admitting garden seeds, excepting peas and beans, free. It occurs to us that the Tariff Committee of the American Seed Trade Association could handle this subject to advantage and probably with considerable effect, representing as they would the seed trade of the United States.

In this connection and evidently in reply to a similar circular the FLORIST has been favored with a copy of the following letter, which explains itself:

Office of  
SCHLEGEL & FOTTLER,  
26 So. Market St.,  
BOSTON, MASS., Jan. 19, 1894.  
MESSRS. D. LANDRETH & SONS,  
Philadelphia, Pa.

Gentlemen:—We received your circular asking us to join in a movement to protest against that provision of the Wilson bill which placed garden seeds upon the free list. When such houses as yours and others doing an extensive business as growers and dealers in seeds have never considered that there was any advantage to themselves to become identified with the Association representing so many of the seed dealers of America—an association that has always needed the counsels and influence of such houses as yours—how can you expect that members of that Association, either as individuals or collectively, should act with you? It seems to us that it is the want of united action on the part of all American seedsmen that is largely responsible for the condition in which the trade finds itself.

# NEW CROP ONION SEED

## \$1.00 PER POUND—

Either RED WETHERSFIELD or YELLOW DANVERS.

### \$2.25 PER POUND for American Grown Prizetaker,

In lots of FIVE POUNDS of one kind or assorted as desired. With every \$5.00 order goes FREE a copy of Greiner's Newest and Best Book, "ONIONS FOR PROFIT," telling all the Secrets of Success in Old and New Onion Culture.

### If You Garden for Profit

you can save money and should buy at Wholesale Prices, as quoted in BURPEE'S BLUE LIST for 1894. It is mailed FREE to Market Gardeners everywhere, who, while entitled to the lowest prices possible, should always be sure to get Only the Best Seeds That Grow! BURPEE'S SEEDS ARE WARRANTED,—few equal, none better—and are annually sold direct to many more planters than are the seeds of any other growers.

W. Atlee Burpee & Co., Seed Growers, Philadelphia, Pa.

If you have not already seen BURPEE'S FARM ANNUAL for 1894, write for it TO-DAY. A handsome book of 172 pages, it is pronounced by papers everywhere *The Leading American Seed Catalogue*. It tells all about the Choicest Vegetables and Most Beautiful Flowers for THE HOME GARDEN.

We should begin with a movement towards abolishing the free distribution of seeds by our government. If it is right and proper for our government to annually give away seeds to the people—seeds costing the government each year one hundred thousand dollars, more or less—then it is also right to continue the same line of policy in making seeds cheap for the people by taking off all duties. We should at least be consistent.

We will join any movement that will help to place our line of business upon a level with that of others. There is no justice or reason in continuing this free Government seed business. Other necessities of life should as properly be distributed to the people free of cost.

Let us begin at the root of the worst evil our business has to contend with, and we believe that every seedsman in America will join in asking for a fair share of protection. Sincerely yours,  
JOHN FOTTLER, JR.

WM. H. RAND, formerly with Elliott & Sons, has taken a position with August Rolker & Sons as salesman and traveling agent.

THE STOCK of Phil. Stimmel at Omaha is advertised to be sold at public auction in that city on January 27, 1894, and at Waterloo, Neb., similar stock on January 29.

THE FIRM of Graham, Passmore & Co., manufacturers of the Philadelphia lawn mowers at Philadelphia, are succeeded by the Philadelphia Lawn Mower Co., 3907 and 3909 Chestnut street, Philadelphia.

ONION SEED for the past three weeks has sagged badly and no one seems to know just why even whites are down. When trade does set in it seems as if there must be an advance on some sorts. Sets have been dull, but should advance. Trade seed orders are fairly good. The mail trade is hardly far enough advanced to judge of it.

## California Midwinter Exposition.

There will be held at the California Midwinter International Exposition, which opens on the 27th of this month in San Francisco, a great citrus and deciduous fruit show in the Horticultural Building that perhaps will be the greatest citrus exhibit ever held in the country.

There will be semi-monthly flower shows throughout the six months, and it is expected that these exhibitions will be superior to anything ever attempted in the west. One of the unique features will be the wild flower exhibit.

There will be also held in connection with the Horticultural Department a series of fruit conventions which will convene in the latter part of April, the exact date not yet having been set. Oregon, Washington, Nevada and Arizona have been invited to participate in these Congresses. It is our desire now to cordially invite horticulturists throughout the United States and Europe who are interested in California's horticultural progress to be with us and participate in these great meetings. EMORY E. SMITH, Chief Departments of Horticulture and Agriculture.

## Assessing Greenhouse Property.

I own four acres of land with ten greenhouses, all with modern improvements, for which I am assessed \$3,000—3% levy. Three of the houses were built in 1892. When the assessor asked me what they cost I told him from \$600 to \$800. Still my assessment was raised from \$1,900 to \$3,000, which I think is more than the plant should be assessed for. The greenhouses are assessed for \$1,800, half again as much as the real estate they stand on, and I have found it impossible to convince the assessor that greenhouses should not be assessed so high. I should be glad to know how greenhouses are rated in other cities. E. HAENTZE, Fond du Lac, Wis.

Mention American Florist.

VERBENAS, MAMMOTH, perfectly clean, strong plants, \$2 per 100. Transplanted Cuttings, \$1.00 per 100. Rooted Cuttings, \$6.00 per 1000. All to color. Cash.

W. B. WOODRUFF, Florist, Westfield, N. J.

## The Best Carnation in the Market.

## THE ADELAIDE KRESKEN

Which was originated in 1891, and flowered in the same year, is conceded by all to be the prettiest Carnation ever grown. Strong grower, free from rust, 18 1/2 ft. high, stiff stem, good calyx, and the flower (of a beautiful rosy pink color) averaging three inches and over.

A VERY FREE BLOOMER. In addition to recovering the Best Seeding Prizes at Cincinnati, O., Club Certificate at Springfield, Mass., and Milwaukee, Wis., Hunt Prizes, Indianapolis, Ind., it has received Certificates of Merit at the American Florists' Society, St. Louis, Mo.; also the best vase of pinks at St. Louis, Mo., and Certificate of Merit at Toronto. The undersigned begs leave to submit the following exceedingly low prices for Rooted Cuttings, which will be ready March 1st, 1894: \$2.00 per doz.; \$10 per 100; \$45 per 500; \$80 per 1000.

Cash must accompany all orders. Address all communications to

PETER HERB, Mt. Healthy, Hamilton Co., O.

## Daybreak Carnation

A visit from several prominent florists of the State, has convinced me that I have the healthiest stock of the above beautiful carnation in this State. Before leaving my establishment they left orders for Daybreak at \$2.50 per 100, and \$20.00 per 1000.

I shall have, about Feb. 5th, 50,000 well Rooted Cuttings at the following prices:

\$2.50 per 100; \$20.00 per 1000.

Terms strictly cash. My customers will please take notice that I cannot accept personal checks. Satisfaction guaranteed.

FRED SCHNEIDER, Wholesale Florist,

## CARNATIONS AND VERBENAS. ROOTED CUTTINGS.

We have a large stock of Daybreak, Puritan, Edna Craig, Aurora, McGowan, Nellie Lewis, and other leading varieties. Also immense stock of Mammoth Verbenas.

Send for prices on what you want. Catalogue ready about January 15th. Send for it.

**VICK & HILL, Rochester, N. Y.**

## CARNATIONS.

My list is not a big list but it is a mighty good list, and the cuttings are equally good. I would like to quote figures to you on any of the following varieties. In writing please state how many you will want of each variety. **Daybreak, Lizzie McGowan, Silver Spray, Grace Darling, Aurora, Portia, Edna Craig, Fred Dorner, J. R. Freeman, Golden Triumph.**

**Annie Pixley and Helen Keller.**

**PIXLEY** is one of those beautiful light pinks, with a fair sized flower and good, strong calyx. With ordinary culture stems can be cut twenty inches long. The flower is a model in form, and the growth is strong and healthy.

**KELLER** you know all about, they are both sure to make good paying varieties for cut flowers.

Pixley per 100, \$12.00; per 1000, \$100.00.

Keller per 100, \$12.00; per 1000, \$90.00.

L. B. 496.

**ALBERT M. HERR, LANCASTER, PA.**

**Verbena Lancaster Beauty.**

Decidedly the prettiest Verbena that grows, novel as well as beautiful and sells at sight.

Price, per 100, \$2.00.

**PANSIES.**—I can still supply a few of those seedling plants at \$5.00 per 1000, or 75 cts. per 100. The same good strain I always have.

No list published and terms are cash before shipping or C. O. D.

## IN BLOOM The new and beautiful "HELEN KELLER" Fancy Carnation

We extend a cordial invitation to Carnation growers to come and see it growing and blooming. This grand new variety must be seen to be appreciated. It is undoubtedly the

## • GREATEST NEW CARNATION UP TO DATE! •

It is healthy and productive. In form, size and elegance, nothing can approach it. Two houses filled with this sterling novelty are worth going many miles to see—one at Summit; one at Chestnut Hill.

## COME AND SEE IT GROWING.

Orders booked now and filled strictly in rotation, commencing March 15, '94. Strong Rooted Cuttings, \$3.00 per Dozen; \$12.00 per Hundred; \$90.00 per Thousand.

**EDWIN LONSDALE,**

CHESTNUT HILL, PHILA.

**JOHN N. MAY,**

SUMMIT, N. J.

## "COME AND SEE THE BOYS"

—AND—

## THE YELLOW CARNATION BOUTON D'OR.

After growing this variety for the past three winters we are convinced that it is the best Yellow Carnation ever introduced.

**WHAT WE CLAIM:**—That it is decidedly a good, strong grower and free bloomer; color a beautiful yellow penciled with dark carmine. That it is of the best form and fully as large as Buttercup. That the calyx is perfect, the stem long and stiff, and the foliage possibly better than that of any other carnation.

**PRICE.** \$2 per Doz.; \$10 per 100; \$75 per 1000. **ROOTED CUTTINGS READY MARCH 1, 1894.**

Orders filled in strict rotation. Come and see it grow and be convinced. Only one hour from New York City.

**Dailedouze Bros., Flatbush, L. I., N. Y.**

## Foreign Notes.

Chrysanthemums Mrs. L. C. Madeira and Mrs. Jerome Jones are very highly spoken of in the *Journal of Horticulture*.

As showing the mildness of the season in Great Britain up to New Years it is stated that in Dunkeld, Perthshire, strawberries were picked through December and on New Years day outside, and many rhododendrons, primroses and violets were blooming.

The following price list of certain flowers, popular at this season in our own markets, which prevailed at Covent Garden, January 3, may be of interest to our readers. It is somewhat remarkable that the prices quoted are nearly the same as similar goods brought in this country at the same date: Callas 8 to 12, carnations 3 to 6, chrysanthemums 1 to 4, eucharis 8 to 12, Roman hyacinths 1 to 1.50, lily of the valley 1.50 to 4, poinsettias 8 to 16, tulips 1.50 to 4, orchids 6 to 25, lilacs per bunch .87 to 1.50.

Croton Russell is a distinct variety recently certificated by the Royal Horticultural Society. It is rather dwarf in habit. The leaves are bronzy green, richly veined and mottled with red and yellow.

Mr. Henry Cannell, head of the firm of Cannell & Sons, seedsmen, of Swanley and Eynsford, England, has received from the Academy of Science and Arts, Brussels, the diploma and membership of that institution, which has been conferred for useful invention, commerce and the common good.

Verbascum Weidemannianum, one of the novelties of 1894, is a handsome plant from Kurdistan. It grows to a height of two and a half feet, branching freely and producing a quantity of indigo or lilac flowers one to one and a half inches in diameter.

In a recent number of the *Gardeners' Chronicle* Mr. Geo. Nicholson, of Kew, gives a most interesting account of Rhododendron Catawiense at home on Roan Mountain, Western North Carolina and Eastern Tennessee. Mr. Nicholson was impressed by the grandeur of the scenery in this locality, and by its botanical wealth, it being the home of many choice shrubs grown in British gardens.

Richardia Rehmanni, the pink flowered calla sent out as a novelty this year, is a native of Natal. It is described as resembling the dwarf R. aethiopica compacta in size and growth, the spathe four inches long, with a tail like tip nearly an inch long, dull rose with a few lines of green outside and rose purple inside.

Lycaste Imshooiana, recently exhibited by Messrs. Linden at Brussels, is described as very handsome and distinct. The sepals and petals are pale yellow, densely spotted with crimson, while the lip is yellow of a brighter shade. It is a hybrid from Peru and is said to result from a cross between Lycaste Skinneri and Maxillaria nigrescens.

FIRST PRIZE . . .

For best 50 plants, Single Stem Whites, at Chicago, where it competed against Ivory and other standard varieties of equal merit.

FIRST PRIZE . . .

For best Vase of Ten Blooms at Indianapolis, and a

CERTIFICATE OF MERIT . . .

At the Chrysanthemum Exhibition of the Rhode Island Horticultural Society.

**MARIE LOUISE** is a marked improvement as a grower, which it has proven the past season, where plants were grown among other varieties, it taking the lead in every case, and as to stem and foliage, it is simply perfect.

The flower, when **"Well done,"** measures from seven to eight inches in breadth and same in depth, its great depth being the marked feature, and when first opening, petals are incurved, and when open, reflexing closely around the stem, interlacing and building up full to the center by October 20th, a plummy globe. The accompanying cut is  $\frac{1}{2}$  natural size. See illustration of single stem plants in AMERICAN FLORIST, November 9th, 1893.

Orders booked now, and will be filled in rotation after March 1st, 1894.

PRICE, good strong plants, 50c. each; \$5 per doz.; \$35 per 100.

**R. WITTERSTAETTER,**  
**SEDAMSVILLE, Cincinnati, O.**

## The Single Pipe System.

I was much interested in the remarks made by your St. Louis correspondent, R. F. T., on the single pipe system as seen by him at Mr. W. Huckle's, at Belleville, Ill. I don't know to whom the credit is due for first suggesting this mode of piping greenhouses. I got my idea of it from the manager of the firm that furnished me my boilers, and he said it was the first time he had ever used it in heating greenhouses, although in common use in heating dwelling houses all over the country.

This is the fourth year I have had the system in successful operation and I am more than pleased with the way it works. I am satisfied that if our brother florists knew how simple and economical it is there would be a more general application of its principles than now. Some of our craft who visited Mr. Dale's place at Toronto during the seventh convention will doubtless remember my calling their attention to this system and my explaining how it could be applied to his plant that was just then being piped. He, however, with the majority of the florists present, were rather skeptical about it, and I presume piped his new houses in the old way.

I consider it the best way to pipe houses for these reasons: First—you do not require a lot of expensive valves; all that is necessary is a cap with small air cock at end of each pipe; you can then use one or as many as needed to keep the house at proper temperature, and in this way a great saving of fuel is attained. Second—its simplicity; there is nothing to get out of order; each pipe runs independent of the others and if not wanted to work you simply close the air valve at end when steam is down, and the pipe then being full of air of course cannot be full of steam, and there is the whole thing in a nut shell.

As to the distance this single pipe system may be used, I have just stepped off eighty paces through two houses, being something like two hundred and forty feet long, and I find no difficulty in the circulation, so distance does not seem to make any difference. THOS. FRANKS, Champaign, Ill.

## Piping.

ED. AM. FLORIST:—How many feet of 2-inch hot water pipe shall I use in a double span house 14x60 feet to maintain a temperature of from 55° to 60° in zero weather? G. A.

Not knowing the pitch of house, whether the sides are partly glazed or otherwise constructed, or whether there are one or two gables exposed, it is impossible for us to tell the amount of pipe needed to heat the house named. If your correspondent will take the surface feet of glass exposure in the house and allow 1½ lineal feet of 2-inch pipe for each 3 feet of such surface, and ascertain the number of surface feet of board sides or other material than glass, allowing 1½ lineal feet of the same size pipe for each 10 feet of such surface, these two amounts added will give him the number of feet of 2-inch pipe required to maintain a temperature of 60° in the house in zero weather. This is on the basis of the open tank system. LINCOLN PIERSON, Sec'y Lord & Burnham Co.

PLEASE mention the AMERICAN FLORIST every time you write to an advertiser.

## TO TAKE PLACE OF WIND MILLS

## HOT AIR PUMPING ENGINES

## A Windmill

Is unreliable because it de-  
pends upon the elements  
for its power; hydraulic  
rams also depend upon fav-  
orable conditions and waste  
as much water as they se-  
cure. Steam pumps require  
skill and hand pumps de-  
mand labor and time. The

**DE LAMATER-ERICKSON  
Hot-Air**

## Pumping Engines

are especially designed for  
pumping water, and from  
shallow streams or any  
kind of well. They are  
simple, safe and reliable,  
require no steam and have  
no valves. They require  
very little heat to operate  
them, and can be arranged  
for any kind of fuel.

Send for illustrated catalogue to

**NEW YORK, N. Y.**

## GLASS

which is absolutely perfect for modern  
greenhouse construction.

**ROCK BOTTOM PRICES.**  
Send for Estimates. Satisfaction Guaranteed.

**REED GLASS CO.,**  
65 Warren Street, and 46, 48 & 50 College Place,  
**NEW YORK CITY.**

## News Notes.

WESTERLY, R. I.—S. J. Reuter sails from New York January 24 on a tour through England and Germany.

CRAWFORDSVILLE, IND.—Krause & Crist are having a conservatory built adjoining their down-town office on E. Main street.

CINCINNATI, O.—Trade has shown a decided improvement during the last few days and stock (especially roses and carnations) are well cleaned up.

WILMINGTON, DEL.—The firm of Sparks & Hannam has been dissolved, Mr. Sparks buying out Mr. Hannam's interest and continuing the business under the name of Chas. E. Sparks, Jr.

ALLEGHENY CITY, PA.—The establishment of Ludwig & Richter, 16 Federal street, is in the hands of the sheriff. The store is closed and the place advertised for sale. Besides executions, judgments were entered only to the amount of \$100.

PROVIDENCE, R. I.—The annual meeting of the Rhode Island Horticultural Society was held on January 17. The following officers were elected: President, Joseph H. Fanning; vice-presidents, L. W. Russell and Thos. K. Parker; secretary-treasurer, Chas. W. Smith; librarian, Thos. K. Parker; botanist, Prof. W. W. Bailey.

BILTMORE, N. C.—The vast estate at this place owned by Mr. George Vanderbilt is now being planted with a large collection of trees and shrubs, the idea being to establish an arboretum to rival Kew. The estate is 9,000 acres in extent, and a driveway twelve miles in length leads up to the residence. This driveway is bordered by plantations and is intended to be one of the special features of the estate. Many trees and shrubs too tender for northern latitudes succeed, such as *Abelia rupestris* and *A. floribunda*, *Ficus stipulata*, *Arbutus Unedo*, *Lapageria rosea*, *Thea Bohea* and the Japanese bamboos. Last winter was unusually severe, but *Araucaria imbricata* stood 9° of frost without injury. January 12 the *Abelia*, *Forsythia intermedia*, *Kerriopteris mastacanthus* and others were showing foliage. *Rhododendron Catawbiense* is indigenous to this district and makes a superb show during the flowering season. The propagator and gardener, Mr. C. D. Beadle, has a large nursery, where he is growing and testing the various trees and shrubs before permanent planting. The estate is like a community in itself, and is under the general management of Supt. Chas. McNamee. It is intended to rival some of the famous estates of the Old World, though naturally it will require years of development yet.

## Announcement to Florists.

We desire to announce the dissolution of the firm of Sipple Dopffel & Co., and to introduce to the trade its successor, The Syracuse Pottery Co., which will be under the management of William Dopffel and Conrad Breitschwerth. The business will be conducted as heretofore, except on a larger scale to meet the growing demand for our goods. We have accordingly enlarged our plant and capacity, and with unsurpassed facilities are now prepared to fill the largest order on short notice. Our latest improved machines are turning out the best and most serviceable flower pots in the market, and assuring you of our intention to lead in further improvements we solicit a continuance of your patronage in the belief that we can supply just what is needed at a price and in a manner satisfactory to all.

Send for price list and samples and we know you will give us an order.

HATBORO, PA.—Chas. C. Royce will erect a commercial violet house the coming spring and will enter the ranks of the professionals.

NEW HAVEN, CONN.—Mrs. Robt. Arnold has opened a retail florist store on Chapel street, which makes a very pretty addition to the trade.

SANTA CRUZ, CAL.—Thomas Thompson has presented 200 fine palms to the county exhibit at Sunset City. They will be planted along one of the avenues of the fair grounds.

GRAND HAVEN, MICH.—It is now Geo. Hancock & Son instead of simply Geo. Hancock. The son, Mr. J. G. Hancock, has long had charge of most of the business details and the change in name will make no difference in the management.

DO YOU WANT an alphabetical list of the chrysanthemums in commerce in America, with class and a brief accurate description of each one, and synonyms noted? You will find such a list in our trade directory and reference book.

### Chicago Carnation Notes.

J. T. Anthony at Bowmanville has several houses of carnations which are of more than usual interest from the fact that they contain quite a large number of new varieties and others that while not, strictly speaking, new sorts, are very little known around Chicago.

Of pink varieties we find the following: Wm. Scott, Mme. Diaz Albertini, Edna Craig, Mrs. Elizabeth Reynolds, Grace Wilder and Daybreak.

Wm. Scott is at the present writing in full bloom and makes a splendid show. The plants are strong and vigorous and covered with buds and flowers, which are borne on long stems. Not a ragged flower could be found on the bench and the color runs remarkably even. Mr. A. picked a bunch of twenty-five blooms which we examined very closely, but so even did the color run that we couldn't detect the slightest difference of shade. In Mr. Anthony's opinion this is pre-eminently the grower's carnation in this color. It proves a great producer with him, flowers large and of good keeping quality.

Mrs. Elizabeth Reynolds Mr. A. regards as equally good; in some respects he prefers it even to Scott. The flower is somewhat larger and of a deeper pink. This shade is, in our opinion, not quite as pleasing as the first sort mentioned, and the stems appear a little weaker. This sort does not look its best just now as it has been flowering freely since early fall, and is now pretty well off crop.

Mme. Diaz Albertini is a splendid carnation. We never before saw such fine blooms. In color this variety is somewhat darker than Daybreak, and so far as we could see there was no tendency to fade. The flowers, though very large and double, don't show any tendency to burst, and although the flower opens but slowly, owing to its great size, the blooms develop in perfect shape. The stems are strong and considering the weight of the flowers this is an important point. In addition to size and beauty the flower is very sweet scented. Mr. Anthony says of this variety: "One of the finest varieties for a grower who caters to a first class trade. It will not produce the number of blooms that Scott or Mrs. Reynolds will, but the flowers always bring fancy prices. I get \$1 a dozen for them when commoner sorts sell at 50 cents. The habit of the plant is also good, growth

strong and compact and perfectly healthy."

Edna Craig looks poorly. The plants are badly diseased and dying out in spots. The flowers show a tendency to fade badly.

Grace Wilder is doing very well. It flowers freely and plants are healthy, but blooms burst and more than one half are badly streaked and faded out. Mr. A. will not grow it any more.

Daybreak looks exceedingly well. It flowers freely, and the blooms are large, well formed and of very good color. This sort, by the way, is spoken of very highly by every grower we have seen. We haven't found a poor looking lot anywhere, but it appears to do best when grown in rather heavy soil, although we have seen it do well in a light sandy soil too, but there is a marked difference in the color and keeping qualities of the blooms, those grown on heavy soil being much deeper in color and texture firmer.

In whites we find Lizzie McGowan, White Wings, White Dove, Blanche, Hinze's White and Silver Spray.

White Wings is regarded by Mr. A. as first on the list. With him this variety has done exceedingly well, the blooms are apparently free from bursting the calyx, of good size, borne on long stems and pure white. The flower is not very double, but the petals are thick and firm. A good keeper.

Lizzie McGowan stands second. The plants look healthy but not very strong. The wiry growth of this variety don't give it a very robust appearance at its best. The flowers are of fair size but have a tendency at present to split.

White Dove, as seen at this establishment, is one of the most vigorous growers. The plants at the present writing are looking as fine as any one could wish, but so far have yielded no returns. The few flowers that are open are badly split and not any better than the old DeGraw, of which variety it reminds one very much in both flower and habit though a taller grower.

Blanche, one of Fred Dorner's latest, has done very little up to the present time, but Mr. A. thinks he has not given it a fair show yet, and reserves his opinion on this sort for the present.

Silver Spray is badly diseased, the only bench which looks really poor. Mr. Anthony thinks the reason for this is that the soil he is using on his benches is too heavy for this variety.

Hinze's White looks well, but is of course very late and will be discarded in the future.

Of the reds the best is Portia. We have seldom seen better or larger blooms of this sort. If Portia could always be depended on, as we see it here, there could be little fault found with it.

Garfield looks thrifty, but will have to go.

Tidal Wave is doing well. This sort

can always be depended on. As a producer it certainly has few equals.

Spartan is somewhat in the way of Tidal Wave in form and color of bloom, but does not cluster so much and the stem is longer. Mr. A. speaks very highly of it and recommends it as a free bloomer and quite early.

Richmond is somewhat like the above in color but larger. The flowers are borne on very long stems and have a tendency to blast. It has not proved satisfactory.

In dark crimsons he has Wabash and Anna Webb. The latter is regarded the best of the two.

Two of the striped varieties are grown—Doctor Smart and Western Pride. Both sorts are looking well, but Western Pride shows some crippled flowers and more or less of the buds are blasted. This variety did extremely well all through the fall. Both varieties sell very well on the market.

All the above varieties are grown on benches in a heavy rose soil.

R. J. Donovan, at Rosehill, has three houses in carnations. The majority of these are Portia, partly grown on benches and partly on solid beds. There is no apparent difference in the condition of the plants. This variety is looking splendid at present, being in full crop, flowers quite large and of fine color.

Garfield is just showing the first blooms. This variety has been largely grown by Mr. D., but Portia is so much better with him that Garfield will have to go.

One bench of Silver Spray is not doing quite so well. There are a good many buds and flowers on the plants, but these are badly affected by rust.

A small batch of Tidal Wave is also doing poorly—the first lot of this variety we have seen this season that is not doing well. Mr. Donovan thinks his soil does not suit this sort, as he has tried it several years with the same result.

A few plants of J. J. Harrison show some fine bloom. This variety has been grown here for a number of years. The flowers always sell well at fancy prices, but it is late in coming into bloom and pays but poorly to grow.

The stock here is grown in a rather sandy loam.

Stollery Bros., at Argyle Park, show two houses of carnations which in general excellence would be difficult to surpass.

Lizzie McGowan easily takes first honors. We have never seen better or as good blooms of this popular sort as are produced here. The plants don't look so very robust, and it seems all the more remarkable that these should produce such fine blooms. McGowan occupies but part of a bench and Silver Spray takes up the other part.

Silver Spray did you say? Can it be possible? We must confess that we are not an expert on carnations, but thought we could recognize Silver Spray when we saw it. We should have named it any thing almost rather than Silver Spray, and if we did not have the most indisputable evidence we should still insist that this was some other sort. The flowers, *every one*, are as much striped with color as Western Pride or J. J. Harrison, and if it wasn't for the form of the flower we should sooner take it for one of these two varieties than what it really is. There are two different lots of these plants grown in separate houses, but in the same kind of soil. The stock came from widely different localities. One lot was bought from one of our local growers

while the other was obtained from a New Jersey grower. Both lots look exactly alike. The plants are as strong, healthy and vigorous as it is possible for them to be and are flowering freely. The cause of the color is undoubtedly in the soil. This variety, as well as all the others except McGowan, is planted in a composition of  $\frac{2}{3}$  rather heavy rose soil and  $\frac{1}{3}$  of the soil found on this place, a black muck. This locality was originally a slough, and since being drained has been devoted to celery growing for a number of years.

McGowan, as noted above, is grown in an unmixed rose soil and does not show the slightest trace of pink. But a dozen or so of McGowan were planted with Silver Spray in the mixed soil, and in these we also notice streaks of pink, though not near so pronounced as in the other variety.

Tidal Wave is unusually fine here, both in size and color, and so is Daybreak.

Portia looks well, but when seen growing in company with such varieties as the above looks rather insignificant. X.

#### Carnation Notes.

We will soon begin to prepare our plants for next season and the methods we have followed heretofore with success are the best for us to follow again with the additional knowledge we have obtained by another year's experience.

If you have been successful planting them in flats do not pot them because some one else says so. If you have good results from planting or potting them into rich soil don't use poor soil because some one tells you it will be better. These remarks may seem superfluous but I have seen quite a number of failures just from this method of taking another man's advice as gospel and not using a little judgment in regard to local conditions. If you have not had good results perhaps the following may be of some use to you.

In the first place pot your plants as soon as they are fairly well rooted, as it weakens them to be left in the sand too long. I say "pot" because with me they make better plants than those planted in trays, or beds, or on benches; although I have seen good results from all of these methods. In potting them several grades of soil should be used. For a variety like Lizzie McGowan a very rich potting soil can be used to good advantage as this variety will stand more liberal feeding than any other I know of. Don't use it so rich however, that the change from the pot to the field is too great or the result will be a check and you will have a lot of dead leaves on the bottom of the plant. Many of the failures with this variety are no doubt due to a non-recognition of the fact that it is a strong feeder, for where it is grown properly there is certainly no white that can hold a candle to it, at least I know of none.

These McGowan remarks will apply to all weak growing varieties. Take such sorts as Portia, Fred Dorner and that class; they can and should be potted into a poorer grade of soil and the very strong and rank growers as most of the new seedlings are should have quite a poor soil; by following this method up you will be able to secure more uniform plants and much better results.

If you have rust on the place keep a sharp lookout for it when potting and any plant that has the least speck of it is not worth potting up no matter if the cutting has cost you a dollar; throw it out or burn it. A good plan is to dip every cutting into the Bordeaux solution;

this will wash off any rust spores that may be on the leaves and will act as a preventive by keeping any that may fall on the plants from taking hold.

After the plants are potted up do not stick them on a side bench where nothing else will do. Remember that as you treat your plants so will your plants treat you and it is far better to leave such places idle than to injure your next season's crop of flowers. Put them where they can get the full benefit of the sun, and can be given the very best of ventilation.

A good temperature for these young plants is 50° to 60° during the day, the latter figure on bright days and not over fifty on dull cloudy days; for night from 45° to 50° is about right; but if the cuttings have been grown in a higher temperature it is well to drop gradually to the above figures, taking a week or two to do it in.

The same rule as applies to older plants in regard to watering applies to these young plants. The soil should not be too wet when they are potted up and then they should have a good watering and not again until they show signs of becoming dry. A. M. HERR.

#### Two New Carnations.

A box of carnations from F. Dorner & Son, Lafayette, Ind., recently received by us, included two of the latest novelties of the season of 1894, Goldfinch and E. A. Wood. Mr. Dorner has already a solid reputation for his many meritorious introductions, and these varieties assuredly will not detract from it. Goldfinch is a clear lemon yellow flower, slightly streaked and edged with carmine; in shape it suggests Albertini, having the same raised fullness of the center petals, and it is very double. Buttercup being a failure in so many western localities it is only fair to imagine that this new western yellow may be the flower many growers are looking for. E. A. Wood, the other novelty, is a large and shapely flower, in color bright delicate pink streaked and splashed with deeper rose pink, very fragrant and double and having a splendid stem and calyx.

Some other flowers in the same collection were Mme. Diaz Albertini, undoubtedly one of the most beautiful pinks yet introduced; Wm. Scott, which ranks with the best fancies in our market; Uncle John, a white of high merit, and The Stuart, a brilliant red, for which we may venture to prophecy future distinction. All were finely grown and representative flowers.

#### Miscellaneous Seasonable Hints.

From now until Easter your houses will be filled up with little chance of spreading out much. There are seeds to sow and cuttings to put in, which does not take up much room. Of plants wanted in the spring the seeds of which can be sown now there are mignonette, petunia, lobelia, maurandya and lophospermum. Mignonette does not transplant well, and a few seeds in a 2-inch pot, and afterwards thinned out to two or three of the best plants and then shifted into a 3 or 4-inch pot, make the best plants. Lobelia is seldom too early from seed. If you have sufficient stock from cuttings you will have much better plants for vases and baskets than the seedlings, but you don't always have them.

If you want a few gloxinias earlier than the main crop—middle of March is early enough to start them for that—put a few bulbs in 3-inch pots now and start

FLORAL DESIGN SENT BY THE DENVER FLORISTS' CLUB TO THE FUNERAL OF  
THE LATE AVERY GALLUP

in a night temperature of 55°. Water when first potted but keep them quite on the dry side after that until they have made a little leaf growth.

A few tuberous rooted begonias can be started at the same time and under the same conditions. Last year some vases and beds of begonias were highly satisfactory, especially towards the end of the season, and the bulbs that were started late did much the best.

If you have any Crozy canna bulbs resting in the cellar or under the bench get them up and divide and start growing. They will make fine plants by middle of May and the flowers will help greatly to recommend them. They need take up but little bench room for a month. I place them in three or four inches of sand in flats and put the flats on the pipes where the heat is not too strong. In a month they will have made a growth of five or six inches and can then be potted off.

This is a good time to rob your hydrangeas which are starting into growth of one or two cuttings off each plant for next year's supply. The sooner they are propagated the stronger the young plants will be when planted out. If you have not put in cuttings of cytisus do so at once. It is very slow when young. Racemosa is both a better color and a more compact grower than old canariensis.

You seldom have too much of that very

useful drooping plant vinca variegated and green. The plants propagated in September will now be benefited by having their tops cut off and the cuttings will make just the right size plants for baskets, while the older plants if shifted into 3-inch and given a good bench will make fine long droopers by May.

There is no better time to overhaul your lilies than just now. The well known sorts anceps, autumnalis, Arnoldiana and alba are done flowering and should be resting, and can be given a new pot or basket without any check to the plant. If the material in the basket is very much decayed and the plants are not doing well take them entirely out and thoroughly wash the old peat off the roots and start again with fresh peat or sphagnum, and if you use the same old basket thoroughly clean that and be very sparing of water till the plants show signs of breaking.

WM. SCOTT,  
Buffalo, January 29.

#### Phrynium Variegatum.

Mr. Wm. R. Smith says that Phrynium variegatum is in his opinion destined to become a people's plant. He was forcibly struck with a house of this handsome plant when visiting Mr. Rob't Craig of Philadelphia recently. The plants were grown in a cool house, much to his sur-

prise. He says they were a sight to behold and to admire. Two important discoveries have lately been made in reference to bringing this plant to its perfect state says Mr. Smith. First, grow it cool in winter; second, plant in shade in open ground in summer. The latter was demonstrated at the Botanic Garden in the summer of '92 and plants so treated were admired by many who were fortunate enough to see them in front of Mr. Smith's house during the S. A. F. convention.

C. LESLIE REYNOLDS.

#### A Cyclamen Disease.

A cyclamen, as its name might not suggest, is ordinarily one of the most healthful of plants so far as fungous diseases are concerned. Within the last two months complaints have come to me of serious trouble with this highly prized ornamental plant. One large grower, for example, of it was obliged to throw away nearly his whole crop, having at present but a few specimens, and they not being in good health. This disease so far as it has been studied is confined to the foliage; but it may upon further investigation be found to infest the whole plant. The general appearance of the plant when infested with this fungous disease is easily described. Certain leaves, not necessarily the older and outer ones, turn of a dark color in ill defined areas, that is to say, when a leaf is beginning to show the presence of this fungus there will be a darkening of the most affected portion. After a while this diseased area will become dry and of a lighter color, and will exhibit a number of concentric rings of light and dark bands. The leaf at this place is of course dead and brittle, and upon touching it may break away, so that irregular holes are frequently met with in the leaves. There is no one portion of the blade that is more subject to attack than another; sometimes the upper third of the leaf will be thus blighted and the rounded tip curled under. Again the blotch may be midway between the tip and the right or left lobe at the base of the blade. Some leaves may have two or more of these diseased areas, and when such is the case by the spreading of the trouble the leaf is soon entirely ruined.

This disease, which appears to be unrecorded in the works upon parasitic fungi, is a member of the genus Phoma, and from what has been said above it is strictly of a fungous origin, and must be treated as such. It remains to be determined whether the bulbs and leaf stalks are also affected with this Phoma. Whether they are or not it is evident from a knowledge of the closely related fungi upon other plants, that this pest of the cyclamen is amenable to treatment with the ordinary fungicides. If those who are troubled with this leaf blight, after removing all of the leaves showing the darkened and dead patches, should use either the Bordeaux mixture or the ammoniacal carbonate of copper compound it would probably assist materially in checking the disease, and possibly eradicating it from the house.

The suggestion has come that it is the same as the violet disease. This does not seem to be probable. There are several diseases of the violet, and none of them so far as the writer knows has the microscopic characteristics of the Phoma of the cyclamen. As far as can be determined from the books upon diseases of plants there is recorded only one other cyclamen leaf parasite, and it is quite different in its appearance to the unassisted eye from the Phoma above

treated, and differs much more strongly when seen under the microscope.

Those growers of cyclamen who have little or more of this cyclamen blight would confer a favor upon the undersigned if they will kindly send a few specimens of the same for comparison and further study, and while the trouble is without question of a fungous origin, there are several points with regard to its life history that need further consideration.

BYRON D. HALSTED.

Rutgers College, New Brunswick, N. J.

#### Hot Water Under Pressure.

Please inform me of the advantage of putting in hot water under pressure for greenhouse heating where boiler and piping are of sufficient capacity under the open system. I am told that the saving in fuel will be a consideration and that there is a gain in attendance.

Simcoe, Ont.

H. H. GROFF.

Replying to your correspondent as to the merits of the pressure system over the open plan for heating greenhouses, we have both systems, also steam heating, here in practice, the two former for several years side by side, and I think the pressure system has several advantages over the gravity:

First, the pipes best suited to it are 2-inch regular gas or water pipe; this is all screwed together by threads so that any reasonably intelligent man can fit it up. It requires no brick piers to support it in the greenhouse as is the case with heavy cast iron pipe.

Second, its first cost, all things considered, is quite something cheaper, and in case of changes being necessary it is very much easier to make them than with heavy cast iron pipe.

Third, the difference in the amount of pipe required is 10 2-inch where eight 3½-inch cast iron pipes would be required. These can be more easily distributed over the house, as strips nailed to the posts supporting benches, etc. are all that is needed to carry them.

Fourth, where ample boiler capacity and a liberal amount of pipe is used, so that there is a reserve for all cases of emergency, quite a saving of fuel can be made in a season. It is also practical to use considerably larger boilers for this system, which means a lesser number of fires to look after. The attention, etc. in all other respects are about equal, which means in this particular, one system has no advantage over the other.

The special requirements of the pressure plan are a water tank, elevated high enough to give the desired pressure at all times, say from seven to fourteen pounds to the square inch, which means two feet elevation for each one pound pressure required. The larger the area to be heated the more pressure will be required to circulate the water rapidly. The more rise the pipes can have from the end nearest the boiler to the other extreme end the quicker will be the circulation.

Several in advocating this system of heating have advocated what is known as the "down hill" plan, which means elevating the flow pipes to the highest point as near the boiler as practical and then grading the pipes from there with a fall or descent all round the greenhouse back to the boiler. This we found to be a mistake, as the ends of the houses nearest the boiler were so much hotter than the further end, and we also found a considerable loss of valuable heat which meant more expense to get the necessary heat than should be.

After a year's trial we changed the whole system to running the pipes up hill to the extreme ends of the houses and bringing the returns back on the same grade and alongside of the flow pipes. This we found a great improvement in many ways. I know that many advocates of the "down hill" plan will dispute this, but "facts are stubborn things," and I do not want to open a discussion on this threadworn subject, but simply give the facts of the case as we have proved them here, for the benefit of your correspondent.

The first hot water arrangement for heating a greenhouse that I had anything to do with was on the pressure plan (*not down hill*). This was in my apprenticeship days, and I have good reason to remember it, for it came very near sending me to the "happy hunting grounds." This came about through the supply pipe from the tank to the boiler (a ½-inch pipe) getting stopped with sediment or something else which prevented the water feeding the boiler properly. The result was one cold evening while stoking, the boiler, which I noticed was boiling the water very fast, exploded. [It was generating steam for which there was no escape.] I was turned over very unceremoniously, and after wondering for a while whether it was myself or some one else there gathered myself together, for I had been jammed up into the corner of the stoke hole, the farthest extremity possible from the boiler, left after the combat with more bruises than my opponent got; however, I gathered myself together, crawled out of the stoke hole the best way I could and when I was able to investigate the trouble made up my mind that if I ever had anything to do with putting up a boiler the supply pipe would certainly be larger than half an inch or I would have nothing to do with firing it. Since that time I have had nearly forty years' experience in putting up and running all sorts, sizes, shapes and forms of boilers, have ridden saddles, fired cannons and stoked tubulars and nearly every other form, and with various successes and failures every means of circulation, coming eventually to the conclusion given above, which I hope may be of benefit to your correspondent and others wishing to erect hot water heating apparatus.

JOHN N. MAY.

#### Set of Four Wedding Bouquets Tied With Narrow Ribbons and Flowers.

Each bouquet in this set is tied with one full piece (10 yards) of narrow ribbon to match the color of the roses. To these streamers at intervals are attached with bows of the same ribbons roses such as compose the bouquet.

The bride's bunch in the center, composed of Brides and lilies of the valley, is intended to be held in a position at right angles to the body so that the spray falls gracefully from the hand. The ribbons of this bouquet are tied with sprays of lilies.

M.

#### New York.

The revival in the cut flower trade still continues. It is refreshing to see so much life in it and it reminds one of the "good old times." On Saturday, 27th, the scene in the wholesale establishments was most encouraging. American Beauties and fancy carnations were in special demand, and no sooner was a box opened which contained either of these desirable commodities than a score of hands were outstretched and the stuff melted away as

by magic, while mutterings of disappointment were to be heard from those who got left in the distribution. Anyone who wanted to get a share of the desirable stock had to be on the alert and for the time being found no opportunity for either Corbett-Mitchell discussion or dice-box manipulation.

A persistent effort is being made to keep the price of number one Beauties at 75 cents, but it is done with difficulty. It is worthy of note that the best selling Beauties to-day are not these selected specimens with three or four foot stems, but rather the third class blooms with stems twelve to eighteen inches, and which can be bought at 25 to 35 cents. The flowers on these are about as good as those on the higher priced stock, the only difference being length of stem, and this feature seems to have lost its importance of former seasons.

Meteors are also selling well. Those coming in from the F. R. Pierson Co. are the finest ever seen here in midwinter. There are also fine Bridesmaids and Brides coming in and they are readily sold, as is in fact all really good stock, but there is a large quantity of inferior stock, small, poor color, badly handled and otherwise undesirable which sells only because nothing else is to be had and then at miserable figures.

It is interesting to note the greediness with which the limited quantity of new and specially fine carnations is snapped up. Three to four dollars per hundred, and occasionally five dollars, is the price willingly paid for such stock, and the growers seem well satisfied with these results. Lily of the valley is the only flower in the so-called bulbous stock which is selling. Tulips must be extra good blooms with long stems and preferably pink in color to find a customer. Violets are good and abundant but excessive prices are not obtainable. There are a great many cattleyas and cypripediums in the market at present. Twenty-five to forty dollars per hundred is the prevailing price for cattleyas, and cypripediums are difficult to dispose of at ten dollars, an unprecedentedly low price. Lilacs seem to have lost their old time popularity and sell very poorly. Very little shipping trade is being done and the activity is confined to home demands.

The retailers all speak favorably of the situation and claim to be doing as well as they could expect. There have been a great many social events during the past week requiring floral decoration more or less elaborate, and this will no doubt continue unabated until Lent sets in, and possibly may not stop even then. The windows of the retail establishments are very attractive nowadays. One of the prettiest displays of this kind was seen recently in Thorley's window, the central attraction being three great rings composed of many hundreds of cattleyas and arranged so as to produce a most novel effect. Hand bouquets of pretty good size and rather loosely arranged are quite popular this winter.

At Mr. Hicks Arnold's conservatory on 84th street there is always something interesting and rare to be seen. A fine collection of lilies is just going out of bloom and at present a rich and varied display of cypripediums attracts the attention. These are Mr. Arnold's special pets, and among them he spends his spare hours. Just now among the rare hybrids blooming are Cypripedium Arnoldianum, the beautiful yellow C. insigne Sanderæ and C. Paris. The latter is in bloom for the first time and is the only specimen in

SET OF FOUR WEDDING BOUQUETS TIED WITH NARROW RIBBON AND FLOWERS.

this country. It is a hybrid between bellatulum and argus, color white, suffused with purple and heavily blotched with deep red. An interesting collection of seedling cypripediums is beginning to bloom for the first time. Among the other beautiful things now in bloom are Phajus Cooksonii and Vanda Lowii.

#### Philadelphia.

Although Lent has not set in and it is quite some time until Easter, the growers are speculating as to the price of lilies. In a little knot gathered in one of the stores the other day the lily question was being discussed and the probable price, when one said, "Well, I am not going to be caught napping this season; last year I held out for 15, as I undersood that was to be the price, and before I knew it almost everybody had been supplied at 12. I am going to sell my lilies for the best price I can get, but I am not going to have any left over by standing out for a high price to the detriment of my market." Another grower thought that bringing lilies in at this time interfered

with their sale at Easter. Longiflorum and Harrisii were compared, and each variety was considered better by those growing them. Diseased bulbs and those infested with insects were thought to be the reasons for imperfect growth and foliage, although there is less of this blight reported than for several years. It was also said to take about six weeks in a medium temperature after the buds begin to develop to get them in flower.

Business has been quiet the past week, some days being very dull, calling to mind the first week of Lent. Next week promises to be better, there being a number of social entertainments, as well as the second assembly ball.

Good roses are scarce; the Brunners are all cut out for the present, and Beauties and Belles are in poor shape; 35 to 40 is asked for the best. There are still some Laings, which bring 25. All the other roses are in good supply at fair prices, the largest teas bringing 6 to 8, the medium, like Cusins, Hostes, Bennetts and Woottons 4 to 6, and Perles and Gontiers 3 to 4.

Carnations are plentiful and the price

is nearing the dollar mark for marketable flowers, while the extra fine and fancy kinds bring \$2 to \$3. \$7 is still asked for H. Keller. This is a fine variety, but we might also venture to suggest that \$7 is also a nice little handful of money these hard times. Of course, we are told, the way to get a good price for carnations is to ask it, but it takes courage to ask a reasonable profit on carnations that cost from \$7 to \$12 per hundred; a little smelling salts to revive customers after hearing prices will have to be added to the florists' stock if these carnationists keep up their present pace. Daffodils are becoming quite plentiful, the price now being 3 to 5, according to quality. Other bulbous flowers are to be had in quantity; Romans and paper whites bring 2 to 3. Tulips are now good and can be had in variety for from 3 to 5. Freesia is abundant at from \$1 to \$1.50. Valley is still 4 for the best and is now very good. Smilax has never been so plentiful as this season and 15 is the top price for it, although for some extra fine 20 has been asked. Considerable has also been sold at from 10 to 12.

H. Kainey on 17th street has taken in a partner, Frederick Ehret, the uptown commission man being admitted to the firm.

Saturday night has become a club night at the alleys and quite a number of the boys are to be found there every Saturday evening enjoying themselves and giving each other points on pool or ten pins. In the match on Thursday last Crawford's team beat the Walker faction something over 100 pins. Crawford set a good pace for his men, making 527 pins in the three games.

#### Boston.

Good roses are selling well and the demand bids fair to continue brisk until Lent comes in or until the production is considerably increased. This condition of the rose market is undoubtedly owing more to the smallness of the cut generally than to any special increase in the consumption. As to price the figures obtainable for number one stock is fully as high as it has been at any time for years. Four dollars a dozen is the price with the best growers for their extra selected Mermets and Brides, while the ordinary cut of these varieties will bring not much more than four dollars per hundred. The Mermet houses at Waban Conservatories are in splendid condition and worth a trip of many miles to see. The same may be said of the houses in Lawrence Cotter's care, of which there are seven devoted to Mermets and Brides. While there are some American Beauties, Meteors, etc. grown in this section yet a good proportion of the number of these roses used here comes from New York. Some of the large retail dealers receive a considerable portion of their daily supply of roses from New York.

There are plenty of carnations and violets with no special rush for them unless of extra fine quality. Bulbous stock is everywhere, but with the exception of lily of the valley it goes very slowly. Tulips in pans are beginning to sell well, but as cut blooms nobody seems to care for them. Azaleas in bloom and cyclamens are seen in abundance in the florists' windows.

If anyone wishes to see a fine lot of cyclamens George Anderson's establishment at Milton is the place to go. No finer blooms have ever been shown, and many of the plants are miniature forests of flower buds. They will make a big

record at the spring exhibition in Horticultural Hall. Seeds are now beginning to come up for next season's stock. Mr. Anderson sows his cyclamen seed on finely broken charcoal in pans which have first been partially filled with shreds of dry cow manure gathered from the pasture. Roses, carnations and mushrooms are also well grown crops at this establishment.

↓ The greenhouses of Justus Geist at McRose were badly damaged by fire Friday night, January 26.

#### Chicago.

↑ At the Florist Club meeting last Thursday evening President Hauswirth read a brief paper on floral arrangements. Referring to table decorations he said he preferred a low arrangement, not to exceed 12 inches in height, making it as graceful as possible with such a limitation in height. While there was a better chance to make a more graceful disposition of the flowers in a tall slender vase which would carry the flowers high enough not to obstruct the view across the table he believed that the diners should not be obliged to gaze toward the ceiling in order to view the flowers. He preferred pink flowers for evening dinners, as these look better under artificial light than those of most other colors. He always placed flowers in bowls wherever possible as the flowers keep much better than when made up into plateaus or similar arrangements. He felt that the growers for this market should endeavor to better supply the demand for foliage. He had noted that the tendency of demand was for fewer flowers, but of finer quality, in decorations, and an abundant use of foliage in all arrangements. He was sure that good carnation foliage would meet with ready sale at a profitable price if placed on the market.

The paper brought out a very interesting discussion, during which Mr. McAdams mentioned an order he had received for a decoration in which the only foliage to be used was that of the flower itself in every case. He believed that adiantums should never be used with such a large flower as the chrysanthemum, and that the safest plan was to always use the flower's own foliage where it was possible to secure it.

Mr. H. H. Hindshaw has been appointed professor of botany at the State University of Washington, at Seattle, and left for his new home last Thursday. The University will establish an arboretum and this work will be superintended by Mr. Hindshaw. Mr. H. has only recently returned from New York where he was married. His wife accompanies him to the Pacific coast.

Mr. W. A. Viberts was married January 25. We wish the couple every happiness.

Mr. Edgar Sanders has recovered from his long and severe illness and is about again, though he has not yet fully regained his old strength.

J. C. Craig has started business at 82 State street.

The first two days of this week were very brisk, all the commission men saying that they soon sold all their good stuff. Flowers are scarce in a good many cases, particularly in first-class grades. Good Beauties, which go for \$4 to \$5 a dozen, are really scarce; the cheap poor grades are not called for; Brides are scarce, and in brisk demand at \$5 a 100; Perles and Niphetos of good quality are \$3 or \$4, but good Perles are comparatively scarce and there is a good call for all light roses. The first hybrids from local points were

fine Jacqueminots from Stielow, which made their appearance last Monday; they are fine flowers, with good stems and clean handsome foliage, selling well at \$25. The Niles Center Co. is also selling good lilac from the same grower, the purple variety, which has been coming in for a few days; it averages about 50 cents a bunch. Fine white lilac has been selling at \$1 to \$1.50 a dozen sprays; it is still scarce.

Carnations are not plentiful, and are going well. Daybreak and Scott sell at \$2 to \$2.50, with some extra blooms at \$3. These two varieties are about the only fancies coming in. Scarlets are not plentiful. In bulb stock Romans are as dull and as plentiful as ever; a tremendous quantity is being grown still. Paper whites continue at a standstill. Daffodils go for \$4 to \$5, and vary much in quality. Valley is much more plentiful; \$4 is about the highest, and much of it is sold for \$2, fine quality too. The tulip market is very uncertain; in the main they sell but slowly. Red Duc Von Thol is really unsalable, Chrysolora goes better, and is said in some cases to be a first rate seller, but not in all. Chrysolora and Yellow Prince average about the same. The Klehm Nursery Co. is sending in some of the pink La Reine, the same as last year; they are a beautiful color, and bring \$5. Violets are not equal to the demand and run from \$1 to \$1.50.

Smilax is selling much better than it did, in fact there is a healthier demand for all greens. The smilax ranges from \$10 to \$15; adiantum 75 cents to \$1.50. With Lent beginning next week the florists' harvest seems likely to be a very short one, nor is it anticipated that Easter prices will run above those prevailing at Christmas.

#### Buffalo.

The condition of business is about the same as at the last report, viz., very slow. There is a fair counter trade all the time, but no occasion calling for an extra supply of flowers. I see by the latest health statistics that this is a particularly healthy winter and most everybody is stopping with us, so we are denied even that profitable part of the business to a large extent. Roses for the past week have been quite scarce, especially teas. Why this should be is hard to tell, for the usual chronic complaint of "No sun" certainly cannot be laid up against this winter. We have any number of bright mild days just now and have had for a month past, when usually at this season our glass is covered with snow and ice. I suspect it has been too mild and not enough occasion for good brisk firing.

Violets are coming in in large quantities and good quality. The finest are sent in by Messrs. Harmon & Burr of Darien Centre, N. Y. Carnations are in good supply. Daybreak and other new pinks have entirely placed that once popular variety Grace Wilder in the shade; few of it will be grown another year. Our store windows are now gay with tulips, daffodils and crocuses, and the demand for bulbous stuff is quite fair at present.

Mr. Pettigrew of Lincoln Park, Chicago, who is making a tour of the principal parks of the country, gave us a call last week, which we greatly appreciated. We shortly afterward conducted him to our own park superintendent, Wm. McMillan, after which no doubt "flowers vs. no flowers in public parks" was ably argued out on both sides.

That festive youth, Peter Crowe, of

Utica, accompanied by Mr. Fry of Rochester, visited our city two weeks ago and persuaded Mr. Long, E. I. Mepsted, the writer and some others that a visit to Mr. Fred Schneider of Attica would be the correct thing. We complied and on arriving there found Mr. Primrose of Rochester ready for the fray. Mr. Schneider's extensive lot of glass is nearly all taken up with carnations, and a very large majority of these are Daybreak. A finer lot of this grand variety I have not yet seen. Hundreds of thousands of these fine blooms will be picked before the season is over. I looked for rust with every confidence of finding it, but in justice to Mr. Schneider I must say I was disappointed, for I did not find a speck on his entire place. After horticulture was disposed of and a good dinner, the bowling alley was inspected and we found no rust on that. This establishment is something unique. It is open to all good people, but it is not open to everybody. You can enjoy the freedom of a public place with the seclusion of a private party. Mr. S. has two fine alleys of regulation size. Many enjoyable games were played, but as Mrs. Schneider and Peter Crowe were chosen on the same side there was little show for the other side. This is an excellent place for the tired drummer or the weary florist to spend a day. Host Schneider will see all your wants provided for.

W. S.  
Jan. 29.

#### St. Louis.

Since last week we have been treated to a taste of genuine winter weather, the mercury reaching 11 below zero. The effect of the cold wave is seen in the market, violets being unattainable. The last shipments received from the south came frozen solid, and since then nothing has come in, owing to the plants at many of the shipping points having been served the same way as stock in transit, as they are grown in the open ground and lightly constructed frames. The home growers have been deterred at the same time from relieving the market owing to their not being able to get into their frames, and to make matters worse, there seems to be a run on violets.

Trade this week is much better than last. The cold weather has shortened up the supply of roses, which were already off crop and rather scarce, and has caused stock sent in to go with a celerity and cleanness that is delightful to behold in the light of the last three or four months' experience.

Lent comes early this season, and the opinions expressed by the various florists seem to tend towards its cutting no figure worth mentioning. Those located here longest say that its influence is felt less and less every season. Of course there are a great many persons who leave town and go south at that time, but their absence is compensated for by the increased shipping trade.

At the last meeting of the Bowling club the teams were re-divided, the first and last three on the list composing team 1; the second three highest and lowest compose team 2, and the middle six on the list composing team 3. A rule was also made awarding to the member making the lowest average for the series a leather medal, which must be worn on bowling nights under a penalty of a 25-cent fine. Teams 1 and 2 have already opened the series, number 1 having 112 more pins to its credit than number 2, which was handicapped by the absence of a member.

Number 2, however, won two of the three games played.

J. B. Deamund of Chicago was in town during the past week. R. F. T.

#### Washington.

Business the past week has been very good, keeping our store florists quite busy. Luncheons, teas and dinners were numerous among the society people. While the florists were kept busy there was but little money in it for the boys, as the decorations were mostly small affairs, requiring a good deal of work with as little material as could be used. From now to the close of the social season the florists expect to be kept busy. Several good orders are booked for next week.

The Gude Bros. say that this was as good a week for them as any during the time they have been in business (holiday weeks excepted). They are very enterprising young men. One of them looks after the greenhouses while the other devotes his entire time and attention to the elegant store on F street. They are cutting some fine Beauties, Mermets and La France. Considering how late they were in getting their new houses planted their stock is in remarkably fine condition.

Postmaster General and Mrs. Bissell gave a dinner last Friday night in honor of the President and Mrs. Cleveland and the Cabinet. The decorations were in violet and white. The center piece was of boxes of growing lilies of the valley extending nearly the entire length of the table, the edges of the boxes resting on asparagus placed on the white cloth, the box being hid with broad violet colored ribbon with asparagus falling gracefully over it to relieve the stiffness. The valley was flanked at either end of the table by boxes of growing violets. These were tied around with ribbon the same shade as the flowers. The tall silver lamps burned under shades of violet silk covered with white tulle encircled at the top with violets. In the finger bowls floated violets and valley. The corsages and gentlemen's bouquets were of the same flower. The chandeliers were festooned with asparagus. The decorations were by Gude Bros.

Mr. Chas. G. Dulin gave a luncheon Friday, at which the decorations were white and violet. From the center lamp radiated violet ribbons to each of the places, bearing on the end the name of the guest to occupy the seat. The corsage bouquets were of violets and the sonvenirs of the occasion were boxes of bonbons tied with violet ribbons, on the bow of which poised a butterfly.

The President and Mrs. Cleveland gave their second card reception last Thursday in honor of Congress and the Judiciary. The east room was decorated as usual. The effect was enhanced by the introduction of red, white and blue electric lights among the massing of green palms, crotons and dracenas in the large east windows. The mantels on the east side of the room were banked with cut flowers and the chandeliers festooned with smilax. The blue room was decorated as usual. The mirror rests were banked with cut flowers, the colors being scarlet and white, with a massing of foliage plants in the rear of the apartment.

Smilax is a drug in the market this season. Last year our florists could not get enough for their decorations. Arparagus seems to have taken its place entirely. Bulbons stuff is coming in quantity and the quality is excellent. Violets are more plentiful and are much finer. Pink roses

are still scarce and poor. Meteors are quite plentiful, but the demand for them is far behind last year.

Chionanthus fragrans is now in full flower in the open ground. The flowers are small whitish or yellow, purplish inside and very sweet scented. A few sprigs of this tiny flower hid among others will give a most delicious perfume to the lot. It is worthy of a place among a collection of shrubs, perfectly hardy and of easy culture, a native of Japan. It is easily increased by division.

C. LESLIE REYNOLDS.

State wages; send references. Good chance to work up. Also a gardener wanted. Address ROCKY RIVER NURSERY & GREENHOUSES, care Fries & Schuele, Cleveland, O.

**WANTED**—Two single men with good habits and address that speak English fluently, who understand heating and growing of roses, carnations, chrysanthemums and other general stock, also floral work and selling same. State wages; send references. Good chance to work up. Also a gardener wanted. Address ROCKY RIVER NURSERY & GREENHOUSES, care Fries & Schuele, Cleveland, O.

**FOR SALE**—\$650 will purchase 12,000 square feet of glass, well stocked, 1 acre of land, and 8-room dwelling, in Chicago; or will rent greenhouses. Address H. S. DIETRICH & Co., 90 La Salle St., Chicago.

#### FOR SALE OR TO RENT.

Nine greenhouses, well stocked; also wind mill, barn, pots, etc.; a mile from New York City. For full particulars, address J. & W. L., 328 Flushing Ave., Astoria, L. I., N. Y.

#### FOR RENT.

The entire establishment formerly occupied by V. H. Hallcock & Son, at Queens, L. I., 12 miles from New York. Including 10 greenhouses, packing houses and sheds, office, two cellars, one 125x50 ft., the other 50x30. Immense bulb house. Also 40 acres of land. This place has been run as a bulb and flower concern for 24 years. A fine opportunity for a miscellaneous bulb business. The time is right for the right concern of this kind. Can be had very cheap for a term of years. Also a fine locality for a local plant trade. Address E. V. HALLLOCK, Queens, N. Y.

#### FOR SALE.

A large commercial establishment in New Jersey, consisting of about 10 acres of land, with 22 greenhouses of the following dimensions:

- 8 houses 18 feet wide by 100 feet long.
- 6 houses 16 feet wide by 100 feet long.
- 1 house 10 feet wide by 100 feet long.
- 2 houses 12 feet wide by 100 feet long.
- 5 houses 10 1/2 feet wide by 100 feet long.
- 1 house 22 feet wide by 100 feet long.

All connected by a long shed and heated by the most improved Steam Boilers. The firing is all done in one place, and the ashes can be wheeled out. Finest water system in the world; six houses can be watered at one time without affecting the pressure. This place is situated in a flourishing town—Market value of property is \$1500 per Acre. It is 9 miles from New York by wagon route—all hard roads. Five minutes walk from Railroad Station; sixteen trains each way daily. There are two Auction Houses in New York and two Markets, the finest in the world for disposing of plants. It is also near two other large manufacturing cities, being 4 miles from one and 5 miles from another, both having good plant markets.

The out-buildings consist of a new barn 26 by 32 feet, the upper part of one-half being fitted up for man and family to live in, a large boiler house and carpenter shop a flower cellar and Cut Flower room.

Without exception the location for a wholesale cut flower or plant establishment is unsurpassed.

Well stocked for Spring. Price \$23,000. Will accept one-half cash, balance on bond and mortgage at 5 per cent. Address R. A. GAIN, care American Florist, Eastern Office, 67 Bromfield St., Boston, Mass.

## Montreal.

The annual meeting of the Montreal Gardeners' and Florists' Club took place on Tuesday, Jan. 23. The reports of the secretary and treasurer were considered very satisfactory. A committee was named to see what arrangement could be made with the Horticultural Society, with a view of working in unison.

The elections of officers resulted as follows: President, John Eddy; 1st vice-president, John Bland; 2nd vice-president, John Holliday; treasurer, Alfred Wilshire; recording secretary, Fred Bennett; assistant secretary, Joseph Davis; corresponding secretary, Henry Stocking; committee, Jas. McKenna, B. T. Baud, F. C. Smith, Jas. Nairn, John Perrin.

The annual dinner took place immediately after the meeting, about 50 sitting down to the table. There was a good menu provided, to which ample justice was rendered. During the dessert course much fun was indulged in with the "Neposet flower pots" which were supplied with false bottoms, much to the surprise and sorrow of many of the diners.

After the dinner, the usual loyal and patriotic toasts being honored, the following were offered: "Kindred Societies," responded to by J. Doyle; "The Craft," responded to by Messrs. Graham (seed trade), J. McKenna (wholesale grower), A. Wilshire (retail florist) and J. Walsh (private gardener); "Retiring Officers," responded to by G. Copeland, H. Stocking and J. Bland. "In-coming Officers," J. Eddy and F. Bennett. The evening passed merrily away with songs and jokes from Messrs. Hopkins, Petit, Bird, Robinson, Wm. Wilshire, McHugh, Bray, Walter Wilshire and Cadman. That much fun was enjoyed may be well believed since several old members who never had attempted such a feat before were to be seen honestly doing their best to burn up, if not able to smoke, their cigars. At any rate matches were scarce before we got through. To wind up the evening's fun our worthy host and also our late worthy president were both given a good honest Canadian Bournee to the tune of "He's a daisy, we believe it, just now," all standing up and singing "Auld Lang Syne" before we departed.

The tables were handsomely decorated with begonias, azaleas, hyacinths, cyclamen, poinsettias and tulips, supplied by Walter Wilshire, our genial ex-president.

HABITANT.

HOLYOKE, MASS.—Officers of the Horticultural Society were chosen at the January meeting as follows: President, E. S. Waters; vice-presidents, W. S. Loomis and Mrs. C. W. Ranlet; secretary, George Hicks; treasurer, C. E. Mackintosh. The new members of the board of directors are E. D. Shaw and A. F. Sickman.

## HEADQUARTERS for WATER LILIES

SEED of Red, White and Blue varieties, 50 cts. per trade pkt.

Nelumbium speciosum (Egyptian Lotus), N. s. roseum, N. luteum. Prices on application.

My Columbian Novelties will be ready for distribution this spring. These include such vars. that received special award at the World's Fair, and other rare vars.

WM. TRICKER, DONGAN HILL, New York.

## YOUNG ROSE PLANTS

We offer the following very choice plants in 2-inch pots:

|                  | Per 100 |             | Per 100 |
|------------------|---------|-------------|---------|
| Am. Beauties,    | \$7 00  | Mermets,    | \$3 50  |
| Bridesmaids,     | 5 00    | Perles,     | 3 50    |
| Kaiserin,        | 4 00    | Woottons,   | 3 50    |
| La France,       | 3 50    | Mme. Hoste, | 3 50    |
| D'ch. of Albany, | 3 50    | Bennetts,   | 3 50    |
| Brides,          | 3 50    |             |         |

The above stock is very strong and healthy, and propagated from selected wood. We raised the above to grow for ourselves, and it will give better satisfaction than stock which has been raised simply to sell.

BASSETT & WASHBURN,  
Hinsdale, Ill.

## SMILAX.

## CONTRACT NOW for FORCING ROSES

for your next season's planting and secure well rooted stock grown specially for your order. Last year, owing to the heavy demands made upon us at planting time, we were unable to fill many orders, thus disappointing our customers. We are now contracting to grow, for delivery when wanted, the leading varieties of forcing roses—including the new kinds, BRIDESMAID, the best pink grown; KAISERIN and TESTOUT; also Meteors, Beauties, Woottons, Brides, La France, etc., etc.

We earnestly request intending purchasers to submit us a list of their wants, and we will be pleased to quote them special prices for strong, well rooted plants to be delivered when they may designate.

We make a Specialty of Growing Roses for the trade. Having experienced and competent growers. Our stock is first-class in every particular and we guarantee satisfaction. Of the many hundred unsolicited testimonials we append the following: "Roses got of you last year have been the best bearers we have in our houses. RIVERSIDE FLORAL CO., Marshalltown, Iowa."

Order Early and secure the Best.

L. L. MAY & CO.,

Florists and Seedsmen, ST. PAUL, MINN.  
Our Wholesale and Retail Catalogue for 1894 mailed free on application.

## Forcing Roses.

A stock of the best varieties  
always on hand.

M. A. HUNT, Terre Haute, Ind.

## Hybrid Perpetual Roses,

Worked low on the Manetti Stock, offer the best results to the florist, blooming freely and giving plenty of cuttings for propagating quickly. Fine plants for sale by the 100 or 1000, at low rates.

Price Lists to applicants. Address

WILLIAM H. SPOONER,

Address THE AMERICAN FLORIST CO., Chicago.

Toronto.

The trade in this town appears to be getting "kinder mixed," but if an outsider should hear the remark made that there are no wholesalers in Toronto, he need not infer therefrom that there are not plenty of cut flowers to supply both the home and outside market.

Some days there is a little business doing and other days there is not enough to be worth mentioning. Taking it altogether, perhaps the less said about it the better. It hardly seems probable that it will improve much just yet except for a short time perhaps about Easter, and it hardly seems possible that it can get any worse. Napoleon used to say that everything comes to the man who knows how to wait, and as there appears to be nothing better to do now but to wait for the good times which are bound to come sooner or later (may it be sooner), we may as well be as cheerful as we can while waiting. Our annual dinner on the 31st should be of some assistance in driving dull care away.

Mr. Geo. Reeves, superintendent at Reservoir Park, is building a large tank after the most approved pattern for growing aquatics in one of the green-houses.

Cattleyas in variety are conspicuous in many of the store windows now. J. H. Dunlop has started a new idea at his retail store which seems to take well; 25-cent boxes of cut flowers are shown in the window; they contain quite a few roses, some Roman hyacinths, etc., and green. They certainly look very tempting, and the price brings them within reach of all.

DELAWARE, O.—Mr. J. H. Cunningham, the florist, buried his 7 year old daughter Kittie January 21. The little girl was very popular and the funeral was largely attended by sympathizing friends. The cause of death was pneumonia following an attack of measles.

## The Seed Trade.

## AM. SEED TRADE ASSOCIATION.

W. ATLEE BURPEE, Philadelphia, president; A. L. DON, secretary and treasurer, 111 Chambers street, New York. Next annual meeting second Tuesday in June, (will probably be held in Toronto.)

## The Catalogue Trade.

In response to an inquiry sent to several houses in the catalogue trade the following replies have been received:

W. Atlee Burpee & Co., of Philadelphia, say: "We are pleased to tell you that the mail seed trade is opening very satisfactorily indeed, our receipts up to date being fully 20% ahead of the same period for January 1893. It is, however impossible to draw definite conclusions from this as the increase may be altogether due to the mild weather which we have had—last January you will remember was very severe and stormy. We do not think that these exceptionally hard times will depress the seed trade to anything like the extent that they have other lines of business."

John A. Salzer Seed Co., of La Crosse, says: "The first twenty days show decrease of 8% over 1893 and an increase over 1892."

Jas. Vick's Sons, of Rochester, says: "The season with us opens very well, but it is impossible to tell much about it so early."

Johnson & Stokes, of Philadelphia, says: "Trade has been a very pleasant surprise to us thus far; our sales averaging very much in excess of last year. We think this may be partially accounted for by our having such a very open winter, but it is an indication that money is lying around in the hands of the seed buyers and we look forward to a good season."

John Lewis Childs, of Floral Park, says: "Business thus far this year has been quite satisfactory. It is about the same as last year."

From reports received from other sources we are inclined to believe that the seed trade for January is fully up to that of January 1893.

BOSTON.—The seedsmen have all got their catalogues out now and are beginning to prepare for the expected orders. From appearances at this early date the indications are for a very busy season. Anything in the way of winter business has been well up to the average and there seems to be a universal confidence in the trade that spring business will be fully equal to that of past seasons. Seeds are late coming in owing to the poor season and late harvest in Europe, and some things are in short supply. In flower seeds some varieties of asters and all kinds of nasturtiums are short. On nasturtiums the delivery from abroad is reported to be not over twenty per cent of the quantity ordered. In market garden seeds, beets, wax beans, dwarf wrinkled peas and turnips are scarce, with prices higher. Sweet peas are exceedingly abundant and are offered under name at such low figures that there is little excuse for anybody to handle mixtures.

THE CALL for the winter meeting of the executive committee of the American Seed Trade Association has been issued for Tuesday, February 6th, at the Cosmopolitan Hotel, New York.

NEW YORK.—Theodore Pabst & Co., agents for Vilmorin, Andrieux & Co., have assigned. The agency has been transferred to August Rhotert, 26 Barclay street.

**WHY** do so many  
Canna Growers  
say they have a  
**YELLOW Canna**  
"As good as  
Florence Vaughan?"

This Canna has been introduced to the trade in America and Europe solely by us, not by M. Crozy, the originator, as stated by some of our competitors. The true stock has been disseminated wholly and solely by us. Stock offered as introduced by others is suspicious.

**VAUGHAN'S SEED STORE,**  
New York. CHICAGO.

**NEW CROP ONION SEED**

Either RED WETHERSFIELD or  
YELLOW DANVERS.

**\$2.25 PER POUND for**  
American Grown Prizetaker,

lots of FIVE POUNDS of one kind or assorted as desired. With every \$5.00 order goes FREE a copy of Greiner's Newest and Best Book, "ONIONS FOR PROFIT," telling all the Secrets of Success in Old and New Onion Culture.

**If You Garden for Profit**

you can save money and should buy at Wholesale Prices, as quoted in BURPEE'S BLUE LIST for 1894. It is mailed FREE to Market Gardeners every where, who, while entitled to the lowest prices possible, should always be sure to get Only the Best Seeds That Grow! BURPEE'S SEEDS ARE WARRANTED, — few equal, none better — and are annually sold direct to many more planters than are the seeds of any other growers.

**W. Atlee Burpee & Co., Seed Growers, Philadelphia, Pa.**

If you have not already seen BURPEE'S FARM ANNUAL for 1894, write for it TO-DAY. A handsome book of 172 pages, it is pronounced by papers everywhere The Leading American Seed Catalogue. It tells all about the Choicest Vegetables and Most Beautiful Flowers for THE HOME GARDEN.

**HEADQUARTERS FOR COLEUS**

Golden Queen, Golden Bedder, and Crimson Verschaffelt specialties; also a large number of other varieties. Rooted cuttings \$1.00 per 100. Liberal discount for large orders.

Geraniums, 2½-in. pots, \$20 per 1000; \$2.25 per 100; from flats, \$15 per 1000; \$1.75 per 100. Ageratum, blue and white, rooted cuttings, 75c. per 100. Fuchsias, leading sorts, 2½-in. pots, \$2 per 100; rooted cuttings, \$1.25 per 100. Petunias, Dreer's strain, 2½-in. pots, mixed, \$2.50 per 100; rooted cuttings \$1.50 per 100; Double White same price. Heliotrope, 4 varieties, rooted cuttings, \$1.25 per 100. Salvia Splendens, \$1.25 per 100 rooted cuttings. At these prices the selection of sorts to remain with us. Cash must always accompany the order. J. E. FELTHOUSEN, 370 Van Vranken Avenue. SCHENECTADY, N. Y.

FOR

## MARKET GARDENERS AND FLORISTS

Almost our entire extensive business is supplying the choicest varieties of Garden and Flower Seeds direct to **Market Gardeners** and **Florists**. We furnish not only sorts that are pure and true of their kind, but we make a **close** study of the varieties that are especially adapted to the wants of the **Gardener, who grows for Market and Shipping**.

While there are other good, reliable seed houses, there is **no house in the trade** that has given the wants of this class of planters the careful attention we have, or can serve him as well.

Fully appreciating the great care necessary with this class of orders, they are carefully separated and given to our most reliable and trusted employees to execute.

Our handsome Catalogue and Wholesale Market Gardeners Price List will be sent free and their Photographic Illustrations truthfully portray the Superior Vegetables our Seeds produce.

## JOHNSON & STOKES,

Trade Catalogue for 1894 free on application.

Better than  
Ever for  
1894.

Established 1856.

Is Different from Others.

It is intended to aid the planter in selecting the Seeds best adapted for his needs and conditions and in getting from them the best possible results. It is not, therefore, highly colored in either sense; and we have taken great care that nothing worthless be put in, or nothing worthy be left out. We invite a trial of our Seeds. We know them because we grow them. Every planter of Vegetables or Flowers ought to know about our three warrants; our cash discounts; and our gift of agricultural papers to purchasers of our Seeds. All of these are explained in the Catalogue, a copy of which can be yours for the asking.

J. J. H. GREGORY & SON.

**SEEDS**

When you write to any of the advertisers in this paper please say that you saw the advertisement in the American Florist.

## Catalogues Received.

Nanz & Neuner, Louisville, Ky., seeds, plants and bulbs; John Gardiner & Co., Philadelphia, seeds; Steele, Briggs, Marcon Seed Co., Toronto, Canada, seeds and plants; John McGowan, Orange, N. J., carnations; Allen L. Wood, Rochester, N. Y., small fruits; Weeber & Don, New York, seeds; H. F. Michell, Philadelphia, seeds and bulbs; Lohrman, Brotherton & Co., Detroit, Mich., seeds; J. Chas. McCullough, Cincinnati, O., seeds; Fred Dorner & Son, Lafayette, Ind., trade list carnations; D. Landreth & Sons, Philadelphia, seeds; A. Keilholz, Quedlinburg, Germany, seeds.

TRENTON, N. J.—There was a very good attendance at the recent meeting of the State Hort. Society in this city: The papers were listened to with much interest. A special feature of the program was the presentation of a box of bulbs and seeds to each lady present. The officers elected were as follows: President, E. Williams; vice-president, E. P. Beebe; secretary, H. I. Budd; treasurer, Chas. L. Jones; executive committee—Dr. J. B. Ward, J. M. White, I. W. Nicholson, D. A. Vanderveer, E. P. Beebe; fruit committee, A. W. Pearson, W. R. Ward, John Repp, S. C. DeCou, Geo. W. Jessup; flower committee, E. P. Beebe, Mrs. L. R. Trimble, Chas. L. Jones; vegetable committee, Franklin Dye, D. V. Garhart, G. L. Voorhees; legislative committee, Dr. J. B. Ward, I. B. Nicholson, Theo. F. Baker; delegates to state board of agriculture, E. Williams, Charles Parry.

PEORIA, ILL.—Christmas trade was about same as last year. Prices were about same too, except on roses, which were about 20% lower. Had plenty of everything except good colored carnations. Quality was about as usual at the season, except roses, which were a little off color. More call for colored flowers. Narcissus sold well, but hyacinths went slowly. Increased call for plants, both decorative and flowering. Holly sold well. New Year's trade was a little better than last year, but of course not nearly as good as Christmas. The business has been demoralized here by two of our florists, who have been trying to see which could sell the cheapest. Last November one put out a sign offering roses at 6 cents a dozen and the other one at once hung out a card offering roses at 5 cents a dozen. Of course this foolish competition has hurt us all.

PLEASE mention the AMERICAN FLORIST every time you write to an advertiser in these columns.

My list is not a big list but it is a mighty good list, and the cuttings are equally good. I would like to quote figures to you on any of the following varieties. In writing please state how many you will want of each variety. Daybreak, Lizzie McGowan, Silver Spray, Grace Darling, Aurora, Portia, Edna Craig, Fred Dorner, J. R. Freeman, Golden Triumph.

### Annie Pixley and Helen Keller.

PIXLEY is one of those beautiful light pinks, with a fair sized flower and good, strong calyx. With ordinary culture stems can be cut twenty inches long. The flower is a model in form, and the growth is strong and healthy.

KELLER you know all about, they are both sure to make good paying varieties for cut flowers.

Pixley per 100, \$12.00; per 1000, \$100.00.

Keller per 100, \$12.00; per 1000, \$90.00.

L. B. 496.

ALBERT M. HERR, LANCASTER, PA.

### Verbena Lancaster Beauty.

Decidedly the prettiest Verbena that grows, novel as well as beautiful and sells at sight.

Price, per 100, \$2.00.

PANSIES.—I can still supply a few of those seedling plants at \$5.00 per 1000, or 75 cts. per 100. The same good strain I always have.

No list published and terms are cash before shipping or C. O. D.

## IN BLOOM The new and beautiful "HELEN KELLER" Fancy Carnation

We extend a cordial invitation to Carnation growers to come and see it growing and blooming. This grand new variety must be seen to be appreciated. It is undoubtedly the

### ••GREATEST NEW CARNATION UP TO DATE!••

It is healthy and productive. In form, size and elegance, nothing can approach it. Two houses filled with this sterling novelty are worth going many miles to see—one at Summit; one at Chestnut Hill.

### COME AND SEE IT GROWING.

Orders booked now and filled strictly in rotation, commencing March 15, '94. Strong Rooted Cuttings, \$3.00 per Dozen; \$12.00 per Hundred; \$90.00 per Thousand.

EDWIN LONSDALE,  
CHESTNUT HILL, PHILA.

JOHN N. MAY,  
SUMMIT, N. J.

## COLEUS.

A large stock, in 75 varieties, including the very newest kinds.

ROOTED CUTTINGS, in 30 to 40 varieties, at \$6.50 per 1000 by express; in 20 varieties, at \$1.00 per 100 by mail.

Golden Bedder (true), at \$10.00 per 1000; Verschaffeltii, Golden Verschaffeltii, Mrs. I. D. Haight and other yellows at \$5.00 a 1000. NEW KINOS, including some of the most handsome ever offered for sale, in 10 varieties, at \$2.00 per 100 by mail.

STOCK PLANTS, ordinary kinds at \$3.00 per 100; Verschaffeltii and yellows, at \$4.00 per 100. Cash with Order. Sale delivery guaranteed.

## CARNATIONS.

ROOTED CUTTINGS of new and leading kinds.

We make a Specialty of BUTTERCUP and STANLEY, of which we have a large stock. \$5.00 per 100; \$45.00 per 1000. Plants all in prime condition, and an inspection solicited.

Send for circular of both Coleus and Carnations.

W. R. Shelmire,

AVONDALE, PA.

## Daybreak Carnation

A visit from several prominent florists of the State, has convinced me that I have the healthiest stock of the above beautiful carnation in this State. Before leaving my establishment they left orders for Daybreak at \$2.50 per 100, and \$20.00 per 1000.

I shall have, about Feb. 5th, 50,000 well Rooted Cuttings at the following prices:

\$2.50 per 100; \$20.00 per 1000.

Terms strictly cash. My customers will please take notice that I cannot accept personal checks. Satisfaction guaranteed.

"COME AND SEE THE BOYS"

## THE YELLOW BOUTON D'OR.

After growing this variety for the past three winters we are convinced that it is the best Yellow Carnation ever introduced.

**LISTEN TO THE CRITICS!** After viewing a house, W. Albert Manda says: "Bouton d'Or is certainly a good grower and free bloomer; a variety one can recommend with pleasure. I like it better than Buttercup."

SAMUEL HENSHAW: "Bouton d'Or is just the one we have been looking for, and is the nearest approach to the ideal carnation in its color yet introduced. The color is a clear canary penciled with carmine, firm texture, a full large flower—one just measured is three inches in diameter—exceedingly prolific as a bud maker; stems stout with clean, healthy foliage. I congratulate you in disseminating so grand a flower."

PRICE, \$2 per Doz.; \$10 per 100; \$75 per 1000. ROOTED CUTTINGS READY MARCH 1, 1894. Orders filled in strict rotation. Come and see it grow and be convinced. Only one hour from New York City.

Dailedouze Bros., Flatbush, L. I., N. Y.

JOHN F. RUPP, Shiremanstown, Pa.

## Fresh Information About the Violet.

What a source of fun the daily papers are when they attempt to cover subjects pertaining to the trade! Is the rest of their news (?) equally reliable? The following from the San Francisco *Chronicle* is certainly very rich:

Few people would want to pay \$2,000 for thirty-two violet plants, yet that is what a local florist sold that many roots for, and he does not think he was overpaid, either. As may be supposed, the violets are curiosities.

They are the outcome of years of patient hybridizing. Only violets of one gender grow on a plant. This renders them capable of being experimented with successfully. The big, bold, double violet is the male flower. The demure single blossom is the female. From the double flower the pollen is carefully cut and placed in the cup of the single blossom. Only one blossom in a hundred of those artificially treated will produce seed. This seed is then planted, and the resultant violet is again hybridized with some other remarkable specimen.

Sometimes odd colors are obtained; sometimes odd form. A year ago a local nurseryman produced a violet giant. It was four times larger than the ordinary flower and grew on a stem from twelve to fifteen inches long. The plant on which these remarkable blossoms grew sprang up from one of the seeds resulting from a long series of hybridizing. It was subdivided, and now there are thirty-two plants.

These were purchased a few days ago by a city florist for \$2,000. An iron-bound contract prevents the propagator from giving away, selling or keeping a single rootlet. A nursery will be started in a neighboring county, to be devoted to multiplying the peculiar plant. None of the plants or blossoms will be sold for two years, by which time the thirty-two roots will have grown to four or five millions. The violet has been named the "Tiburcio Parrot," after the well known capitalist.

R. W. CARMAN, Flushing, L. I.

Dear Sir:—Please send us by Star Union Line Freight (Pennsylvania Line), another 5 gallon can of Little's Antipest. We are not yet out, nor do we want to get out of it, for we think it indispensable and have sent you several customers by recommending it. Please hurry it through.

Very truly yours,  
THE GOOD & REESE CO.

BROOKLYN, N. Y., Jan. 15, 1894.

R. W. CARMAN,

Dear Sir:—Please send me 2 gallons of Little's Antipest. Have used your Antipest with great results last season. I was troubled considerably with the large black ants in Greenwood Cemetery, but by using your Antipest drove them all off. Have also used it on all kinds of soft and hard wooded plants, with the best results. I would also suggest to you to send circulars of your Antipest to the different Supt. of cemeteries, also to florists who attend to plots in the cemeteries, as it will save them trouble and annoyances from the black ants who destroy plants and mounds.

Yours truly, CHAS. KROMBACH.

MERS, Toronto, Ont.

PLEASE mention the AMERICAN FLORIST  
every time you write to an advertiser.

## A "Wonderful Discovery."

Copies of a circular issued by a Texas gentleman by the name of Murphy have been sent us by several readers. Following is the text of this remarkable document:

## MURPHY'S WONDERFUL DISCOVERY!

## THE "RESURRECTION PLANT" TEA.

Purifies the blood, prolongs life and cures stiffness in aged people.

*The plant after being boiled several hours will serve as a flower or evergreen in the parlor.*

Myself as well as others have thoroughly tested it and find it to act as above stated.

The tea acts as a very light purgative, and patients should govern themselves according to the effect upon the bowels.

**DIRECTIONS FOR USING:**—Boil six medium sized plants in one-half gallon of water, reduce to one quart of tea. Take a tea cup full three times a day.

This plant will retain life by freezing as well as boiling and becomes green, and also is very palatable to use as a tea. Price two dollars per 100 plants aboard cars, and cheaper in larger quantities to dealers.

The fact that the plant "will retain life by freezing as well as boiling" gives the grower a good second chance of success. If he happens to have no facilities for freezing at the time he can always manage to arrange for boiling.

## A Lovely Picture.

I tell yez, Jimmy looked too lovely for any think in his coffin. He had a harp o' lilies lyin' flat acrost his stummick, an' his hair wuz did up in ringlets wot come down to his neck. He died wid a smile on his mou' and his ears wuz washed wid bay rum an' filled wid wiolets.—*Life*.

## LOCKLAND LUMBER CO.

## Announcement to Florists.

We desire to announce the dissolution of the firm of Sipple Dopffel & Co., and to introduce to the trade its successor, The Syracuse Pottery Co., which will be under the management of William Dopffel and Conrad Breitschwerth. The business will be conducted as heretofore, except on a larger scale to meet the growing demand for our goods. We have accordingly enlarged our plant and capacity, and with unsurpassed facilities are now prepared to fill the largest order on short notice. Our latest improved machines are turning out the best and most serviceable flower pots in the market, and assuring you of our intention to lead in further improvements we solicit a continuance of your patronage in the belief that we can supply just what is needed at a price and in a manner satisfactory to all.

Send for price list and samples and we know you will give us an order.

WESTFIELD, MASS.—Mr. S. Batson has sold out to Henry Gibson and has removed to Kalamazoo, Mich.

RICHMOND HILL, N. Y.—Last summer Mr. Axel Lindstrom added five new houses to his plant which now has an aggregate of 20,000 square feet of glass.

MINNEAPOLIS, MINN.—On January 27, one of our big dry goods stores advertised a flower sale in which were offered: "Cyclormen, in pots, each 10 cents; Dutch Hyacinths, in pots, all colors, pink, blue, purple and white two for 25 cents; Cinerari, in bloom, each 15 cents; choice Easter lilies, in bloom; 100 extra fine Azaleas, in all colors, large size, covered with flowers! Some plants worth \$5.00 choice for each \$1.50; cut flowers of all kinds at popular prices."

### The Flower Show as an Educator.

BY JOHN N. MAY.

[Read before the New Jersey Social Florists' Club Feb. 1.]

As an educator for the young men in our business, or, I should rather use the term as a promoter of opportunities of education, there are very few things equal to a nice flower show. In the first place the very cream of all the productions of the different greenhouses, gardens, etc., are always placed on exhibition. For the young man this is an excellent school and I would advise everyone to visit such shows where they can possibly do so if only for the sake of information alone.

Oftentimes I have myself wondered why certain premiums were awarded in a certain way and in my judgment, basing only upon possibly first sight, have considered the judges possibly to have made an error. After weighing the matter over very carefully in all its various bearings I could begin to see it in a different light; oftentimes I was greatly assisted in this matter by standing quietly by, watching and hearing the various comments of the different people as they criticised them. Herein lies one of the secrets of the whole thing. The judges, it must be borne in mind, are selected from those who are considered well versed in the characteristics of different plants, flowers, etc., which they are called upon to criticise, and it must also be borne in mind that these same judges weigh every item in favor or against the variety or varieties that they are commenting upon. Furthermore, as a rule, they are extremely cautious before they award a premium because they know that the eyes of the general public are always upon their work and they are subject to a good deal of criticism if they make any mistakes. This, of itself, is of great value in checking any undue discrimination in such matters. Another point may be worth mentioning on this subject and that is if you do not quite understand why any particular premium, whether it be for plants, flowers, fruits or vegetables of any sort on exhibition, has been awarded to what to all appearance was not a superior exhibit, wait until your opportunity comes and then ask someone whom you think can give you better information upon the subject. While their opinion may not be absolutely infallible as to its reasons, in the course of their replies they will give you frequently the key to the whole subject.

In my boyhood days we were taught by the old school of gardeners that the way to obtain information was "to keep your eyes and ears open and your mouth shut." I am afraid that was carrying the point a little too far; while it is still applicable in very many cases, I think you will find the majority of practical men of the day are perfectly willing to

answer any question put in a respectful way, and by such means you can very often obtain information that you could not otherwise get. Of course you have to go about this in rather a cautious way. It would not pay to ask a man point blank why such and such a subject was awarded such a premium, but ask simply because you desire information. This is done every day by hundreds of people that are simply observers and not exhibitors at our different flower shows.

In putting up exhibits for competition, such as arranging collections of plants and flowers, the general effect goes a long way towards deciding the premium. This is a source of great study and can be utilized for future benefit by every one of us. There may be times in our future lives when such subjects may come before us and we may be called upon to do something similar. Profiting by what we have seen in the past we can oftentimes improve upon it. The blending of colors so that they harmonize one with the other and so that they will show the best possible contrast, bringing out the varied charms of each, is one of the great objects to be studied in this matter. Whether it is a group of ornamental plants or a group of flowering plants the same law applies, and where arrangement is a greater conundrum for the young beginner than in the ordinary exhibits of individual specimens. In the latter oftentimes the subject will be very clear and very distinctly delineated by the different exhibits. On the contrary in exhibits of choice groups of decorative plants or massive groups of flowering plants it is an exceedingly difficult matter even for the judges to decide which has the preference or precedence in points of beauty, excellence and general effect. Frequently it will be found that plants, though better grown and in healthier condition and really finer specimens individually than in another group which is placed in competition with it, lack artistic effect in arrangement, and this debars the superior plants from the first honors, while the lesser plants are awarded the coveted premium; this is one of the lessons we all have to learn if we are ever going to do anything in exhibiting. Tasteful arrangements combined with study of colors and effects en masse will always take precedence over groups of finer grown specimens injudiciously arranged. One of the best educators, as a rule, that can be obtained in this way is by watching the effect on the general public. As a rule if there is any particular exhibit that calls or attracts the greater attention of spectators over any other (whether a large or small exhibit) it may be taken as a general rule almost universally that there is some particular merit in that exhibit over and above the others. Taking the public at large you will find that 75 per cent of them are absolute judges of

the beautiful, whether it is individual flowers, plants or groups of decorative or flowering plants. Frequently simplicity combined with artistic arrangement will also win over a much more elaborate arrangement; this also comes from the fact that the general mind can grasp a quiet, simple arrangement before it can an intricate or complicated one.

There is one unfortunate feature, however, in the flower shows of the present day; that is the precedence of large showy varieties of flowers to the exclusion of the smaller and oftentimes more beautiful. This can be observed at all our chrysanthemum shows, where the beautiful little Pompon and graceful Anemone are hardly ever seen; the cause for this is that the general taste everywhere has been drifting towards size rather than intrinsic beauty. Possibly within the next few years this will be all changed again, and as the general public gets more interested and better educated up to the taste of choicer, finer and more artistic flowers, so will the general tendency of the shows drift that way.

I have nearly all my life been connected more or less with flower shows and exhibiting, and these are the general impressions I have drawn from my own experience in the matter and I would say right here to all who calculate or contemplate following this profession for their livelihood that the time possibly may come when you will all enter the arena as exhibitors in some shape or form and some of these points it may be well for you to study out. Do not hesitate when in a show if you do not understand anything to ask someone whom you think can give you the desired information; or by listening quietly to the different conversations of the different people you can obtain such information without asking anyone. Where this is not practicable do not be afraid to ask for it. The same law applies in our business in everyday life. Many young men do their work mechanically and do it to the best of their ability, but they do it oftentimes, particularly where they are starting at something they have not done before, without knowing the why and the wherefore. In this case, just as in the show business, it would greatly help them to obtain the information desired and be considerable benefit to themselves in the future if they would ask the reason for its being done so. No employer who has any consideration for his own best interests as well as that of his employees will ever hesitate to give a reason why it should be done any particular way.

As you pass through life and work under different employers you will find a different method of doing things in nearly every place you go into. Oftentimes the results will be quite as satisfactory under the different treatments; this I know to many young men is quite a stumbling block, but adapt yourselves to circumstances as they present themselves to you in everyday life and in the end you will be able to know which is the better method to follow. Herein lies one of the advantages of changing to different establishments because of the experience it will give you, all of which you can use to your own benefit in after life. Do not trust to memory in any of these things; keep a little book for memoranda; always make a note of days and date of any important work that you are doing, and even the unimportant, so to speak, should be noted. This will often prove of great value to you by referring back to it. Take, for example, if you want a plant to bloom on a certain date it may be of

great value to you to have a memorandum of the date that plant was put in the greenhouse, noting its particular treatment, temperatures, etc., during the time it was growing to the time of its perfection in bloom. All the hardy plants and shrubs that are treated this way should be particularly noted, as the seasons will greatly vary the time for which such things can be brought to perfection under forcing treatment. The same law applies to fruits and vegetables, in fact everything which we are called upon to grow. As an illustration, take the pansy, which by many is considered a common flower. If you want plants in bloom in perfection, say for Easter one year, which may fall at the end of March or first of April, you will have to vary the time of sowing the seed considerably to what you would if Easter falls on the fifteenth of April the coming season. The two weeks' difference in the spring will make from four to six weeks' difference in planting the seed in the fall of the year. By keeping note of these things as they present themselves you will find them of great value to you. I simply mention pansies as being the simplest things to be obtained. All the other difficult and intricate plants to grow and force bear the same relation to starting as the pansy above mentioned.

In conclusion will just remark that one of the finest ideas and most practical I have ever known was during my apprenticeship days. My employer had been forty-five years in the gardening business the day I left him. His parting words to me were: "I hope you will succeed and do well in life, and remember that you can always learn something from everyone you meet. I have been forty-five years at this business, and I am simply an apprentice to-day. Good-bye."

#### Bermuda Lilies.

Our attention has been called to the fact that as in previous seasons Bermuda growers are again sending out their prospectuses, offering boxes of five dozen blooms delivered in New York City for \$2.70, and our correspondents urge that something should be done to induce the dealers here who import bulbs largely from Bermuda to ascertain from the growers there whether they are in the habit of sending cut blooms to the United States and at the same time advise them that if they persist in doing so the dealers as a body will refuse to buy bulbs from them.

The following communication from Mr. F. R. Pierson will be interesting in this connection as coming from one of the largest and most experienced handlers of Bermuda lilies. Mr. Pierson says:

"I do not believe that this kind of flowers shipped from Bermuda hurts the sale of greenhouse grown blooms at all, as these flowers do not reach this country in good condition. Flowers are very, very indifferent, the stems are short and the foliage badly yellowed. If a florist sent such stuff into the city he would get no returns from it whatever; it would simply be unsalable. There was a time when lilies were not so cheap when there might have been a temptation to use such stock because the difference in price tempted people to invest in them, but the ruling price on Harrisii the past winter has been 5 cents to 10 cents. 10 cents has been about the top price for best Harrisii since the holidays and quantities have sold as low as 5 cents, consequently I cannot see how any florist would touch this Bermuda stock at anything like these

figures. For these reasons I do not believe that it affects the sale of Easter lilies or hurts the florist to any appreciable extent.

"You will understand better the conditions under which these flowers arrive when I state that the flowers are cut a week before they reach New York, as all freight of this character is obliged to be on board steamer before six o'clock Wednesday, necessitating—if any quantity is shipped—packing on Tuesday, and Wednesday at latest. Flowers have to be passed through custom house and are not available until late Monday afternoon or early Tuesday morning, hence are practically a week on the way. You know what that would be when flowers are in first-class condition when packed, but the outdoor grown flower in Bermuda is not so perfect as those grown under glass in this country, and why anybody should be tempted to buy such stuff, which arrives in such condition, when our own greenhouse stock can be bought at such low prices, I do not see. I think it must go into the hands of amateurs and the people who would buy such stock would not be very valuable customers to the florists.

"When we first went into Harrisii growing in Bermuda, years and years ago and when we obtained 25 cents, 35 cents or 50 cents each for the blooms, as we did the first years we grew the flowers, the question of Bermuda competition was a serious one and was carefully considered by us, but by repeated experiments we satisfied ourselves that these flowers could never be shipped into the New York market, which of course is the nearest one, and ever seriously affect the price of our greenhouse grown product. Then there was a temptation to use such stock because the greenhouse product was abnormally high and Bermuda flowers could be purchased at same price they can be today, but it never cut any figure then, and I consider it at present time a bugbear which has more reality in imagination than in fact.

"If there should be any difference of opinion as to condition in which the flowers could be brought in here, there is an insurmountable barrier which makes their practical importation for Easter an impossibility, as the steamer arrives on Sunday, so that flowers intended for Easter have to be brought in on Sunday preceding Easter, which obliges anyone shipping to cut the flowers nearly two weeks, certainly not less than that, before they can be used. Quality of the flowers is thus ruined, as will be apparent to anyone. I state these facts fully so you will appreciate the situation, if you are not already informed in reference to the matter, and think the facts already stated will convince you that the importation of Easter lilies, particularly as a factor influencing Easter prices, is more imaginary than real. At any other time, through over-production or lack of demand, prices are already so low that I cannot conceive how the Bermuda grown flower shipped here could find buyers even at any price, as good greenhouse grown stock is wholesaled at same figures as we are asked for the Bermuda stock. I believe the one outlet for them is among people of limited means, who are not critical buyers, and who only buy them by reason of their cheapness, as I believe the men who export the flowers make no distinction between a wholesale or retail buyer."

OUR trade directory and reference book for 1894 will be issued next month. Send your order now for a copy. Price \$2.

BROKEN COLUMN WITH CLUSTER ON SHAFT

*Ericas at Whitestone.*

One of the neatest places in the vicinity of New York is Louis Dupuy's at Whitestone. A visit to Mr. Dupuy is a pleasure, for he is a thorough gardener and most courteous as well. Here is where the beautiful *ericas* that one sees in the New York florists' windows come from. Not everybody can grow *ericas* successfully and not every place will suit these fastidious plants, so Mr. Dupuy is fortunately in a line which is not likely to be overcrowded or overdone for many a year.

He regards *E. nigricans* as the best of all to grow in this country. It comes in

just right for Christmas and is one of the most beautiful of flowers as well as the shapeliest of plants. This species has to be grown until its second year, when it blooms in best form. *E. Wilmoreana* does well here also and can be had in beautiful condition for Easter. The plants of this species Mr. Dupuy finds it best to import, but this is quite a risk and considerable loss often occurs.

The great midwinter variety *E. persoluta alba* is now coming into bloom. The flowering season can be extended considerably by keeping the plants in the cold frame and bringing into heat in succession. Cuttings of this variety are taken from December to March. These

are left in the pan until they have a good ball, when they are potted, and in June are plunged outside, where they stay till late fall, when they are removed to cold frames, and are then tidy plants ten to twelve inches high and full of buds. *E. persoluta rosea* is quite pretty with flowers pink instead of white and more fastigate in growth than *alba*. Heaths bloom earlier here than they do in Europe, as they ripen up much quicker in this climate, so it happens that *E. hyemalis*, which is so popular in Paris in November and December, blooms too soon here to be of value in the market. *E. gracilis* is another early one with fine pink flowers and beautiful soft green foliage, and in one year old plants is admirably adapted for *jardinieres*.

Speaking of the cultivation of *ericas* in general, Mr. Dupuy says that the item of water is a very important one, as when the water has any amount of lime in it it affects the *ericas* greatly. On only one side of Paris, the east side, can *ericas* be grown well. There is no insect that bothers these plants. The only trouble is mildew, which is liable to appear when they are kept too close in the house, for *ericas* require always a plentiful circulation of air.

Besides the heaths Mr. Dupuy has at present early *genistas* and *hydrangeas* that will make well bloomed plants for Easter, also fine J. J. Harrison, Thomas Cartledge, Lizzie McGowan and *Portia* carnations. The *Portias* have been in the benches since July, and this appears to have been just the thing for them, for they are blooming splendidly.

*Broken Column With Cluster on Shaft.*

The base is square and composed of Ivory chrysanthemums, Bride roses, carnations and *adiantum*, plants of which were taken out of pots and plunged in the moss. The shaft is made of white carnations, the broken portion being represented with violets. The large cluster on front of shaft is of Bride roses and lilies of the valley. M.

*Otaheite Oranges.*

ED. AM. FLORIST:—Are the little ornamental Otaheite oranges raised from seed or cuttings? Please give directions for producing plants that will bloom and bear fruit. F.

Otaheite oranges are propagated either by means of cuttings or by grafting, the latter being the best method to secure a stock of this plant.

Seedling oranges or lemons form the most desirable stock on which to graft, and if sown now should become of suitable size for grafting next fall or winter. Either cleft or side grafting will answer, though the latter makes the neatest job, the scion being formed of a piece of firm, young wood, and should be bound securely in place and the union covered with grafting wax. The grafted plants should be kept moderately close until the parts are united, after which they should be given more air and light, and can be grown on in about a rose house temperature.

The soil best adapted for orange culture is a good loam enriched with some well rotted manure and a small quantity of bone dust, and it is not necessary to report them frequently.

During the summer it is a good plan to grow them in a partly shaded frame outdoors, there being less trouble from insects by the use of this method, but the

plants should be brought in as soon as the nights get cold in the fall if rapid growth is desired.

The young plants will take at least two years to become salable, and stock plants for propagating from can be had from some of the large florists around New York. T.

#### Chester County Carnation Society.

The regular February meeting was held in Kennett Square, Pa., Saturday, February 3.

Edward Swayne, of the committee on floral exchange, reported prices for rental in the farmer's market, Philadelphia, where it seemed space could be secured at a reasonable price.

Mr. Styer, for the committee on exhibition of flowers, reported his efforts to secure space at various points in Philadelphia, the most favorable place offered being a large mercantile establishment. The Pennsylvania Horticultural Society having decided to abandon its spring exhibition it would be impossible to show carnations at that time. The feeling of the members as expressed, was entirely favorable to holding the exhibition. The committee were authorized to make all necessary arrangements, the date to be in March, not later than 15th and to continue two days.

The subject of propagation was discussed. Mr. Walton had at first used 5 or 6 inches of road sand, and later 1½ inches coal ashes and 2 to 2½ inches of road sand; under the latter circumstances he had much better success. Mr. Ladley was having poor success with one lot of Daybreak cuttings which he thought was due to a weakened condition of the stock plants. Jos. Phillips noted a great difference in rooting vitality of cuttings from two lots of Portia, those from stock grown cold being far in advance of the others from a warmer house, the difference being 25 to 30 per cent. in favor of cuttings from the colder grown stock. He favored the early removal of the cuttings from the sand. Wm. Swayne thought the loss in vitality could have been overcome by propagating at a higher temperature than had been given those grown colder. He was having better success than formerly by using more bottom heat, 6° to 10° in excess of the temperature at which the plants were grown and with little shading. Mr. Shelmire found 60° overhead and 65° in the sand was best. Mr. E. Swayne used a muslin shading being back of a north bench so as to shade and yet admit of walking between the curtain and bench. Mr. Phillips used a frame of lath on the glass outside for a shade with entire satisfaction.

Referring to disposition of rooted cuttings from sand, Secretary Shelmire had found a marked difference in the field growth in favor of plants grown in pots over those from flats. Wm. Davis gave a brief report of a trip through Western Pennsylvania and Ohio among the carnation growers, many of whom he found growing fine stock. A device for plant support was shown from B. Schroeter, of Detroit, Mich., which had been tried by

some of the members and seemed to be a practical device.

Edward Swayne showed flowers of Ophelia, in fine condition. C. J. Pennock showed a white of good size and well fringed. Secretary Shelmire showed the finest white ever before the society, on good stem and fragrant. Wm. Swayne had a pink and Wm. Skelton a good crimson and also a white.

Discussion on the use of tobacco for destruction of green fly developed the fact that there was considerable complaint among buyers on account of the smell of tobacco adhering to the flowers. The use of stems on the walks was recommended to obviate this. Vaporized tobacco water was also thought to obviate the trouble. C. J.

#### How I "Tie up" My Carnations.

All carnations have a desire to grow up straight without brush, stakes, strings or other intervention. It is only when their flowers expand that the tops become heavy, and the whole stem bends down to the ground. The stems are generally strong enough, but there is a weak spot where the stem joins the main plant. If the flower stems receive a little support in about the middle, even the weakest will stand up.

In the fall after I bench my carnations I let them start into growth without doing anything in the way of supporting them. After they have attained about one-third of their height, I give the bed a thorough raking over to destroy all weeds. I then stretch two stout wires lengthwise over the bed and on these I lay a sheet of wire netting. As the carnations continue to grow they go through the meshes and nothing farther needs to be done for that season. I think a three inch mesh is most handy.

CHAS. EVERDING.

#### Carnation Notes.

There are possibilities in carnation culture that we may sometimes overlook. On a visit last week to Mr. Shelmire I saw a house of seedlings; almost every one was making good salable blooms and many of them were really fine. He tells me he is making about as much money or more from these plants, selling only the blooms, as he is from any of the older standard sorts. They are all seedlings of Caesar, which has the happy faculty of producing seed that turns out all double blooms. This is rather a new phase of carnation culture and one that we can study to advantage.

A little farther down the road is William Swayne's place. He also has a new wrinkle under way. Someone has told him, or he has seen it (I forget which), of growing Buttercup entirely from seed, and that the seed produced all good Buttercups that grew and produced much better than plants grown from cuttings. Mr. Swayne is experimenting with Edna Craig on this line and hopes to get the same results.

Mr. E. G. Hill said at our carnation meeting in Pittsburg last winter that Edna Craig was rust proof and that the best way to fight that disease was to produce a race of carnations that would not be affected by the rust. Here is another way out, not only from rust, but almost all of the diseases carnations are heir to. If we can produce a race of carnations that will duplicate themselves by seed we will be right in the swim, for any good seedling will have much more vigor and

be more prolific than the plants we grow from cuttings. In experimenting on this line it will be well to recognize the fact that self fecundation is abhorrent to nature and that much better seed can be produced, and the seeds will produce better plants if they are artificially fertilized, that is, by not merely taking the pollen from a flower and using it on the pistil of the same flower, but by alternating them, taking pollen from one flower and using it on the pistil of the next plant, and taking the pollen from that plant and using it on the pistil of the first. Of course it will be understood that the seed is to be produced from one variety alone and not crossed with any others, as it will even then take some time to get them to come true, if they do come true at all.

Now this may all be theory, and poor theory at that, but in the face of the fact that it is possible with one variety and that it will not take much time to make the experiment it is certainly worth a trial, for the results are so desirable if attained. To get any pure seed it is well to begin at once, as it will not be long until the bees come in during the day and they will cross fertilize them.

ALBERT M. HERR.

#### Lily of the Valley.

Will some experienced grower please tell me how to force lily of the valley so as to get the leaves? I have no trouble in getting flowers. BEGINNER.

The only way to secure plenty of foliage on early crops of lily of the valley is by the use of cold storage pips of the previous years crop. But from this time onward an abundance of leaves can be had by forcing the pips somewhat slower. Begin the operation with strong heat, and continue this condition until the shoots are about two inches high, then give rather less heat and a little more light, and the leaves will grow about as fast as the flower spikes. The strong heat referred to above for the starting of the pips should be a bottom heat of about 80°.

W. H. T.

#### Lady Campbell Violet.

ED. AM. FLORIST:—Your Philadelphia correspondent "L." in No. 291, states the color of the new "Lady Campbell" violet to be "about the shade of the old Neapolitan." So far as I have seen he is right. I refer to Huebner's stock. I do not think he claims it to be "darker," or even as dark as the Marie Louise, at least those who speak for him do not. During the past season I have had an opportunity to compare it with the Neapolitan, and also the Parma, and find it differs more in habit from the former, being a stronger grower, than in color, while in constitutional vigor and color of flowers it is almost identical with the Parma. Commercially they are not distinct. Still there is a difference which, though trifling, may be given here. The habit of the Campbell is more compact, and in this respect it resembles the old Neapolitan. The compact appearance is due to a lesser deflexity of the leaf foot stalks. This deflexity is common in all sweet violets and marked in the Marie Louise; and it may have been noticed how, when the plants are doing well, the tips of the leaves will turn towards the ground. The leaf of the Parma is rougher and the hairs on the surface longer and denser, giving the plants a grayish green cast on a general view. Like the Neapol-

itan, neither is so liable to disease as the Marie Louise, but both spot a little. I have tried the various copper compounds, but think I would have done as well if I had never used them. My plants have grown out of it nicely.

I do not know the origin of Huebner's stock, but have no reason to believe it is not genuine. On comparison with mine imported from Cannell it appears to be not quite the same. There is a difference which may be detected at a glance, but very hard to describe. I wish to say to any of the interested parties that I should be glad to send a few cuttings of the Parma and Lady Campbell for comparison next winter. T. D. HATFIELD.

Wellesley, Mass.

#### Blight of *Dracæna Fragrans*.

From time to time bits of leaves of *Dracæna fragrans* are sent to the Experiment Station with a complaint that the plants are not doing well, and in commercial greenhouses they become unsalable. The trouble in question is another one of those caused by a fungus, or at least it is the active agent of destruction when the leaves reach me. The foliage of the plant is of a texture and thickness that render it a favorable feeding ground for fungi, for they as a rule love succulent plants, all other things remaining constant. It is often the tips of the leaves that are most subject to the bad effects of the blight, and this is true of many other than the *dracæna* plants. This may be due to the fact that the water holds to the pendent tips longer than to any other portions. When the plants are sprinkled the upper portions of the foliage retaining only a film of the liquid quickly dry off, while the water descending to the tips there remains for a long time. The presence of this moisture upon the surface of the leaf tips furnishes the proper conditions for the germination of spores that may have been brought there by the descending water as it flowed along, gathering to itself the spores previously deposited upon the surface of the leaf. It is thus seen that there are at least two good reasons why the tips of drooping leaves may be infested with fungi while the upright parts escape. As a matter of fact, however, such portions do not escape. Not infrequently in the case in hand *dracæna* leaves may be blighted midway of the tips and base. In such instances it is possible that sometimes there has been some injury by means of which the spores found an easy place to germinate, and their germ tubes to penetrate the leaf.

There is a third reason why the tips are more susceptible, namely, the greater surface exposed to the amount of tissue than in the other parts of the leaf. The entrance of disease germs is largely a surface action, and therefore the chances are greater as the tip of the leaf is approached. The tips being thinner and farther from the base of interior water supplies often suffer from wilting and become dried naturally. Anything of this nature assists the parasites to get a foothold. The wonder is that more tips are not attacked. When once a fungus has established itself it will begin to work its way in the leaf toward its base. This advance may be quite uniform and rapid, so much so that there is a distinct line between the living and the destroyed tissue.

The accompanying engraving shows a portion of a leaf of *Dracæna fragrans* and illustrates the point above stated. The dead tip was cut away before the photograph was taken. This tip had taken on

a straw color while the healthy portion in the lower half of the engraving was of a pale green. The line between the healthy and diseased is very marked, due to the rapid shrinkage and paling of the latter.

The fungus which was destroying the leaf inch by inch is a species of *anthrac-*

BLIGHT OF *DRACÆNA FRAGRANS*.

nose of the genus *Gloeosporium* and doubtless could be prevented from getting a foothold in the *dracæna* foliage by weekly sprayings of any standard fungicide. BYRON D. HALSTED.

Rutgers College

#### Seasonable Hints.

There are two beautiful plants that are coming in about right for Easter this year. They are *Acacia Drummondii* and *A. armata*. They are not grown or seen as much as they should be. To those who are not acquainted with them, would say they are of a different habit from the lovely *A. pubescens*, which does best trained up the end of a cool house or pillar. *Drummondii* and *armata*, with plenty of cutting back, can be made fine bushy plants. They both have clear yellow flowers. They cannot be grown as cheaply as a *cytisus* and should command a much better price. In the winter they thrive best in a night temperature of 45° to 50°, or in the same house you would keep your *Azalea indica*. After they have done flowering cut them back to within 2 or 3 inches of the last year's growth; they will break out and make growth for another year's flowers. I have found for several years that the best summer treatment is to plunge them out of doors on a dry bottom in any material that is most convenient, spent hops or tan bark preferred, and let them have the full rays of the sun. Keep them there as long as you can without running any risk of an early frost.

This early Easter is going to suit a good many lots of that cheap plant, the *cineraria*. I have mentioned previously how easily a *cineraria* is killed by overwatering. If allowed to wilt from dryness they will lose some of their bottom leaves, which much detracts from the appearance of a *cineraria*. But overwatering is worse, for they never recover from that. Keep them well fumigated, but not too strong at one time, and in addi-

tion a few tobacco stems among the pots helps greatly to keep down our constant enemy, greenfly.

As the season advances you will find your stock of plants increasing and wanting more room, particularly the many kinds that are not used until the months of May and June. It does no harm to a bench of roses or carnations to set a row of drooping plants along the edge of the bench. Such plants as vineas, German ivy, lobelias and many others can be set there, and after the middle of February, with careful watering, can do no possible harm. In recommending this way of getting relief from a crowded bench I am no advocate of the principle of mixing up plants in general, far from it. Nothing shows evidence of a mismanaged place quicker than to see a jumble of plants of different sorts and in different sized pots on the same bench. I am aware that the great majority of my readers do not need to be told this, yet there are too many places to be seen where this impracticable method is still followed. If your trade demands but one or two dozen of a certain plant, have that lot occupy one or two *straight* rows on the bench, and if you have two thousand of another kind, let them be in blocks; they are moved easily and properly watered and attended to in every way.

If you grow American Beauty rose and wish to grow your own stock for this summer's planting, now is an excellent time to propagate. Some people find it difficult to "strike" this rose with success. My experience is it is one of the easiest. Don't choose the very largest growth, but take the moderately short and firmer growths. In cutting off a growth for propagating judgment will have to be used. Perhaps several inches at the base of the shoot will have to be thrown away because it is too much matured and the same will have to be discarded on the other end because they are too soft. Make every cutting with two or more eyes and if you will insert them in clean sand which has a bottom heat of 75° with a top heat of 60° you will not lose 5 per cent. When they are rooted and potted into 2 or 2½-inch pots they need careful attention. They must not be put at once into a house 10° lower than they were rooted in, or you will find many of them turning black, stem and all. While many, perhaps all, of the tea roses are as well or better propagated from one eye cuttings it is very essential that Am. Beauty should have at least one eye under the ground when planted, for most of the growth you depend on for flowers will come from the eye that is beneath the ground. This point is ably explained in Mr. M. A. Hunt's book on "How to grow cut flowers." How often to water the cutting bench is often asked. If it allows the water to pass through freely and the bottom heat is brisk no harm will be done if watered every day. After ten days in the sand all rose cuttings should be able to stand all the sun light that we get for this month.

Buffalo, Feb. 5.

WM. SCOTT.

#### Foreign Notes.

*Graderia subintegra* is a beautiful new greenhouse perennial from South Africa, belonging to the *Scrophulariaceæ*. It is an herbaceous trailer three inches high, with showy pink gloxinia-like flowers, and seems likely to prove a valuable acquisition.

*Ricinus Zanzibarensis* is a new variety recently received from East Africa, and which is far more striking than the old

*R. communis*. The leaves of the type are light green, 2 to 2½ feet across, with whitish ribs; in general habit it looks like a most luxuriant *Aralia Sieboldii*. There are three showy forms of *zanzibariensis*, differing from the type, *maculatus*, *cinerascens*, and *niger*, all very showy and richly colored.

*Chrysanthemum Good Gracious* has received an award of merit from the Royal Horticultural Society in London.

*Galax aphylla* is being used abroad for wreaths, etc., and is meeting with high praise, the beauty of the leaves being frequently remarked. The English decorators seem inclined to make good use of these leaves. The plant is not by any means a stranger to English gardens.

#### Philadelphia.

The past week has shown considerable improvement in the volume of business, and this increase, together with the difficulty experienced in obtaining flowers, kept the dealers on a rush most of the time. Good flowers of all kinds were very scarce; particularly was this the case with large roses. The Brunners for the most part are cut out. Anderson has just finished his first house, which has held out for a long time, the first roses being cut about Christmas. Smith & Whiteley still have a few and Burton has a small house.

For the second assembly ball, which was held last Friday night, there was a great demand for large roses. It seemed as if nothing would do if these flowers could not be had; even orchids could not be substituted. Beauties and Belles that would not have been noticed at other times were eagerly grabbed up and used in lieu of something better. Double violets were also scarce and in great demand.

The weather, or something else, has interfered lately with cut flowers, as the growers are scarcely getting a third of what they ought to be cutting. One of them said recently "We are great growers, the sun and us, particularly the sun," and it is the lack of sunshine that is said to have caused all the trouble.

The condition of the market has had no material effect on prices and they remain about the same as last week. Daffodils are coming in from a number of growers and sell very well. There are a few tulips about, Mr. Harris supplying the most of them. He is forcing comparatively few this season, as for the last year or two he says there has been no money in them. A grower who has had considerable experience with tulips says "I wish they would put the tariff so high that the Dutch would have to keep their bulbs; there is no money in them for anybody, and if they were out of the market other flowers would sell better." *Freesia* is now very plentiful and sells at from \$1 to \$1.50 for the best ordinary. Mr. Lukens of Burlington, has some very fine which brings him \$3 per hundred.

Quite a number of the carnationists from Chester County were in town recently. Messrs. Barnard and Phillips, of West Grove, and Messrs. Love and Moore of Unionville, were seen last Thursday. The latter gentlemen had flowers of some of their new varieties along with them; they were very promising sorts, particularly a light yellow striped variety raised by Mr. Love, and a fine large crimson, the best of its color we have yet seen, a seedling of Mr. Moore's. The rapid advancement in the carnation is illustrated in the statement of Mr. Love who says that he has but two varieties left, *Buttercup* and *Portia*, of a collection of fifteen,

all supposed to be standard kinds three years ago; the balance were discarded to make room for the new and improved sorts of to-day.

Mr. Lonsdale's Helen Keller house is the Mecca for many of the visiting craft and his order list is increasing largely in consequence. At last accounts 15,000 plants had been sold and nearly every mail brings additional orders.

The Pennsylvania Horticultural Society has met with an irreparable loss in the death of its President, Mr. Geo. W. Childs, who died Saturday, February 3, of paralysis, after an illness of a few days. Mr. Childs' name lent a prestige to the society which secured for it many members, and his presence at the exhibitions in which he took great pride and interest were always conspicuous events. The best plants from his conservatories were certain to be seen at the shows and in every way in his power, probably most notably through the columns of the *Public Ledger* did he use his influence to help the society in its good work. The Florists' Club of this city and the members of the S. A. F. who attended the convention of 1886, held in Philadelphia, will remember with pleasure the elegant reception tendered the society by Mr. Childs at Wootton, his country seat near Bryn Mawr. The photographic group of the members with Mr. Childs' residence in the background, taken on that occasion, is one of the best pictures of the society, and a valued souvenir of the occasion.

At the meeting of the Florists' Club held last Tuesday evening the following resolutions were adopted and ordered to be spread on the minutes, a copy of the same to be engrossed and sent to Mrs. Childs.

WHEREAS: The Florists' Club of Philadelphia, having learned with deep regret of the death of Mr. George W. Childs, the late president of the Pennsylvania Horticultural Society and a warm and enthusiastic patron of horticulture and floriculture, therefore be it

Resolved: That the Florists' Club of Philadelphia hereby expresses its deep sense of the irreparable loss which it has thus sustained in common with all other horticultural and floricultural bodies in the United States and all over the world. Mr. Childs was an honor to horticulture and was ever ready to respond in the most generous manner to its advancement. The Florists' Club of Philadelphia had particular cause to regard Mr. Childs with feelings of the warmest esteem and admiration for many acts of kindness and sympathy and especially does it hold him in grateful remembrance for his cordial hospitality to the club and the national society during the annual convention of 1886. The club feels deeply that it has lost a warm friend and horticulture at large has lost one of its brightest and most distinguished ornaments.

The members of the Florists' Club of Philadelphia hereby record their heartfelt sorrow under this dispensation of Providence and their warm appreciation of Mr. Childs' noble character in every walk of life and hereby extend their heartfelt sympathy to his bereaved wife.

They are proud to have been his fellow citizens, proud to have been associated with him in the advancement of their art, and proud of all that he has done to make his name beloved at home and revered abroad. Therefore be it further

Resolved: That these resolutions be spread upon the minute book of the club and when suitably engrossed and signed be forwarded to the family of the deceased.

President Lonsdale has appointed some of the committees who are to make arrangements for the coming meeting of the S. A. F. and there have been several meetings. It is expected that after the February meeting everything will be in working order and the arrangements for the most part completed before the March meeting.

The meeting called by the Pennsylvania Horticultural Society, Monday, Feb. 5, to take action on the death of its president, Mr. Geo. W. Childs, was well attended. Dr. Reed, vice-president, occupied the chair and in opening the meeting spoke in eulogistic terms of Mr. Childs

and his work while president of the society.

Dr. Morris, Prof. Frazer, Dr. Gadsden, Hiram DeWalt, and Secretary Farson also made remarks, all showing their appreciation of his worth, and sorrow at losing such a good friend to the society. Prof. Persifer Frazer and Dr. Cheston Morris, presented the following minute which was adopted by a rising vote:

WHEREAS, in the loss of our president, George W. Childs, the Horticultural Society of Pennsylvania has sustained an irreparable loss, and

WHEREAS, a great and useful life flowers at its termination, and like a cut flower, should be made the means of carrying its beauty and fragrance far from the scene of its life; therefore, be it

Resolved, That while bowing reverently before the decree which has called him to his rest, has gathered him as a ripe sheaf of wheat, we deplore his absence from our midst, where even his name was as a tower of strength and his willing assistance in all our efforts for the advancement of Horticulture, both in its scientific and practical aspect, was always so freely bestowed.

Resolved, That the Horticultural Society of Pennsylvania, makes this public note of its mourning for its great and good president, not only because it recognizes that it will be impossible to supply his place, but because his gentle encouragement, his faithful assistance, and his unobtrusive advice were to us (as to so many other institutions of varied purposes) a strong bond of union, and a guarantee of success.

Resolved, That none but those privileged to know him well, can speak of the many good deeds by which, unknown to the public, he adorned the noble and useful life thus brought unexpectedly to a close, when we had hoped he would have been long spared to enjoy the fruits of his exertions and see the good results of his labors for others.

Resolved, That we tender our respectful sympathy to his family and relatives, to whom a copy of these resolutions shall be sent.

The funeral services were held in St. James church at 1 o'clock, Feb. 6. Messrs. G. C. Watson, John Westcott, Thomas Cartledge, H. H. Battles and Edwin Lonsdale attended, representing the Florists' Club, and Messrs. Dr. Reed, Dr. Morris, John Burton, D. D. L. Farson and Robert Kift for the Horticultural Society.

The chancel of the church was entirely filled with floral emblems. There has not been such a display at a public funeral in this city for a long time, if at all. Quite a number of the designs were from New York and other cities, and the flowers used were the very best, the designs for the most part being composed of valley, roses, orchids and violets. There were several large wreaths composed almost entirely of cattleyas, one over four feet in diameter, and a number of others of lilies of the valley and cattleyas. The wreath seemed to be the popular design as at least one-third of the pieces were wreaths. There were a number of these composed of roses and valley, others of these with clusters of violets and again clusters of lilies and roses. Several beautiful wreaths were made almost entirely of galax leaves with large knot of violets and tied with ribbon. Ribbon was also used on a number of the designs. There were quite a few designs of clusters of palm leaves tied and arranged with flowers in various ways, some with all violets and others with roses and valley and some all orchids, cypripediums or cattleyas. There was one large mound of lilies of the valley on which lay a wreath of laurel.

The Pennsylvania Horticultural Society sent a handsome pair of palm leaves and the Florists' Club a cross and crown on an ivy panel with a spray of acacia. There was but one pillow and but few set pieces, one being a standing cross and crown of red carnations and white flowers, and a piece having an arch over a book with the inscription, "Public Ledger." For the most part the work showed great care, both in selection of flowers and in their arrangement, and

gave evidence that public taste in selection of designs is tending towards the more simple and graceful arrangements.

After the services the flowers, instead of being sent to the cemetery, were distributed to the different hospitals of the city.

The dinner of the Florists' Club given to the executive committee of the S. A. F. will be held on Wednesday evening, Feb. 14, and an invitation is hereby extended to the members of the various florists' clubs to be present on this occasion. The committee having the matter in hand are working hard, and it is hoped that a large delegation from the different clubs will be present. K.

#### New York.

The improvement noted a week ago in the flower market has continued without interruption and everybody is happy in consequence. Trade has been better than last year at the same time, and prices on some flowers hold up equal to those of former seasons. This is not true of American Beauties though for while there is a good demand for all that come in yet high prices cannot be obtained. The shortness in the supply of roses helps the sale of everything else and with the exception of smilax, Harrisii lilies and the deserted red tulip the stock in the hands of the wholesalers is well cleaned out everyday. All are on the anxious seat as to the effect of Lent, which comes in this week. It has been remarked that Lent does not of late years have its former influence on the flower trade and it is to be hoped that this will prove to be true in the present instance.

Some very good roses are coming in to Millang Bros. from the John Henderson Co., although in common with most rose growing establishments they are somewhat off erop at present. The big place at Flushing has been greatly improved during the past year by the erection of new houses in the place of old ones and still further renewals are contemplated for the coming season. It is worthy of comment that Gontier, which at one time was the rose par excellence at this establishment, is no longer successful and has had to be dropped from the list. Watteville too does poorly, but La France, Mermet, Bride and Perle are fine. Mr. Hillman is justified in feeling elated at the success he is meeting with in these varieties, for it would be hard to find in the vicinity of New York any Mermet or Bride houses in better condition than those of the John Henderson Co. at present.

If a prize were offered for neatness and cleanliness Mr. H. C. Rath's carnation house at Flushing would stand a good chance of winning it. This house is 223 feet long and is filled with McGowan, Daybreak, Mrs. Fisher and Portia. These all, Daybreak especially, are in the pink of condition and well they may, for each plant is cared for as if it was the only plant on the place, and judging from appearances this policy pays. Mr. Rath has a sport from Daybreak which he thinks favorably of. It is splashed with a darker shade of pink and the form of the bloom is much like that of McGowan.

Among the recent additions to Flushing's carnation-growing industry is the establishment of F. Darlington, which consists of three houses of healthy looking carnations. The standard red here is Thomas Cartledge. As grown here this variety appears to have every requisite of a first-class red carnation. Mr. Darlington has some promising one-year-

old seedlings among which are two or three good whites.

When College Point is mentioned one involuntarily thinks of A. Schultheis. This is natural, for Schultheis is very much in evidence over there, excepting the time between 5:30 and 8:00 a. m. during which period he is one of the leading lights of the 34th street market. The College Point establishment is a very thrifty place. No space in the houses is allowed to lie unoccupied. Every corner is utilized for something and if there is money in growing anything Mr. Schultheis will come pretty near finding it out. It is a good place to visit, provided you can pass the dogs. Once inside, Mr. Schultheis will show you round and tell you all about it as you go. There are roses and carnations in variety, lily of the valley, tulips and daffodils in great quantity, and cyclamens that are now a glorious sight. A shaded house 225 feet long is filled with lily of the valley in all stages of growth.

Cusins and Perles do finely here. The latter are full of buds and fat wine-red stems. Kaiserin Augusta Victoria seems to grow here all right in midwinter, notwithstanding the opposite has been the experience of some growers. Testout, on the contrary, is standing still at present. This, however, Mr. Schultheis thinks may be owing to insufficient heat. Later on there will be a big show of Baroness Rothschild and other hybrids in pots for the market.

Schiller & Co. is the style of a new firm that has opened a florist store at 122 E. 23d street. The senior member is Mr. Ludwig Schiller who had charge of Germany's horticultural display at the World's Fair.

#### Boston.

The subject for consideration at the meeting of Massachusetts Horticultural Society on Saturday February 3, was, "Electricity: The Latest Discoveries as applied to Horticulture," an exhaustive lecture on this subject being presented by Prof. L. H. Bailey, of Cornell University. Prof. Bailey gave an interesting account of the experiments which have been going on under his direction during the past four or five years, and the results attained from the application of electric illumination to growing plants and the direct application of electricity to the soil, the plant and the air, the general result of the investigation however, lacking as yet that completeness from which definite conclusions might be drawn as to the value commercially of this agent.

This was prize day for cut orchids, violets, carnations and camellias, in all of which classes there were good displays. From Mrs. F. L. Ames and J. L. Gardner came grand collections of orchid blooms. The display from Mrs. Ames was especially rich in rare and new varieties, conspicuous among them being a fine spike of the noble Miltoniopsis Bleui splendens. Lælia anceps was seen in many novel forms, and there were lycastes, cattleyas, cypripediums, odontoglossums, masdevallias, etc. in great profusion.

Camellias were shown in variety by F. B. Hayes and J. L. Gardner, and violets by N. T. Kidder and R. and J. Farquhar & Co. The latter showed a violet which they have named "Farquhar" and which can best be described as a large and finely colored form of Marie Louise. A set of cyclamens in 6-inch pots, thirteen months from seed, were staged by N. T. Kidder, and were very handsome plants. Carnations were quite extensively shown by

Wm. Nicholson, R. T. Lombard, L. H. Foster, H. K. Southworth and A. H. Fewkes. First prize for collection was awarded to Mr. Nicholson and second to Mr. Lombard. The two new varieties Ada Byron and Nicholson attracted much attention. In L. H. Foster's collection was a very fine white which Mr. Foster believes to be Storm King and which came to him supposedly by mistake among a lot of other varieties which he bought. There was also a fine vase of Helen Keller which came from Edwin Lonsdale.

The meeting of the society was very largely attended, the lower hall being well filled. A vote was passed tendering the use of one of the halls to the American Carnation Society for their meeting next year, should they see fit to select Boston as their next meeting place. The subject for next Saturday will be "The Construction of Plant Houses," on which an essay will be delivered by Mr. W. A. Burnham of the Lord & Burnham Co., Irvington, New York.

Cut flower trade continues fair. Transient trade is poor and flowers are purchased in smaller amounts than has been customary, but there has been the usual number of dinners, receptions and occasions of like nature which have kept the retail florists busy, and as the cut is not very heavy in any line at present the stock coming in has been distributed without difficulty.

#### Chicago.

Last week was really encouraging to the trade; though flowers were scarce—or perhaps because flowers were scarce—trade was excellent, and stock went at good prices. For several weeks really first-class stock has been short, especially the best roses, and this has kept prices firm. The shortage must have been general, as the commission men report an excellent shipping trade, not only to western points, but to places in Ohio, Michigan, Pennsylvania, and other points east of Chicago. This week prices have dropped a little, but still are better than they were. Last week Brides and similar roses went up to \$8, but they now stand at \$6, the same price prevailing for Woottons and Meteors. The Meteors are not so good as they were, being very black, and often with crumpled petals. Perle, Niphetos and Gontier have climbed a little, now being \$3 to \$4. Beauties keep scarce; at no time this winter has there been a surplus of good blooms; they run from \$10 to \$35. Jacqueminots have dropped to \$2 a dozen; they are fine and well-colored. A limited quantity of pink hybrids have been seen, but they are not yet in regular supply.

Good carnations seem inclined to hold up, ranging from \$1 to \$1.50 for ordinary; fancy \$2, and extra fancies \$3, Daybreak and Scott being the usual varieties, but they are both in short supply. Extra quality Garfield are graded as fancies, but are very short, and not up to the demand. Violets are not very plentiful, and are worth \$1 to \$2; last week the supply could not reach the demand. Northrup is cutting extra fine violets, but many local growers report failure, partial or complete, with these flowers this winter.

Bulb stock is very slow. When there are plenty of roses and carnations bulbs will not sell. Even valley is slow, the best quality going for \$4, and much is sold under this price. The valley that sells first is that which is carefully graded, not firsts, seconds and culls all together.

Dutch hyacinths are the highest priced of the smaller bulb stuff now, bringing \$6 to \$8 for extremely fine quality.

Romans still languish at \$2 to \$3. *Dafodils* do not go as well as they did; they are plentiful at \$3 to \$4, tulips are the same, and go very slow. Yellow tulips seem to go best, but the demand is very capricious. *Harrisii* has stiffened a little, going from \$5 to \$12.50. W. N. Rudd is sending in very fine *Harrisii*. *Callas* do not sell well.

Among miscellaneous flowers nice *mignonette* sells for \$2 to \$4; *forget-me-nots* at \$1 to \$2, and *marguerites* at \$1. Greens are stationary. It is likely that business will drop off for a few days after Ash Wednesday, but it is not likely that Lent will make a great difference to the trade.

H. E. Redelings has succeeded *Redelings & Peters* at 804 Milwaukee avenue.

M. Olsen has sold an interest in his wholesale commission business to H. R. Hughes, and the business will hereafter be conducted under the firm name of *Olsen & Hughes*.

#### Washington.

One day recently at noon the thermometer stood 64°, while at the same time one year ago it registered but 23°.

Business is picking up a trifle, but is not up to the standard. No large dinners nor receptions are being given where the florist can get in a good decoration. Teas and luncheons still hold sway. There are several good decorations booked for the latter part of the month. The majority of society people seem to be holding back for the close of the social season for their important dinners and it will then probably be a rush as to who can make the greatest show.

Flowers are more plentiful than they have been since the holidays and the quality is generally good.

Secretary and Mrs. Carlisle recently entertained the President and Mrs. Cleveland at dinner, at which all the members of the cabinet and their ladies were present. The decorations were green and white. Every nook and corner was filled with foliage plants. The mantels were filled with white azaleas and primulas in pots, the pots being hid in a mass of asparagus. The handsome mirror above the mantel was gracefully festooned with asparagus, which hung in small delicate strings over the glass, reaching to the flowers below. The crystal chandelier over the dining table was festooned with the same green. The centerpiece was a large oval basket of ferns studded with *cypripediums* and *Bride roses*. The cloth was strewn with maidenhair fern. The tapers in the low silver candelabras burned under green shades. The name cards were a lily leaf. Corsages and bou-tonnieres were of white roses.

At the second state dinner of the season in honor of the diplomatic corps the table decorations were somewhat different from those usually gotten up for such occasions, as there was no set design for a centerpiece. Instead of the floral globe, which has been used so often, on which the divisions of the continent were represented in various kinds of flowers, there was arranged down the center of the long table, which was in the shape of a large Roman I, a flat of asparagus about 12 feet long and 2 feet wide, which was studded with *Mermet roses* and *Marguerites*. In the center of this flat stood a fine phoenix and near either end was a fine plant of *Dracæna Goldieana*. Across the

ends of the table was one oval and two round baskets of asparagus, studded in the same manner as the center. The wax tapers in the gold and silver candelabras were capped with pink shades, the idea of a pink dinner being further carried out in the confections and bon-bons. There were over 500 fine *Mermets* used in this decoration of the table. The chandeliers were festooned with smilax and every corner in the room was filled with tall rubbers reaching nearly to the ceiling, with a few small palms and *dracænas* grouped about them. The two mantels were banked with *echeveria* flowers studded with valley, having for a center a plant of *Cocos Weddelliana*, and near each end was a variegated pineapple. These mantels were unique indeed; the bright *echeveria* flowers showed up beautifully when the electric lights were turned on. Sprays of valley floated in the finger bowls. The entire dining room presented a beautiful effect, it being entirely different from the usual set decorations used on such occasions. Mr. Pfister has every reason to feel proud of the success in this change. I heard Mrs. Cleveland express herself as being delighted with it.

In the east room, where the guests were received, the decorations were similar to the last. The west mirror rests were banked with *Adiantum Farleyense* and high colored *crotons*, *Dracæna Goldieana* and *Pandanus Veitchii*. The two east mantels were banked with carnations, roses and Romans. The center divan was crowned by a fine specimen of sago palm.

The red room was decorated with foliage plants in windows and corners, mostly rubbers and palms, with a few ferns to add grace. The mantel was banked with white double hyacinths and *Pandanus Veitchii*.

The blue room was prettily decorated with various foliage plants in windows and on mirror rests. The mantel was banked with double white azaleas and primroses in pots, red tulips and hyacinths. The beautiful divan was surmounted by a fine plant of *nepenthes* having a number of pitchers hanging over the handsome *jardiniere*.

The green room was decorated with foliage plants, the mantel being banked with primulas and tulips intermingled with foliage plants. No electric lights were used in this decoration.

C. LESLIE REYNOLDS.

#### St. Louis.

Since last report we have had a week of steady cold weather which has had the effect of keeping stock scarce, especially as many growers are off crop. The chances are that the first part of Lent will see stock present in much greater abundance, and the recent cold wave that swept through the south is looked upon to relieve the market as its effect is already felt in the shipping trade. It has most effectually cut off the violet supply for the time being as there has been but one shipment received that amounts to anything during the week.

The retail men are cleaned out early in the day and it makes the growers and wholesalers kind of blue to be unable to fill their wants, more especially so when they remember that not so very long ago they could not give them flowers, and with the prospect of the same state of affairs existing in the not very distant future.

At a ball given recently the Ayers Floral Co. furnished a very pretty and extensive smilax decoration. The upper

and lower ends of the hall were banked with palms, which formed screens behind which were placed a brass and string band which alternated. Along the walls were hung palms in pot guards which were decorated and suspended by American Beauty ribbon. From the central chandelier streamers of smilax were carried on all sides to the balcony in two tiers, the lower connecting underneath and the upper with the railing. The front of the balcony was also dressed with smilax from the railing to the bottom. The remaining four chandeliers were covered with smilax. Among the streamers leading from the central chandelier were placed numerous fairy lamps, which greatly added to the charming effect. The two lower corners were separated from the hall by curtains of smilax forming secluded nooks. The decoration as a whole was very pretty and was well carried out.

Mr. John Young, who has been slightly under the weather, is feeling much better and will be able to hold up his end of bowling from now on.

Mr. Atkinson, representing Pitcher & Manda, was in town during the week, and reports finding buyers very conservative.

The date set for a hearing of the suit of Mr. Jablonsky against the Haydock estate was reached last week, and a continuance, asked by Mr. Jablonsky owing to the absence of witnesses, was granted.

R. F. T.

#### Toronto.

The annual dinner of the Gardeners' and Florists' Association, which took place on Wednesday last, was—as one of the daily papers remarked the next day—a huge success. The attendance was not quite so large and the decorations were not so profuse as of yore, the former owing probably to hard times and the latter to the scarcity of roses at the time; what was lacking, however, in these was fully made up by an increase in the fun, good humor and general jollification. The comic songs sung by Mr. F. Wright and Mr. H. Endean were, outside the speeches, the feature of the evening. Messrs. C. J. Tidy, G. Manton, H. Cole, W. Muston, H. Simmers, A. McNaughton and others also contributed to the evening's enjoyment by singing songs sentimental and otherwise.

The president, Mr. A. Gilchrist, made an exemplary chairman and was entirely successful in carrying out the program without a hitch. Aldermen did not materialize to as large an extent as usual, Ald. Hallam and ex-Ald. Saunders being the only ones to represent the city corporation. John Chambers, although he has not yet fully recovered from his last serious illness, was there and ably represented the city parks and gardens. Mr. Geo. Vair and Mr. W. Muston responded to the toast of "Sister Societies," the latter on behalf of the American Carnation Society. To "Our Association" Messrs. John Chambers and Thos. Manton responded. I should have liked to have given the latter's speech in full, but unfortunately the management omitted to engage a stenographer. "Our profession" was done justice to by Mr. S. E. Briggs and Mr. Geo. Reeves. The president and treasurer (Mr. H. Simmers) modestly responded for "Our Officers." "The Ladies" were attended to by Messrs. H. Simmers and F. Burfitt. "Auld Lang Syne" and "God Save the Queen" finished up the most enjoyable evening the association has ever had.

There is no change worth recording in the state of trade. The weather still keeps comparatively mild, with the average of sunshine below par. The mean temperature for the month of January was 28° and a fraction.

Baltimore.

Trade has been fluctuating in character this week, one day nothing to be had for love or money, the next everybody glutted. Lilac blooms have appeared in small quantity. Violets are becoming more plentiful and can be had in good quality at fifty cents a hundred. Jonquils are in pretty good supply at three cents. Good roses can only be had in limited quantity and prices continue very fair, La France 8 cents, Perles 6.

The club has gotten up a schedule for the next chrysanthemum show, and a very satisfactory one for everybody to judge from the few expressions of dissatisfaction. Any one sending a worthy exhibit in any class will be entitled to a certificate setting forth the merit of the entry. The first section of the carnation entries is to be free to all. Except that some premiums are made larger and a few altered the rest of the list is much the same as last year.

Fire damaged Mr. Jno. Donn's establishment on Erdman avenue, to the extent of \$800.

Mr. Robt. J. Halliday is reported to be steadily improving.

St. Paul, Minn.

Trade is unmistakably dull this month. The city is dead socially this winter and with Lent almost upon us, florists will have to depend on "funeral work" more than ever until after Easter. Notwithstanding the dull trade, however, there does not appear to be a surplus in the market. This is accounted for by the unfavorable weather of the past few weeks and the fact that most roses are now "off crop." Prices are quite firm and if trade is light there is satisfaction in knowing that everything sells at a profit.

Chris Hansen has closed the store he recently opened on Robert street.

Alderman Warren has opened up a second store on Third street. A fire in the new establishment did some damage recently. We believe, however that it was not very serious. Just at present he is in the south with his family.

Stock about town is looking fairly well and seems to be coming on well for an early Easter trade. Narisii and azaleas are well along while an abundance of tulips, Von Sions and other bulbous stock will be brought in later on.

A recent visit to May & Co's. extensive establishment found every department very busy. This firm does a very large wholesale and retail plant and seed business, besides a large cut flower trade and a retail nursery business. At present they are mailing their annual catalogue.

FELIX.

#### SITUATIONS, WANTS, FOR SALE

Advertisements under this head will be inserted at the rate of 10 cents a line (seven words) each insertion. Cash must accompany order. Plant ads. not admitted under this head.

**SITUATION WANTED**—By a first-class florist to take charge of roses and chrysanthemums. Address R. S., care American Florist, Chicago.

**SITUATION WANTED**—In private place, as gardener by man of experience; married and small family. Good references. THOMP, care Am. Florist.

**SITUATION WANTED**—By first-class florist, to take charge. Thoroughly experienced in all branches. At references. FLORIST, box 55, Kalamazoo, Mich.

**SITUATION WANTED**—By first-class florist, 18 years' experience; single. Best of references. Private or commercial place. Address F. O., care American Florist.

**SITUATION WANTED**—By young man of 16 as an assistant; have worked 2 years in Orphans Home greenhouses. Address FLORIST, O. S. and S. O. Home, Xenia, Ohio.

**SITUATION WANTED**—Florist, age 21; best of references; wishes position, either private or commercial place. Please state wages. Address F. W., 47 Linden St., Brooklyn, N. Y.

**SITUATION WANTED**—By a young Holland gardener. Best references can be given from Haage & Schmidt, Germany. One year in this country. Address B. G., care American Florist, Chicago.

**SITUATION WANTED**—As florist or propagator in growing roses, carnations, palms, orchids and general stock; 15 years experience, single; commercial or private place. Address P. O., care Am. Florist.

**SITUATION WANTED**—By first-class designer a situation where artistic work is appreciated. Fast worker; steady and sober. Moderate salary but steady place expected. Address Y. Z., care Am. Florist.

**SITUATION WANTED**—By first-class florist; grower of roses, palms and general stock; also good propagator; 16 years' experience; 31 years of age; single; German. Good references. Address R. M., care American Florist, Chicago.

**SITUATION WANTED**—By a married man as head-gardener on private place; understands rose, grape and plant growing, and management of a gentleman's place. Good references. Address GARDENER, Fishkill-on-Hudson, N. Y.

**SITUATION WANTED**—By a young man who has had 5 years' experience in general stock growing and greenhouse work. Has also had experience in mailing department. Can furnish good references. Address O. C. H., box 55, Calla, Ohio.

**SITUATION WANTED**—As manager, foreman or head-gardener in commercial or private place; a thoroughly experienced florist, fruit and vegetable grower; married, no children. East preferred. Good references. Address E. C., care Am. Florist.

JOHN G. ESLER, Sec'y F. H. A., Saddle River, N. J.

## THE GREAT ANTIPEST.

For particulars, see next week.

R. W. CARMAN, GEN'L AGT., 231 Amity Street, FLUSHING, Queens Co., N. Y.

Providence, R. I.

The annual meeting of the R. I. Horticultural Society was held January 17. The various reports showed the society to be in a healthful and prosperous condition. Although the year has been a disastrous one to business generally and money apparently scarce among the people, this society has continued its work as usual and the financial results are satisfactory, the society being in good financial condition.

Outside of exhibitions, of which four have been held, the society holds monthly meetings at which papers are read on subjects of interest in the work in which we are engaged. Our chrysanthemum exhibition was a great success in point of exhibits and attendance, an account of which appeared in your valuable journal at the time.

The officers elected for the ensuing year are as follows: President, Joseph H. Fanning; 1st vice-president, Levi W. Russell; 2nd vice-president, Thomas K. Parker; secretary and treasurer, Charles W. Smith; botanist, Prof. W. Whitman Bailey; librarian, Thomas K. Parker; auditors—C. C. Armstrong, Wm. J. Danielson, E. A. Dean; finance committee—Joseph C. Johnson, C. C. Godfrey, John G. Massie.

Mr. John G. Massie, who has served the society for two years as its president, declined a re-election on account of pressing business matters outside. Mr. Massie is treasurer of one of our largest savings banks and as a consequence he is a very busy man. Mr. Fanning, the president, is a successful jewelry manufacturer and has served the society before in a similar capacity.

After adjournment the members were invited to an oyster supper, which was greatly enjoyed.

Under the management of its new president the society looks forward to a new era in its life and to a successful year of business and usefulness. C. W. SMITH.

GRAND HAVEN, MICH.—Mrs. Geo. Hancock died last week. She was a great lover of flowers and spent much of her time in her earlier years in their cultivation. This admiration for flowers led practically, later on, to the founding of the business now carried on by the firm of Geo. Hancock & Son.

CINCINNATI.—Business has been better for the last few weeks and is still improving. Stock is also better.

### CONTRACT NOW for FORCING ROSES

for your next season's planting and secure well rooted stock grown specially for your order. Last year, owing to the heavy demands made upon us at planting time, we were unable to fill many orders, thus disappointing our customers. We are now contracting to grow, for delivery when wanted, the leading varieties of forcing roses—including the new kinds, BRIDESMAID, the best pluk grown; KAISERIN and TE-TOUT; also Meteors, Beauties, Woottons, Brides, La France, etc., etc.

We earnestly request intending purchasers to submit us a list of their wants, and we will be pleased to quote them special prices for strong, well rooted plants to be delivered when they may designate.

We make a specialty of Growing Roses for the trade. Having experienced and competent growers. Our stock is first-class in every particular and we guarantee satisfaction. Of the many hundred unsolicited testimonials we append the following: "Roses got of you last year have been the best bearers we have in our houses. RIVERSIDE FLOREAL CO., Marshalltown, Iowa."

Order Early and secure the Best.

**L. L. MAY & CO.,**

Florists and Seedsmen, ST. PAUL, MINN.

# YOUNG ROSE PLANTS

We offer the following very choice plants in 2-inch pots :

|                         | Per 100       |                    | Per 100       |
|-------------------------|---------------|--------------------|---------------|
| <b>Am. Beauties,</b>    | <b>\$7 00</b> | <b>Mermets,</b>    | <b>\$3 50</b> |
| <b>Bridesmaids,</b>     | <b>5 00</b>   | <b>Perles,</b>     | <b>3 50</b>   |
| <b>Kaiserin,</b>        | <b>4 00</b>   | <b>Woottons,</b>   | <b>3 50</b>   |
| <b>La France,</b>       | <b>3 50</b>   | <b>Mme. Hoste,</b> | <b>3 50</b>   |
| <b>D'ch. of Albany,</b> | <b>3 50</b>   | <b>Bennetts,</b>   | <b>3 50</b>   |
| <b>Brides,</b>          | <b>3 50</b>   |                    |               |

The above stock is very strong and healthy, and propagated from selected wood. We raised the above to grow for ourselves, and it will give better satisfaction than stock which has been raised simply to sell.

## Our New Directory.

In spite of all our efforts to get the book out on time this year, and our early start on the work of covering the country by correspondence, etc., we shall be unable to have complete books before March 1. We have been obliged to send third inquiries to about 10% of the list and in some cases a fourth request to secure needed information or to verify doubtful names. Parts of the book that were already complete are now being put into type and the work is being crowded in every way possible. Never before has so much labor and expense been lavished upon the compilation of a list of these trades, and it will certainly be a credit to the profession. The price will be \$2 00 a copy. Let us book your order now. You can't afford to be without this book.

## Catalogues Received.

John N. May, Summit, N. J., roses, carnations and chrysanthemums; Currie Bros., Milwaukee, Wis., seeds and plants; Cox Seed and Plant Co., San Francisco, seeds and plants; Wm. H. Spooner, Jamaica Plain, Mass., roses; Theo. Koss, Milwaukee, Wis., seeds; J. L. Dillon, Bloomsburg, Pa., verbenas, carnations, roses, etc.; Youngers & Co., Geneva, Neb., nursery stock; Muncie Floral Co., Muncie, Ind., plants; Memphis Floral Co., Memphis, Tenn., plants; Nathan Smith & Son, Adrian, Mich., chrysanthemums and carnations; W. W. Wilmore, Denver, Col., dahlias; Andorra Nurseries, Chestnut Hill, Philadelphia, Pa., hardy trees, shrubs and plants; Panther Creek Nursery, Fresno, Cal., nursery stock and plants; C. Hennecke Co., Milwaukee, Wis., flower pots, jardinieres, etc.; E. H. Hunt, Chicago, seeds; Wm. Baylor Hartland, Cork, Ireland, seeds and bulbs; J. Roscoe Fuller & Co., Floral Park, N. Y., seeds, bulbs and plants; Vick & Hill, Rochester, N. Y., trade list plants.

AMONG THE SPRING catalogues received one of the daintiest covers noted is that of J. M. McCullough's Sons. It is a very simple and natural arrangement of cosmos, pink and white, as soft in its tints as a water-color, and a welcome change from the glaring color and crowded arrangement so often seen. We are informed that this excellent bit of work was designed by one of their employees.

LET US book your order now for a copy of our new trade directory and reference book to be issued next month. Price \$2.

PLEASE mention the AMERICAN FLORIST every time you write to an advertiser in these columns.

## The Seed Trade.

## AM. SEED TRADE ASSOCIATION.

W. ATLEE BURPEE, Philadelphia, president; A. L. DON, secretary and treasurer, 111 Chambers street, New York. Next annual meeting second Tuesday in June, (will probably be held in Toronto.)

GEO. C. THOMSON has withdrawn from the firm of Mathieson—Thomson Seed Co., of Chicago and Robert Mathieson continues the business alone.

THE EXECUTIVE COMMITTEE of the American Seed Trade Association held their annual meeting at the Cosmopolitan Hotel, New York, on Tuesday, February 6. There were present, President W. Atlee Burpee, Secretary A. L. Don, Wm. Meggatt, S. F. Willard, Robert Livingston, E. B. Clark and I. B. Clark. The Wilson bill and its relations to the seed trade was one of the matters discussed. It was voted that while favoring the retention of the present rate of twenty per cent ad valorem as preferable to an abolition of all duties they would advocate as the sense of the association a specific duty of a higher rate rather than an ad valorem duty as calculated to encourage the importation of the better grades of seeds. This resolution will be presented to the general meeting of seed growers and seed merchants which is called to meet at Philadelphia on February 13. The next meeting of the Seed Trade Association will be held at Toronto on the second Tuesday in June.

## Duty on Beans and Peas.

Inquiries have been made as to whether the duty of 20% on beans should not be 20 cents per bushel, same as peas.

The paragraphs in the Wilson bill covering the point are as follows: "196. Beans, twenty per centum ad valorem. 202. Peas, dried, 20 cents per bushel."

W.

## British Imports.

The British Board of Trade returns give the value of imports of grass and clover seed into that country in 1893 at nearly 4 million dollars, the exact figures being \$790,061, an increase of over 3/4 of a million dollars over the imports of 1892.

The 1893 crops of grass seeds were again very short in Great Britain and the large figures noted above will doubtless rise still higher this season. Exporters on this side report a very brisk demand from Europe since the season opened.

W.

## Tariff on Seeds.

A meeting of seed growers and seed merchants will be held on Tuesday, February 13, at 11 a. m., Room No. 42, Girard House, Philadelphia.

1st. To adopt resolutions of protest against the placing of garden seeds upon the free list, as proposed under the provisions of the Wilson bill.

2d. To appoint a committee to present the resolutions to congress and ask for a hearing.

crets of Success in Old and New ONION CULTURE.

## If You Garden for Profit

you can save money and should buy at Wholesale  
Prices, as quoted in BURPEE'S BLUE LIST  
for 1894. It is mailed FREE to Market Gardeners every-  
where, who, while entitled to the lowest prices possible,  
should always be sure to get Only the Best Seeds That  
Grow! BURPEE'S SEEDS ARE WARRANTED.—  
few equal, none better—and are annually sold direct to many more  
planters than are the seeds of any other growers.

W. Atlee Burpee & Co., Seed Growers, Philadelphia, Pa.

If you have not already seen BURPEE'S FARM ANNUAL for 1894, write for it TO-DAY. A  
handsome book of 172 pages, it is pronounced by papers everywhere *The Leading American Seed Catalogue*.  
It tells all about the Choicest Vegetables and Most Beautiful Flowers for THE HOME GARDEN.

DOUBLE BEGONIA SEED.  
HOW IS IT GROWN?

Good double begonia seed is difficult to produce, a  
proper double having no pollen. If single pollen is  
used a lot of worthless seedlings results. Most double  
begonia seed is therefore grown from semi double vari-  
eties, but these cannot give a good percentage of gene-  
rally CONSTANT doubles. The correct way is to a ti-  
dily force the best named double varieties to produce  
a LITTLE pollen, and therefrom set the seed. This  
being slow, uncertain and painstaking work, the few  
grains so produced are rarely sold, being really more  
valuable than gold. Such seed produces 85 to 95 per  
cent. of good doubles.

OUR begonia seed is grown by the last method and  
is the result of a summer's work of a most skillful  
hybridist. Most of the seedlings will bloom double,  
from the first flower to the last in November. They  
will come in all the delicate shades of white, cream,  
canary, lemon, salmon, salmon-orange, rosy-salmon,  
pink and rose. It contains a good percentage of basket  
varieties, trailing begonias, and Chrysanthemums.  
Price per trade packet, \$1.00. Stock limited. Single  
seed, 25 cents.

DOUBLE begonias are excellent for floral work,  
especially for funeral designs, being pure, delicate,  
beautiful and very durable.

BEGONIA BULBS.—We supply florists with  
small unflowered seedling bulbs from the best of seed.  
Having discovered easy and rapid methods of hard-  
ening, we can sell at a low price. They are twice trans-  
planted, one season old, and make good stock for  
bedding, pot plants or summer decoration of green  
houses. Price per hundred, \$2.00; per thousand, \$15.00.  
post paid.

BEGONIA PLANTS.—These are the above  
bulbs started. They are ready through May and June  
when greenhouses are cleared of other plants. Florists  
will welcome these for raising their own bulbs, for  
brightening the greenhouses and frames during sum-  
mer and for their incessant supply of valuable cut-  
flowers. Price same as bulbs. We book orders now.

INFORMATION.—Florists who are not success-  
ful with Tuberous Begonias should write us their  
difficulties and we will give the best instruction free  
of charge.

We devote most of our glass and time to Tu-  
berous Begonias. Having one of the finest collections  
of named varieties extant. We can turn out a su-  
perior article.

## Mass. Hort. Society.

Following is the list of speakers and essays arranged for the weekly meetings for the remainder of the season:

February 10.—The Construction of Plant Houses. By W. A. Burnham, of The Lord & Burnham Co., Irvington-on Hudson, N. Y.

February 17.—Mushrooms. By William Falconer, Editor of *Gardening*, Glen Cove, N. Y.

February 24.—Cinerarias and Calceolarias. By Kenneth Finlayson, Brookline.

March 3.—Some Insects Injurious to Vegetation. By John G. Jack, Arnold Arboretum, Jamaica Plain.

March 10.—Metropolitan Parks. By Sylvester Baxter, Ex-Secretary of the Metropolitan Park Commission, Malden.

March 17.—Growing Seeds for the Market. By Hon. James J. H. Gregory, Marblehead.

March 24.—Vegetables Under Glass. By William D. Philbrick, Newton Center.

March 31.—Horticulture at the World's Columbian Exposition. By William J. Stewart, Winchester.

## Insect on Cyclamen.

Replying to subscriber the insect you send is a species of aphid and the best remedy is the application of kerosene emulsion, the formula of which is as follows: Soft soap one quart, or hard soap one quarter of a pound, preferably whale oil soap; two quarts of hot water, one pint of kerosene; stir until all are permanently mixed; add water until the kerosene forms one-fifteenth of the whole compound; mix and apply it with a hand syringe.

## Flowers for Dinner.

He—"You say there are no flowers for the dinner table. Where are the chrysanthemums I sent home?"

She—"Oh, George, don't speak so loud; you might hurt Bridget's feelings. She didn't understand what they were, and has cooked them in milk."—*Life*.

## The Best Carnation in the Market.

## THE ADELAIDE KRESKEN

Which was originated in 1891, and flowered in the same year, is conceded by all to be the prettiest Carnation ever grown. Strong grower, free from rust, 12 ft. high, stiff stem, good calyx, and the flower (of a beautiful rosy pink color) averaging three inches and over.

**A VERY FREE BLOOMER.** In addition to recovering the Best Seedling Prizes at Cincinnati, O., Club Certificate at Springfield, Mass., and Milwaukee, Wis., Hunt Prizes, Indianapolis, Ind., it has received Certificates of Merit at the American Florists' Society, St. Louis, Mo.; also the best vase of pinks at St. Louis, Mo., and Certificate of Merit at Toronto. The undersigned begs leave to submit the following exceedingly low prices for Rooted Cuttings, which will be ready March 1st, 1894: \$2.00 per doz.; \$10 per 100; \$45 per 500; \$80 per 1000.

Cash must accompany all orders. Address all communications to

## CARNATIONS AND VERBENAS. ROOTED CUTTINGS.

We have a large stock of Daybreak, Puritan, Edna Craig, Aurora, McGowan, Nellie Lewis, and other leading varieties. Also immense stock of Mammoth Verbenas. Send for prices on what you want. Catalogue ready about January 15th. Send for it.

VICK & HILL, Rochester, N. Y.

## CARNATIONS.

My list is not a big list but it is a mighty good list, and the cuttings are equally good. I would like to quote figures to you on any of the following varieties. In writing please state how many you will want of each variety. Daybreak, Lizzie McGowan, Silver Spray, Grace Darling, Aurora, Portia, Edna Craig, Fred Dorner, J. R. Freeman, Golden Triumph.

### Annie Pixley and Helen Keller.

PIXLEY is one of those beautiful light pinks, with a fair sized flower and good, strong calyx. With ordinary culture stems can be cut twenty inches long. The flower is a model in form, and the growth is strong and healthy.

KELLER you know all about, they are both sure to make good paying varieties for cut flowers.

Pixley per 100, \$12.00; per 1000, \$100.00.  
Keller per 100, \$12.00; per 1000, \$90.00.

L. B. 496.

ALBERT M. HERR, LANCASTER, PA.

### Verbena Lancaster Beauty.

Decidedly the prettiest Verbena that grows, novel as well as beautiful and sells at sight.

Price, per 100, \$2.00.

PANSIES.—I can still supply a few of those seedling plants at \$5.00 per 1000, or 75 cts. per 100. The same good strain I always have.

No list published and terms are cash before shipping or C. O. D.

## IN BLOOM The new and beautiful "HELEN KELLER" Fancy Carnation

We extend a cordial invitation to Carnation growers to come and see it growing and blooming. This grand new variety must be seen to be appreciated. It is undoubtedly the

### ••GREATEST NEW CARNATION UP TO DATE!••

It is healthy and productive. In form, size and elegance, nothing can approach it. Two houses filled with this sterling novelty are worth going many miles to see—one at Summit; one at Chestnut Hill.

### COME AND SEE IT GROWING.

Orders booked now and filled strictly in rotation, commencing March 15, '94. Strong Rooted Cuttings, \$3.00 per Dozen; \$12.00 per Hundred; \$90.00 per Thousand.

EDWIN LONSDALE,  
CHESTNUT HILL, PHILA.

JOHN N. MAY,  
SUMMIT, N. J.

## "Washington, — New York" AND BOUTON D'OR.

January, 25, 1894.

MESSRS. DAILEDLOUZE BROS., *Gentlemen*:—We wish to compliment you on the qualities of your new yellow carnation Bouton d'Or. It is the best yellow carnation we have ever handled; being a splendid keeper, sells on sight, and will always be in demand.

[signed]

Yours truly, J. H. SMALL & SONS.

PRICE, \$2 per Doz.; \$10 per 100; \$75 per 1000. ROOTED CUTTINGS READY MARCH 1, 1894. Orders filled in strict rotation. Come and see it grow and be convinced. Only one hour from New York City.

Dailedouze Bros., Flatbush, L. I., N. Y.

## Daybreak Carnation

A visit from several prominent florists of the State, has convinced me that I have the healthiest stock of the above beautiful carnation in this State. Before leaving my establishment they left orders for Daybreak at \$2.50 per 100, and \$20.00 per 1000. I shall have, about Feb. 5th, 50,000 well Rooted Cuttings at the following prices:

\$2.50 per 100; \$20.00 per 1000.

Terms strictly cash. My customers will please take notice that I cannot accept personal checks. Satisfaction guaranteed.

### The Single Pipe System.

I notice with pleasure the interest manifested by the St. Louis Florists' Club in the discussion of the single pipe system of steam heating for greenhouses, a short description of which was given in the St. Louis news-letter of January 11.

This system is destined to be the future mode of greenhouse piping because of its simplicity, the advantage for regulating temperature by changing one pipe at a time, and its particular adaptability to low pressure steam, the only truly economical steam. The system is not new. There is nothing new under the sun. It is only new in its application to greenhouse heating.

The St. Louis club was of the opinion that steam could not be carried great distances with this system, or in other words the system was only practical on small places. The originator states that there is no reasonable limit. Mr. Franks, of Champaign, Ill., states (AM. FLORIST January 25), that he is heating coils 240 feet long successfully with this system. This is an unusual length as houses of that length are generally heated from the center. This seems to displace the fear as to distance.

A description of the plan of piping may be of interest: Start out from the boiler with a main about one-third or more larger than would be used for the circuit system and cross your houses at the desired point, reducing for every house in such proportion that the end of the main will run out into an 1 1/4-inch pipe, giving all the pitch to the main that is possible. Then raise your heating coils from the main to the proper height, that from this point (which is the place for the valve) the coil will have a rise of one inch in ten feet to the farther end. At this (the further) end place an automatic air valve which closes when the steam reaches it. The water or condensed steam returns by the same route to a point near the boiler, where there is a large tap placed on the underside of the main which is connected with the returns of the boiler, and falls from the main through this tap into the returns of the boiler. The system works just as well with 50 pounds as 5 pounds of steam and heats with one-half pound pressure.

To the advocates of hot water this system shall not be totally invaluable. There are in operation at the present time in a large new convent in St. Louis five hot water radiators connected, and fed by a single pipe, the water flowing and returning in the same pipe.

WILLIAM L. HUCKE.  
Belleville, Ill., January 29, 1894.

### Directions for Making a Flower Pot.

Take a large size leaf lard can and give it a good coat of enamel paint. When dry ornament with gold paint and cover with floral designs to suit the taste. Then have your carpenter make you some scalloped moulding to fit around the top. Bore a few holes in the bottom of the can, and you will find that at an expense of about one dollar and the work of two days you have as good a flower pot as you can buy in a store for ten cents.—*Judge.*

Do YOU WANT a list of the leading park superintendents of America? You will find such a list in our trade directory and reference book.

Please mention the AMERICAN FLORIST every time you write to an advertiser.

## VICK'S NEW WHITE BRANCHING ASTER

### THE FLORISTS' FAVORITE.

Has no superior (often sold by Florists for Chrysanthemums). Easily grown from seed. Anticipates the Chrysanthemum by several weeks. Has long stems; flowers pure white, 4 inches or more in diameter; petals broad, long, and many of them more or less twisted and curled. Plant is a strong grower, and has marked tendency to form numerous branches.

Packed in plain small pockets or envelopes ready to place inside your own seed bags or in our regular bags.

## The Florists' Hail Association.

The directors of the Florists' Hail Association have ordered an assessment to be levied on May 1, 1894. This is the fifth assessment ordered since the organization of the association nearly seven years ago. The extraordinary losses during the past year made it necessary to replenish the treasury. New members who join between this date and May 1 are exempt from this levy. JOHN G. ESLE, Sec'y.

## Announcement to Florists.

We desire to announce the dissolution of the firm of Siple Doppf & Co., and to introduce to the trade its successor, The Syracuse Pottery Co., which will be under the management of William Doppf and Conrad Breitschwerth. The business will be conducted as heretofore, except on a larger scale to meet the growing demand for our goods. We have accordingly enlarged our plant and capacity, and with unsurpassed facilities are now prepared to fill the largest order on short notice. Our latest improved machines are turning out the best and most serviceable flower pots in the market, and assuring you of our intention to lead in further improvements we solicit a continuance of your patronage in the belief that we can supply just what is needed at a price and in a manner satisfactory to all.

Send for price list and samples and we know you will give us an order.
